ON

THE URGENT WATER SUPPLY PROJECT FOR
RESETTLEMENT AREAS AND BARANGAYS
AFFECTED BY MT.PINATUBO ERUPTION

IN

THE REPUBLIC OF THE PHILIPPINES

In response to the request from the Government of the Republic of the Philippines, the Government of Japan decided to conduct a Basic Design Study on the Uregent Water Supply Project for Resettlement Areas and Barangays Affected by Mt.Pinatubo Eruption (hereinafter referred to as "the Project") and entrusted the study to the Japan International Cooperation Agency (JICA).

JICA sent to the Philippines a study team headed by Mr.Sigeru Okamoto, Deputy Director, 1st Basic Design Study Division, Grant Aid Study and Design Department, JICA, from 16th November to 15th December, 1992.

The team had a series of discussions with the officials concerned of the Government of the Philippines and conducted a field survey at the study area.

As a result of discussions and field survey, both sides have confirmed the main items described in the attached sheets. The team will proceed to further work and prepare the Basic Design Study Report.

Mr./Sigeru Okamoto

Leader

Basic Design Study Team JICA

ULCA

Manila, 26th November, 1992

Mr. Teodoro T. Encarnacion

\ Undersecretary

Department of Public Works and Highways, Philippines

1. Objectives

The objectives of the Project are to construct point water sources in the upland resettlement areas which are suffering from lack of water and to procure equipment and machineries for drilling wells in barangays affected by Mt. Pinatubo eruption.

2. Project sites

The sites of the Project for construction of point sources are upland resettlement areas which are indicated in AnnexI.

3. Executing Agency

The Department of Public Works and Highways (DPWH) is the responsible and executing agency for the implementation of the Project. The Mount Pinatubo Rehabilitation -Project Management Office (MPR-PMO) in the Department is responsible for supervision as well as operation and maintenance of facilities and equipment provided under the Project.

4. Items requested by the Government of the Philippines

- 1) After discussions with the Basic Design Study Team, the items described in Annex II were finally requested by the Philippine side as the Project components.
- 2) In case deep well is found nonfeasible as a water source, spring water development shall be considered as an alternative water source.
 - 3) However, the final components, both specifications and quantity, will be decided after a further study in Japan, based on in principle the criteria described in Annex III.

5. Japan's Grant Aid system

- 1) The Philippine side has understood the system of Japan's Grant Aid explained by the team.
 - 2) The Philippine side will take necessary measures, as described in Annex IV, for the smooth implementation of the

Project on condition that the Grant Aid by the Government of Japan is extended to the Project.

6. Other relevant issues

In case that Japan's Grant Aid is extended to the Project, the following conditions will be applied:

- 1) the Government of the Philippines will allocate necessary budget for operation and maintenance of the facilities and equipment provided by the Project.
- 2) DPWH will assign the necessary personnel for operation and maintenace of the facilities and equipment provided by the Project.
- 3) after the point sources are constructed by the Project, Barangay Waterworks and Sanitation Association(BWSA) will be formed for operation and maintenance of the facilities, and DPWH will undertake trainings for the personnel of BWSA.
- 4) DPWH will monitor the situation of operation and maintenance by BWSA, and support them to keep the facilities in good condition.

