

tools used in metal working units) is classified in the appropriate class of group 292 (special purpose machinery).

Spraying machinery specialized for use in agriculture is classified in class 2921 (agricultural and forestry machinery).

Metal or glass rolling machinery is classified in class 2923 (machinery for metallurgy) and 2929 (other special purpose machinery), respectively.

Cream separators are classified in class 2925 (machinery for food, beverage and tobacco processing).

Apparatus for filtering or purifying food is also classified in class 2925.

Industrial clothes driers are classified in class 2929 (other special purpose machinery).

Domestic refrigerating or freezing equipment is classified in class 2930 (domestic appliances n.e.c.).

Fans used chiefly in homes or offices are also classified in class 2930.

Sensitive balances are classified in class 3312 (instruments and appliances for measuring, checking, testing, navigating and other purposes, except industrial process control equipment).

COVERAGE OF THE SUB-CLASS

Code	Title	Quantitative unit	Coverage
291911	Producer gas/ water gas; acetylene gas/ similar gas generators	No.	Incl.; Similar water process gas generators; distilling or rectifying plant; heat exchange units; machinery for liquefying air or gas
291912	Air conditioning machines	No.	-
291913	Refrigerating and freezing equipment/heat pumps	No.	Excl.; Household type equipment
291914	Filtering or purifying machinery/ apparatus	No.	Incl.; Those for liquids or gases, except oil filters; petrol filters and air intake filters for internal combustion engines

2921 Agricultural and forestry machinery

DEFINITION OF THE CLASS: This class includes:

- tractors used in agriculture or forestry, walking (pedestrian controlled) tractors. Tractors fitted with winches or devices to facilitate attachment or control of implements or power take-off units, earth moving or other materials handling equipment.
- self-loading or self-unloading trailers or semi-trailers designed for agricultural purposes.
- agricultural, horticultural or forestry machinery for soil preparation, planting or fertilizing the crop, including: ploughs; harrows, weeders, hoes, seeders, manure spreaders, thinners etc., whether or not self-propelled. Manufacture of animal drawn machinery is included.
- harvesting or threshing machinery: combined harvester-threshers; harvesters for cotton, maize (corn), fruit, roots or tubers; mowers (lawn, hay or other mowers including cutter bars); balers; cleaning, sorting or grading machines for eggs, fruit or other crops. Manufacture of self-propelled, tractor- or animal-drawn machinery.
- milking machines.
- spraying machinery for agricultural use.
- other machinery used in agriculture, animal husbandry, horticulture or forestry: poultry keeping machinery, equipment for preparing fodder, bee-keeping machinery, etc.

Exclusions: Hand tools used in agriculture, horticulture and forestry are classified in class 2893 (cutlery, hand tools and general hardware).

Conveyors for farm use are classified in class 2915 (lifting and handling equipment).

Works trucks and platform tractors are also classified in class 2915, whereas manufacture of tractors used in construction or mining is classified in class 2924 (machinery for mining, quarrying and construction).

Cream separators are classified in class 2925 (machinery for food, beverage and tobacco processing).

Over-the-road tractors for semi-trailers are classified in class 3410 (motor vehicles).

COVERAGE OF THE SUB-CLASS

Code	Title	Quantitative unit	Coverage
292111	Agricultural, or machinery for soil preparation/cultivation/the like	No.	Incl.; Horticultural or forestry machinery for soil preparation or cultivation; lawn or sports-ground rollers
292112	Mowers for lawns, parks/sports-grounds	No.	-
292113	Other mowers; straw/fodder balers; threshing machinery/the like	No.	Incl.; Other haymaking machinery; other harvesting machinery
292114	Pedestrian controlled tractors	No.	Excl.; Those of the type used on railway station platforms
292115	Other tractors	-	Excl.; Track-laying tractors, road tractors for semi-trailers and tractors of the type used on railway station platforms
292116	Mechanical appliances for projecting, liquids/powders	No.	Incl.; Those for dispersing or spraying liquids or powers for agriculture or horticulture
292117	Self-loading/self-unloading trailers	No.	Incl.; Semi-trailers for agricultural purposes
292118	Machines for cleaning/sorting eggs, fruit, dried leguminous vegetables etc; milking machines/the like	No.	Incl.; Those for grading eggs, fruit, seed, grain, dried leguminous vegetables or other agricultural produce; milking machines; poultry incubators and brooders; agricultural, horticultural, forestry, poultry-keeping or bee-keeping machinery, n.e.c.

Code	Title	Quantitative unit	Coverage
292119	Parts for the goods of 2921-11 to -13	-	Incl.; Parts of machines for cleaning, sorting or grading eggs, fruit or other agricultural produce; parts of poultry incubators and brooders; parts n.e.c. of agricultural, horticultural, horestry, poultry- keeping or bee-keeping machinery
292191	Commission work	-	-
292192	Repair service	-	-

2922 Machine-tools

DEFINITION OF THE CLASS: This class includes:

- machine-tools for working metal or other material such as wood, stone, cork, bones, hardened rubber, hard plastics, cold glass etc.
- machine-tools for turning, drilling, milling, shaping, planing, boring, grinding or performing other operations.
- stamping or pressing machine-tools. Punch presses, hydraulic presses, shears, slitters, breaks, drop-hammers, forging machines and so forth. Manufacture of draw-benches, thread rollers or machines for working wire.
- machine-tools of simple design (e.g. foot-operated kick-presses), of traditional design (e.g. manually controlled motor-driven), of advanced design (e.g. numerically controlled, multi-station transfer machines).
- machine tools for working any material by removal of material by laser beam or similar processes.
- machines for nailing, stapling, glueing or otherwise assembling wood, cork, bone, hard rubber, hard plastics or similar hard materials.
- gas or electric welding, brazing or soldering machines whether or not capable also of cutting metal. Included is manufacture of machines which use a laser or other light or photon beam, ultrasonic waves, an electron beam, a magnetic pulse or a plasma arc.
- tools for working in the hand with self-contained electric or non-electric motor or with pneumatic drive. Manufacture of rotary or rotary percussion drills, chain saws, filing machines, wire brush machines, hammers, riveters, sheet metal cutters among others.
- presses for the manufacture of particle board or fibre building board of wood or other ligneous materials and other machinery for treating wood or cork.
- parts and accessories for the machine-tools classified here such as work holders (chucks, face plates), dividing heads and other special attachments for machine-tools.

Exclusions: Interchangeable tools for hand tools or machine-tools (drills, punches, dies, taps, milling cutters, turning tools, saw blades, cutting knives, and plates, sticks, tips and the like of sintered metal, carbides or cermets) are classified in class 2893 (cutlery, hand tools and general hardware).

Machinery used in metal mills or foundries are classified in class 2923 (machinery for metallurgy).

Machinery for mining and quarrying are classified in class 2924.

A rock drill that cannot be held in the hand during operation is considered to be manufactured in activity class 2924 (machinery for mining, quarrying and construction) but a hand held pneumatic rock drill remains classified here.

