## STATISTICS AND DATA

### Records of Trainees Accepted and of Japanese Experts Assigned Overseas

- (1) This section contains the records from April 1, 1954, to March 31, 1972.
- (2) The yearly figures used in the records refer to fiscal years (April 1 to March 31 of the following year).
- (3) The number of persons in the records represents only the number of trainees arriving in Japan and of Japanese experts leaving Japan in a fiscal year under the budget for that fiscal year. Accordingly, the number of trainees staying in Japan and of Japanese experts serving abroad beyond the fiscal year into the following year or the year after are calculated once only for the year of their arrival in Japan or departure overseas and not for the subsequent year or years.
- (4) The classification of industries is based mainly on the administrative system in Japan and is tabulated on the basis of the functions of the administrative agencies concerned. For instance, the manufacture of agricultural machines is included in the category of light industry and their utilization and operation in agriculture.
- (5) If a subject covers two or more items, it is included in the industry covered by the principal subject of training or guidance.
- (6) "Other European and American Countries" refers to the nationals of developed countries in Europe and America who visited Japan for study, inspection or who rendered cooperation to the countries other than developing ones on subjects such as seismology, etc.
