

LIST OF PLATES

PL. I-1	Geologic Map of the Surveyed Area (Rio Blanco)	1 : 5,000
PL. I-2	Geologic Map of the Surveyed Area (La Verde)	1 : 2,000
PL. I-3	Geologic Map of the Surveyed Area with Cross Section (Diamante)	1 : 5,000
PL. I-4	Geologic Map of the Surveyed Area with Cross Section (Bombona)	1 : 5,000
PL. I-5	Cross Section (Rio Blanco)	1 : 5,000
PL. I-6	Cross Section (La Verde)	1 : 2,000
PL. I-7	Results of Geochemical Survey for Cu, Mo (Rio Blanco) in Soils	1 : 5,000
PL. I-8	Results of Geochemical Survey for Cu, Mo (La Verde) in Soils	1 : 2,000
PL. I-9	Results of Geochemical Survey for Zn, As (Diamante) in Soils	1 : 5,000
PL. I-10	Results of Geochemical Survey for Zn, As (Bombona) in Soils	1 : 5,000
PL. I-11	Location Map of Soils and Rock Samples (Rio Blanco)	1 : 5,000
PL. I-12	Location Map of Soils and Rock Samples (La Verde)	1 : 2,000
PL. I-13	Location Map of Soils and Rock Samples (Diamante)	1 : 5,000
PL. I-14	Location Map of Soils and Rock Samples (Bombona)	1 : 5,000
PL. I-15	Main Part of the Diamante Mining Area with Longitudinal Section and Results of Chemical Analysis	1 : 2,000

- #### LEGEND
- Sedimentary rocks**
- Alternation of sandstone & shale
 - Black shale
 - Green volcanic rocks (siliceous green tuff)
- Intrusive rocks**
- Porphyrite
 - Silicified-chloritized micro diorite
 - Epidolized-chloritized micro diorite
 - Micro diorite (monzonitic)
- Other features**
- Fractured rock
 - Pyritization: weak (<1%), medium (1-2%), strong (2-5%)
 - Mineralized vein
 - Geological boundary
 - Bedding
 - Fault: visible & presumed
 - Portal
 - Cross section line (A-A')
 - f.g. Fina grained (porphyritic) ϕ 2mm
 - m.g. Medium grained (porphyritic) ϕ 3-5mm
 - c.g. Coarse grained ϕ 3-5mm
