211	G	Emergency	Outpatient	First Aid Room	Syringe Pump	2

No.	Floor	Department	Unit	Room	Description	Q'ty
212	G	Emergency	Outpatient	First Aid Room	Hand Washer	1
213	G	Emergency	Outpatient	First Aid Room	Electrical Surgery Unit	1
214	G	Emergency	Outpatient	First Aid Room	Endoscope System (Probe 1 Set)	1
215	G	Emergency	Outpatient	First Aid Room	Automated Endoscope Reprocessor	1
216	G	Emergency	Outpatient	First Aid Room	Syringe Pump	2
217	G	Emergency	Outpatient	First Aid Room	Ventilator, Respiratory Mode: 4 modes	1

No.	Floor	Department	Unit	Room	Description	Q'ty
218	G	Emergency	Outpatient	First Aid Room	C Arm for Orthopedics	1
219	G	Emergency	Outpatient	Internal Examination Room	Examination Table	1
220	G	Emergency	Outpatient	Internal Examination Room	Examination Table, Gynecology	1
221	G	Emergency	Outpatient	Internal Examination Room	Examination Unit, Gynecology	1
222	G	Emergency	Outpatient	Internal Examination Room	Ultrasound Diagnostic Imaging System, Portable, color, 2 probes	1
223	G	Emergency	Outpatient	Internal Examination Room	Labor Monitor	1
224	G	Emergency	Outpatient	Internal Examination Room	System Microscope	1
225	G	Emergency	Outpatient	Internal Examination Room	Laparoscopy System	1
226	G	Emergency	Outpatient	Internal Examination Room	Ultrasound Washer	1

No.	Floor	Department	Unit	Room	Description	Q'ty
227	G	Emergency	Outpatient	Internal Examination Room	Infusion Pump	1
228	G	Emergency	Outpatient	Internal Examination Room	Syringe Pump	2
229	G	Emergency	Outpatient	Internal Examination Room	Suction Unit	1
230	G	Emergency	Outpatient	Recovery Room	Labor Monitor	1
231	G	Emergency	Outpatient	Storage	Examination Light, mobile	1
232	G	Emergency	Outpatient	Storage	Syringe Pump	2
233	G	Emergency	Outpatient	Storage	Ventilator, Portable	1
234	2	Emergency	Ward	HCU (Including Infection)	Ventilator, Respiratory Mode: 4 modes	20
235	2	Emergency	Ward	HCU (Including Infection)	Patient Monitor for Ward, 5 parameters (ECG, Respiration, SpO2, temperature(2), NIBP)	20

No.	Floor	Department	Unit	Room	Description	Q'ty
236	2	Emergency	Ward	HCU (Including Infection)	Syringe Pump	20
237	2	Emergency	Ward	HCU (Including Infection)	Oximeter	20
238	2	Emergency	Ward	HCU (Including Infection)	Suction Unit	5
239	2	Emergency	Ward	HCU (Including Infection)	Defibrillator	2
240	2	Emergency	Ward	HCU (Including Infection)	X-ray Illuminator	1
242	2	Emergency	Ward	HCU (Including Infection)	ICU Bed	20
243	2	Emergency	Ward	HCU (Including Infection)	Central Monitor for max. 8 persons	3
244	2	Emergency	Ward	HCU (Including Infection)	Ceiling Pendant (Aneathesia)	20
245	2	Emergency	Ward	HCU (Including Infection)	ECG	1

No.	Floor	Department	Unit	Room	Description	Q'ty
246	2	Emergency	Ward	HCU (Including Infection)	Bed Pun Washer	1
247	2	Emergency	Ward	HCU (Including Infection)	Medical Refrigerator	1
248	2	Emergency	Ward	EICU	Ventilator, Intensive Care, (with Oxygen Sensor, Respiratory Mode: 8 modes)	4
249	2	Emergency	Ward	EICU	Patient Monitor for Operation, treatment, 6 parameters (ECG, Respiration, SpO2, temperature(2), NIBP, CO2)	4
250	2	Emergency	Ward	EICU	Central Monitor for max. 8 persons	1
251	2	Emergency	Ward	EICU	Syringe Pump, PCA	8
252	2	Emergency	Ward	EICU	Oximeter	4
253	2	Emergency	Ward	EICU	Suction Unit	1
254	2	Emergency	Ward	EICU	X-ray Illuminator	1
255	2	Emergency	Ward	EICU	Ultrasound Diagnostic Imaging System, Portable, color, 2 probes	1

No.	Floor	Department	Unit	Room	Description	Q'ty
256	2	Emergency	Ward	EICU	ICU Bed	4
257	2	Emergency	Ward	EICU	Shadowless Lamp	4
258	2	Emergency	Ward	EICU	Ceiling Pendant (Aneathesia)	4
259	2	Emergency	Ward	EICU	ECG	1
260	2	Emergency	Ward	EICU	Medical Refrigerator	1
261	2	Emergency	Ward	Patient Preparation room	Patient Monitor for Operation, treatment, 6 parameters (ECG, Respiration, SpO2, temperature(2), NIBP, CO2)	1
262	G	Emergency	Operation	Operation Room, emergency	Shadowless Lamp	1
263	G	Emergency	Operation	Operation Room, emergency	Ceiling Pendant (Aneathesia)	1
264	G	Emergency	Operation	Operation Room, emergency	Syringe Pump	2

