PREFACE

In response to a request from the Government of the Kingdom of Thailand, the Government of Japan decided to conduct the Topographic Mapping of Bangkok Metropolitan Area and entrusted the project to the Japan International Cooperation Agency (JICA).

JICA sent to Thailand a study team headed by Mr. Tositomo Kanakubo comprised of members from International Engineering Consultants Association and Kokusai Kogyo Co., Ltd. from September, 1986 to March, 1989.

The team conducted the field surveys including taking of aerial photographs in close cooperation with the authorities concerned of Thailand.

After the team returned to Japan, such works as aerial triangulation, stereoplotting, compilation and drafting were carried out and original topographic maps of 1/4,000, composite negative films of 1/10,000 and the present report were prepared. Further, the printing of maps was carried out in Thailand in response to the request of the Government of Thailand.

I hope that this report together with the above maps will be used effectively for formulating development plans of the region and contribute to the promotion of the friendly relations between our two countries.

I wish to express my sincere appreciation to officials concerned of the Government of the Kingkom of Thailand for their close cooperation extended to the team.

March 29, 1989

Kenenta Yanag

Kensuke Yanagiya President Japan International Cooperation Agency

His Excellency Mr. Kensuke Yanagiya President Japan International Cooperation Agency Tokyo, Japan

Letter of Transmittal

Dear Sir:

In response to your request, we are pleased to formally submit herewith the general report on "Topographic Mapping of Bangkok Metropolitan Area" which has been conducted since F.Y. 1986.

This report generalize the progress of study and the technical aspects. The study was undertaken by International Engineering Consultants Association in a joint-venture with Kokusai Kogyo Co., Ltd. from September 1986 to March 1989.

The outcome of study was two kinds of 61 multi-color composite negatives (for an English and a Thai version) of the 1:10,000 topographic map for Bangkok Metropolitan area and two kinds of 40 drafting sheets (for an English and a Thai version) of the central area of Bangkok on the basis of the 1:20,000 aerial photographs.

We are convinced that the report would, together with these results, be fully utilized as the basic materials for urban development of Bangkok and contribute to the future development of Thailand.

We wish to express my sincere appreciation to the officials concerned of the Japanese Government for giving their appropriate direction during the study as well as to the officials concerned of the Bangkok Metropolitan Administration, the Royal Thai Survey Department and the Japanese Embassy in Thailand for their close cooperation during the study.

Very truely yours

Canakubo

Tositomo Kanakubo Team Leader The Topographic Mapping of Bangkok Metropolitan Area
