#### I. The Japan International Cooperation Agency and its Functions

#### 1-1 History and Functions

The Japan International Cooperation Agency (hereinafter referred to as "the Agency" or "JICA") was established on August 1, 1974 as the implementing agency of Government-sponsored technical cooperation for developing countries and as an agent to administer emigration services.

The Agency performs its activities for international cooperation and also for the smooth and efficient implementation of its programs, the Agency is striving to obtain a wide range of cooperation from the relevant government agencies, local public bodies and private organizations in Japan by keeping close contact with them and to act in concert with the governments of developing countries and the related international organizations,

The functions of the Agency fall under the following categories

- (1) Technical Cooperation
  - a) Acceptance of trainees
  - b) Dispatch of experts
  - c) Provision of equipment
  - d) Project-type technical cooperation

Technical cooperation centres
Health and medical cooperation
Population and family planning cooperation
Agriculture, forestry and fisheries development
cooperation

Industrial development cooperation

- e) Development survey
- (2) Capital Grant Assistance
- (3) Japan Overseas Cooperation Volunteers (JOCV)
- (4) Investment in and Financing of Development Projects
- (5) Emigration Services
- (6) Recruiting and Training of Qualified Personnel for Technical Cooperation

The budget of the Agency consists of Grants, Investments and Funds in Trust. And the fund required for carrying out its technical cooperation activities is budgeted by the Japanese Government under its Official Development Assistance (ODA) Programme.

#### 2. Outline of Project-Type Technical Cooperation

The technical cooperation programs of JICA for their implementation consist of three basic components: namely, technical training in Japan and abroad, the dispatch of Japanese experts and the provision of equipment and materials.

These three types of technical cooperation can be implemented independently, but in the interest of better coordination and more effectiveness, they sometimes are combined to form a new type of technical cooperation which is called the "project-type technical cooperation".

This aims at integrated technical cooperation making it possible to implement a specific technical cooperation project comprehensively and systematically from planning to implementation with a project support system established in Japan.

The objective of the project-type technical cooperation is the transfer of technology to engineers, technicians, medical staff, farmers, extention officers and so on in the recipient country by means of their participation in development projects of respective fields. The fields are agriculture, forestry, fisheries, medical care, public health, population and family planning, vocational training, mining and manufacturing, small-scale industry, and researches related to these fields.

Implementation of the project-type technical cooperation is carried out systematically and comprehensively over a period of several years with specific site in the recipient country as its operational base.

For this purpose, JICA provides technical cooperation by combining effectively the dispatch of various teams, assignment of experts, provision of equipment and materials, technical training of counterpart personnel in Japan, while the recipient country

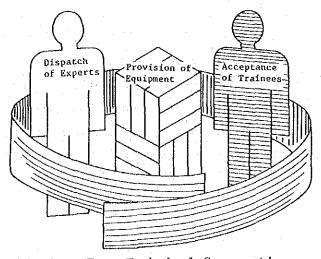

provides land, building, facilities, etc., which will serve as the project base as well as the local experts who will work as counterpart personnel with the Japanese experts. The recipient country is also to bear local costs such as operational expenses.

As for the normal procedure of implementation, a Record of Discussions (R/D) is prepared for each project and is signed by the Japanese executing agency (JICA) and the authority concerned in the recipient country. This recommends to a both governments for their acceptance of details of the implementation plan as well as the obligations to be observed by the two parties concerned.

On the basis of this recommendation, both governments execute the project defined in the R/D by reaching mutual agreement on the implementation of each one of the three components mentioned earlier: i.e. counterpart training in Japan, dispatch of Japanese experts and the provisions of equipment and materials.

The project-type technical cooperation contributes directly to the transfer of technology with an integrated sequence of activities for a long period and on a large scale. At the same time it aims at meeting basic human needs of the recipient country.

Therefore, this type of technical cooperation plays a important role among Japanese technical cooperation programs. Recently there has been an increase in the number of requests for this type of cooperation, and the nature of such requests tends to be more comprehensive, larger in scale (in combination with financial cooperation) and more advanced and specialized in technical requirement than in the past.