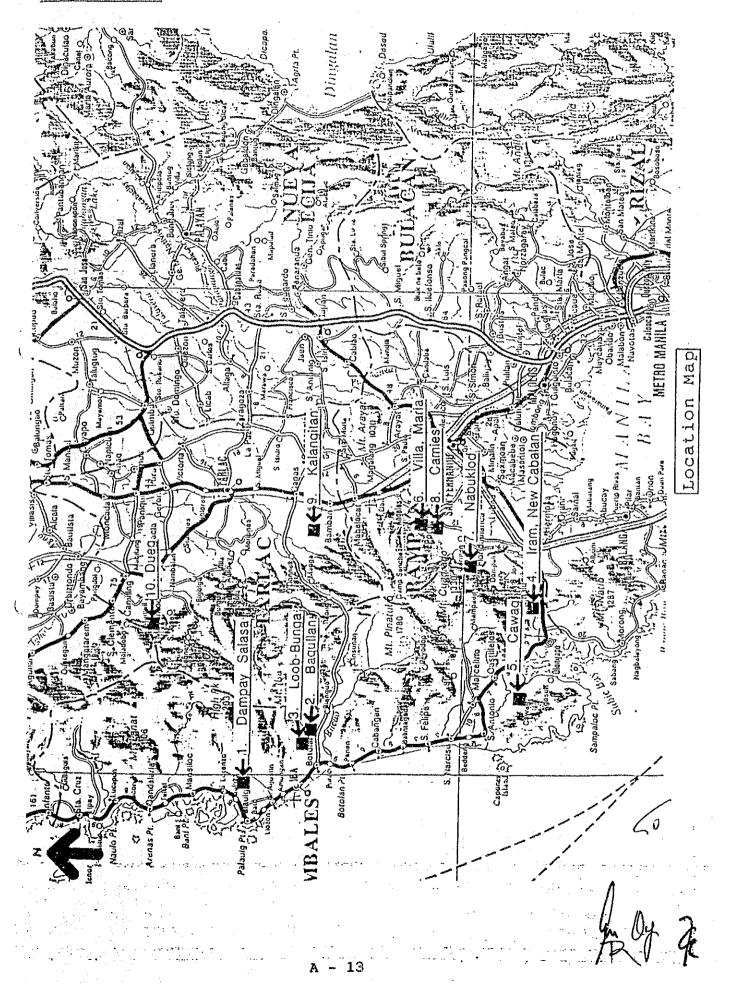

7. Tentative Schedule of the Study

وُ الْحِيْ

- 1) The consultant members will proceed to further studies in the Philippines until /5th December, 1992.
- 2) Based on the Minutes of Discussions and the results of the study, JICA will compile a draft report and dispatch a team to the Philippines to explain its contents around February 1993.

Annex III

Criteria to finalize the Project Components

The following criteria will be applied to decide the final components of the Project.

- 1) Financial and technical viability of the Project
- -2) Hydrogeological and topographical conditions of the Project sites
- 3) Demographical and infrastructural conditions of the resettlement areas
- 4) Technical and managerial capacity of the autorities concerned with the Project
- 5) Safety from possible secondary disastars (future eruption, mud flows, etc.)
- 6) Capacity and quality of existing water sources

no

Undertakings by the Government of Republic of the Philippines

- 1) To secure the land necessary for the implementation of the Project facilities.
- 2) To clear, level and reclaim the construction sites prior to the commencement of the Project.
- To provide facilities for distribution of electricity, water supply and drainage and other incidental facilities outside the site, if necessary.
- 4) To ensure speedy unloading, tax exemption, custom clearance of the products under the Grant Aid at the port of disembarkation.
- 5) To accord Japanese nationals whose services may be required in connection with the supply of the products and services under the verified Contracts such facilities as may be necessary for their entry into the Philippines and stay therein for the performance of their work.
- 6) To exempt Japanese nationals involved in the Project from customs duties, internal taxes and other fiscal levies which may be imposed in the Philippines with respect to the supply of the equipment/machineries and services under the verified Contracts.
- 7) To bear commissions to the Japanese foreign exchange bank for the banking services based upon the Banking Arrangement.
- 8) To bear all expenses, other than those to be covered by the Grant Aid, necessary for the execution of the Project.
- 9) To assign exclusive counterpart engineers/technicians for the Project.
- 10) To use and maintain properly and effectively the facilities constructed and equipment purchased under the Grant Aid.

July 7

A- 6 Depertment Order No. 185 "Creation of MPR-PMO"

REPUBLIC OF THE PHILIPPINES DEPARTMENT OF PUBLIC WORKS AND HIGHWAYS OFFICE OF THE SECRETARY MANILA

06 November 1992

DEPARTMENT ORDER NO. 165 7 Series of 1992 7/10

> SUBJECT: CREATION OF MT. PINATUBO REHABILITATION-PHO ABSORBING THE TASK FORCE FOR MT. PINATUBO REHABILITATION PROJECTS

In the interest of the service, the Mount Pinatubo Rehabilitation-Project Management Office (MPR-PMO) is hereby created and shall henceforth assume the over-all responsibility in the implementation and supervision on the rehabilitation projects in the Mt. Pinatubo affected areas. Director Florante Soriquez shall be the Program Director under the supervision of Undersecretary Teodoro T. Encarnacion. This PMO shall operate as an independent Office. The Program Director can avail himself of the resources and facilities within the Department with the approval of the Secretary/Undersecretary.

