2. The second part of the document is a list of the names of the members of the committee who have been appointed to the various sub-committees.

**APPENDIX VI      HYDROLOGICAL ANALYSIS BY TANK MODEL METHOD**

**VI - 1      Hydrological Analysis**

In the examination of the Julumito Hydro-electric Power Project, a hydrological analysis was made using the Tank Model Method, in order to supplement the run-off data of Julumito Gauging Station provided on the Rio Cauca.

**VI - 2      Precipitation Observation Station**

The locations of precipitation and run-off observation stations in the project area are indicated in Fig. VI-1. In carrying out this examination, as the precipitation observation station representing the Rio Cauca catchment basin, Coconuco Precipitation Observation Station, which has good correlations with precipitations of other stations in the same catchment area, was adopted.

**Table VI-1      Coefficient of Correlation of Precipitation Station**

Precipitation Station	Precipitation Station	Coefficient of Correlation
Coconuco	Popayan (Universidad)	0.720
	Popayan (Electraguas)	0.728
	Popayan (Machangara)	0.745
	Purace	0.800
Popayan (Universidad)	Popayan (Electraguas)	0.907
	Florida	0.871
Popayan (Electraguas)	Florida	0.885
Florida	Purace	0.768

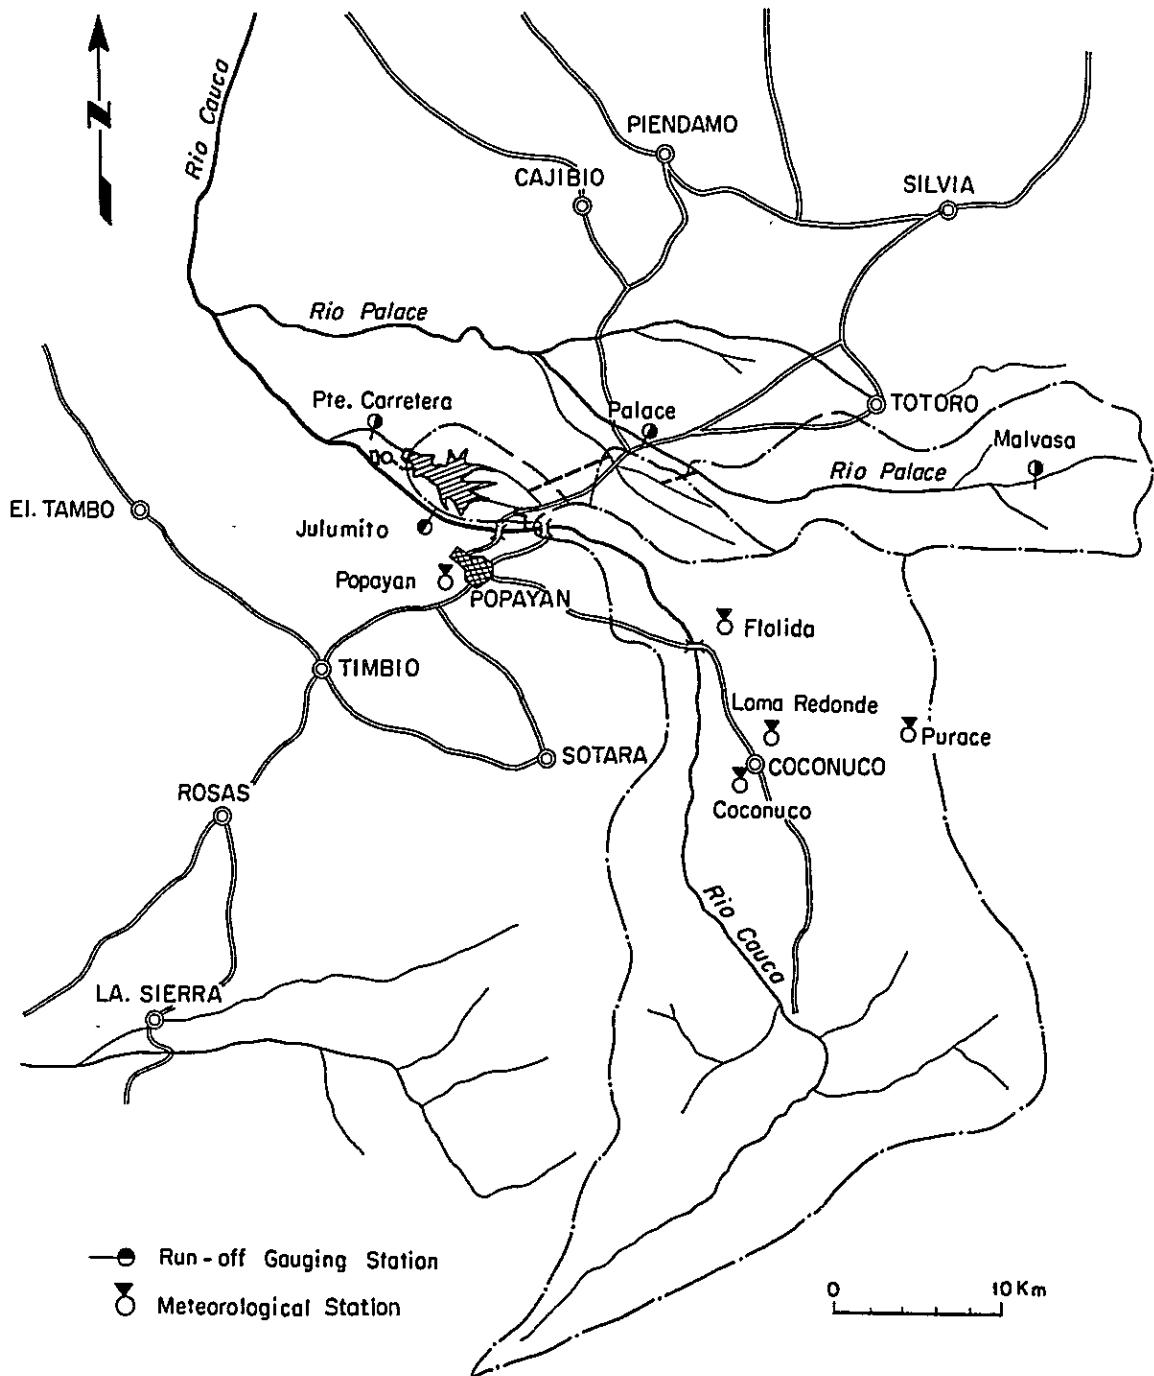

(Note) Coefficient of correlation in calculated according to the equation below.

$$r = \frac{\epsilon \cdot x \cdot y - \bar{x} \cdot \epsilon \cdot \bar{y}}{\sqrt{(\epsilon \cdot x^2 - \bar{x} \cdot \epsilon \cdot \bar{x}) (\epsilon \cdot y^2 - \bar{y} \cdot \epsilon \cdot \bar{y})}}$$

where,    r : coefficient of correlation

          x,y : precipitations at simultaneous time in two observation stations (mm)

Fig. VI-1 Location Map of Run-off and Meteorological Gauging Station