COVERAGE OF THE SUB-CLASS

Code	Title	Quantitative unit	Coverage
292211	Machine-tools for working any material by removal of material, by laser/other light/photon beam	No.	Incl.; Electro-discharge, electro-chemical, electron beam, ionic beam or plasma arc processes
292212	Machining centres/the like, for working metal	No.	Incl.; Unit construction machines (single station) and multi-station transfer machines, for working metal
292213	Lathes for removing metal	No.	-
292214	Machine-tools for threading/tapping by removing metal	No.	-
292215	Machine-tools for threading/tapping by removing metal	No.	Excl.; Lathes and way-type unit head machines
292216	Machine-tools for deburring, sharpening, grinding, otherwise finishing metal	No.	Incl.; Those for honing, lapping, polishing or otherwise finishing metal, sintered metal carbides or cermets by means of grinding stones, abrasives or polishing products; machine-tools for planin
292217	Machine-tools for working metal by forging, hammering/die-stamping	No.	Incl.; Machine-tools for working metal by bending, folding, straightening, flattening, shearing, punching or notching; other presses for working metal or metal carbides
292218	Machine-tools n.e.c. for working metal	-	Incl.; Those for sintered metal carbides or cermets, without removing material
292221	Machine-tools for working stone, ceramics, concrete/the like	No.	Incl.; Those for asbestos-cement or like mineral materials or for cold working glass

Code	Title	Quantitative unit	Coverage
292222	Machine-tools for working wood, cork, bone/the like	No.	e.g. Those for working wood, cork, bone, hard rubber, hard plastics or similar hard materials; presses for the manufacture of particle board or fibre building board of wood or other ligneous materials and other machinery for treating wood or cork
292231	Tools for working in the hand	No.	e.g. Those working in the hand, pneumatic or with self-contained non-electric motor
292232	Electro-mechanical tools for working in the hand, self-contained electric motor	No.	e.g. Those for working in the hand, with self-contained electric motor
292240	Machinery and apparatus for soldering, brazing/welding	No.	Incl.; Gas-operated surface tempering machines and appliances; electric machines and apparatus for hot spraying of metals or sintered metal carbides
292251	Tool holders, self-opening dieheads, work holders	No.	Incl.; Dividing heads and other special attachments for machine-tools; tool-holders for any type of tool for working in the hand; other parts and accessories for the goods of class
292252	Parts and accessories for the goods of 2922-21	-	Incl.; Parts and accessories of machine tools for working wood, bone, hard plastics and the like
292253	Parts for the goods of 2922-31	-	-
292254	Parts for the goods of 2922-32	-	-

292292	Repair service	-	-

2923 Machinery for metallurgy

DEFINITION OF THE CLASS: This class includes machines and equipment for handling hot metals: converters, ingot moulds, ladles and casting machines of a kind used in metallurgy or in metal foundries. Manufacture of metal-rolling mills and rolls for such mills.

Exclusions: Draw-benches for bars, tubes, profiles, wire or the like are classified in class 2922 (machine-tools).

Moulding boxes and moulds (except ingot moulds) and of machines for forming foundry moulds are classified in class 2929 (other special purpose machinery).

COVERAGE OF THE SUB-CLASS

Code	Title	Quantitative unit	Coverage
292310	Converters, ladles, ingot moulds/casting machines	No.	e.g. Converters, ladles, ingot moulds and casting machines, of a kind used in metallurgy or in metal foundries; metal-rolling mills
292320	Parts for the goods of 2923-10	-	Incl.; rolls for rolling mills
292391	Commission work	-	-
292392	Repair service	-	-

2924 Machinery for mining, quarrying and construction

DEFINITION OF THE CLASS: This class includes:

- lifting and handling machinery specially designed for use underground, e.g. conveyors. Manufacture of boring or sinking machinery, whether or not intended for use underground.
- machinery for treating minerals by screening, sorting, separating, washing, crushing, grinding, mixing, kneading or similar processes including concrete or mortar mixers, moulders, extruders, etc.
- track-laying tractors and tractors used in construction or mining.
- bulldozers and angledozer. Manufacture of other earth moving machinery, whether or not self-propelled, graders, levellers, scrapers, mechanical shovels, excavators, shovel loaders, tamping machines and road rollers.
- pile-drivers and pile-extractors, and compacting machines.
- machines used in construction not elsewhere classified or included: mortar spreaders, road building equipment (e.g. bitumen spreaders) machinery for surfacing concrete (grooving, smoothing, checkering), etc.
- bulldozer and angledozer blades and other parts specialized for the machines mentioned above.

Exclusions: Agricultural tractors are classified in class 2921 (agricultural and forestry machinery).

Machine-tools for working stone, including machines for splitting or cleaving stone, are classified in class 2922 (machine-tools).

COVERAGE OF THE SUB-CLASS

Code	Title	Quantitative unit	Coverage
292411	Continuous-action elevators/conveyors	No.	e.g. Continuous-action elevators and conveyors, for goods or materials, specially designed for underground use
292412	Coal/rock cutters/tunnelling machinery	No.	Incl.; Other boring and sinking machinery
292421	Bulldozers/angledozers, self-propelled	No.	-
292422	Graders/levellers, self-propelled	No.	-

Code	Title	Quantitative unit	Coverage

292426	Mechanical shovels, excavators/shovel loaders, self-propelled	No.	Incl.; Shovel loaders, self-propelled, with a 360-degree revolving superstructure, except front-end shovel loaders
292427	Mechanical shovels, excavators/shovel loaders	No.	Incl.; Front-end shovel loaders and machinery with a 360-degree revolving superstructure; moving, grading, levelling, scraping, excavating, tamping, compacting, extracting or boring
292429	Bulldozer/angledozer blades	No.	-
292430	Pile-drivers/pile-extractors/the like	No.	Incl.; Snow-ploughs and snow-blowers; other moving, grading, levelling, scraping, excavating, tamping, compacting, extracting or boring machinery, not self-propelled, for earth, minera
292440	Machinery for sorting, screening, separating, washing, crushing, grinding, mixing/kneading earth, stone, ores/other mineral substances	No.	Incl.; Machinery for agglomerating, shaping or moulding solid mineral fuels, cerami

Code	Title	Quantitative unit	Coverage
292450	Track-laying tractors	No.	-
292461	Parts n.e.c. of boring/ sinking machinery	-	Incl.; Parts n.e.c. or of derricks, cranes, mobile lifting frames, straddle carries and works trucks fitted with a crane; parts n.e.c. of moving, grading, levelling, scraping, excava
292462	Parts for the goods of 2924-40	-	
292491	Commission work	-	-
292492	Repair service	-	-

2925 Machinery for food, beverage and tobacco processing

DEFINITION OF THE CLASS: This class includes:

