PREFACE

In response to the request of the Government of the Republic of Rwanda, the Japanese Government decided to conduct a feasibility study on the Rural Water Supply Project in the Eastern Region (Kibungo Prefecture) of Rwanda, excluding the Akagera National Park and two cities of Kibungo and Rwamagana.

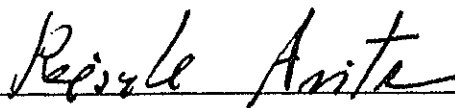

The study was entrusted to the Japan International Cooperation Agency (JICA) which sent to Rwanda a study team led by Hiroatsu NARITA of Chuo Kaihatsu Corporation. Based on the Preliminary survey made in two stage in 1983, the team carried out surveys from October 1984 to March 1985, and from May 1985 to November 1985.

The team exchanged views on the Project with the officials concerned of the Government of Rwanda during the survey. After the team returned to Japan, further studies were made and the present report has been prepared.

I hope that this report will serve to assist the development of the Project and contribute to the promotion of friendly relations between our two countries.

I wish to express my deep appreciation to the officials concerned of the Government of the Republic of Rwanda for their close cooperation extended to the team.

December, 1985

Dear Sir:

Letter of Transmittal

We are pleased to submit to you the Final Report for the Study on the Rural Water Supply Project in the Eastern Region, the Republic of Rwanda, prepared for consideration by the Government of the Republic of Rwanda in formulating a rural water supply scheme in the eastern region of the country by water resource development.

The Report consists of the Main Report and Supporting Report. The Main Report contains a review of the country and the study area background, analysis and evaluation of the ground water resources in the study area, the project scheme and its implementation. The supporting Report contains supporting data and technical details.

All members of the Study Team wish to express grateful acknowledgement to the personnel of your Agency, Ministry of Foreign Affairs, and Embassy of Japan in Zaire as well as officials and individuals of Rwanda for their assistance extended to the Study Team. The Study Team sincerely hopes that the study results will contribute to the future rural water supply system in Rwanda.

Sincerely yours,

Hirotsu NARITA
Team leader
