PROJECT ML - 6

Changwat: Ratchaburi

C. Ratchaburi - J. R. 35

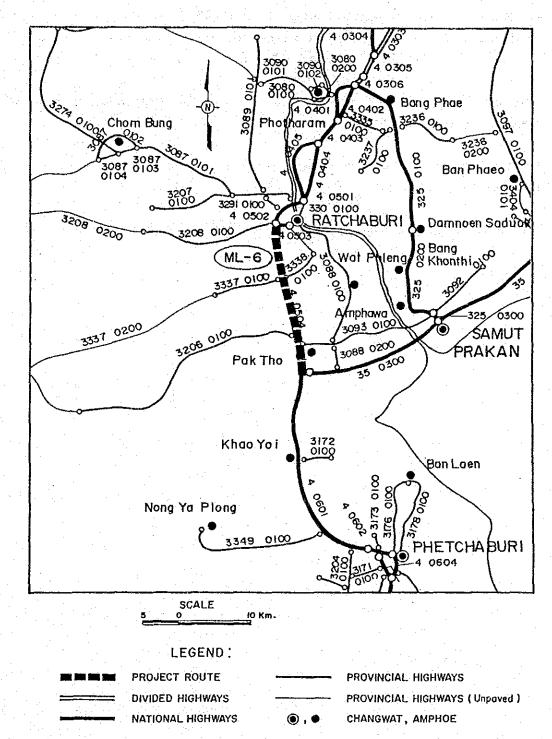

Length: 22.20 km

## SUMMARY

#### PROJECT ML-6

Item	Description
Changwat	Ratchaburi
Origin	C. Ratchaburi (J.R.3208)
Destination	J.R. 35
Length	
Total	22.8 km
Improvement Section	22.8 km
DOH Road	No.4 22.8 km
Others	
New Construction Section	
Surface Type and Condition	AC Surfacing/Fair
Terrain	Flat
Traffic (ADT)	
Existing	8,004
2000	21,925
2008	32,583
Existing Standard	P1
Proposed Standard	PD
Construction Cost	
Financial	155,216 Baht
Economic	129,111 Baht
IRR	29.6%
B/C	2.95

#### LOCATION OF PROJECT ROUTE

#### 1. GENERAL

The project section is a part of Route 4 and lies in Changwat Ratchaburi from the junction with Route 3208 to the junction with Route 35, the Thonburi-Pak Tho Highway, with a total length of 22.8 km. The existing road has a two-lane asphaltic concrete carriageway of 7.00 m width and 2.50-m shoulders. The terrain is flat. Land use in the surrounding area is paddy field with little unused land. Sugarcane is grown in the area along the last 3 km of this section. Horizontal alignment is good throughout the length, but there are some bridge approaches where vertical alignment is less than desirable.

Traffic is heavy as the road shares traffic between Bangkok and the Southern Region with the Thonburi-Pak Tho Highway.

This project is therefore planned to accommodate traffic which is expected to increase.

#### 2. TRAFFIC (Growth Rate Method)

#### Base Traffic Volume

	Section	Year	MC	PC	LB	НВ		MT	HT	ADT
ML-6	4-0502	1986	3820	2346	337	347	2928	931	1115	8004

#### Traffic Growth Rate

Route	Period	MC	PC	ĽB	HB	LT	MĽ	HT	ADT
ML-6	- 1993	9.53	10.15	8.32	7.61	9.72	8.68	9.85	9.53
	1994 - 2000	5.34	5.81	5.50	4.90	5.36	4.59	5.07	5.34
	2001 - 2008	5.12	5.76	4.80	3.90	4.94	4.61	4.58	5.12

## 6. DEVELOPMENT AND SOCIAL IMPACTS

Combined with the already planned improvement of other sections of Route 4, the completion of this project would further help the integration of economies of the Southern and Central Regions. Aside from the development directly related with traffic such as gas stations, impact on the productive activities in the surrounding area would be small.

## LOCATION OF PROJECT ROUTE

## 1. GENERAL

The proposed project is to expand Route 304 from Amphoe Min Buri to Muang Chachoengsao from the existing two to four lanes. The total length of the project is 41.0 km.

The terrain is flat, and both sides of the road are fully cultivated with paddy.