- machinery chiefly employed by the dairy industry: cream separators; milk processing machinery (homogenizers and irradiators); milk converting machinery (butter churns, butter workers and moulding machines); cheese-making machines (homogenizers, moulders, presses).
- machinery chiefly employed by the grain milling industry: machinery to clean, sort or grade seed, grain or dried leguminous vegetables (winnowers, sieving belts, cyclone separators, aspirator separators, grain brushing machines and the like); machinery used to produce flour, meal or other ground products (grinding mills, "breaking" rolls or mills, feeders, sifters, bran cleaners, blenders, rice hullers, pea splitters etc.).
- presses, crushers and similar machinery used to make wine, cider, fruit juices or similar beverages.
- machinery specialized for use in the bakery industry or for making macaroni, spaghetti or similar products: dough mixers, dough-dividers, moulders, slicers, cake depositing machines etc.
- machinery plant or equipment, including electrically heated, for the treatment of food or drink by a change of temperature: milk pasteurizing, concentrating or cooking plant; vats for processing or curing cheese; for machining, for concentrating or for other operations involving heating or cooling; autoclaves and plant for steaming, boiling, cooking, frying or drying food; non-electric bakery ovens.
- machinery for the extraction or preparation of animal or fixed vegetable fats or oils.
- machinery for the preparation of tobacco and for the making of cigarettes or cigars, or for pipe or chewing tobacco or snuff.
- machines and equipment to process food not elsewhere classified: machinery to make confectionery, cocoa or chocolate; to manufacture sugar; for breweries; to process meat or poultry (de-hairing or plucking, cutting or chopping, mincing or dicing, meat beating machines etc.); to prepare fruit, nuts or vegetables; to prepare fish, shell fish or other sea-food, filtering or purifying machinery; other machinery for the industrial preparation or manufacture of food or drink.

Exclusions: Vats and tanks not fitted with thermal or mechanical equipment are classified in class 2812 (tanks, reservoirs and containers of metal).

General purpose machinery are classified in the appropriate class of group 291; pumps or compressors -- 2912; packing and wrapping machinery, weighing machinery -- 2819 (other general purpose machinery).

Cleaning, sorting or grading machinery for eggs, fruit or other crops are classified in class 2921 (agricultural and forestry machinery).

COVERAGE OF THE SUB-CLASS

Code	Title	Quantitative unit	Coverage
292511	Cream separators	No.	-
292512	Dairy machinery	No.	-
292513	Machinery used in the working of cereals/ dried leguminous vegetables	No.	e.g. Machinery used in the milling industry or for the working of cereals or dried leguminous vegetables other than farm-type machinery
292514	Machinery used in the manufacture of wine, cider, fruit juices/ the like	No.	e.g. Presses, crushers and similar machinery used in the manufacture of wine, cider, fruit juices or similar beverages
292515	Bakery ovens, non-electric; dryers for agricultural products/the like	No.	Incl.; Machinery for making hot drinks or for cooking or heating food, except domestic type machines
292516	Machinery n.e.c. for the preparation/ of food and drink	No.	e.g. Machinery b,e,c, for the industrial preparation or manufacture of food and drink (including fats or oils)
292517	Machinery n.e.c. for processing tobacco	No.	-
292521	Parts for the goods of subclass 2925-14	-	Incl.; Parts of milking machines and dairy machinery
292522	Parts n.e.c. for the goods of 2925-13/ 2925-16	-	Incl.; Parts of machines for cleaning sorting or grading seed, grain or dried leguminous vegetables

292592	Repair service	-	-

2926 Machinery for textile, apparel and leather production

DEFINITION OF THE CLASS: This class includes:

- machines for preparing textile fibres (natural or short man-made) up to the spinning stage and similar machines which prepare fibres for use as stuffing or for manufacture of felt or wadding: cotton gins, bale breakers, garnetters, cotton spreaders, wool scourers, wool carbonizers, combs, carders, roving frames etc.
- spinning machines for converting rovings into yarn including machines to form double, multiple or cabled yarns.
- machines for preparing textile yarns for use on weaving machines (looms) or knitting machines: reelers, warpers and related machines.
- weaving machines (looms) including hand looms; knitting machines (flat or circular); machines for making knotted net, tulle, lace, braid and other special fabrics, including gimped yarn.
- auxiliary machines or equipment for the machines described above: warp beam stands or creels, dobbies and Jacquards, shuttle changing mechanisms, automatic spool changers, wool degreasing agitators; and parts for the above machines such as slides, combs and slide bars; metallic healds, needles for knitting machines; shuttles for weaving machines; warping beams; spindles for braiding machines etc.
- machinery for washing, bleaching, dyeing, dressing, finishing, coating or impregnating textile yarns or fabrics or made up textile articles; machines for applying paste to the base fabric or other support used in the manufacture of linoleum or similar floor coverings; machines for reeling, unreeling, folding, cutting or pinking textile fabrics.
- ironing machines including fusing presses.
- laundry-type washing and drying machines and dry-cleaning machines.
- sewing machines and sewing machine heads, whether or not for household use: machines for sewing together textile material, leather, furskins etc., to produce apparel, shoes, embroidery, luggage, headgear, sacks etc.
- sewing machine needles.
- machines for producing or finishing felt or non-wovens in the piece or in shapes, including machines for making felt hats.
- machinery for preparing, tanning or working hides, skins or leather, including de-hairing machines, fleshing machines, hammer mills and hammering machines, shaving machines, and finishers such as machines that brush, glaze or grain leather.
- machinery for making or repairing footwear or other articles of hides, skins, leather or furskins.

Exclusions: Paper or paperboard cards for use on Jacquard machines are classified in class 2109 (other articles of paper and paperboard).

Ironing machines of the calendar type are classified in class 2919 (other general purpose machinery).

Machines for producing wire net or wire cloth that operate on principles different from textile looms, are classified in class 2922 (machine-tools).

Sewing machines used in bookbinding are classified in class 2929 (other special purpose machinery).

COVERAGE OF THE SUB-CLASS

Code	Title	Quantitative unit	Coverage
292611	Machines for extruding, drawing, texturing/cutting	No.	Incl.; Machines for preparing textile fibres or producing textile yarns; textile reeling or winding machines and machines for preparing textile yarns for use or machines for weaving, knitting and the like
292612	Weaving machines	No.	-
292613	Knitting machines, stitch-bonding machines/the like	No.	Incl.; Machines for making gimped yarn, tulle, lace, embroidery, trimmings, braid or net and machines for tufting
292614	Auxiliary machinery for use with machines for textile extruding, spinning, weaving/the like	No.	Incl.; Machines for textile preparing, knitting or the like
292621	Machinery for the manufacture of felt/non-wovens in the piece/in shapes	No.	Incl.; Machinery for the finishing; blocks for making hats; machinery for washing, wringing, ironing, pressing, bleaching, dyeing, dressing, finishing, coating or impreg
292622	Laundry-type washing machines, each of a dry linen capacity exceeding 10 kg; dry-cleaning machines	No.	Incl.; Drying machines for textile fabrics or articles, each of a dry linen capacity exceeding 10 kg

2927 Weapons and ammunition

DEFINITION OF THE CLASS: This class includes:

- tanks and other fighting vehicles including armoured cars, tank recovery vehicles and armoured supply vehicles.
- heavy weapons, artillery, mobile guns including railway mounted guns; rocket projectors and launchers; torpedo tubes, depth charge throwers; heavy machine guns etc.
- small arms such as light machine guns, rifles, carbines, shot guns, revolvers or pistols. Small arms designed for use by the defense forces, the police, other organized services, or by hunters or sports persons.
- air or gas guns and pistols.
- firearms which fire blank cartridges, signal flares, captive-bolts and other non-projected firing pistols or other "guns".
- munitions for the weapons described above and for delivery by other means: bombs, grenades, torpedoes, mines, rockets and similar munitions of war; cartridges shot-gun shells and other ammunition; projectiles; military ballistic and guided missiles.

