NO. OF ABBANDONS	62	121	3	19	18	0	64	71	3	361

Note: 1) Numbers of springs and abandans are containing some duplication in the count due to some overlapping of their irrigation area among villages.

2) Category of wells: Shallow well (d = less than 10m),
Semi Deep Well (d = 10 to 50m),
Deep Well (d = more than 50m)

LIST OF FIGURES

Figure G.1. Proposed Layout of CAPIC's Land	G-10
Figure G.2. CAPIC Farm Field Plan	G-11

G.1. Purpose of Project

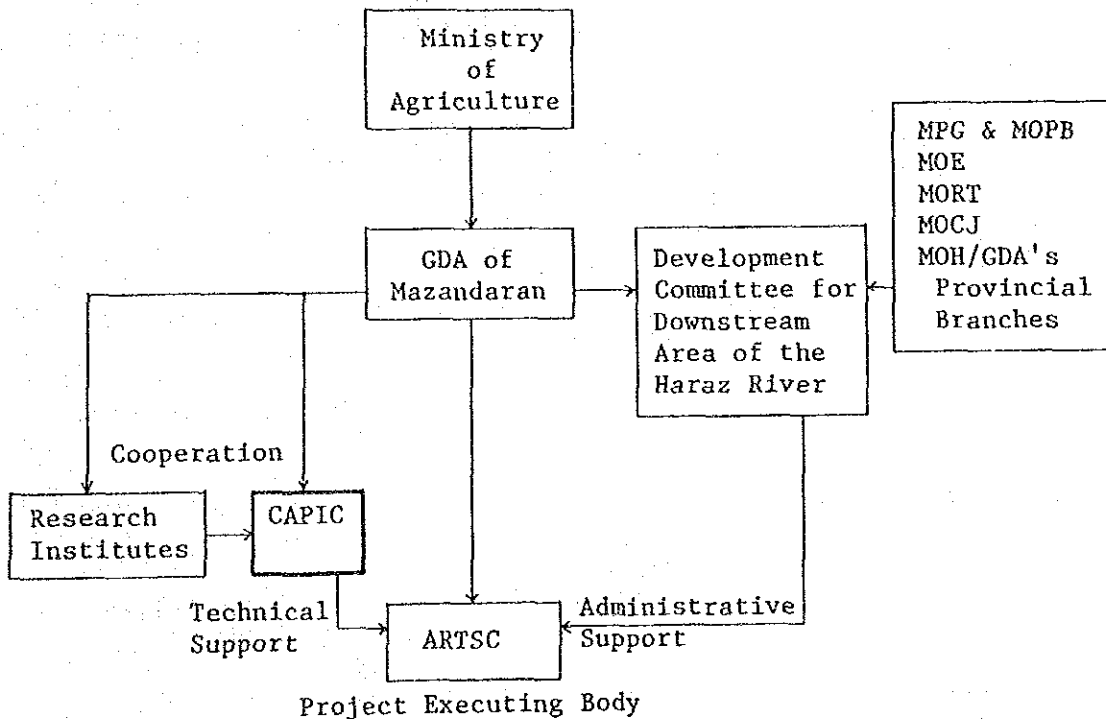

The Caspian Sea Coastal Area Agricultural Development Project - Pilot Implementation Center (hereinafter referred to as "CAPIC") will be executed aiming that the Master Plan for developing the said Project Area shall be verified and that the necessary engineers/experts shall be brought up for encouraging and extending the highly productive agriculture in the Caspian Sea Coastal Area, particularly, in the lower basin of the Haraz river.

G.2. Role of CAPIC in Master Plan

It is emphasized in the Master Plan that successful encouragement and extension of the highly productive agriculture require the upgrading of agricultural infrastructure and farming techniques/farm management. And promotion of the Project along with the aforesaid recommendation essentially requires the verification of the Master Plan and the establishment of a well formed organization staffed with richly experienced engineers and experts. Therefore, CAPIC shall be given a role as technical supporting body for the Project.

G.3. Position of CAPIC in Development Works

The development of the Project Area shall be promoted by the organization illustrated below.

In a word, the Agriculture, Rural and Tribal Service Center (ARTSC) will be an executing body, and CAPIC be the technical supporter of ARTSC.

On the other hand, the Development Committee for Downstream Area of Haraz River shall be established by the ministries concerned so as to make administrative coordination and support in providing various social infrastructures in the rural areas.

G.4. Functions of CAPIC

CAPIC shall have the following functions in each of short, middle and long terms so that the purposes mentioned in paragraph G.1 could be achieved smoothly.

(1) Functions for short term (about 5 years)

- 1) Technical and socio-economical verification of the development plan included in the Master Plan. In other words, introduction of the latest technology of land consolidation for raising the land productivity. And the verification of social conditions for successful realization of the Project, and the improvement and establishment of farming techniques to be required for higher yield and quality improvement, and improvement of farming practices for a higher productivity of labour, etc.
- 2) Education and extension of modern farming based upon various verification, demonstration and tests including some pilot programs as part.
- 3) Upbringing of technical staffs for the development (core staffs of CAPIC) through realization of the aforesaid items of 1) and 2).