No.	Floor	Department	Unit	Room	Description	Q'ty
265	G	Emergency	Operation	Operation Room, emergency	Pulse Oximeter	1
266	G	Emergency	Operation	Operation Room, emergency	Suction Unit	1
267	G	Emergency	Operation	Operation Room, emergency	Electrical Surgery Unit	1
268	G	Emergency	Operation	Operation Room, emergency	Surgical Table, Electrical	1
269	G	Emergency	Operation	Operation Room, emergency	Ventilator, Respiratory Mode: 4 modes	1
270	G	Emergency	Operation	Operation Room, emergency	Patient Monitor for Operation, treatment, 6 parameters (ECG, Respiration, SpO2, temperature(2), NIBP, CO2)	1
271	G	Emergency	Operation	Ante Room	Hand Washer	1
272	G	Health Check-up	Health Check-up	Examination Room	X-ray Illumination	1
273	G	Health Check-up	Health Check-up	Examination Room	Examination Table	1

No.	Floor	Department	Unit	Room	Description	Q'ty
274	G	Health Check-up	Health Check-up	Examination Room	Blood Pressure Pulse Wave Inspection Apparatus	1
275	G	Health Check-up	Health Check-up	Examination Room	Laser Rheometer	1
276	G	Health Check-up	Health Check-up	Examination Room	Refrigerator for Medicine	1
277	G	Health Check-up	Health Check-up	Examination Room	Automated Sphygmomanometer	1
278	G	Health Check-up	Health Check-up	Physiology Test Room	Polysomnography Monitoring System	1
279	G	Health Check-up	Health Check-up	Physiology Test Room	Spirometer	1
280	G	Health Check-up	Health Check-up	Physiology Test Room	ECG	1
281	G	Health Check-up	Health Check-up	Physiology Test Room	Examination Table	1
282	G	Health Check-up	Health Check-up	Physiology Test Room	Ultrasound Diagnostic Imaging System, General, Color, 3probes with Real- time tissue Elastography Unit,	4
283	G	Health Check-up	Health Check-up	Audio Room	Audio Booth	1

No.	Floor	Department	Unit	Room	Description	Q'ty
284	G	Health Check-up	Health Check-up	Eye Test Room	Tonometer	1
285	G	Health Check-up	Health Check-up	Eye Test Room	Automated Perimeter	1
286	G	Health Check-up	Health Check-up	Eye Test Room	Fundas Camera System	1
287	G	Health Check-up	Health Check-up	Eye Test Room	Slit Lamp	1
288	G	Health Check-up	Health Check-up	Eye Test Room	Eye Test Chart	1
289	G	Health Check-up	Health Check-up	X-Ray Room 1	X-ray, Chest	1
290	G	Health Check-up	Health Check-up	X-Ray Room 1	X-ray, General	1
291	G	Health Check-up	Health Check-up	X-Ray Room 2	X-TV, Fluroscopy	1
292	G	Health Check-up	Health Check-up	X-Ray Operation Room	CR System	1
293	G	Health Check-up	Health Check-up	X-Ray Operation Room	X-ray Illuminator	1
294	G	Health Check-up	Health Check-up	Mammography Room	Mammography	1

No.	Floor	Department	Unit	Room	Description	Q'ty
295	G	Health Check-up	Health Check-up	Bone Mineral Measurement Device Room	Bone Mineral Measurement Device	1
296	G	Health Check-up	Health Check-up	Endoscopy	Endoscopy System	1
297	G	Health Check-up	Health Check-up	Endoscopy	Suction Unit	1
298	G	Health Check-up	Health Check-up	Endoscopy	Treatment Table	1
299	G	Health Check-up	Health Check-up	Endoscopy	Automatic Endoscopy Reprocessor	1
300	G	Health Check-up	Health Check-up	Endoscopy	X-Ray Illuminator	1
301	G	Health Check-up	Health Check-up	Endoscopy	Treatment Table, Electorical	1
302	G	Health Check-up	Health Check-up	Endoscopy	Endoscope storage cabinet	1
303	G	Health Check-up	Health Check-up	Endoscopy	Probe (Upper Abdominal), Endoscopy	1
304	G	Health Check-up	Health Check-up	Endoscopy	Biopsy	1

No.	Floor	Department	Unit	Room	Description	Q'ty
305	G	Health Check-up	Health Check-up	Endoscopy	Endoscopy Image Reader	1
306	G	Health Check-up	Health Check-up	Clinical Laboratory	U.B.T	1
307	G	Health Check-up	Health Check-up	Clinical Laboratory	Allergy IgE Analyzer	1
308	G	Health Check-up	Health Check-up	Clinical Laboratory	Biochemical Analyser	1
309	G	Health Check-up	Health Check-up	Clinical Laboratory	Hematology Analyser	1
310	G	Health Check-up	Health Check-up	Clinical Laboratory	Urine Analyzer	1
311	2	Intensive Care	Intensive Care	ICU	Patient Monitor for Intensive care, 8 parameters (ECG, Respiration, SpO2, temperature(2), NIBP, IBP, CO2, Multi gas)	25
312	2	Intensive Care	Intensive Care	ICU	Bed Pan Washer	1
313	2	Intensive Care	Intensive Care	ICU	Ventilator, Intensive Care, (with Oxygen Sensor, Respiratory Mode: 8 modes)	25