Exclusions: Percussion caps, detonators or signalling flares are classified in class 2429 (other chemical products n.e.c.).

Cutlasses, swords, bayonets and similar arms are classified in class 2899 (other fabricated metal products n.e.c.).

Vehicles for the transport of bank notes or valuables, sometimes called "armoured cars", are classified in class 3410 (motor vehicles).

COVERAGE OF THE SUB-CLASS

Code	Title	Quantitative unit	Coverage
292710	Tanks and other armoured fighting vehicles, motorised	No.	Incl.; Parts thereof
292720	Military weapons, other than revolvers, pistols/the like	No.	Incl.; Swords

2929 Other special purpose machinery

DEFINITION OF THE CLASS: This class includes special purpose machinery and equipment not elsewhere classified, such as:

- machines for extruding, drawing, texturing, manufacturing or cutting man-made textile fibres, materials or yarns.
- machinery for working rubber or plastics or for the manufacture of products of these materials: extruders, moulders, pneumatic tyre making or retreading machines and other machines for making a specific rubber or plastics product such as gramophone records.
- machinery for the pulp, paper and paperboard industries: machinery employing heat specially designed for the pulp, paper and paperboard industries (e.g. digesters); cutters, gridenders or crushers specially designed for preparing wood, bamboo, esparto, straw, rags, waste paper etc., for pulp, paper or paperboard manufacture; machines that convert cellulose bearing materials to pulp (e.g. beaters, refiners, strainers); paper or paperboard making machinery; corrugating machinery; machinery for finishing paper or paperboard (e.g. coating machines, ruling machines, creping machines).
- machinery for producing paper of a given size or shape or for producing articles such as envelopes, paper bags, boxes or cartons (e.g. slitters, rulers, perforators, die-cutters, folders, stockers, winders, paper cup making machines, paper pulp moulders).
- type-founding machinery (e.g. automatic type foundry, type-casting machines); type-setting machinery (e.g. monotype machines, other keyboard machines for casting and setting type); printing type of wood, metal or plastics; machines for making impressed flongs, stereotyping plates, machines for acid etching plates and phototype-setting and composing machines); blocks, plates, cylinders and other printing components treated to render them suitable for engraving or impressing or engraved or impressed (e.g. lithographic stones, polished or grained metal cylinders, metal or plastics masters for use on offset machines, photogravure plates).
- printing machinery (e.g. ordinary presses, platen presses, cylinder presses, rotary presses and special printing machines such as screen printers, yarn printers, machines for printing on cork, clothing or other unusual materials); machines for uses ancillary to printing (e.g. stockers, feeders, folders, gummers, staplers).
- book-binding machinery including book-sewing machines and machines for assembling paper by means of metal or plastic spirals and page numbering machines.
- machinery for producing tiles, bricks, shaped ceramic pastes, pipes, graphite electrodes, blackboard chalk, foundry moulds, etc.
- moulding boxes for metal foundry; mould bases; moulding patterns; moulds for metal (other than ingot moulds), metal carbides, glass, mineral materials, rubber or plastics.

- centrifugal clothes driers; machines to assemble electric or electronic lamps, tubes (valves) or bulbs in glass envelopes; machines for production or hot-working of glass or glassware, glass fibre or yarn, e.g. glass rolling machinery; machinery or apparatus for isotopic separation.

- other special purpose machinery and equipment not elsewhere classified.

Exclusions: Calendars (other than rolls for metal or glass) even if specially designed to work a particular material, are classified in class 2919 (other general purpose machinery).

Machinery or equipment to work hard rubber, hard plastics or cold glass (chiefly machine-tools) are classified in class 2922 (machine-tool).

Household appliances are classified in class 2930 (domestic appliances n.e.c.).

Office duplicating equipment is classified in class 3000 (office, accounting and computing machinery).

COVERAGE OF THE SUB-CLASS

2930 Domestic appliances n.e.c.

DEFINITION OF THE CLASS: This class includes:

- domestic electric appliances: electric blankets, refrigerators and freezers, dishwashers, laundry equipment (clothes washers, washer-dryers, dryers), vacuum cleaners, floor polishers, waste disposals, appliances to prepare or process food (grinders, blenders, juice squeezers, tin openers and so forth), and other domestic electric appliances (electric razors, electric tooth brushes, knife sharpeners, ventilating or recycling hoods etc.).
- electro-thermic domestic appliances such as electric instantaneous storage or immersion heaters; electro-thermic hair dressing appliances (dryers, combs, brushes, curlers); electric smoothing irons; space heaters and household type fans; cooking appliances (ovens, microwave ovens, cookers, hot plates, toasters, coffee or tea makers, fry-pans, roasters, grills etc.); and electric heating resistors.
- non-electric domestic space heaters, cooking ranges, grates, stoves and domestic central heating plants. Manufacture of non-electric water heaters, cooking appliances and plate warmers.

Exclusions: Industrial or commercial equipment similar to but usually heavier, larger and sturdier than the appliances described above is classified in the appropriate class of group 291 (general purpose machinery) or 292 (special purpose machinery) e.g.:

- refrigerating or freezing equipment for commercial purposes is classified in class 2919 (other general purpose machinery).
- fans intended for industrial applications are also classified in class 2919.
- laundry-type washing and drying machines are classified in class 2926 (machinery for textile, apparel and leather production).

Sewing machines, whether or not for household use, are classified in class 2926 (machinery for textile, apparel and leather production).