An inventory of accomplishment and delineation of previous accomplishment shall be established and proper turnover of functions and responsibilities from concerned implementors shall be completed on or before 16 November 1992 to avoid disruption of the on-going activities. This inventory of accomplishment shall form part of the future evaluation of the projects.

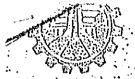

All previous Department orders, circulars and memoranda inconsistent to this order are hereby superceded and modified accordingly.

This Department Order shall take effect immediately.

For compliance.

JOSE P. DE JESUS Secretary

A- 7 Depertment Order No. 186 "Designation of Program Director of MPR-PMO"

OFFICE OF THE SECRETARY

MANILA

SER# 1193

06 November 1992

DEPARTMENT ORDER

Series of 1992

. . .

SUBJECT:

Designation of Mr., Florante Soriquez as the Program Director of the Newly created Mt. Pinatubo Rehabilitation-Project Management Office.

In the interest of the service and in order to effect a smooth implementation of Mt. Pinatubo Rehabilitation Program and turn over of responsibilities of the DPWH Task Force for Mt. Pinatubo Rehabilitation Projects, Mr. Florante Soriquez is hereby designated as Program Director of the newly created Mt. Pinatubo Rehabilitation-Project Management Office (MPR-PMO).

As such, Director Vicente R. Lopez shall turn over all his present duties, responsibilities and resources associated with the implementation of the said projects.

This Order shall take effect immediately.

OSE P. DF JESUS

A- 8 Letter to JICA Manila Office(Transfer of the Excuting Agency)

REPUBLIC OF THE PHILIPPINES DEPARTMENT OF PUBLIC WORKS AND HIGHWAYS OFFICE OF THE SECRETARY MANILA

November 24, 1992

P. 1019

Mr. Masataka Iijima Resident Representative Japanese International Coordinating Agency 12 F Pacific Star Bldg., Corner Sen. Gil J. Puyat Avenue Makati, Metro Manila

Sir.

The Department of Public Works and Highways (DPWH) recently created the Mount Pinatubo Rehabilitation - Project Management Office (MPR-PMO) under Program Director Florante Soriquez with objective to integrate and place the management and control of all Mount Pinatubo Rehabilitation efforts into one responsible organization. The PMO shall plan and program locally-funded and foreign assisted projects, supervise design works, bid, implement, monitor, and maintain infrastructure projects. The PMO is also tasked with coordinating all related efforts in the Department, including those by other government agencies.

We have directed all offices within DPWH which are implementing all Mount Pinatubo related projects, whether locally or foreign funded, to effect immediate turn-over to the MPR-PMO.

In line with this, we wish to inform you that the JICA- assisted "Urgent Water Supply Project for Resettlement Areas and Barangays Affected by Mount Pinatubo" is being transferred from the RWS-PMO to the MPR-PMO. For the time being that the MPR-PMO is in the process of organizing and until such time that it has been fully staffed, RWS-PMO shall continue to provide the PMO with the necessary support. The MPR-PMO shall, however be responsible for all aspects of the projects.

We shall highly appreciate therefore if you would course all communications related to the project to Director Soriquez.

We look forward to the realization of this project. Thank you and warm regards.

Very truly yours,

JOSE P. DE JESUS

Secretary

A- 9 TECHNICAL NOTES

ON

THE URGENT WATER SUPPLY PROJECT FOR RESETTLEMENT AREA AND BARANGAYS AFFECTED BY MT. PINATUBO ERUPTION

The Minutes of Discussions on the Basic Design Study on the Urgent Water Supply Project for Resettlement Area and Barangays affected by Mt. Pinatubo Eruption (hereinafter referred as "the Project") was concluded between the JICA Basic Design Study Team (hereinafter referred as "the JICA Team") and Department of Public Works and Highways (hereinafter referred as "the DPWH") of the Government of the Republic of the Philippines on November 27, 1992.

Following the conclusion of Minutes of Discussions of the Project, the JICA Technical Team continued technical discussions and field survey in Philippines up to December 15, 1992.

