Scale 1 : 50,000

LEGEND

Alluvial deposits	<b>a</b>	silt, sand and gravel
Bongabong Group	<b>Bo</b>	conglomerate, calcareous sandstone, calcareous siltstone to mudstone with andesitic tuff
Sablayan Group	<b>Sa</b>	limestone, calcareous sandstone, calcareous mudstone with andesite and andesitic tuff
Baco Group	<b>BL</b>	Lumintao Formation basalt with basaltic tuff, sandstone, shale, slate to phyllite, green slate
	<b>BM</b>	Mansalay Formation shale, sandstone, slate to phyllite, phyllitic sandstone with basalt and basaltic tuff
Halcon metamorphics	<b>HMms</b>	mica schist with green schist

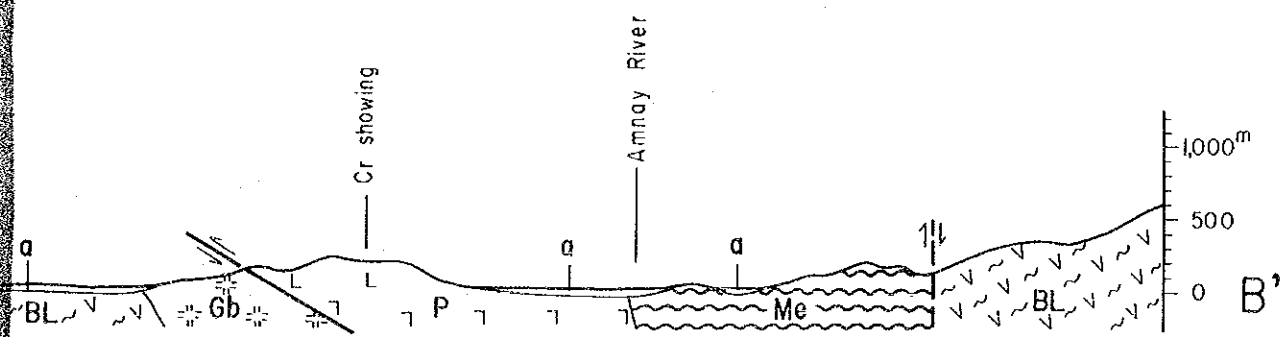

### LEGEND

Alluvial deposits	<b>a</b>	silt, sand and gravel
Bongabong Group	<b>Bo</b>	conglomerate, calcareous sandstone, calcareous siltstone to mudstone with andesitic tuff
Sablayan Group	<b>Sa</b>	limestone, calcareous sandstone, calcareous mudstone with andesite and andesitic tuff
Baco Group	<b>BL</b>	basalt with basaltic tuff, sandstone, shale, slate to phyllite, green slate
	<b>BM</b>	shale, sandstone, slate to phyllite, phyllitic sandstone with basalt and basaltic tuff
Halcon metamorphics	<b>HMms</b>	mica schist with green schist