3000 Office, accounting and computing machinery

DEFINITION OF THE CLASS: This class includes:

- hectograph or stencil duplicating machines, addressing machines and sheet-fed office-type offset printing machines.
- manual or electric typewriters; automatic typewriters, i.e. typewriters through which a previously perforated band is run, causing it to type a stock message; machines with a limited memory able to correct and retype texts automatically; machines incorporating a device for transmitting typed figures to a separate calculating machine; word-processing machines.
- photo-copying apparatus incorporating an optical system or of the contact type and thermo-copying apparatus.
- hand-held or desk-top electronic calculating machines; other calculators; accounting machines, cash registers, postage franking machines, ticket-issuing machines and similar machines incorporating a calculating device.
- other office machinery or equipment: machines that sort, wrap or count coins; automatic banknote dispensers; machines that stuff envelopes, sort mail; pencil sharpeners, perforating or stapling machines, etc.
- automatic data-processing machines of the digital, analogue or hybrid type.
- complete digital systems comprising a central processing unit, an input unit and an output unit; digital systems which include peripheral units such as additional input/output units, additional storage units, etc.; units of the central processing system or peripherals.
- analogue data-processing machines comprising analogue elements, control elements and programming elements; additional elements for analogue computers having an input or an output function.
- peripheral units for analogue machines such as punch tape readers, curve followers, graph plotters, etc.
- hybrid (analogue/digital) machines.
- magnetic or optical readers; machines for transcribing data onto data media in coded form; machines for processing data, decoding and giving the result in clear.

Exclusions: Electronic parts of computing machinery are classified in class 3210 (electronic valves and tubes and other electronic components).

Electronic games (e.g. video games, checkers) are classified in class 3694 (games and toys).

3110 Electric motors, generators and transformers

DEFINITION OF THE CLASS: This class includes:

- alternating or direct current (DC) generator sets.
- alternating current (AC) generators.
- universal AC/DC motors.
- DC motors or generators.
- rotary converters.
- electrical transformers of all sizes and types; static converters; apparatus based on mercury arc rectifiers, diode rectifiers, metal or crystal rectifiers, battery chargers, high tension generators, synchronous mechanical contact rectifiers and other static converters; inductors.

Exclusions: Vehicle generators and cranking motors are classified in class 3190 (other electrical equipment n.e.c.).

Diodes are classified in class 3210 (electronic valves and tubes and other electronic components).

3120 Electricity distribution and control apparatus

DEFINITION OF THE CLASS: This class includes:

- electrical apparatus for switching or protecting electrical circuits, or for making connections to or in electrical circuits (e.g. switches, fuses, lightning arresters, voltage limiters, surge suppressors, plugs, junction boxes), for a voltage exceeding 1,000 volts such as are generally used in power distribution systems.
- apparatus for switching or protecting electrical circuits, similar to the apparatus described above, but including relays, sockets, lamp holders, etc., for a voltage not exceeding 1,000 volts, such as are generally used for dwellings, industrial equipment or household appliances.
- boards, panels (including numerical control panels), consoles, desks, cabinets and other bases, equipped with two or more of the apparatus described above, for electricity control or distribution of electricity, including those incorporating instruments or apparatus of class 3312 (instruments and appliances for measuring, checking, testing, navigating and other purposes, except industrial process control equipment).

Exclusions: Parts of moulded plastics, of glass or of ceramic material are classified in class 2520 (plastics products), 2610 (glass and glass products) and 2691 (non-structural non-refractory ceramic ware), respectively.

Fuse wire or strip is classified in class 2720 (basic precious and non-ferrous metals).

Carbon or graphite electrodes are classified in class 3190 (other electrical equipment n.e.c.).

Boards, panels, consoles, etc., for use in line telephony or line telegraphy are classified in class 3220 (television and radio transmitters and apparatus for line telephony and line telegraphy).

3130 Insulated wire and cable

DEFINITION OF THE CLASS: This class includes:

- Insulated (including enamelled or anodized) wire, cable (including co-axial cable) and other insulated conductors whether or not fitted with connectors.
- insulated strip such as is used in large capacity machines or control equipment.
- optical fibre cables made up of individually sheathed fibres, whether or not assembled with electric conductors or fitted with connectors.

Exclusions: Uninsulated non-ferrous metal wire is classified in class 2720 (basic precious and non-ferrous metals).

Uninsulated metal cable or insulated cable not capable of being used as a conductor of electricity is classified in class 2899 (other fabricated metal products n.e.c.).

Wiring sets are classified in class 3190 (other electrical equipment n.e.c.).

Optical fibres and of cables of optical fibres not individually sheathed are classified in class 3320 (optical instruments and photographic equipment).

3150 Electric lamps and lighting equipment

DEFINITION OF THE CLASS: This class includes:

- electric filament lamps including sealed beam lamp units.
- ultra-violet or infra-red lamps.
- discharge lamps, fluorescent, hot cathode or other discharge lamps.
- arc lamps.
- lighting equipment, including non-electric.
- flash-bulbs used in photography.
- illuminated signs, illuminated name-plates and the like.
- lighting sets of a kind used for Christmas trees.

Exclusions: Lighting equipment for cycles and motor vehicles is classified in class 3190 (other electrical equipment n.e.c.), while manufacture of lighting equipment for other vehicles remains classified here.

3190 Other electrical equipment n.e.c.

DEFINITION OF THE CLASS: This class:

- electrical ignition or starting equipment of a kind used for spark-ignition or compression-ignition internal combustion engines: ignition magnetos, magneto-dynamos, ignition coils, sparking plugs, glow plugs, starter motors, generators (dynamos, alternators), cut-outs, voltage regulators, etc.; cranking motors.
- ignition wiring sets of a kind used in vehicles, aircraft, ships and other machinery.
- electrical lighting or signalling equipment specialized for use on cycles and motor vehicles; headlamps (other than sealed beam lamp units) and lamps or lights for parking, warning, turning, inspecting interior lighting, external indicators for taxis, police, ambulances, etc.
- sound signalling devices such as horns, sirens and other electrical sound signalling appliances; other electrically activated sound or visual signalling apparatus (e.g. bells, indicator panels, burglar or fire alarms).
- windscreen wipers and electrical defrosters and demisters.
- dynamos for cycles.
- electrical signalling, safety or traffic control equipment for motorways, roads or streets; railways and tramways; inland waterways, ports and harbours; and airports.
- electro-magnets; electro-magnetic or permanent magnet chucks, clutches, brakes, couplings, clamps or lifting heads.
- electrical insulators, except of glass or ceramics; insulating fittings for electrical machines or equipment, except of ceramics or plastics; carbon or graphite electrodes; electrical conduit tubing and joints for such tubing, of base metal lined with insulating material.
- electrical machines and apparatus not elsewhere classified: particle accelerators, signal generators, mine detectors, electrical mine detonators, defrosters and demisters with electrical resistors for aircraft, ships, trains and other vehicles, and other electrical machines and apparatus.
- electronic engine parts.
- electronic equipment not elsewhere classified.

Exclusions: Glass envelopes for lamps are classified in class 2610 (glass and glass products).

Electrically operated hand-held spray guns are classified in class 2919 (other general purpose machinery).

Electric lawn-mowers are classified in class 2921 (agricultural and forestry machinery).

Electric razors are classified in class 2930 (domestic appliances n.e.c.).

Electronic valves and tubes (including cold cathode valves) are classified in class 3210.