### VI - 3 Method of Analysis

As calculation methods for low water level discharge, there are the hydrograph analyses by the Storage Functions Method and the Tank Model Method. The Tank Model Method, which is generally used for low water level discharge calculations, will be used.

The periods requiring to supplement run-off data of Julumito Gauging Station are the 2 years 4 months from January 1962 to April 1964, and each days on which run-off records were missing up from April 1964 to December 1976.

In order to supplement the run-off data of Julumito Run-off Gauging Station by the Tank Model Method, verification for this analysis is done using the daily observation records of Julumito Run-off Gauging Station and Coconuco Precipitation Observation Station from April 1964 to December 1976.

Upon confirming the appropriateness of this analysis by the verification, the supplementations are made by this analysis.

### VI - 4 Tank Model Method

The basic idea of the Tank Model Method is explained below with the simple model shown in Fig. VI-2.

When water is introduced into a tank, the water level in the tank successively rises. However, a hole is provided at the bottom of the tank so that the stored water successively flows out. This relation is similar to that of rainfall and discharge in nature. The Tank Model Method utilizes this relationship.

In the Tank Model Method it is assumed that, the discharge ( $q$ ) from a tank is proportional to the storage height above the hole in the tank (depth of water  $h$ ). In effect, the relation between the two is expressed by the following equation:

$$q(t) = \alpha \cdot h(t)$$

where

$h$  : storage height in tank (depth)

$\alpha$  : run-off coefficient of hole

However, rainfall loss and delayed run-off cannot be expressed with (A). In order to express rainfall loss, the model of (B) with the outlet hole provided at the side at a height  $h_e$  from the bottom is considered.