(2) Functions for middle term (about 5 to 10 years)

- 1) Expansion of the pilot areas and establishment of modern farming works in the pilot areas.
- 2) Verification and demonstration of the practical techniques in the verification farms.
- 3) Training of ARTSC staffs through execution of the above items of 1) and 2).
- 4) Rendering of the necessary consulting services for commencement of the land consolidation works undertaken by ARTSC.

(3) Functions for long term (more than 10 years)

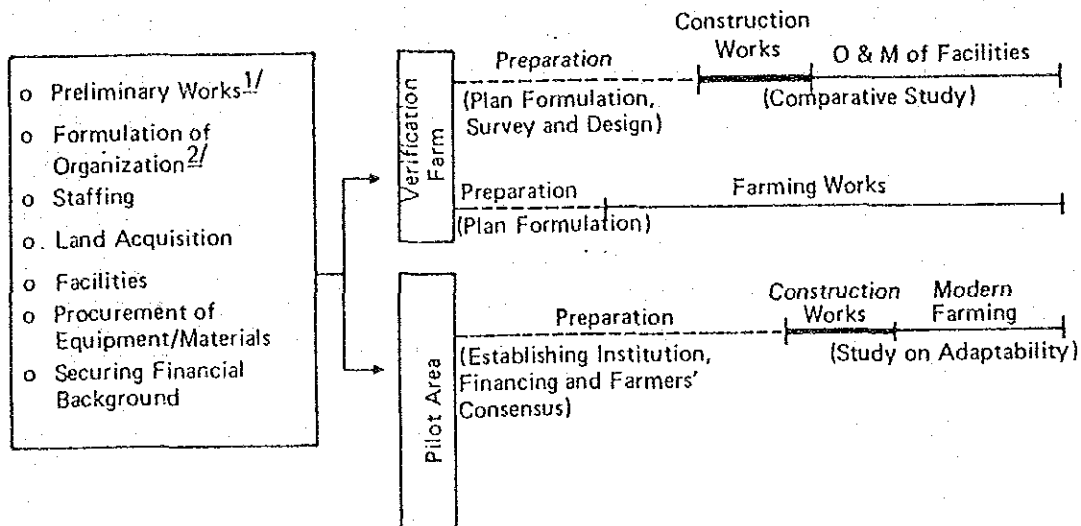

- 1) Improvement of farming techniques and extension of new techniques in the verification farms and pilot areas, and extension of these techniques to the entire Project Area.

- 2) Rendering of the necessary consulting services to ARTSC for implementing land consolidation works.
- 3) Social and economical evaluation of various changes resulting from development of the Project Area, and revision and supplement of the Project Plan when required.

For reference, the technical support will be provided not only, to the downstream area of the Haraz river but also its surrounding areas in view of the middle/long term plans.

C.5. Implementation Plan of CAPIC

The implementation program for the short-termed project plan shown in Table G.1. is proposed, and the program is summarized below;

Note: ^{1/} Establishment of the Development Committee of Downstream Area of Haraz River including enhancement of ARTSC/RSC.

^{2/} At this stage, only the staffs should be mobilized to meet the requirements in this the stage, and also procurement of equipment/material should be limited to the extent that the stage requires. The staffing and procurement shall be made according to the development of the CAPIC Project.

The relationship between the functions in short term and the aforesaid works is illustrated below;

Work Site	Construction or Farming	M/P Verification		Extension Works	Upbringing of CAPIC/ARTSC Staff
		Technical	Social		
Verification Farms	Construction	⊙	○	○	Upbringing of staff is planned through experience of execution of two items in left column
	Farming	⊙	○	○	
Pilot Areas	Construction	○	⊙	⊙	⊙ main purpose
	Farming	○	⊙	⊙	

G.6. Staffing Plan of CAPIC

The CAPIC shall have permanent technical staffs at least required to perform the aforesaid functions mentioned in paragraph G.1.

Technical Staffs of CAPIC

		University Graduates	High School Graduates	Total
(1) Design & Construction of Facilities	3 parties	3	9	12
(2) O & M of Constructional Machinery	1 party	1	4	5
(3) Crop Farming	2 parties	2	4	6
(4) O & M of Agri-machinery/ Facilities	3 parties	3	3	6
(5) Livestock Farming	2 parties	2	4	6
(6) Agro-economy/Statistics	2 parties	2	2	4
<u>Total</u>		<u>13</u>	<u>26</u>	<u>39</u>

The above technical staffs for CAPIC shall undergo technical retrainings in the frame of the functions in short term, and the employment plan of these staffs is shown hereunder.