No.	Floor	Department	Unit	Room	Description	Q'ty
314	2	Intensive Care	Intensive Care	ICU	Ultrasound Diagnostic Imaging System, General, Color, 3probes, Real-time tissue Elastography Unit	2
315	2	Intensive Care	Intensive Care	ICU	Ceiling Pendant (Multi)	25
316	2	Intensive Care	Intensive Care	ICU	Shadowless Lamp	25
317	2	Intensive Care	Intensive Care	ICU	Syringe Pump	25
A317	2	Intensive Care	Intensive Care	ICU	Syringe Pump, PCA	25
318	2	Intensive Care	Intensive Care	ICU	Infusion Pump	25
319	2	Intensive Care	Intensive Care	ICU	Electrolyte Analyzer	1
320	2	Intensive Care	Intensive Care	ICU	ICU Bed	25
321	2	Intensive Care	Intensive Care	SCU	Ceiling Pendant (Multi)	10
322	2	Intensive Care	Intensive Care	SCU	Shadowless Lamp	10

No.	Floor	Department	Unit	Room	Description	Q'ty
323	2	Intensive Care	Intensive Care	SCU	Patient Monitor for Intensive care, 8 parameters (ECG, Respiration, SpO2, temperature(2), NIBP, IBP,CO2, Multi gas)	10
324	2	Intensive Care	Intensive Care	SCU	Bed Pan Washer	1
325	2	Intensive Care	Intensive Care	SCU	Ventilator, Intensive Care, (with Oxygen Sensor, Respiratory Mode: 8 modes)	10
326	2	Intensive Care	Intensive Care	SCU	Syringe Pump	20
327	2	Intensive Care	Intensive Care	SCU	Infusion Pump	10
328	2	Intensive Care	Intensive Care	SCU	Electrolyte Analyzer	1
329	2	Intensive Care	Intensive Care	SCU	Blood Gas Analyzer	1
330	2	Intensive Care	Intensive Care	SCU	ICU Bed	10
331	2	Intensive Care	Intensive Care	Staff Station	Defibrillator	2
332	2	Intensive Care	Intensive Care	Staff Station	Medical Telemeter	2

No.	Floor	Department	Unit	Room	Description	Q'ty
333	2	Intensive Care	Intensive Care	Staff Station	Central Monitor for max. 8 persons	4
334	2	Intensive Care	Intensive Care	Staff Station	Pulse Oximeter	2
335	2	Intensive Care	Intensive Care	Staff Station	ECG with Analyzing Function	1
336	2	Intensive Care	Intensive Care	Staff Station	Heart-lung Machine	2
337	2	Intensive Care	Intensive Care	Staff Station	Refrigerator for Medicine	2
338	2	Intensive Care	Intensive Care	Staff Station	Refrigerator for Blood, Small	2
339	2	Intensive Care	Intensive Care	Staff Station	Ventilator, Portable	2
340	2	Intensive Care	Intensive Care	Storage Room	Suction Unit	2
341	2	Intensive Care	Intensive Care	Storage Room	Shadowless Lamp, Portable	2
342	2	Intensive Care	Intensive Care	Storage Room	X-ray, Portable	1
A342	2	Intensive Care	Intensive Care	Storage Room	Bed Scale	4

No.	Floor	Department	Unit	Room	Description	Q'ty
343	2	Intensive Care	Pulmonary	Storage Room	Respiratory Examination Unit	1
344	2	Intensive Care	Pulmonary	Storage Room	Pulmonary Function Examination Device	1
345	2	Intensive Care	Pulmonary	Storage Room	Percutaneous Caerdiopulmonary Support System (PCPS)	1
346	2	Intensive Care	Neurology	Storage Room	EEG	1
347	2	Intensive Care	Neurology	Storage Room	Treatment Table	1
348	2	Intensive Care	Neurology	Storage Room	Brain Tissue Oxygen Tension	1
349	2	Intensive Care	Neurology	Storage Room	ICP Monitoring	1
350	2	Intensive Care	Urology	Storage Room	Urethroscope	1
351	2	Intensive Care	Urology	Storage Room	Systoscope Test Set	1

No.	Floor	Department	Unit	Room	Description	Q'ty
352	3	Intensive Care	MFICU	MFICU	Patient Monitor for Intensive care, 8 parameters (ECG, Respiration, SpO2, temperature(2), NIBP, IBP, CO2, Multi gas	6
353	3	Intensive Care	MFICU	MFICU	Bed Pan Washer	1
354	3	Intensive Care	MFICU	MFICU	Ventilator, Intensive Care, (with Oxygen Sensor, Respiratory Mode: 8 modes)	6
356	3	Intensive Care	MFICU	MFICU	Ceiling Pendant (Multi)	6
357	3	Intensive Care	MFICU	MFICU	Shadowless Lamp	6
358	3	Intensive Care	MFICU	MFICU	Syringe Pump, PCA	12
359	3	Intensive Care	MFICU	MFICU	Infusion Pump	6
360	3	Intensive Care	MFICU	MFICU	Electrolyte Analyzer	1
361	3	Intensive Care	MFICU	MFICU	Blood Gas Analyzer	1