3210 Electronic valves and tubes and other electronic components

DEFINITION OF THE CLASS: This class includes:

- thermionic, cold cathode or photo-cathode valves or tubes (e.g. television picture tubes, television camera tubes, image converters and intensifiers, microwave tubes, receiver or amplifier valves or tubes, etc.).
- diodes, transistors and similar semi-conductor devices; photosensitive semi-conductor devices including photo-voltaic cells; mounted piezo-electric crystals.
- electronic integrated circuits and micro-assemblies: monolithic integrated circuits, hybrid integrated circuits and electronic micro-assemblies of moulded module, micromodule or similar types.
- printed circuits, i.e. circuits which are made by forming on an insulating base, by conventional or non-conventional printing process, conductor elements, contacts or other printed "passive" elements such as inductances, resistors and capacitors, among others.
- electrical capacitors (or condensers); fixed, variable or adjustable.
- resistors including rheostats and potentiometers, other than heating resistors.

Exclusions: An assembly consisting of a number of electronic microcircuits mounted on an appropriate carrier, e.g. one designed as a part of a digital data processing machine, is generally classified in the same class as the complete machine.

Transformers are classified in class 3110 (electric motors, generators and transformers).

3220 Television and radio transmitters and apparatus for line telephony and line telegraphy

DEFINITION OF THE CLASS: This class includes:

- apparatus for radio-broadcasting by means of electromagnetic waves without any line connection. Manufacture of apparatus for television transmission whether or not by line. Included is manufacture of relay transmitters and television transmitters for industrial use.
- transmission apparatus for radio-telephony, radio-telegraphy, whether or not incorporating reception apparatus or sound recording or reproducing apparatus: fixed transmitters and transmitter-receivers, radio-telephony apparatus for transport equipment, radio-telephones, other transponders, "facsimile" radio-telegraphic apparatus, etc.
- television cameras of all kinds.
- apparatus for line telephony or line telegraphy, including such apparatus for carrier-current line systems; reception apparatus for radio-telephony or radio-telegraphy including apparatus combined with sound recording or reproducing apparatus or a clock. Included is manufacture of telephone sets, automatic and non-automatic switchboards and exchanges; and Morse or Morse-type keys, other telegraphic transmitters, Morse-type recorders, printer-type receivers, picture telegraphic transmitters and receivers, etc.

Exclusions: General purpose parts (e.g. primary batteries or insulated wire) are classified in the appropriate class of division 31 (electrical machinery and apparatus n.e.c.) or in class 32i0 (electronic valves and tubes and other electronic components).

3230 Television and radio receivers, sound or video recording or reproducing apparatus, and associated goods

DEFINITION OF THE CLASS: This class includes:

- television receivers (including video monitors and video projectors), whether or not combined in the same housing with radio-broadcast receivers or sound or video recording or reproducing apparatus.
- reception apparatus for radio-broadcasting including apparatus with sound recording or reproducing apparatus or a clock.
- magnetic tape recorders and other sound recording generators including those incorporating a sound reproducing device: telephone answering machines, cassette-type recorders, etc.
- video recording or reproducing apparatus.
- turntables (record decks), record players, cassette players and other sound reproducing apparatus.
- microphones, loudspeakers, headphones, earphones, amplifiers and sound amplifier sets regardless of the particular purpose for which the apparatus may be designed.
- specialized parts for the equipment resulting from the activities classified in this class: pick-ups, tone arms, sound-heads, tables for turntables, record cutters, aerials of all kinds and serial reflectors and aerial rotors.

COVERAGE OF THE SUB-CLASS

3311 Medical and surgical equipment and orthopaedic appliances

DEFINITION OF THE CLASS: This class includes:

- instruments and appliances used in medical, surgical, dental or veterinary practice or science including electro-diagnostic apparatus such as electro-cardiographs; dental drill engines, ophthalmic instruments including sight testing sets, syringes, with or without needles, needles used in medicine and other instruments and appliances, including optical instruments such as mirrors and reflectors, endoscopes, etc.
- apparatus based on the use of X-rays or alpha, beta or gamma radiations, whether or not for use in human or animal medicine. Included is manufacture of X-ray tubes, high-tension generators, control panels, desks, screens and the like.
- sterilizers.
- mechano-therapy appliances; message apparatus; psychological testing apparatus; ozone therapy, oxygen therapy, artificial respiration or other therapeutic respiratory apparatus; other breathing appliances and gas masks other than simple protective masks.
- orthopaedic appliances including crutches, surgical belts and trusses, orthopaedic corsets and shoes; splints and other fracture appliances; appliances worn, carried or implanted (e.g. hearing aids or pace-makers).
- artificial teeth, artificial limbs and other artificial parts of the body.
- medical, surgical, dental or veterinary furniture such as operating tables, hospital beds with mechanical fittings, dentists' chairs and barbers' chairs with the same or similar movement capability.

Exclusions: Surgical dressings, medicated wadding, fracture bandages, catgut, and other prepared sutures are classified in class 2423 (pharmaceuticals, medicinal chemicals and botanical products).

Cements used in dentistry are also classified in class 2423.

Thermometers are classified in class 3312 (instruments and appliances for measuring, checking, testing, navigating and other purposes, except industrial process control equipment).

Corrective spectacle lenses and of their frames or of compound optical microscopes are classified in class 3320 (optical instruments and photographic equipment).

3312 Instruments and appliances for measuring, checking, testing, navigating and other purposes, except industrial process control equipment

DEFINITION OF THE CLASS: This class includes:

- sensitive balances.
- drawing marking-out or mathematical calculating instruments, including instruments for measuring length for use in the hand (e.g. measuring rods and tapes, micrometers, callipers and gauges).
- microscopes other than optical microscopes and diffraction apparatus.
- apparatus for measuring and checking electrical quantities (e.g. oscilloscopes, spectrum analysers; and instruments for checking current, voltage, resistance) with or without a recording device.
- apparatus for measuring or checking non-electrical quantities (e.g. radiation detectors and counters, instruments and apparatus specially designed for telecommunications such as cross-talk meters and apparatus for testing and regulating vehicle motors).
- automatic regulating or controlling instruments and apparatus (e.g. thermostats, pressure controllers, level regulators, humidity regulators, oven-draught regulators; and automatic regulators of electrical quantities), except industrial process control equipment.
- navigational, meteorological, geophysical and related instruments and apparatus (e.g. surveying instruments such as theodolites) oceanographic or hydrological instruments, seismometers, rangefinders, automatic pilots, sextants, ultrasonic sounding instruments, and special instruments for air navigation.
- radar apparatus and radio remote control apparatus.
- electricity supply meters and supply meters for water or gas.
- machines and appliances for testing the physical properties of materials: machines and apparatus for testing hardness and other properties of metals; for testing wear and tear and other properties of textiles; aid for testing the physical properties of paper, linoleum, plastics, rubber, wood, concrete and other materials.
- instruments and apparatus for carrying out physical or chemical analyses (e.g. polarimeters, refractometers, colorimeters, Orsöb's apparatus, pH-meters, viscometers, surface tension instruments).
- instruments and apparatus for measuring or checking the flow, level, pressure or other variables of liquids or gases (e.g. flow meters, level gauges, manometers, heat meters), except industrial process control equipment.
- other measuring, checking or testing instruments, apparatus or machines (e.g. hydrometers, thermometers, barometers, revolution counters, taximeters, pedometers, tachometers, balancing machines, test benches, comparators (including optical comparators and other optical-type

measuring and checking appliances and instruments)), instruments for checking watches or watch parts, etc., except industrial process control equipment.