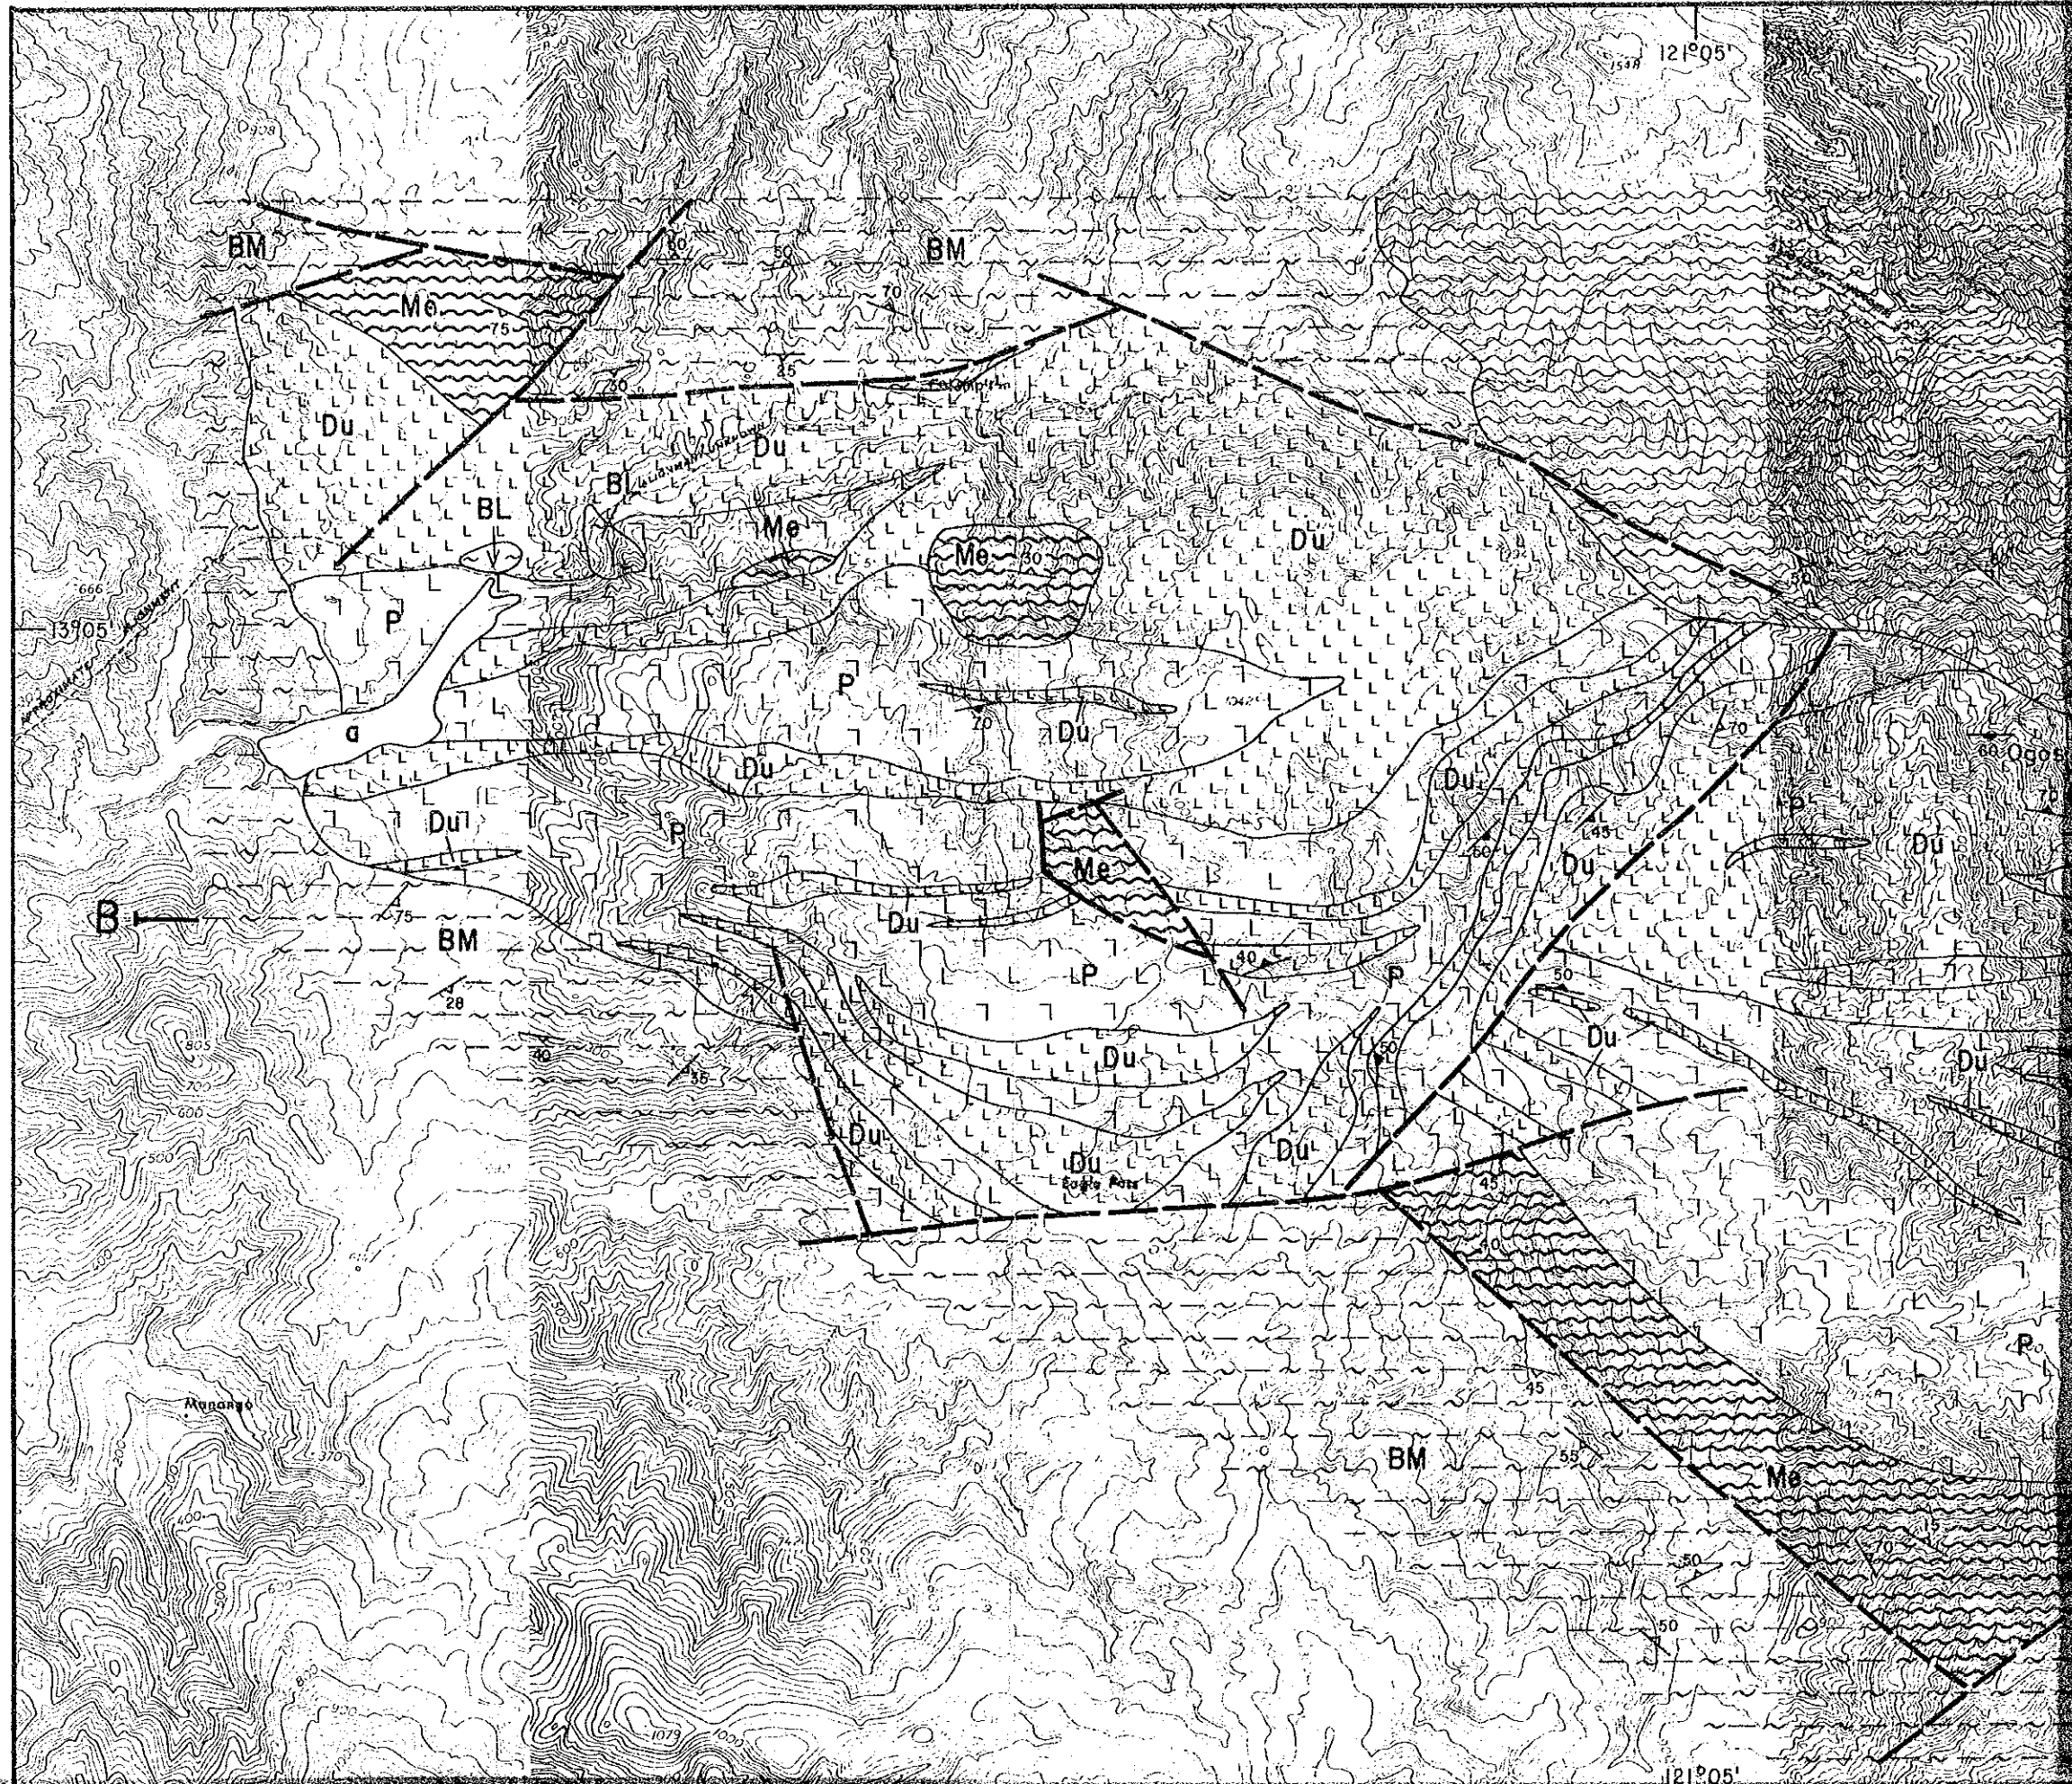

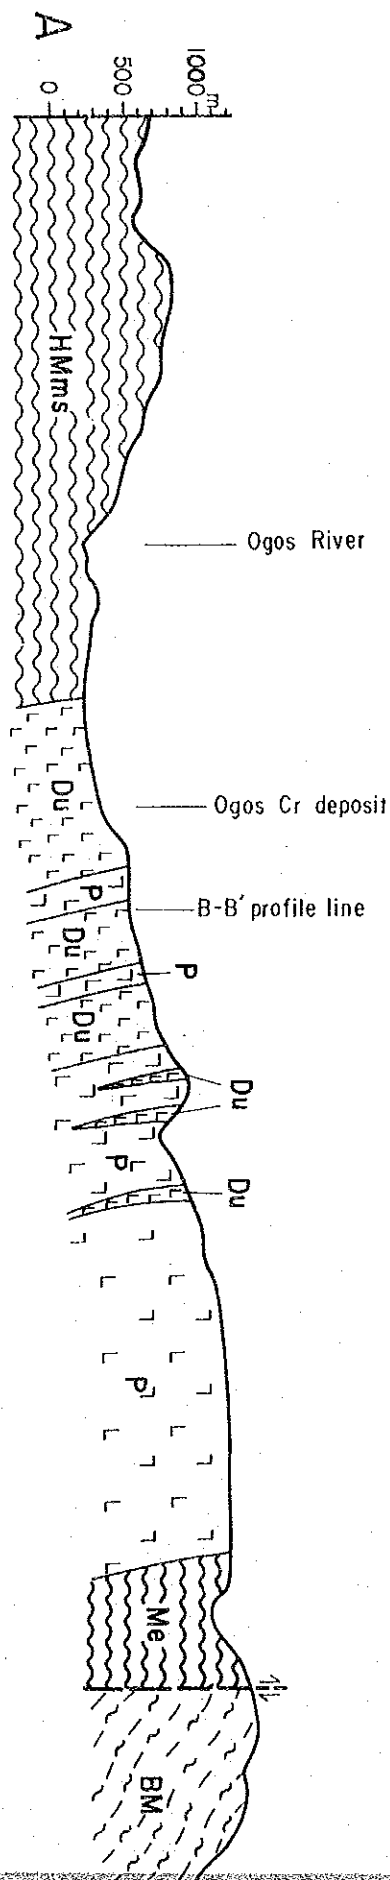

### Intrusive Rocks

Ultramafic complex	<b>P</b>	peridotite
	<b>Du</b>	dunite
	<b>Gb</b>	gabbro
	<b>Me</b>	amphibolite and green schist