No.	Floor	Department	Unit	Room	Description	Q'ty
362	3	Intensive Care	MFICU	MFICU	Examination Unit, Gynecology	1
364	3	Intensive Care	MFICU	MFICU	Ultrasound Diagnostic Imaging System, Transvaginal, color, 3probes, 4D Imaging, Real- time tissue Elastograhly Unit	1
365	3	Intensive Care	MFICU	MFICU	Ultrasound Diagnostic Imaging System, Abdominal, color, 5probes with Doppler unit, biomedical Wave form Display Unit, 3D Display Unit, Disital Capture Unit	1
366	3	Intensive Care	MFICU	MFICU	Ultrasound Washer	1
367	3	Intensive Care	MFICU	MFICU	Incubator	1
368	3	Intensive Care	MFICU	MFICU	Incubator for Conveyence	1
369	3	Intensive Care	MFICU	MFICU	Oxygen Tent	1
370	3	Intensive Care	MFICU	MFICU	Ventilator for Neonate	6
371	3	Intensive Care	MFICU	MFICU	Light Therapy Unit	1

No.	Floor	Department	Unit	Room	Description	Q'ty
372	3	Intensive Care	MFICU	MFICU	Bilirubin Meter	1
373	3	Intensive Care	MFICU	MFICU	Infant Warmer	1
374	3	Intensive Care	MFICU	MFICU	ICU Bed	6
375	3	Intensive Care	GCU	GCU	Patient Monitor for Intensive care, 8 parameters (ECG, Respiration, SpO2, temperature(2), NIBP, IBP, CO2, Multi gas	5
376	3	Intensive Care	GCU	GCU	Ultrasound Diagnostic Imaging System, General, Color, 3probes, Real-time tissue Elastography Unit	1
377	3	Intensive Care	GCU	GCU	Syringe Pump, PCA	11
378	3	Intensive Care	GCU	GCU	Infusion Pump	5
379	3	Intensive Care	GCU	GCU	Electrolyte Analyzer	1
380	3	Intensive Care	GCU	GCU	Incubator	11

No.	Floor	Department	Unit	Room	Description	Q'ty
381	3	Intensive Care	GCU	GCU	Incubator for Conveyence	1
382	3	Intensive Care	GCU	GCU	Light Therapy Unit	1
383	3	Intensive Care	GCU	GCU	Bilirubin Meter	1
384	3	Intensive Care	GCU	GCU	Infant Warmer	11
385	3	Intensive Care	GCU	GCU	Oxygen Tent	11
386	3	Intensive Care	NICU	NICU	Patient Monitor for Intensive care, 8 parameters (ECG, Respiration, SpO2, temperature(2), NIBP, IBP,CO2, Multi gas	10
387	3	Intensive Care	NICU	NICU	Ventilator for Neonate	10
388	3	Intensive Care	NICU	NICU	Ultrasound Diagnostic Imaging System, General, Color, 3probes, Real-time tissue Elastograhly Unit	1
389	3	Intensive Care	NICU	NICU	Ceiling Pendant (Multi)	10

No.	Floor	Department	Unit	Room	Description	Q'ty
390	3	Intensive Care	NICU	NICU	Shadowless Lamp	10
391	3	Intensive Care	NICU	NICU	Syringe Pump, PCA	20
392	3	Intensive Care	NICU	NICU	Infusion Pump	10
393	3	Intensive Care	NICU	NICU	Electrolyte Analyzer	1
394	3	Intensive Care	NICU	NICU	Incubator	10
395	3	Intensive Care	NICU	NICU	Incubator for Extreme Premature Infant	5
396	3	Intensive Care	NICU	NICU	Light Therapy Unit	1
397	3	Intensive Care	NICU	NICU	Bilirubin Meter	1
398	3	Intensive Care	NICU	NICU	Infant Warmer	10
399	3	Intensive Care	NICU	NICU	Oxygen Tent	10
400	3	Intensive Care	NICU	Premature Infant Room	Incubator	2

No.	Floor	Department	Unit	Room	Description	Q'ty
401	3	Intensive Care	NICU	Premature Infant Room	Incubator for Extreme Premature Infant	3
402	3	Intensive Care	NICU	Premature Infant Room	Incubator for Conveyence	1
403	3	Intensive Care	NICU	Premature Infant Room	Light Therapy Unit	1
404	3	Intensive Care	NICU	Premature Infant Room	Bilirubin Meter	1
405	3	Intensive Care	NICU	Premature Infant Room	Patient Monitor for Intensive care, 8 parameters (ECG, Respiration, SpO2, temperature(2), NIBP, IBP,CO2, Multi gas	5
406	3	Intensive Care	NICU	Premature Infant Room	Infant Warmer	4
407	3	Intensive Care	NICU	Premature Infant Room	Oxygen Tent	4
408	3	Intensive Care	NICU	Premature Infant Room	Ventilator for Neonate	5