Project-Type Technical Cooperation

#### 3. Five Programs under Project-Type Technical Cooperation Scheme

Project-Type Technical Cooperation being implemented by the Agency includes (1) Technical Cooperation Center Program, (2) Health and Medical Cooperation Program, (3) Population and Family Planning Program, (4) Agriculture, Forestry and Fisheries Cooperation Program, (5) Industrial Development Cooperation Program.

Under the program of this type, the Agency provides technical cooperation through the dispatch of various survey teams, assignment of experts, supply of equipment and materials, and acceptance of counterparts.

#### (1) Technical Cooperation Center Program

This program was begun in 1960. Technical Cooperation

Centers are designed to train and upgrade engineers and skilled workers whose services are essential for the socio-economic progress of developing countries and they can be broadly classified as follows:

- (a) Cooperation in the development of manpower resources aimed at upgrading engineers, skilled workers, and instructors.
- (b) Cooperation in research and development, and experimental works involving tests for practical application.
- (c) Cooperation in development and improvement of production techniques.
- (d) Cooperation in vocational training

#### (2) Health and Medical Cooperation Program

This program was started in 1966. The program is designed to offer medical cooperation to developing countries suffering from epidemic, endemic, and other diseases as well as unfavourable environmental conditions. In order to help them in alleviating these situations, JICA cooperates in the promotion of medical care, public health and training of medical, nursing and other relevant staff and in the research and control of various diseases, including parasitic, viral and bacterial diseases, cancer, and cardiovascular diseases.

#### (3) Population and Family Planning Program

This program, which had been part of the Health and Medical Cooperation Program until 1979, was separated from the latter and established new technical cooperation program in 1980 in order to contribute to the promotion of the population and family planning in developing countries.

#### (4) Agriculture, Forestry and Fisheries Cooperation Program

The agricultural cooperation program was started in 1967 and expanded to include forestry cooperation in 1977. As an example, this program offers cooperation for the development of human resources as well as for improving technology in the fields of rice cultivation, upland farming, sericulture, livestock breeding, forestry, and fish farming, and so on.

At the same time it aims at improving the infrastructure required for the autonomous development of agriculture, forestry and fisheries.

Concrete examples of activities under this program are as follows:

- (a) Cooperation in the establishment of training centers and model farms for the dissemination and popularization of improved techniques;
- (b) Cooperation in the improvement and diffusion of technology;
- (c) Cooperation in improving the production infrastructure such as irrigation and drainage;
- (d) Cooperation in regional agricultural development projects through combination of the contents of items from a) through c) above-mentioned;
- (e) Cooperation in agricultural training and research centers, and experimental laboratories.

#### (5) Industrial Development Cooperation Program

This Program is aimed at the effective utilization of locally available natural and human resources in developing countries for the development, promotion and growth of mining and manufacturing industries to expand employment opportunities. In order to promote local industries in developing countries, not only the transfer of manufacturing technology but also the transfer of production-related techniques such as production control, business management, distribution and marking and development of human resources, as well as the enhancement of research and development capability are equally important.

#### 4. Flow of Project-Type Technical Cooperation

The flow of project-type technical cooperation is shown in the chart.

In order to bring the whole process of the cooperation smoothly to a successful completion where the recipient country can take over and operate the project by herself, it is necessary to always pay attention to the progress of the project in the whole procedural flow which takes up a number of years from beginning to end.

#### 4-1 Identification Stage

- (1) Request for Cooperation
  - a) A request from a recipient country for the Technical Cooperation is normally channelled through the Japanese Embassy. The request must be supported by detailed information.
  - b) The Embassy will then convey the requested project to JICA through the Ministry of Foreign Affairs of Japan.
- (2) Initial Screening of the Potential Projects

JICA will study and examine the outline of the Project through the detailed information, and if it finds the Project appropriate, JICA will consult with the Ministries and other organizations concerned for deciding dispatch of the Preliminary Survey Team for the Project.

#### 4-2 Preparation Stage

Preliminary Survey
 This survey aims at;

- a) Identification of the outline of the Project proposal
- b) Clarification of the problems to be solved for the implementation.
- c) Formulation of the appropriate Master Plan for Japan's cooperation not only through discussion and mutual exchange of views with the authorities concerned of the recipient country, but also through fact-finding investigations.