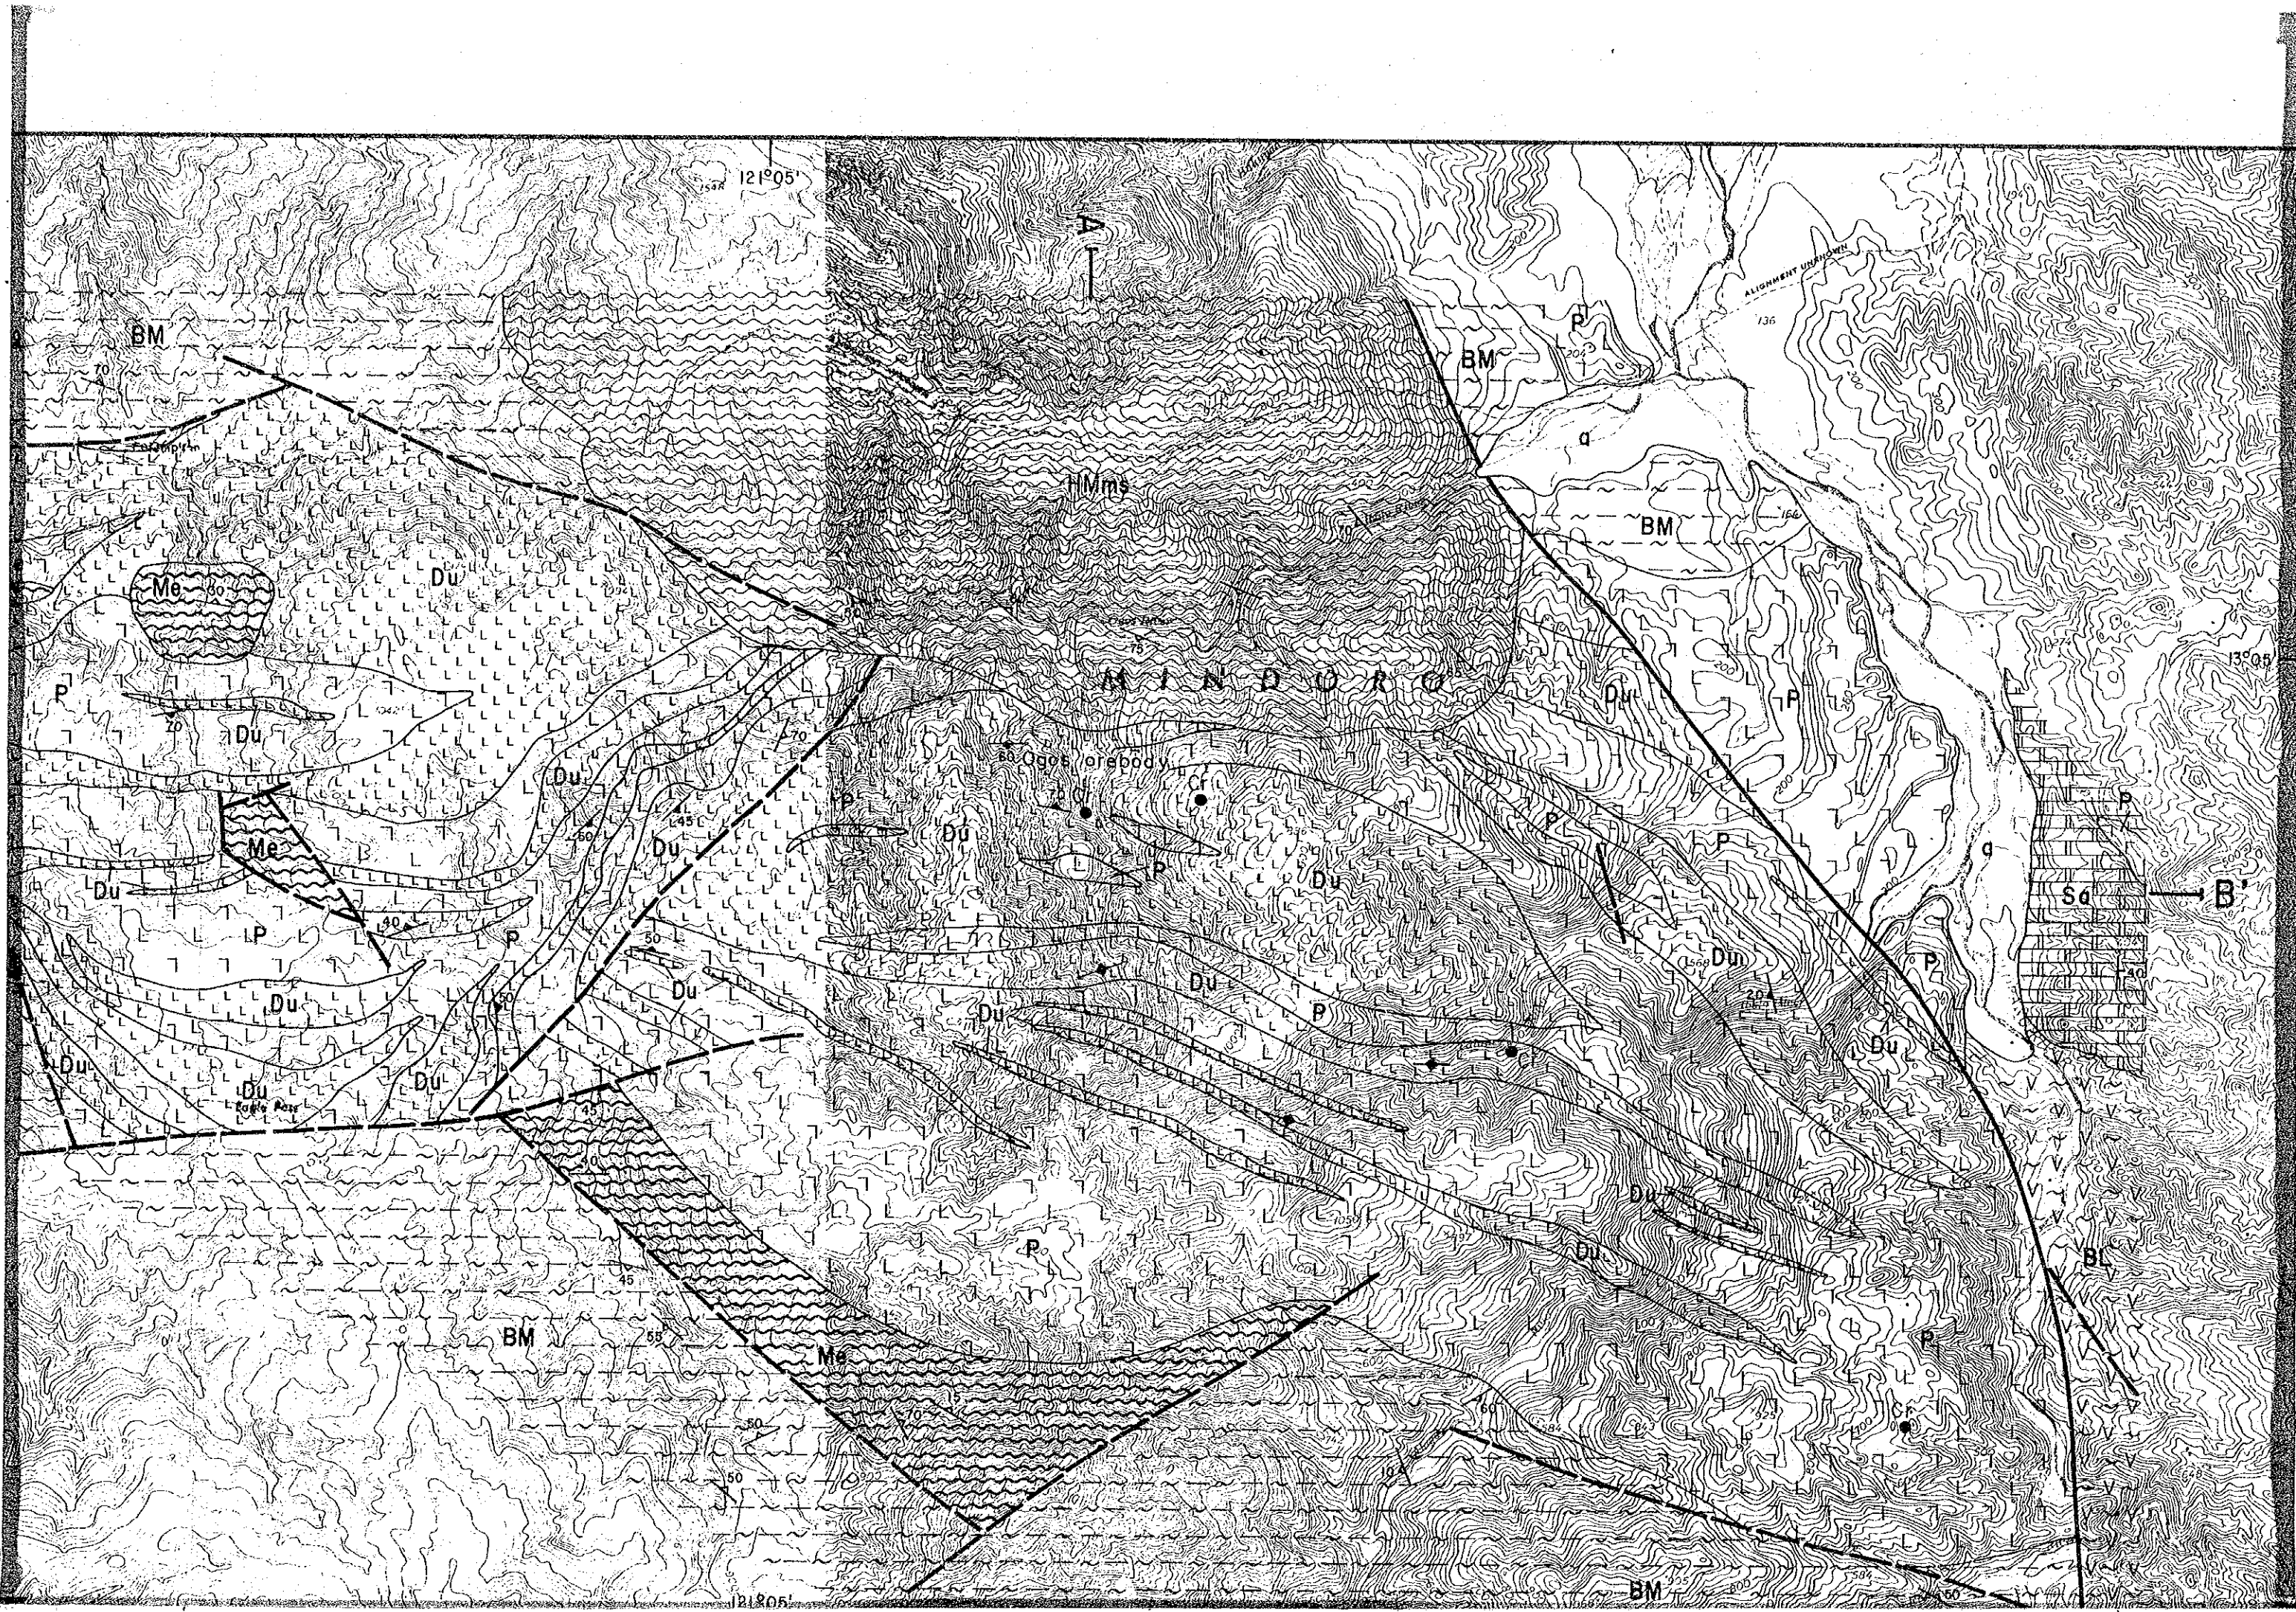

Anticline	Syncline
Fault (certain)	Fault (inferred)
Strike and dip	Schistosity
Layering	Chrome showing
Float of chromite ore	Profile line

**LEGEND**

Alluvial deposits		silt, sand and gravel	
Bongabong Group		conglomerate, calcareous sandstone, calcareous siltstone to mudstone with andesitic tuff	
Sabluyan Group		limestone, calcareous sandstone, calcareous mudstone with andesite and andesitic tuff	
Baco Group	Lumintao Formation		basalt with basaltic tuff, sandstone, shale, slate to phyllite, green slate
	Mansalay Formation		shale, sandstone, slate to phyllite, phyllitic sandstone with basalt and basaltic tuff
Halcon metamorphics		mica schist with green schist	

Intrusive Rocks

Ultramafic complex		peridotite
		dunite
		gabbro
		amphibolite and green schist

	Anticline		Syncline
	Fault (certain)		Fault (inferred)
	30 Strike and dip		50 Schistosity
	Layering		Cr Chrome showing
	Cr Float of chromite ore		A-A' Profile line