No.	Floor	Department	Unit	Room	Description	Q'ty
409	3	Intensive Care	NICU	Premature Infant Room	Infusion Pump	5
410	3	Intensive Care	NICU	Premature Infant Room	Electrolyte Analyzer	1
411	3	Intensive Care	MFICU / GCU / NICU	Staff Station	Defibrillator for Neonate	2
412	3	Intensive Care	MFICU / GCU / NICU	Staff Station	Defibrillator	1
413	3	Intensive Care	MFICU / GCU / NICU	Staff Station	Medical Telemeter	2
414	3	Intensive Care	MFICU / GCU / NICU / SCU	Staff Station	Central Monitor for max. 12 persons	4
415	3	Intensive Care	MFICU / GCU / NICU	Staff Station	Pulse Oximeter	2
416	3	Intensive Care	MFICU / GCU / NICU	Staff Station	ECG with Analyzing Function	1
417	3	Intensive Care	MFICU / GCU / NICU	Staff Station	Heart-lung Machine	1
418	3	Intensive Care	MFICU / GCU / NICU	Staff Station	Refrigerator for Medicine	1

No.	Floor	Department	Unit	Room	Description	Q'ty
419	3	Intensive Care	MFICU / GCU / NICU	Staff Station	Refrigerator for Blood	1
420	3	Intensive Care	MFICU / GCU / NICU	Staff Station	Ventilator, Portable, Built-in nebulization system, Non-invasive ventilation, Pressure sensor	1
421	3	Intensive Care	MFICU / GCU / NICU	Staff Station	Ventilator for Neonate, Portable	1
422	3	Intensive Care	MFICU / GCU / NICU	Storage Room	Suction Unit	2
423	3	Intensive Care	MFICU / GCU / NICU	Storage Room	X-ray, Portable	1
424	3	Intensive Care	MFICU / GCU / NICU	Storage Room	Shadowless Lamp, Portable	2
425	3~8	Ward	Pulmonary	Storage Room	UV Lamp	1
426	3~8	Ward	Pulmonary	Storage Room	Percutaneous Caerdiopulmonary Support System (PCPS)	1
427	3~8	Ward	Pulmonary	Storage Room	Pulmonary Function Examination Device	1

No.	Floor	Department	Unit	Room	Description	Q'ty
428	3~8	Ward	Nephrology	Storage Room	Urine Quality Measurement Device	1
429	3~8	Ward	Neurology	Storage Room	EEG	1

15. The policy of land acquisition and resettlement of this project

The policy of land acquisition and resettlement of this project

- I. The Government of Socialist Republic of VIETNAM will use the Project Resettlement Policy (the Project Policy) for the Cho Ray Second Hospital Development Project specifically because existing national laws and regulations have not been designed to address involuntary resettlement according to international practice, including JICA's policy. The Project Policy is aimed at filling-in any gaps in what local laws and regulations cannot provide in order to help ensure that PAPs are able to rehabilitate themselves to at least their pre-project condition. This section discusses the principles of the Project Policy and the entitlements of the PAPs based on the type and degree of their losses. Where there are gaps between the VIETNAM legal framework for resettlement and JICA's Policy on Involuntary Resettlement, practicable mutually agreeable approaches will be designed consistent with Government practices and JICA's Policy.
- II. Land acquisition and involuntary resettlement will be **avoided** where feasible, or **minimized**, by identifying possible alternative project designs that have the least adverse impact on the communities in the project area.
- III. Where displacement of households is unavoidable, all PAPs (including communities) losing assets, livelihoods or resources will be **fully compensated** and assisted so that they can improve, or at least restore, their former economic and social conditions.
- IV. Compensation and rehabilitation support will be provided to any PAPs, that is, any person or household or business which on account of project implementation would have his, her or their:
 - Standard of living adversely affected;
 - Right, title or interest in any house, interest in, or right to use, any land (including premises, agricultural and grazing land, commercial properties, tenancy, or right in annual or perennial crops and trees or any other fixed or moveable assets, acquired or possessed, temporarily or permanently;
 - Income earning opportunities, business, occupation, work or place of residence or habitat adversely affected temporarily or permanently; or
 - Social and cultural activities and relationships affected or any other losses that may be identified during the process of resettlement planning.
- V. All affected people will be eligible for compensation and rehabilitation assistance, **irrespective of tenure status**, social or economic standing and any such factors that may discriminate against achievement of the objectives outlined above. Lack of legal rights to the assets lost or adversely affected tenure status and social or economic status will not bar the PAPs from entitlements to such compensation and rehabilitation measures or resettlement objectives. All PAPs residing, working, doing business and/or cultivating land within the project impacted areas **as of the date of the latest census** and inventory of lost assets (IOL), are entitled to compensation for their lost assets (land and/or non-land assets), at replacement cost, if available and restoration of incomes and businesses, and will be provided with rehabilitation measures sufficient to assist them to improve or at least maintain their pre-project living standards, income-earning capacity and production levels.
- VI. PAPs that **lose only part of their physical assets** will not be left with a portion that will be inadequate to sustain their current standard of living. The minimum size of remaining land and structures will be agreed during the resettlement planning process.
- VII. People **temporarily affected** are to be considered PAPs and resettlement plans address the issue of temporary acquisition.
- VIII. Where a **host community** is affected by the development of a resettlement site in that community, the host community shall be involved in any resettlement planning and decision-making. All attempts shall be made to minimize the adverse impacts of resettlement upon host communities.
- IX. The **resettlement plans** will be designed in accordance with VIETNAM's National Involuntary Resettlement Policy and JICA's Policy on Involuntary Resettlement.
- X. The Resettlement Plan will be **translated** into local languages and **disclosed** for the reference of PAPs as well as other interested groups.
- XI. Payment for land and/or non-land assets will be based on the principle of **replacement cost**.
- XII. Compensation for PAPs dependent on agricultural activities will be **land-based** wherever possible. Land-based strategies may include provision of replacement land, ensuring greater security of tenure, and upgrading livelihoods of people without legal land titles. If replacement land is not available, other strategies may be built around opportunities for re-training, skill development, wage employment, or self-employment, including access to credit. Solely cash compensation will be avoided as an option if possible, as this may not address losses that are not easily quantified, such as access to services and traditional rights, and may eventually lead to those populations being worse off than without the project.
- XIII. Replacement lands, if the preferred option of PAPs, should be **within the immediate vicinity** of the affected lands wherever possible and be of **comparable productive capacity and potential**¹. As a second option,

