IDRIS (Inter-agency Development Research Information System)

Suppliers:

There are presently seven organizations cooperating in this project:

Board on Science and Technology for International Development (BOSTID), Washington, D.C., USA

German Appropriate Technology Exchange (GATE), Eschborn, Federal Republic of Germany

International Development Research Centre (IDRC), Ottawa, Canada

International Foundation for Science (IFS), Stockholm, Sweden

Japan International Cooperation Agency (JICA), Tokyo, Japan

Swedish Agency for Research Cooperation with Developing Countries (SAREC), Stockholm, Sweden

United Nations University (UNU), Tokyo, Japan

Note: Also included in the data base are a few project records from the Netherlands Universities Foundation for International Cooperation (NUFFIC), The Hague, Netherlands

Content:

This data base provides information describing the research activities located in, or concerned with, developing countries, and funded or coordinated by the agencies mentioned above. Included in this data is the project description, the name of the recipient institution(s), the researchers' names, the geographical area under study, the subject headings, and the amount of funds committed.

NRC

Supplier: Energy Research Group (a joint project of the International Development Research Centre, Ottawa, Canada and the United Nations University, Tokyo, Japan.)

Content: The focus of the NRC data base is on information about energy problems facing developing countries, but there are also items on energy in general. The data base is composed of about 50% books and 50% journal articles and conference papers.

Period of Coverage: The project began in 1983, but the data base includes many pre-1983 documents as well.

Updating Frequency: Irregular

Size: 5,922 references

Indexing Language: English

Thesaurus Used: None; uses their own descriptor list (see list following)

Document Location: The IDRC Library is able to provide most of the references which have either IDRC or ERG in the Location field.

Default QUERY Field: Subject Descriptors (SUBDES, C220)

The descriptor field includes alpha-numeric codes as well as descriptors. There is considerable overlap between these two types of subject headings, but this was originally done for internal reasons. For best results, use both when searching.

Default Print Format: NRG2 (bibliographic citation)

Alternate Print Formats: NRG1 (shorter format - gives title, date, ISN, call number and location)