- (2) Expert for implementation survey
  Supplementary survey will be carried out for the formulation
  of appropriate Master Plan for technical cooperation from the
  technical point of view, if necessary.
- This survey aims to make up and finalize concrete the technical cooperation plan for implementation of the project through discussions and exchange of views with the recipient country.

  Based on the result of the discussions, both sides prepare and sign the Record of Discussions (R/D) and the Tentative Implementation Plan (TIP). After signing of R/D and TIP, technical cooperation will commence.

#### 4-3 Implementation Stage

JICA will send mutual consultation and technical guidance teams in order to review the progress of the implementation of the project and to assess whether cooperation plan should be modified for the successful implementation of the project. These teams will formulate the Annual Work Plan, based on the results of review.

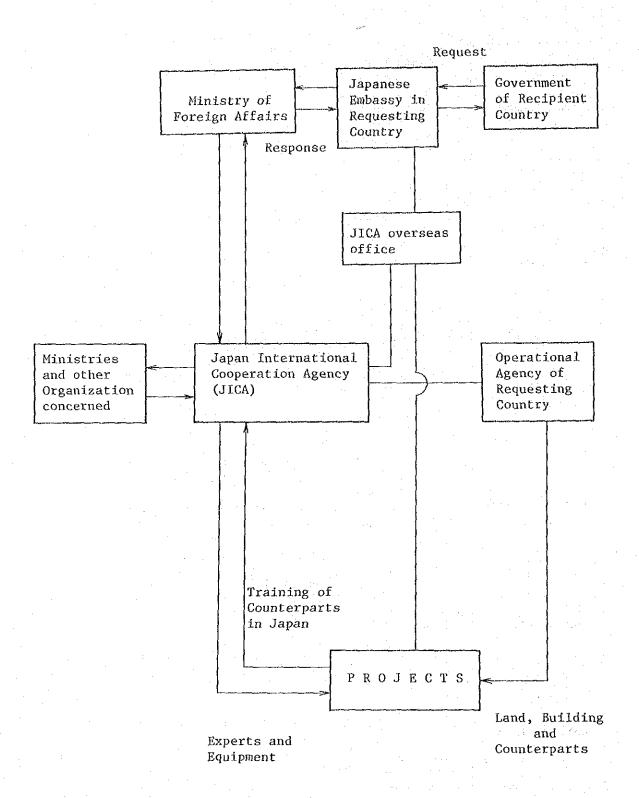

#### 4-4 Evaluation Stage

Evaluation team will be dispatched in order to evaluate totally the effects of the technical cooperation and the progress of implementation of the project, at the end of the cooperation period.

Chart 4-1 Flow of the Project-Type Technical Cooperation

Stage	Flow & Works
Identification	Request for Cooperation  Initial Screening of Potential Projects  - Identification of Project Proposal
	Preliminary Survey - Feasibility Analysis of Project Proposal
Preparation	- Formulation of Project  Expert for implementation Survey
	Implementation Survey  - Consultation on implementation - Signing of Record of Discussions (R/D) and Tentative Schedule of Implementation (TSI) or Agreement
	Cooperation request document (Form Al ∿ A4)
Implementation	- Dispatch of Japanese experts (Form Al) - Acceptance of counterpart personnel     (Form A2 ∿ A3) - Provision of equipment and materials (Form A4) - Dispatch of teams of various kinds     . Implementation Design Team     . Mutual Consultation Team     . Technical Guidance Team     . Equipment Maintenance Team
Evaluation	Evaluation  - Measurement of effects of technical cooperation
Self-Reliance	Completion and Handover of Project  - Self-reliant operation of project by recipient country  After-care

#### 5. Mechanism of Project-Type Technical Cooperation

#### 6. Ordinary Procedure of Implementation (After Signing of the R/D and TSI)

#### (1) Dispatch of the Japanese Experts

Upon request by Al form from the recipient country, JICA selects and assigns experts necessary for the implementation of The Project in the line with R/D and TIP.