Exclusions: Pumps incorporating measuring devices are classified in class 2912 (pumps, compressors, taps and valves).

Medical and surgical instruments are classified in class 3311 (medical and surgical equipment and orthopaedic appliances).

Industrial process control equipment is classified in class 3313.

Binoculars, monoculars and similar optical devices are classified in class 3320 (optical instruments and photographic equipment).

33320 Optical instruments and photographic equipment

DEFINITION OF THE CLASS: This class includes:

- optical elements of glass or of any other material (e.g. quartz, fluorspar, plastics or metal).
- prisms and lenses, mirrors constituting optical elements, colour filters, polarizing elements, etc.
- ophthalmic lenses, including contact lenses.
- optical fibres and cables of optical fibres not individually sheathed.
- mounted optical elements.
- spectacle frames and frames fitted with lenses whether or not the lenses are optically worked: sunglasses, protective glasses and corrective glasses.
- optical instruments such as binoculars, monoculars, other optical telescopes and their mountings; optical astronomical instruments.
- compound optical microscopes, including those for photomicrography and micro-projection.
- other optical appliances and instruments (e.g. telescopic sights for fitting to arms, machines or appliances; lasers other than laser diodes; hand magnifying glasses and magnifiers; mounted, optically worked, glass mirrors, door eyes).
- still or cinematographic cameras; cameras of all types for all purposes, including those used to prepare printing plates for underwater or aerial photography, or for producing microfilm or microfiche; cinematographic sound cameras.
- image projectors, enlargers and reducers including microfilm, microfiche or other microfilm readers.
- cinematographic projectors, including those incorporating sound reproducing apparatus.
- discharge lamp ("electronic") and other flashlight apparatus, but not flash bulbs.
- apparatus and equipment for photographic (including cinematographic) laboratories.
- apparatus for the projection of circuit patterns on sensitized semiconductor materials; projection screens.

Exclusions: Photochemical products are classified in class 2429 (other chemical products n.e.c.).

Unworked glass optical elements are classified in class 2610 (glass and glass products), but unworked optical elements of other materials remain classified in this class.

Photo-copying apparatus incorporating an optical system or of the contact type and thermo-copying apparatus are classified in class 3000 (office, accounting and computing machinery).

Optical fibre cables made up of individually sheathed fibres are classified in class 3130 (insulated wire and cable).

Photographic flash bulbs are classified in class 3150 (electric lamp and lighting equipment).

Television cameras are classified in class 3220 (television and radio transmitters and apparatus for line telephony and line telegraphy).

Video cameras are classified in class 3230 (television and radio receivers, sound or video recording or reproducing apparatus, and associated goods).

Medical and surgical instruments containing optical elements (e.g. endoscopes) are classified in class 3311 (medical and surgical equipment and orthopaedic appliances) and measuring or checking appliances containing optical elements in class 3312 (instruments and appliances for measuring, checking, testing, navigating and other purposes, except industrial process control equipment), if for other uses (e.g. theodolites).

3330 Watches and clocks

DEFINITION OF THE CLASS: This class includes:

- watches and clocks of all kinds; watch and clock cases including cases of precious metals; parts of watches and clocks including watch and clock movements.
- time of day recording apparatus, and apparatus for measuring, recording or otherwise indicating intervals of time, with a watch or clock movement or with synchronous motor; time switches with clock or watch movement or with synchronous motor.
- metal watch straps, watch bands and watch bracelets including those of precious metal.
- watch and clock parts such as springs, jewels, dials, plates, bridges and other parts.

Exclusions: Watch bands of materials other than metal are classified in class 1912 (luggage, handbags and the like, saddlery and harness).

3410 Motor vehicles

DEFINITION OF THE CLASS: This class includes:

- motor cars and other motor vehicles principally designed for the transport of persons: personal passenger motor cars, passenger motor vehicles designed to negotiate unusual terrain (snow mobiles, golf carts, cross-country cars, amphibian motor vehicles) and public-transport type passenger motor vehicles, i.e. buses.
- motor vehicles for the transport of goods: ordinary lorries and vans (flat, tarpaulin covered, closed, etc.); lorries with automatic discharging devices, tankers, drop frame lorries, refuse collectors, etc.; special purpose motor lorries and trucks (motor breakdown lorries, armoured cars, fire-engines, street sweepers, mobile medical and dental clinics, travelling libraries, etc.).
- over-the-road tractors for semi-trailers.
- chassis fitted with engines for the motor vehicles described above.
- compression-ignition or spark-ignition reciprocating or rotary internal combustion piston engines of types chiefly used to power motor vehicles.

Exclusions: Electrical equipment for motor vehicles is classified in class 3190 (other electrical equipment n.e.c.).

3420 Bodies (coachwork) for motor vehicles; trailers and semi-trailers

DEFINITION OF THE CLASS: This class includes:

- bodies (including cabs) designed to be mounted on motor vehicle chassis, bodies for vehicles without chassis and unit construction bodies; bodies for passenger vehicles, lorries and special purpose vehicles; bodies of metal, wood, plastics or combinations of these or other materials.
- trailers and semi-trailers designed to be drawn by motor vehicles; trailers and semi-trailers of the caravan type used for housing or camping, for transport of goods (e.g. tankers, removal trailers, motor car carriers, ammunition limbers, etc.), for transport of passengers and for other purposes including "road-rail" trailers.
- parts of trailers and semi-trailers.
- containers (including containers for the transport of fluids) specially designed and equipped for carriage by one or more modes of transport.

Exclusions: Trailers and semi-trailers specially designed for use in agriculture are classified in class 2921 (agricultural and forestry machinery). Trailers of that type are frequently provided with couplings permitting attachment of choppers, spreaders, or other devices or are fitted with attachments.

Trailer mounted agricultural machinery are also classified in class 2921.

Parts and accessories of bodies for motor vehicles are classified in class 3430.

3511 Built and repaired ships

DEFINITION OF THE CLASS: This class includes builded and repaired ship (other than yachts and other vessels for pleasure or sports) and floating structures. Sections for ships or floating structures.

Vessels used in commerce, in pursuits related to commerce or in the carriage of passengers including multi-purpose vessels.

Vessels designed for ocean, coastal or inland waters.

Passenger vessels. Fishing boats and fish processing factory vessels. Tugs and pusher craft.

Non-motorized vessels (e.g. barges). Vessels designed to be stationary (e.g. light-ships). Vessels the main activity of which is not navigation (e.g. dredgers, floating docks, floating or submersible drilling platforms).