¹ Agricultural land for land of equal productive capacity means that the land provided as compensation should be able to produce the same or better yield the AP was producing on his/her land prior to the project. The production should be in the planting season immediately following the land acquisition. It can be for a future period if transitional allowance equal to the household's previous yield is provided to the AP household while waiting for the land to get back to the same productivity as the previous land.

sites should be identified that minimize the social disruption of those affected; such lands should also have access to services and facilities similar to those available in the lands affected.

- XIV. Resettlement assistance will be provided not only for immediate loss, but also for a **transition period** needed to restore livelihood and standards of living of PAPs. Such support could take the form of short-term jobs, subsistence support, salary maintenance, or similar arrangements.
- XV. The resettlement plan must consider the needs of those most **vulnerable** to the adverse impacts of resettlement (including the poor, those without legal title to land, ethnic minorities, women, children, elderly and disabled) and ensure they are considered in resettlement planning and mitigation measures identified. Assistance should be provided to help them improve their socio-economic status.
- XVI. PAPs will be **involved** in the process of developing and implementing resettlement plans.
- XVII. PAPs and their communities will be **consulted** about the project, the rights and options available to them, and proposed mitigation measures for adverse effects, and to the extent possible be involved in the decisions that are made concerning their resettlement.
- XVIII. Adequate **budgetary support** will be fully committed and made available to cover the costs of land acquisition (including compensation and income restoration measures) within the agreed implementation period. The funds for all resettlement activities will come from the Government.
- XIX. **Displacement does not occur before provision of compensation and of other assistance** required for relocation. Sufficient civic infrastructure must be provided in resettlement site prior to relocation. Acquisition of assets, payment of compensation, and the resettlement and start of the livelihood rehabilitation activities of PAPs, will be completed prior to any construction activities, except when a court of law orders so in expropriation cases. (Livelihood restoration measures must also be in place but not necessarily completed prior to construction activities, as these may be ongoing activities.)
- XX. **Organization and administrative arrangements** for the effective preparation and implementation of the resettlement plan will be identified and in place prior to the commencement of the process; this will include the provision of adequate human resources for supervision, consultation, and monitoring of land acquisition and rehabilitation activities.
- XXI. Appropriate reporting (including auditing and redress functions), **monitoring and evaluation mechanisms**, will be identified and set in place as part of the resettlement management system. An external monitoring group will be hired by the project and will evaluate the resettlement process and final outcome. Such groups may include qualified NGOs, research institutions or universities.

Cut-off-date of Eligibility

The cut-off-date of eligibility refers to the date prior to which the occupation or use of the project area makes residents/users of the same eligible to be categorized as PAPs and be eligible to Project entitlements. In the Project, : Cut-off dates for titleholders will be the date of notification under the Land Acquisition Act and for non-titled holders will be the beginning date of the population census; Date(We are confirming Binh Chanh District Commser procedure beginning day). This date has been disclosed to each affected village by the relevant local governments and the villages have disclosed to their populations. The establishment of the eligibility cut-off date is intended to prevent the influx of ineligible non-residents who might take advantage of Project entitlements

Principle of Replacement Cost

All compensation for land and non-land assets owned by households/shop owners who meet the cut-off-date will be based on the principle of replacement cost. Replacement cost is the amount calculated before displacement which is needed to replace an affected asset without depreciation and without deduction for taxes and/or costs of transaction as follows:

- a. *Productive Land (agricultural, aquaculture, garden and forest) based on actual current market prices that reflect recent land sales in the area, and in the absence of such recent sales, based on recent sales in comparable locations with comparable attributes, fees and taxes or in the absence of such sales, based on productive value;*
- b. *Residential land based on actual current market prices that reflect recent land sales, and in the absence of such recent land sales, based on prices of recent sales in comparable locations with comparable attributes; fees and taxes.*
- c. *Existing local government regulations* for compensation calculations for building, crops and trees will be used where ever available.*
- d. *Houses and other related structures based on actual current market prices of affected materials;*
- e. *Annual crops equivalent to current market value of crops at the time of compensation;*
- f. *For perennial crops, cash compensation at replacement cost that should be in line with local government regulations, if available, is equivalent to current market value given the type and age at the time of compensation.*
- g. *For timber trees, cash compensation at replacement cost that should be in line with local government regulations, if available, will be equivalent to current market value for each type, age and relevant productive value*

at the time of compensation based on the diameter at breast height of each tree.

(Decree 188/2004/ND-CP ,Circular 114/2004/TT-BTC, Circular116/2004/TT-BTC ,Circular 69/2006/TT-BTC)

16. A Contemplation of the ground floor height and the ground
height the Cho Ray Second Hospital will not be flooded

A Contemplation of the ground floor height and the ground height that the Cho Ray Second hospital will not be flooded.

