HOW TO READ TABLES

Tables on Records of Participants Accepted and Japanese Experts Dispatched

1. Period covered: From April 1, 1954 to March 31, 1975
2. The yearly figures used in the records pertain to fiscal years (April 1 of the current year to March 31 of the following year).
3. The number of persons in the records represents only the number of participants who came to Japan and of Japanese experts who left Japan in a fiscal year under the budget appropriated for that year. Accordingly, the number of participants in Japan and of Japanese experts serving abroad beyond the fiscal year into the following year or the year after are calculated once only for the year of their arrival in Japan or departure overseas and not for the subsequent years.
4. Sector classification is based on the Japanese administrative system and is tabulated according to the functions of the administrative agencies concerned. For example, the manufacture of agricultural machines is classified under "machinery" and their utilization and operation under "agriculture".
5. If a participant or expert whose training or service covers two or more items, he will be classified under principal subject of training or guidance.

- Notes:
1. This table shows the number of emigrants provided with travelling expenses by JICA by country and fiscal year (April to March of the next year). The travelling expenses were offered on a loan basis from 1952 to 1965, and thereafter covered fully by JICA with no burden on the emigrants. In May 1969, all the loans offered prior to 1967 were cancelled for full coverage by JICA.
 2. The Refugee Relief Act was applied to the emigrants to the United States.
 3. The Refugee Relief Act is a special law enacted by the United States government in 1953 to admit the entry into the United States of those people who were deprived of means of living during World War II on account of persecution or threat of persecution, natural disasters, or military actions.