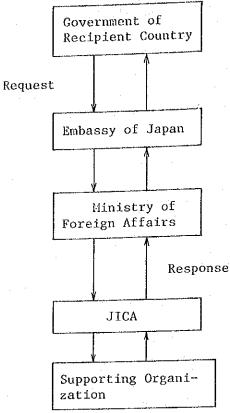

Experts consist of long-term (one year or more) and shortterm (less than one year) experts.

#### (2) Acceptance of Counterpart personnel

Upon request by A2-3 form from the recipient country, JICA provides technical training and/or observation study in Japan to counterpart personnel necessary for the implementation of the Project in line with R/D and TSI.

#### (3) Provision of Equipment

Upon request by A4 form from the recipient country, JICA provides equipment, machinery and materials necessary for the implementation of the project in line with R/D and TSI.

Preparation of Application Form (Form Al, A2, A3, A4)

#### a) Experts

- (1) Selection and recruitment of Japanese experts
- (2) Preparation of B1 form for agreement from the recipient country
- 3 Dispatch of Japanese experts

#### b) Training of Counterpart Personnel in Japan

- (1) Set up of the training plan (schedule and curriculum)
- ② Acceptance

#### c) Equipment

- 1 Selection of equipment to be provided
- ② Preparation of specification of equipment
- ③ Procurement and shipping

#### 7. MEASURES TO BE TAKEN BY BOTH GOVERNMENT

#### I. JAPANESE SIDE

- (1) To dispatch experts at its own expence;
- (2) To provide machinary and equipment at its own expense;
- (3) To receive an adequate number of counterpart personnel for technical training in Japan at its own expense.

#### [Remarks]

- a) Machinery and equipment are delivered in C.I.F.
- b) Japan is taking a single-gear budget system and fisical year starts from April
- c) The Japanese cooperation is implemented on the basis of the Note attached A1 - A4 Form submitted by the recipient government.

#### II. RECIPIENT GOVERNMENT

- (1) To provide necessary service for counterpart personnel and administrative personnel for the implementation of the Project;
- (2) To provide land, building and facilities necessary for the implementation of the Project;
- (3) To provide machinary, equipment and other materials necessary for the implementation of the Project other than those provided by Japan;
- (4) To provide travel allowance for the Japanese experts for the official travel within the recipient country;
- (5) To provide a vehicle with a driver for the Japanese experts during their working hours and from and to their residences;
- (8) To provide suitably furnished accomodations for the Japanese experts and their families;
- (7) To bear the following expenses;
  - a) expenses necessary for the domestic transportation of machinery and equipment provided by Japan as well as for their installation, operation and maintenance.

- b) customs duties, internal taxes and other charges imposed in respect of machinery and equipment provided by Japan
- c) expenses necessary for the provision of textbooks
- d) all running expenses necessary for the implementation of the Project
- (8) To provide the Japanese experts and their families with the priviledges, exemptions and benefits such as free medical services and exemptions from income tax and customs duties no less favourable than those granted to the experts of third countries or international organizations performing similar missions;
- (9) To ensure that the knowledge and techniques acquired in Japan by counterpart personnel are utilized effectively for the implementation of the Project.

## A p p e n d 1 x . 1

Performance of Project-Type Technical Cooperation Program

# 1. Trends of Number of the Projects, Expenses, and Geographical Distribution

#### (1) Number of the Projects in Fiscal 1981 $\sim$ 1985

Type of Program	1981	1982	1983	1984	1985
Technical Cooperation Center	35	37	38	37	38
Program	(26.3)	(27.8)	(27.5)	(28.2)	(27.0)
Health and Medical Cooperation	35	31	33	28	31

Standard Form of Record of Discussions (R/D)

# THE RECORD OF DISCUSSIONS BETWEEN THE JAPANESE IMPLEMENTATION SURVEY TEAM AND THE AUTHORITIES CONCERNED OF THE GOVERNMENT OF ON THE JAPANESE TECHNICAL COOPERATION FOR \_\_\_\_\_\_\_ PROJECT