Hovercraft.

Boats with hulls resembling pleasure boats but specially equipped for commercial service or services related to commerce.

Washings and auxiliary naval vessels (e.g. troopships and hospital ships).

Vessels built or equipped for scientific investigation.

Floating structures: pontoons, inflatable rafts, coffer-dams, landing stages, buoys, floating tanks, etc.

Exclusions: Parts of vessels, other than major hull assemblies, are classified either according to material employed (e.g. sails, class 1721 (made-up textile articles, except apparel), iron or steel anchors, class 2899 (other fabricated metal products n.e.c.)) or according to type of article (e.g. compression ignition engines, class 2911 (engines and turbines, except aircraft, vehicle and cycle engines)).

Navigational and other instruments used aboard ships are classified in class 3312 (instruments and appliances for measuring, checking, testing, navigating and other purposes, except industrial process control equipment).

Amphibian motor vehicles are classified in class 3410 (motor vehicles).

3512 Built and repaired of pleasure and sporting boats

DEFINITION OF THE CLASS: This class includes builded and repaired yachts and other vessels for pleasure or sports including rowing boats, canoes and inflatable boats.

Pleasure boats designed to accept inboard or outboard motors or to be propelled by wind, paddles or cars.

Yachts, cabin cruisers, sport fisherman and other pleasure boats, some of which may be quite large, although boats are generally smaller than ships.

Dories, skiffs, oared life-boats, cutters, kayaks, canoes, racing shells, paddles, etc.

Exclusions: Boats with hulls resembling pleasure boats but different from pleasure boats in being specially equipped for commercial service are classified in class 3511 (ships).

3520 Railway and tramway locomotives and rolling stock

DEFINITION OF THE CLASS: This class includes:

- rail locomotives: rail locomotives powered from an external source of electricity or by electric accumulators; diesel-electric locomotives; rail locomotives powered by compression ignition engines or rail locomotives powered by other means (e.g. gas turbine, steam engine, spark-ignition engine), and locomotive tenders.
- self-propelled railway or tramway coaches, vans and trucks regardless of power source. Included is the manufacture of self-propelled railway or tramway maintenance or service vehicles (e.g. workshops, cranes, testing coaches).
- Railway or tramway rolling stock, not self-propelled: passenger coaches, goods vans, tank wagons, self-discharging vans and wagons, and workshop vans, crane vans, etc.
- specialized parts of railway or tramway locomotives or of rolling-stock: bogies, axles and wheels; brakes and parts of brakers; hooks and coupling devices, buffers and buffer parts; shock absorbers (but not springs); wagon and locomotive frames; bodies; corridor connections, etc.
- mechanical (including electro-mechanical) signalling, safety or traffic control equipment for railways, tramways, roads, inland waterways, parking facilities, port installations or airfields. The activities classified here result in apparatus in which the signal, etc., is operated from a control point, generally at some distance, by movement of cranks, levers, rods, wires, chains, etc., by hydro-pneumatic devices or electric motors (e.g. signal box equipment, point locks, railbrakes, automatic fog-signalling apparatus, level crossing control gear).

Exclusions: Unassembled rails are classified in class 2710 (basic iron and steel).

Engines and turbines are classified in class 2911.

Electric motors are classified in class 3110 (electric motors, generators and transformers).

Electrical signalling, safety or traffic control equipment is classified in class 3190 (other electrical equipment n.e.c.).

3530 Aircraft and spacecraft

DEFINITION OF THE CLASS: This class includes:

- heavier-than-air aeroplanes, whether or not motorized, lighter-than-air flying machines, balloons, spacecraft and spacecraft launch vehicles.
- fixed-wing, manned motorized aeroplanes for the transport of goods or passengers, for use by the defense forces, for sport or other purposes.
- rotary-wing aircraft for all purposes.
- gliders, hang gliders and other non-powered aircraft.
- dirigibles, balloons used in aeronautics and meteorology.
- spacecraft, whether or not equipped to sustain life in space; spacecraft launch vehicles other than military launch vehicles.
- aircraft launching gear; deck-arrestor or similar gear, ground flying trainers.
- parts and accessories of the aircraft of this class; major assemblies such as fuselages, wings, doors, control surfaces, landing gear including seaplane floats, fuel tanks, nacelles, etc.; parts of the major assemblies specialized for installation on aircraft; parts of balloons and airships, and parts of spacecraft and launch vehicles.
- airscrews, helicopter rotors and propelled rotor blades.
- motors and engines of a kind typically found on aircraft.
- spark-ignition reciprocating or rotary internal combustion aircraft engines.
- turbo-jets or turbo-propellers for aircraft.
- reaction engines: ram jets and pulse jets, and rocket engines.
- parts of turbo-jets and turbo-propellers.

Included are maintenance, repair and alteration of aircraft or aircraft engines.

Exclusions: Military ballistic missiles are classified in class 2927 (weapons and ammunition).

Ignition parts and other electrical parts for such engines are classified in class 3190 (other electrical equipment n.e.c.).

Navigational and other instruments used on aircraft are classified in class 3312 (instruments and appliances for measuring, checking, testing, navigating and other purposes, except industrial process control equipment).

3710 Recycled metal waste and scrap

DEFINITION OF THE CLASS: This class includes processed metal waste and scrap and metal articles, whether or not used, into a form which is readily transformed into new raw materials. Typical is that, in terms of commodities, both input and output consist of waste and scrap, the input being sorted or unsorted but always unfit for further direct use in an industrial process, whereas the output is made fit for further processing and is to be considered then as an intermediate good. A more or less "industrial" process is required, either mechanical or chemical.

Characteristic products are all metal waste and scrap, although it should be recognized that, as a matter of course, waste and scrap belong to the characteristic output of all industries manufacturing metals, metal products and machines and equipment.

Exclusions: New material made from waste and scrap is classified in the appropriate class of division 27 (basic metals).

Code	Title	Quantitative unit		Coverage
371010	Recycled metal wastes and scrap	-	-	
371091	Commission work	-	-	

3720 Recycled non-metal waste and scrap

DEFINITION OF THE CLASS: The recycling process should not be carried out as part of or in the same unit as the further processing of the products into new materials, in which case the whole activity should be classified in the appropriate place. The characteristic products of this class can be a large variety of goods. The products can as well be characteristic of many other industries.

Exclusions: Treated food, beverages and tobacco waste is classified in the appropriate class of division 15 (food products and beverages) and 16 (tobacco products), respectively. Producted new materials or products from waste and scrap, such as spinned yarn from garnetted stock or pulp made from waste paper or retreaded tyres are classified in the appropriate class e.g. 1711 (textile fibres and textiles), 2101 (pulp, paper and paperboard) and 2511 (rubber tyres and tubes, retreaded and rebuilt rubber tyres).

Processing of depleted thorium or uranium is classified in class 2330 (nuclear fuel).