I A Contemplation of a depth of being flooded under the extream weather

By the Le Minh Xuan Industrial Zone plan , the depth of being flooded when the flood occurs with the local heavy rain which contains extream weather should be contemplate .

1. The setting condition

- In supposes that 900mm the half with the annual fall of Ho Chi Minh city 1,833mm (2012) falls in 1day under the extream weather, and it records a maximum of 300 mm/h.
(The average fall of Japan is 1,718 mm (Ministry of Land, Infrastructure, Transport and Tourism) and is the same as Ho Chi Minh City approximately. It recorded 824 mm / a day in Izu-oshima in 2013 and it recorded 851.5 mm / a day in Kochi Prefecture in 2011. Also, there is a falling record that the half with annual fall was 1 day at Islamabad Children's hospital,Pakistan (JICA) in June, 2001.)
-
- It supposes that the South China Sea which Ho Chi Minh City faces is the time of the high tide.
- The Saigon river, Mekong river become a ceiling water in the rainy season and the rainwater drainage at Binh Chanh district can not be discharged.
- Binh Chanh District is a low flat and the inclination of the land is approximately 0. (Binh Chanh District Plan)
- The ground development standard height on the city planning at Binh Chanh district is 2.3 m sea level.
(The minits of Binh Chanh District commisser,28/Feb/2014)
- To review a great deal of rainfall at the time of the local heavy rain in this reviewing, there is not a sewage effluent in addition to the quantity of water.

2. The glaze quantity

The rainfall quantity may use experimental formula when it is sought by the investigation reviewing by the enough results.

A general calculation type " the rational method " is used.

" the rational method " $Q = 1/360 \times C \times I \times A \cdot \cdot \cdot \cdot \cdot \textcircled{1}$

Q; The greatest plan rainfall outflow quantity

C; The outflow coefficient. It supposes 0.65 from the following table.

Table 1: The outflow coefficient table. (The source: The design culcuration example in the sewage facilities; 1987; Sankaido Book)

Area	Outflow coefficient	The penetration percentage to the ground
The industrial area which rather has a vacant land in the fieldwork place that have penetration land face. And the residential area where rather is a garden	0.65	35 % of the amount of rainfall
Vacant land (Farm land)	0.1-0.3	90-70% of the amount of rainfall

*The decrease of the underground penetration quantity of water to the industrial park occurs from the agricultural land. The underground penetration percentage decreases by a maximum of about $1/6.5 = 0.15$ times from Table1. That is, the depth of being flooded in case of the rainfall becomes by 5.6 times compared with the present state.

I : Average rainfall intensity(mm/h) in reaching time(t)

Supposing that average reaching time is 10minutes, average rainfall intensity is 300mm/h.

A : Draining area(ha)=Le Minh Xuan Industrial Zone 1,00ha

1,000ha that is whole Le Minh Xuan Industrial Zone.

Supposing that

From fomula $\textcircled{1}$

$$Q = 1/360 \times 0.65 \times 300 \times 1000$$

$$= 541.6 \text{ m}^3/\text{Sec} \quad \textcircled{2}$$

541 m³/sec draining capacity is needed from this.

That is, in the moment (1 second), when the rain of rainfall intensity 300mm/h falls, about 541 m³ rainfall occur in the whole industrial zone.

Here, under the setting condition, because the discharge to the river doesn't form, supposing that it collects in the industrial park.

The rainfall finds total amount of rainfall (Q All) from the setting which continues for 1 hour.

$$Q_{All} = 541.6 \text{ m}^3/\text{sec} \times 3600 \text{ sec} = 1,949,760 \text{ m}^3 \cdot \cdot \cdot \cdot \textcircled{3}$$

Binh Chanh District is a low flat and the inclination of the land is approximately 0. (Binh Chanh District Plan)

It seeks the average water depth because it stores water in 1000 ha

$$1,949,760/1000/10000=0.195\text{m} \cdot \cdot \cdot \cdot \cdot \textcircled{4}$$

Therefore, 1 hour later, to be an average of 195 mm flooded occurs to the fall of 300mm/h over the whole area.

If there is a 900 mm fall under the extreme weather, the average flooding depth is as follows.

$$0.195\text{m} \times 900\text{mm} / 300\text{mm} = 0.585\text{m} = 585\text{mm} \cdots \textcircled{5}$$

The total amount of rainfall which collects in the ground surface is sought from ③.

$$1.949,760 \text{ m}^3 \times 900\text{mm}/300\text{mm} = 5.649,280 \text{ m}^3 \cdot \cdot \textcircled{6}$$

3. The study result

When total fall reaches 900 mm at short time with the local heavy rain which contains extreme weather, and there is not going in and out of a circumference area, **the average flooding depth becomes about 60 cm in the Industrial Zone.**

II. A Contemplation of the ground height that the Cho Ray Second hospital will not be flooded.

4. A Contemplation of flood control basin.

It is considered that there are not realistic drainpipe facilities which have 541 m³/sec ability, under the present situation and the setting condition

Therefore, the flood control basin is considered which stores up outflow rainfall in the industrial zone whole area.

Here, it checks the facility scale which is 5,849,280 m³ from ⑥.