The Japanese Implementation Sur	vey Team (hereinafter referred to a
"JICA") and headed by Mr.	visited from
to to	for the purpose of working
out the details of the technical coop	"
Project in	
During its stay in	·
views and had a series of discussions	with the
authorities concerned in respect of t	he desirable measures to be taken
by both Governments for the successfu	ıl implementation of the above-
mentioned project.  As a result of the discussions,	both parties agreed to recommend
to their respective Governments the m	natters referred to in the document
attached hereto.	
Leader Implementation Survey Team Japan International Cooperation Agency, JAPAN	

#### THE ATTACHED DOCUMENT

I.	COOPERATION BETWEEN BOTH GOVERNMENTS
1.	The Government of Japan and the Government of
	will cooperate with each other in implementing
	Project (hereinafter referred to as "the Project")
	for the purpose of
	and thus contributing to
2.	The Project will be implemented in accordance with the Master Plan
	which is given in I of Annex.
II.	DISPATCH OF JAPANESE EXPERTS
1.	In accordance with the laws and regulations in force in Japan, the
- ·	Government of Japan will take necessary measures through JICA to
	provide at its own expense services of the Japanese experts as listed
	in II of Annex through the normal procedures under the Colombo Plan
	Technical Coperation Scheme (technical cooperation scheme of the
	Government of Japan).
2.	The Japanese experts referred to in 1 above and their families will
	be granted in the privileges, exemptions and benefits
	no less favourable than those accorded to experts of third countries
•	(performing similar missions in) working in
	under the Colombo Plan Technical Cooperation
	Scheme.
III.	PROVISION OF MACHINERY AND EQUIPMENT
1.	In accordance with the laws and regulations in force in Japan, the
	Government of Japan will take necessary measures through JICA to
	provide at its own expense such machinery, equipment and other
	materials (hereinafter referred to as "the Equipment") necessary
:	for the implementation of the Project as listed in III of Annex
1. 1. 1. 1. 1. 1. 1. 1. 1. 1. 1. 1. 1. 1	through the normal procedures under the Colombo Plan Technical
	Cooperation Scheme (technical cooperation scheme of the Government

of Japan).

			;
2.	The Equipment will become the I	property of the Government of	
	being delivered c.i.f. to the		
		d/or airports of disembarkation, and	
		or the implementation of the Project	
	in consultation with the Japane	ese experts referred to in II of Annex.

# VII. ADMINISTRATION OF THE PROJECT

1.	Thewill bear overall responsibility
	for the implementation of the Project.
2	The, as the Head of the Project,
	will be responsible for the administrative and managerial matters
	of the Project.
3.	The Japanese Chief Advisor will provide necessary recommendation
٠	and advice on technical and administrative matters concerning the
•	implementation of the Project to the Head of the Project.
4.	The Japanese experts will give necessary technical guidance and
	advice to the counterpart personnel on matters
	pertaining to the implementation of the Project.
5.	For the effective and successful implementation of the Project, a
	Joint Committee will be established with the function and composi-
	tion as referred to in VI of Annex.
VIII	. CLAIMS AGAINST JAPANESE EXPERTS
	The Government ofundertakes to bear
claí	ns, if any arises, against the Japanese experts engaged in the Project
resu.	lting from, occuring in the course of, or otherwise connected with
the d	discharge of their official functions in
excel	ot for those arising from the willful misconduct or gross negligence
of th	he Japanese experts.
•	
IX.	MUTUAL CONSULTATION
	There will be mutual consultation between the two Governments on any
major	r issues arising from, or in connection with this Attached Document.
•	
х. д	TERM OF COOPERATION
	The duration of the technical cooperation for the Project under this
Artac	ched Document will be years from
	However, there will be a general review by the Joint Committee on
the p	progress of the implementation of the Project during the third year
of tl	ne cooperation period in order to assess whether the term of coopera-

tion should be modified for the successful implementation of the Project.