The JICA Technical Team and the Mt. Pinatubo Rehabilitation Project Management Office (hereinafter referred to as "the MPR-PMO"), DPWH, made several discussions as described hereinafter.

These discussion results will be studied and final components will be decided in Japan by the JICA Team. The results of the study will be concluded in the Draft Final Report of Basic Design Study which will be presented to Philippine side by the end of February, 1993.

(1) Project Implementation System of DPWH

Organizational system of DPWH for the Project Operation was presented by DPWH as shown in ATTACHMENT I.

The system was basically acceptable, though following considerations should be made for the Project Implementation.

- i) Staff assignment for the Project shall be completed up to the end of 1993.
- ii) Operation and management facilities: i.e. Area Office and work shop, will be prepared within 1993/1994.
- iii) Project program shall be confirmed within 1993/1994 through the coordination activities and technical studies.

(2) Formulation and Site Selection for the Urgent Water Supply Project

The Philippine side explained that the final project formulation and site selection for the Project were in progress due to the difficulty of determining the appropriate well sites caused by the damage of "lahar" expanding.

Through discussions with JICA Technical Team, the basic consideration of the project formulation and site selection procedure were explained by the Philippine side, as part of Mt. Pinatubo Rehabilitation and Reconstruction Project under project operation of the MPR-PMO, DPWH. The priority of the site for the Project was basically concluded in ATTACHMENT II.

However, as the proposed scheme of the Project was not considered to be concreted, the DPWH is required to report to the Japanese side in written form as soon as possible with regards to the Project Programme and the list of the Project sites and facilities.

(3) Construction Works Under Japanese Grant Aid

Both parties confirmed that the JICA Technical Team examined the basic component of the construction works under the Grant Aid as a result of the field survey and which the Philippine side understood.

i) Project Site

Based upon the technical studies and discussions between the JICA Team and MPR-PMO, it is amended that a component of the works for the Project is to construct water supply facilities at following sites; DAMPAY SALASA - Palauig, LOOB BUNGA-Botolan, BAQUILAN-Botolan, CAWAG-Subic, IRAM-New Cabalan, CAMIAS-Porac, KALANGITAN-Capas and DUEG-San Clemente (refer to ATTACHMENT III).

NABUKLOD-Floridablanca and VILLA MARIA-Porac are excluded from the construction component of the Project due to the bad accessibility conditions which has been considered as a hindrance from development of the settlement area.

ii) Quantity of Water Supply Facilities Required

Quantity of water supply facilities within each project site under the Grant Aid was tentatively examined and estimated as shown in ATTACHMENT IV, mainly considering existing facilities and demographic conditions of the site.

iii) Possibility of Spring Development

As a result of field survey, the groundwater development of a new water source seemed not to prevail at the following sites due to topographic and hydrogeological conditions of the site as presented in ATTACHMENT V.

- DAMPAY SALASA, Palauig
- IRAM, New Cabalan
- DUEG, San Clemente

Accordingly, the original scheme of hand-pump well construction needs to be altered. Considering the possibility of water resources development in the sites listed above, a spring water development scheme was recommended.

In connection with the scheme recommendation, the DPWH is being required to be directly responsible for the land acquisition, water rights, implementation and operation and maintenance of the Project.

(4) Procurement of Support Equipment and Machineries

The equipment and machineries requested by the Philippine side was stated in Annex II, Minutes of Discussions.

With the present condition of underground geology and the organizational system of the Project Operation, the basic frame to decide the specifications and quantity of equipment and machineries were confirmed by both JICA Team and MPR-PMO, DPWH as stated in ATTACHMENT VI.

(5) Others

The Philippine side expressed their wish to make request for water supply facilities' construction of the two resettlement sites in Palayan, Nueva Ecija in place of the two sites excluded from the Project; Villa Maria, Porac and Nabuklod, Floridablanca, by the JICA Team as a result of field survey. The Philippine side also explained that they could prepare necessary documents and materials for the project within the two resettlement sites of Palayan, Nueva Ecija.

The JICA Team explained that the request needs to be informed to Japanese side by formal procedure.