In this case, when there is no rainfall for some while and the tank is empty, and when there is rainfall less than the amount to reach he, the water level in the tank will not rise to the discharge outlet so that discharge will not occur. The rainfall loss is expressed as above and he indicates the limit rainfall loss. This model may be acceptable for the first rainfall, but it cannot express the losses of the second and subsequent rainfalls, so that it is necessary to consider a model (C) with a hole (infiltration hole) provided at the bottom. The discharge from the infiltration hole corresponds to the quantity of underground seepage water, which is important in the calculation of the low water level discharge. When such tanks are connected in a series, it will be possible to express time lag.

When discharge calculations are made by the Tank Model Method, a number of tanks each having a plural number of outlet holes and one infiltration hole is arranged in a series of several stages in general.

As a result of repeated investigation, calculations by this analysis were made using a three-stage series of tank models indicated as (D).

#### VI - 5 Calculation Results

Based on the initial values, numerous trial calculations were made varying multipliers, hole heights and initial storage heights of the various tanks.

The results of the calculations are as shown in Table VI-2 and Fig. VI-2.

Fig. VI-2 (4) Comparison between Actual Run-off and Estimated Run-off

1. The first part of the document is a list of names and addresses.

2. The second part of the document is a list of names and addresses.

3. The third part of the document is a list of names and addresses.

4. The fourth part of the document is a list of names and addresses.

5. The fifth part of the document is a list of names and addresses.

6. The sixth part of the document is a list of names and addresses.

7. The seventh part of the document is a list of names and addresses.

8. The eighth part of the document is a list of names and addresses.

9. The ninth part of the document is a list of names and addresses.

10. The tenth part of the document is a list of names and addresses.

11. The eleventh part of the document is a list of names and addresses.

12. The twelfth part of the document is a list of names and addresses.

13. The thirteenth part of the document is a list of names and addresses.

14. The fourteenth part of the document is a list of names and addresses.

15. The fifteenth part of the document is a list of names and addresses.

16. The sixteenth part of the document is a list of names and addresses.

17. The seventeenth part of the document is a list of names and addresses.

18. The eighteenth part of the document is a list of names and addresses.

19. The nineteenth part of the document is a list of names and addresses.

20. The twentieth part of the document is a list of names and addresses.

21. The twenty-first part of the document is a list of names and addresses.

22. The twenty-second part of the document is a list of names and addresses.

23. The twenty-third part of the document is a list of names and addresses.

24. The twenty-fourth part of the document is a list of names and addresses.

25. The twenty-fifth part of the document is a list of names and addresses.

26. The twenty-sixth part of the document is a list of names and addresses.

27. The twenty-seventh part of the document is a list of names and addresses.

28. The twenty-eighth part of the document is a list of names and addresses.

29. The twenty-ninth part of the document is a list of names and addresses.

30. The thirtieth part of the document is a list of names and addresses.

31. The thirty-first part of the document is a list of names and addresses.

32. The thirty-second part of the document is a list of names and addresses.

33. The thirty-third part of the document is a list of names and addresses.

34. The thirty-fourth part of the document is a list of names and addresses.

35. The thirty-fifth part of the document is a list of names and addresses.

36. The thirty-sixth part of the document is a list of names and addresses.

37. The thirty-seventh part of the document is a list of names and addresses.

38. The thirty-eighth part of the document is a list of names and addresses.

39. The thirty-ninth part of the document is a list of names and addresses.

40. The fortieth part of the document is a list of names and addresses.

41. The forty-first part of the document is a list of names and addresses.

42. The forty-second part of the document is a list of names and addresses.

43. The forty-third part of the document is a list of names and addresses.

44. The forty-fourth part of the document is a list of names and addresses.

45. The forty-fifth part of the document is a list of names and addresses.

46. The forty-sixth part of the document is a list of names and addresses.

47. The forty-seventh part of the document is a list of names and addresses.

48. The forty-eighth part of the document is a list of names and addresses.

49. The forty-ninth part of the document is a list of names and addresses.

50. The fiftieth part of the document is a list of names and addresses.