Form A. 4 (1962 Revision)

# THE COLOMBO PLAN COUNCIL FOR TECHNICAL CO-OPERATION IN SOUTH AND SOUTH-EAST ASIA Equipment for Training or Research Institutes and for Equipment accompanying Experts

# **APPLICATION**

By the Government of	and the state of t
[ram	(Country)
relevant information an required. The existivi action. Separate forms (b) The requisite number by the appropriate For	ovised for the general guidance of co-operating countries in order to facilitate the aupply of all data necessary to afford an adequate appreciation of the nature of the technical cooperation completion of this application form will avoid much reference back and lead to appendier A 4 should be used for requests for equipment for each individual institute or project. Of copies of the Form A 4, including a copy for the Colombo Plan Bureau, duly endorsed sign Aid Department of the requesting government should be forwarded to the donor government the appropriate channels.
1. Background Information	
Please describe as concisely as possible the general outlines of the project for which the equipment is required, indicating whother the latter is (a) for use by an expert in the performance of his duties (b) for a training scheme of institution or (c) for a research institution. If either (b) or (c) please say whether the equipment is for the establishment of a new institution or the expansion or re-organisation of an existing one (e.g., by the provision of a new department, &c.). The name and exact location of the institution, its approximate cost and the authority responsible for it should be stated. Where appropriate details should be given of the availability of any services required for the operation of the equipment. This would include operation by electricity (i.e. type of current, periodicity, voltage and any variations, phases frequency etc. and if D.C. is	
the only current available please give full details), water reticulation or steam gas etc. Details of similar equipment already in use should be given.	
2. Description of equipment required.	
Please give a full description of each item and general specifications where possible. The manufacturer and estimated cost of each item if known together with details of the proposed end use of item should be given. Where applicable, give details of any special packing or tropic proofing required and indicate whether handbooks or instruction data supplied in English will suffice. If appropriate, please indicate uny required priorities	
or phasing of deliveries and advise whether adequate facilities exist for maintenance and servicing of the type of equipment requested. (If lengthy, detailed lists should be annexed: it would be convenient to have separate annexures for (a) films, (b) books and (c) other equipment.)	
3. Has this equipment request already been directed to any other Agency of Colombo Plan country and if so to whom was it addressed an with what result?	
4. Has the list of equipment already been discussed with representatives of the supplying country/ies? If so, please indicate what stage the discussions have reached	
5. Furnish full particulars in respect of— (a) Consignee; (b) Official to receive documents and enquiries; and (c) Clearing agent at port of entry.	

	4	
•	^	١

<ul> <li>6. Where equipment is required for use by an expert Pleaso indicate— (a) The country or agency from which the expert has been requested or obtained.</li> <li>(b) His duties and length of secondment (a reference to the relative Form A. 1 will suffice when the expert is being provided by the country to whom the equipment request is addressed).</li> <li>(c) What use is proposed for the equipment when the expert's period of secondment terminates?</li> <li>(d) By what date is the equipment required?</li> </ul>	
7. Where equipment is required for Training or Research Institutions Please indicate—  (a) Nature and standard of training or research to be undertaken  (b) Total number of students to be accommodated from within the country or from elsewhere in the Region, the qualifications for admission, the duration of courses, and the annual output of trainees  (c) Whether there is already a similar institute(s) in existence in the country. If so, please give details  (d) Whether buildings are already available. If not has construction started and when is it expected to be completed?  (e) Whether qualified staff to handle the equipment has been recruited or is proposed to be recruited locally. If not is it proposed:—  (i) to recruit foreigners under aidprogrammes?  (ii) to train locally recruited personnel abroad in handling equipment? (the reference numbers of any Forms A. 1 or A. 2 relating to such requests should be quoted)  (f) Taking into account the answers to (d) and (e) above, what is the date by which the equipment is required and the date on which training or research work is to commence.  (g) Whether any assistance in drawing up the Scheme has been obtained from outside experts? (Any specialist reports or Government surveys (e.g., Educational Committee Reports, etc.), bearing on the request should be provided if possible)	
8. Correspondence Name, Postal and Telegraphic Address of official to whom correspondence regarding this proposal is to be forwarded