PROPOSED PROJECT OPERATION SYSTEM OF MPR-PMO, DPWH

(1) Organization Structure of MPR-PMO, DPWH

On November 6, 1992, the Mount Pinatubo Rehabilitation Project Management Office (MPR-PMO) was created by virtue of Department Orders Nos. 185 and 186 to assume the overall responsibility in the implementation and supervision of rehabilitation projects in the Mount Pinatubo area. The aim is to integrate and place the responsibility for all related works into one responsible organization.

An organizational structure of the MPR-PMO which has Comptrollership, Planning, Programming, Equipment and Maintenance, Monitoring and Construction/Maintenance Units, is similar to that of a Regional Office, DPWH as shown below:

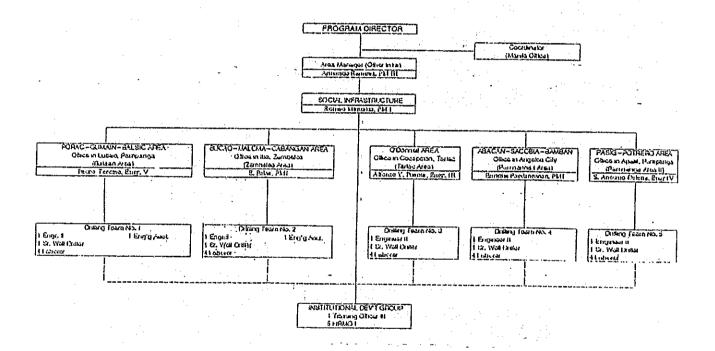

HPR-PHO ORGANIZATIONAL STRUCTURE

(2) Proposed Organizational System of the Project

While the area for river control works under 3 Area Offices devided into nine (9) basins, the area for construction and improvement works under the "Other Infrastructure Area Office"; such as roads and bridge, water supply facilities and buildings, is separated into five (5) basins.

The water supply projects are proposed to be implemented within the respective separated five basins by the "Social Infrastructural Division" of the "Other Infrastructure Area Office". And the organizational system for the water supply projects is planned as below:

PROPOSED ORGANIZATIONAL STRUCTURE (Water Supply Projects/Social Infra)

ATTACHMENT - II

PRIORITY OF THE PROJECT SITES CONSTRUCTED BY MPR-PMO, DPWH

The MPR-PMO has received several requests for the water supply projects in affected area. Identification works of the project is in progress, mainly using following criteria.

- i) Safety from present and future lahar flow
- ii) Accessibility
- iii) Service area and Population covered

Although, the proposed programme for the Urgent Water Supply Project of the MPR-PMO is not concreated, Priority of the Sites is basically formulated as below:

1st Priority - Resettlement Areas

- ZAMBALES
 Dampay Salasa, Palauing
 Baquilan, Botolan
 Loob Bunga, Botolan
 Iram, New Cabalan
 Cawag, Subic
 - PAMPANGA Villa Maria, Porac Nabuklod, Floridablanca Camias, Porac
 - TARLAC
 Kalangitan, Capas
 Dueg, San Clemente
 - NUEVA ECIJA Dona Joseja, Palayan Pinaltakan, Palayan Dos Sientous, Palayan
 - Additional Identified Resettlement Sites by DSWD and/or Presidential Commission

2nd PrioritySchools in Affected Municipalities

3rd Priority

Affected Municipalities
 * Preliminary examination results for Bataan and Pampanga provinces were presented to the JICA Team. The quantity of water supply facilities required was estimated as 231 units in Pampanga Province and 60 units in Bataan Province.

ATTACHMENT - III

10. Dueg, San Clemente	1,100	2,000	550	18	29	SD(2)	•	SD	
TOTAL			· · · · · · · · · · · · · · · · · · ·		148			DW 64 wells SD 3 sites	

NOTE: *1 DW - Deep Weil; SW - Shallow Well; SD - Spring Development; S - Spring, number in the branket shows point sources and faucets

- *2 Contaminated water sources fall into the category of "No Function"
- •3 Quantity required for each site is estimated based on the following factors:
 - Quantity of existing facilities; both deep wells and public faucets of spring development is deducted from the total number of wells required to get the quantity of additional facilities needed.
 - However, when the quantity required is smaller than the number (N) below, the number (N) is considered as the required quantity for the water supply facilities.
 - N = number of Barangays or sitios + 1 (for official building)
 - The number (N) may be equivalent to the number of faucets required for spring development.