Employment Schedule of CAPIC's Technical Staff

Year		1	2	3	4	5	6
Terminal Facilities Improvement	University Graduates						
	High School Graduate						
O & M of Construction Machinery	University Graduate						
	High School Graduate						
Crop Farming	University Graduate						
	High School Graduate						
O & M of Agri-machinery and Facilities	University Graduate						
	High School Graduate						
Livestock Farming	University Graduate						
	High School Graduate						
Agro-Economy and Statistics	University Graduate						
	High School Graduate						
		3	13	21	31	39	39

The specific works by specialities of the staffs in the above table shall be shown in Table G.2.

G.7. Physical Planning of CAPIC

The CAPIC facilities to function for the items mentioned in paragraph G.4. are shown below.

(1) CAPIC Own Land

The CAPIC will formulate land consolidation standard and establish farming techniques in conformity with the land consolidation. For this purpose, comparative experiments will be conducted for each level of land consolidation, and such a training farm for farm machinery operation will be established. The areas by farm types are tabulated below.

Acreage Allocation of CAPIC Own Land

(Unit: ha)

	<u>Experimental Farm for small farm machinery system</u>	<u>Experimental Farm for medium farm machinery system</u>	<u>Training and Research farm</u>	<u>Total</u>
A-type farm	9.0	25.9	-	34.9
B-type farm			-	
C-type farm	4.0	-	-	4.0
Upland farm	-	-	1.9	1.9
Non-consolidated farm	4.0	-	-	4.0
Training farm for mechanized farming	-	-	3.0	3.0
Experimental farm for water management	-	-	2.0	2.0
<u>Total</u>	<u>17.0</u>	<u>25.9</u>	<u>6.9</u>	<u>49.8</u>

The layout of each farm is shown in Figures G.1 and G.2 herein attached.

(2) Farm Facilities and Offices

The following buildings for the main office and farm facilities will be erected to accommodate permanent technical staffs specified in paragraph G.6 and conduct trainings of ARTSC staffs under the medium-term program.

<u>Main Building</u>	<u>Permanent Staff</u>	<u>Trainee</u>	<u>Total</u>	<u>Space/ Man (sq.m)</u>	<u>Total Space (sq.m)</u>
1. Plan/Design Unit	12	9	21	6	126
2. Const. Machine Unit	5	-	5	4	20
3. Crop Farming Unit	6	4	10	4	40
4. Agri-machine Unit	6	-	6	4	24
5. Livestock Farm Unit	6	2	8	4	32
6. Agro-economy Unit	4	2	6	4	24
Sub-total	37	17	54	-	266
7. Drawing printing room					12
8. Material testing room (soil mechanical test, etc.)					30
9. Water quality testing room					15
10. Agricultural testing room					20
11. Livestock farming testing room					20
12. Copying/printing room					10
13. Micro-computer room					10
Sub-total					117
14. Conference hall					120
15. Office and Appurtenants					157
Total Net Space					660
<u>Construction Machinery Building:</u>					
Roofed motor pool					500
Yard					1,500
Spare parts store					56
Work shop					150
Office (*1)					24
Total Space					2,230
<u>Crop Farming/Agri-machinery Building:</u>					
Agri-input store					200
Store for agri-machine tool					240
Repair shop					100
Nursery preparation facilities					2,000
Rice Center (or country elevator)/store					2,500
Office (*2)					60
Total Space					5,100
<u>Livestock Farming Building:</u>					
Hay store					1,200
Animal shed					4,400
Milking room					500
Forage preparation facilities					480
Office (*3)					20
Total Space					6,600 sq.m

- *1 The facility can accommodate four permanent staffs and two trainees. (6 x 4 = 24 sq.m)
- *2 The facility can accommodate 20 persons including five permanent staffs (one staff will be selected at each party), six trainees for farming and nine trainees for farming machinery operation (20 x 3 = 60 sq.m)
- *3 The facility can accommodate two permanent staffs (one staff will be selected at each party) and three trainees. (5 x 4 = 20 sq.m)

G.8. Measures for Establishing CAPIC

It is recommended to take the following measure for successfully establishing the CAPIC.

- (1) The administration for CAPIC shall be institutionally established and the budgetary back-up shall be provided for the most appropriate operation of the institution.
- (2) The most suitable site for CAPIC shall be selected, in consideration of its functions and the necessary land acquisition shall be made in due time.
- (3) In the first project year, the mobilization of permanent staffs shall be made by inter-agencies transfer of staffs available at present among GDA of Mazandaran and its related organizations, and the new employment shall be made after the second project year for gradual increase in staffs.
- (4) The trainers for retraining of permanent staffs shall be assigned temporarily by the ready-available engineers/experts belonging to GDA of Mazandaran and its related organizations.
- (5) The buildings among many facilities of CAPIC shall be constructed one after another according to the progress of the CAPIC works and required functions; however, the main building and various warehouses shall be completed in the first phase. The Livestock farming building and some other facilities shall be provided in the second phase or when necessity arises.
- (6) The procurement of various equipment and materials shall be made to meet requirements of the expanding functions of CAPIC.