Supposing that the depth is a 30 m flood control basin, seemingly the surface of the water area becomes about 20 ha facilities.

$$5,849,280 \text{ m}^3/30\text{m}=194,946 \text{ m}^2=\text{Applomexicaly } 20\text{ha} \cdot \cdot \cdot \cdot \cdot \textcircled{7}$$

This is the scale which ought to review dispersion establishment.

5. Water Environment

A 60 cm flooded is assumed, even if the Industrial Zone whole area is flatly developed at 2.3 m sea level of the standard of the Binh Chanh district city planning, in the reviewed setting condition.

Then, in the fact of the flood, there is water inflow/outflow around. When the project site is located in the low land in the industrial zone, it is estimated that deeper flood occurs.

) As for Long An Prefecture in the most downstream which neighbors Ho Chi Minh City, in the cataclysm in 2000, the whole area was flooded but depth of being flooded near Binh Chanh District border was 0.2–0.5 m. (The Japanese Institute of Irrigation and Drainage, Kobe University 2012 Note)

It is about 6 km in the linear distance from the project sight to the district border.

In this area, it is on the assumption that flood depth is 20-50cm.

In the rainy season of May–October, the big flood of the basin occurs near the Cambodian border (about 120 km upstream) of Mekong upstream style and rich agricultural land is formed but depth of being flooded reaches 2.6–3 m.

The farmer lives in "Stilt House on Water " (=It evaluates in the A rank of CASBEE as the traditional environment symbiosis house.) and misses a flood.

Or, the 1st floor is flooded and lives at equal to or more than the 2nd floor.

Also, the facilities which immigrate only in the rainy season are in Ho Chi Minh City suburbs.

It explained that the sea level rise, with global warming to 100 years later, which faces a city is 2.5 m by the commissar meeting vice-chairperson

The goal with the long-range durable structure body which the Ministry of Land, Infrastructure, Transport and Tourism in Japan recommends is 100years.

The water disaster in the land under the surface of the sea should be reviewed from the present if maximum of utilizing a use term as the building at the Cho Ray Second hospital and promoting the health of sustainable society.

6. Contemplation of the ground floor height that the Cho Ray Second hospital will not be flooded.

From the complementation of I. In the whole Industrial Zone, at the time of the local heavy rain, regardless of the landfill ground height, there is risk with 0.6 m depth of being flooded.

When there is water inflow/outflow around, to be flooded becomes deeper.

And from the record of neighborhood's flood depth 0.2-0.5m, in this area, it is on the assumption that flood depth is 60cm.

It makes a groundfloor and all entrance level from outside above the height where the flood doesn't flow in.

Because the ground development standard height on the city planning at Binh Chanh district is 2.3 m above sea level, all entrance level

=+2.3m above sea level(Binh Chanh district city planning) + 0.6m(flood assumption) + α m(leeway on the safety)

=+2.9m above sea level + α m(leeway on the safety) (>The sea level rise estimate to 100 years later = +2.5m above sea level) ⑧

" +2.9m above sea level + α m(leeway on the safety)" can be reviewed as the ground floor height, all exit height from outside.

7. The plan of building in the river flood disaster area.

"The plan of building in the river flood disaster area" is following as the Hospital Business Continuance Plan.

- ✓ Flood estimate \Rightarrow 0.6 m. It examines a flood in the past \Rightarrow 0.5 m of neighborhood.
- ✓ It plans a waterproof block.
- ✓ It installs water -proof board, a waterproof door preventing being flooded and backflow prevention equipment at the drainpipe.
- ✓ Even if it is flooded under the estimate height, the building plan that little hinderance occurs in the management must be made.
- ✓ The machine room, the electric room, the emergency power source system must be installed in the upstairs from the flood estimate height.
- ✓ The highly efficient medical equipment must be installed in the upstairs from the flood estimate height.
- ✓ The disaster reserve warehouse must be installed in the upstairs from the flood estimate height.
- ✓ A flood estimate line should be displayed in the inside and outside of the building and awakens a resident to note.
- ✓ The existence or non-existence of the boat in case of the disaster should be confirmed, and a storage place should be reviewed.

8. A Contemplation to the present of the ground floor height and the ground height that the Cho Ray Second hospital will not be flooded.

Continuing the practice of the medical care and a hospital management in case of the disaster, in the water disaster, prevention of flooding to the hospital is indispensable. As for the Cho Ray second hospital, it is estimated that it will be completed before the whole infrastructure in the Le Minh Xuan industrial zone will be serviced. When the Industrial Zone service will be progressional in the future, as for the water disaster by the local heavy rain which contains extreme weather, 60 cm that the average depth of flooding is estimated by this contemplation.

Respecting the Vietnamese nature symbiosing and housing environment culture with flooding, lifting the 1st floor by Columns and walls like “Stilt House on Water” will be one building method. As the measure, this can be proposed. However, in this way, the hospital site and the premise road which becomes necessary in the disaster medical will go under the water.

So, the following way is recommended.

“The level of the whole 10ha hospital project site must be set + 3.3 m sea level by landfill, 1 m higher than the circumference road”

The present state of project site is estimated to be about +0.8 m sea level.

But, the natural environment investigation including the measure and the ground result must be added and it proceeds with the reviewing.

Reference; The design culcuration example in the sewage facilities; 1987; Sankaido Book