The existing road has an asphalt concrete carriageway of 6.00 m width and 2.00-m wide shoulders. The surface condition is fair to poor. There are 32 bridges, but horizontal and vertical alignments are good.

As the road is the main road connecting Chachoengsao with Bangkok, traffic is heavy and is expected to grow further.

Therefore, this project is proposed to accommodate the increase in future traffic.

#### 2. TRAFFIC (Growth Rate Method)

#### 6. DEVELOPMENT AND SOCIAL IMPACTS

It is not likely that expanded Route 304 would induce changes in agricultural production patterns in the surrounding area as it is already served by a paved road. Due to its proximity to Bangkok and relatively good and inexpensive land readily available along the road, industrial development may take place such as along Route 34, although the level of development would be less than those along Route 34.

Changwat : Nonthaburi

B. Bang Muang - A. Lat Lum Khaew

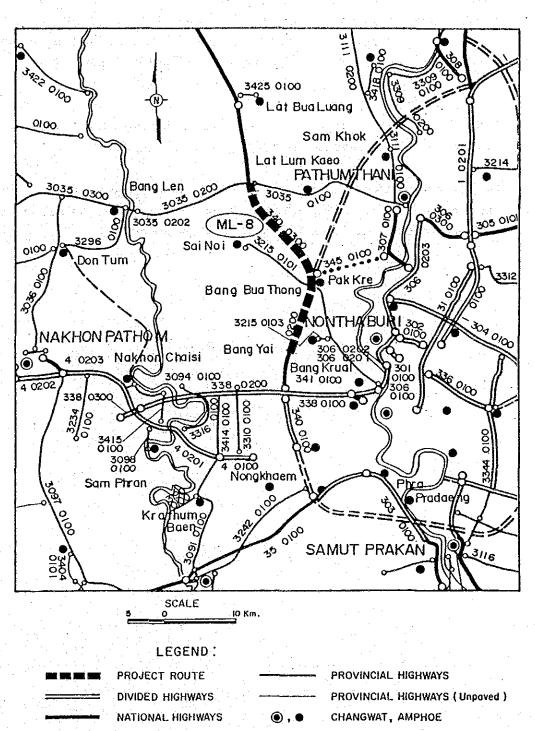

Length : 25.60 km

#### SUMMARY

#### PROJECT ML-8

Item	Description
Changwat	Nonthaburi
Origin	B. Bang Muang
Destination	A. Lat Lum Khaew (J.R. 3035)
Length	A. Dat Bum Miden (U.M. 5000)
Total	25.6 km
Improvement Section	25.6 km
DOH Road	No.340 25.6 km
Others	
New Construction Section	
Surface Type and Condition	AC Surfacing // Fair
Terrain	Flat
Traffic (ADT)	
Existing	5,569
2000	14,258
2008	21,311
Existing Standard	P1, S1
Proposed Standard	PD, SD
Construction Cost	
Financial	254,890 Thousand Baht
Economic	212,022 Thousand Baht
IRR	24.7%
B/C	2.46

## LOCATION OF PROJECT ROUTE

## 1. GENERAL

The proposed project is to expand the number of lanes from the existing two to four for the section of Route 340 from a point 5 km north of the junction with Route 338 in Ban Bang Muang to Amphoe Lat Lum Khaew. The section from the start to Amphoe Bang Bua Thong is to form a part of the Outer Ring Road. The section of Route 340 from the junction with Route 338 to the start of the project road has already been constructed as a four-lane divided highway. The project is thus intended to extend the four-lane divided highway northward.

The terrain is flat, and surrounding land use is almost entirely paddy fields. There are 10 permanent bridges along the route. The existing road has a cross-section with an asphalt pavement width of 7 to 8 m and its surface condition is generally fair.

Traffic is heavy, on the order of 5000 to 6000 ADT, and it is expected that the traffic volume will exceed 10,000 ADT by 1993. When completed, this road would greatly enhance the accessibility of the area northwest of Bangkok to the Bangkok area.

#### 2. TRAFFIC (Growth Rate Method)

#### **Base Traffic Volume**

#### 6. DEVELOPMENT AND SOCIAL IMPACTS

Upon completion of the project road as a four-lane divided highway, development can be expected at and near the intersection of Route 340 as the Outer Ring Road and Route 338 (Bangkok Noi-Nakhon Chaisi Highway). Changwat Suphanburi will increase in importance in the area.