for an expert, i. e., to the Government of J							
Notes This form has been	•	enaral midana	of the Cover	nmant saas	ior concer	ad (IAPAN) In	order to
facilitate the supply	of relevant info	rmation and da	la necessary l	o afford an	adequate ar	preciation of the	nature
of the technical co back and lead to sp	operation require	d. The careful	completion (	of this prop	osal form w	ill avoid much re	terence
					<u> </u>		
Back ground Information							
This section should show as pre-	F-: -						
cisely as possible the general							
nature of the project for which the expert is required,			•				
stating whether it comes within the Government's development programme. It is important to indicate							
within the Government's							
is important to indicate							
whether the project is a new	l .						
enterprise or whether it was started previously. In the							
latter case, any assistance							
received under other technic-							
al co-operation programmes (e.g. under United Nations						4	
auspices) should be stated.	1						
With regard to industrial							
enterprises, some impression of the size is important and						4 - 4 -	
the output and number of	}						
workers to be employed are							
useful indications. The type of process, make and age of							
industrial or scientific equip-							
ment with which the expert	,						
will be concerned should be specified. In the case of							
academic establishments, it							
is an advantage to know the	ļ						
number of annual intake of students, their level of attain-							
ment, numbers and status of	<u> </u> -					-	
existing staff and details of any research facilities and							
the level of research being							
undertaken (Copies of bro-	ĺ						
chures, annual reports, finan- cial statements, calendars,							
syllabus of instruction etc.							
should be attached where applicable).							
application.							
specification for the post,*	]						
a) post title	į						
b) duties for which the expert	1						
will be responsible.  These should preferably be							
listed, and it is important to							
give as much detail as possi-							
ble.							··

# APPLICATION FOR EQUIPMENT

Un the Consequent of	to the Government of Japan
By the Government of under the Technical Co-operation Plan I	for (1) Near and Middle East and Africa, (2) Latin America, or (3) Other Asian Area
Notes.—(1) This form has been de- relevant information an required. The cereful (2) The requisite number e requesting government (3) The equipment to be of uson receive of the shi	vised for the general guidance of co-operating countries in order to facilitate the supply of additional assistance of the technical assistance completion of this application form will avoid much reference back and lead to speedier action, of copies of the Form A 4 duly endorsed by the appropriate Foreign Aid Department of the should be forwarded to the donor government concerned through the appropriate channels, usplied by the Government of Japan will become the property of the requesting government poping documents through the Japaness Embassy, Since the equipment is supplied on C.I.F.
basis, it is requested th	ast the recipient government will meet: internal taxes and other similar charges, if may, imposed in respect of the equipment, and ary for the transportation, installation, operation and maintenance of the equipment.
1. Background Information	
Please describe as concisely as possible the general outlines of the project for which the equipment is required, in- dicating whether the latter is (a) for use by an expert in the performance of his duties (b) for a training sheme of institution or (c) for a research	
institution. If either (b) or (c) please say whether the equipment is for the establishment of a new institution or the expansion or re-organisation of an existing one (e.g., by the provision of a new department, etc.). The name and exact location of the institution,	
its approximate cost and the authority responsible for it should be stated. Where appropriate details should be given of the availability of any services required for the operation of the equipment. This would include operation by electricity (i.e. type of current,	
periodicity, voltage and any variations, phases, frequency etc. and if D.C. is the only current available please give full details), water reticulation or steam gas etc. Details of similar equipment already in use should be given.	
2. Description of equipment required.  Please give a full description of each item and general specifications where possible. The manufacturer ant estimated cost of each item if known together with details of the proposed end use of item should be given. Where applicable, give details of any special packing or tropic proofing required and indicate whether handbooks or instruction data supplied in English will suffice. If appropriate, please indicate any required priorities or phasing of deliveries and advise whether adequate facilities exist for maintenance and servicing of the type	
of equipment requested. (If lengthy, detailed lists should be unexed; it would be convenient to have separate annexores for (a) films; (b) books and (c) other equipment.)	
3. Has this equipment request already been directed to any other Agency or country and if so to whom was it addressed and with what result?	
4. Has the list of equipment already been disscussed with representatives of the supplying country/ies? If so, please indicate what stage the discussions have readhed.	
<ul> <li>5. Furnish full particulars in respect of— <ul> <li>(a) Consignee;</li> <li>(b) Official to receive documents and enquiries; and</li> <li>(c) Clearing agent at port of entry.</li> </ul> </li> </ul>
