On Records of Acceptance of Trainees and Overseas Assignment of Japanese Specialists

- 1 The records stated in this Paragraph are those for the period from April 1, 1954 to March 31, 1968.
- 2 The yearly figures have been tabulated on a fiscal year basis (April 1 to March 31 of following year).
- 3 The numbers of persons in the records represent only the numbers of trainees, who have arrived in Japan, and the Japanese specialists who have left Japan on overseas assignments in the fiscal year based on the budget for that fiscal year.

Accordingly, the numbers of the trainees who stayed in Japan, and the Japanese specialists who served abroad beyond that year into the following year, or the year after, have been calculated once only in the year of their arrival in Japan, or departure overseas, without calculating the following year or the year after.

- 4 The classification of industries has chiefly been based on the administrative system in Japan, with the tabulation mainly centered on clerical work undertaken by the administrative agencies concerned.

For instance, the manufacture of agricultural machines and implements have been included in the category of light industry, and their utilization and operation in agriculture. (Ref. Classification of Industries (1), Data (V))

- 5 If a subject covers two or more items, it is included in the industry covered by the principal subject of training or guidance.
- 6 As for the category "Other European and American countries, etc." it refers to cases of nationals of advanced countries in Europe and America, who visited Japan for research and inspection in connection with extension of economic and technical cooperation to developing countries, as well as to cases of Japan's cooperation with countries other than developing countries with respect to special subjects, for instance, earthquakes.