PRELIMINARY EVALUATION OF GROUNDWATER DEVELOPMENT POTENTIALITY

Site	Topography	Geology	Aquifer	Dev't. Potentiality
ZAMBALES				
1. Dampay Salasa, Palauig	Hilly Areas	Plutonic Rock (Meso-Paleozoic)	Fissure Zone	Low
2. Baquilan, Botolan	Rolling Land	Plutonic Rock (Meso-Paleozoic)	- do -	Medium
3. Loob-Bunga, Botolan	Rolling Land	Plutonic Rock (Meso-Paleozoic)	- do -	Medium
4. Iram, New Cabalan	Isolated Hill	Volcanic Rock (Tertiary)	- do -	Low
5. Cawag, Subic	Rolling Land	Plutonic Rock (Meso-Paleozoic)	- do -	Medium
PAMPANGA				
6. Villa Maria, Porac	Hilly Areas	Volcanic Sediment (Quarternary)	Porous Layer	Low-medium
7. Nobuklod, Floridablanca	Hilly Areas	Volcanic Sediment (Quarternary)	- do -	Low-medium
8. Camies, Porac	Hilly Areas	Volcanic Sediment (Quarternary)	- do -	Low-medium
TARLAC				
9. Kalangitan, Capas	Undulating Lowland	Volcanic Sediment (Quarternary)	Porous Layer	High
10. Dueg, San Clemente	Mountainous Land	Plutonic Rock (Meso-Paleozoic)	Fissure Zone	Very Low

Note: Sites which fall into the category of "Low Development Potentiality", are considered to be unsuitable for groundwater development. Alternative scheme of water resource development, such as spring development, should be established at the sites.

BASIC FRAME TO DECIDE THE SPECIFICATIONS AND QUANTITY OF EQUIPMENT AND MACHINERIES

The following factors will be considered to decide the final components, both the specifications and quantity of equipment and machineries to procure.

- (1) Drilling Rig will be required to have capacities and considering the following factors in selecting:
 - Sufficient capacity to drill the hard rock formations which are widely found in the Project Area.
 - Sufficient capacity to drill at the Project sites of elevated hilly lands.
 - Technical and managerial capacity of the executing agency for operation and maintenance.
- (2) Vehicle and supporting equipment and machineries of drilling works will be selected taking into consideration the following factors:
 - Smooth implementation of the Project considering the broad project areas, scattered sites and hilly topography.
 - Appropriate implementation plan based on the organizational system of the Project operation.
- (3) Investigation and monitoring equipment will be selected based on the following capacity and operation conditions:
 - Sufficient capacity to investigate the deep well which will be constructed by the Project.
 - Handling capacities of both technical and organizational conditions for the investigation, monitoring and maintenance.

A-10 Minutes of Discussions (Explanation of Draft Final Report)

MINUTES OF DISCUSSION
ON
THE URGENT WATER SUPPLY PROJECT
FOR
RESETTLEMENT AREAS AND BARANGAYS
AFFECTED BY MT. PINATUBO ERUPTION
IN
THE REPUBLIC OF THE PHILIPPINES
(CONSULTATION ON DRAFT REPORT)

From November through December, 1992, the Japan International Cooperation Agency (JICA) dispatched a Basic Design Study Team on the Urgent Water Supply Project for Resettlement Areas and Barangays Affected by the Mt. Pinatubo Eruption (hereinafter referred to as "the Project"), to the Republic of the Philippines. Through discussions, field surveys, and technical examination of the results in Japan, the team has prepared the draft report of the study.

In order to explain and to consult the Philippine side on the components of the draft report, JICA sent to the Philippines as Study Team (hereinafter referred to as "the Team"), headed by Mr. Hisashi Ohno, Official, Grant Aid Division, Economic Cooperation Bureau, Ministry of Foreign Affairs, from 14th to 20th February, 1993.

As result of discussions, both parties have confirmed the main items described on the attached sheets.

Manila, 18th February, 1993

Program Director

MPR-PMO

Department of Public Works and Highways

Manila, Philippines

ATTACHMENT

1. Components of Draft Report

The Government of the Philippines has agreed and accepted in principle the components of the Draft Report proposed by the Team.

2. Responsible and Executing Agencies

- The Department of Public Works and Highways (DPWH) is the responsible executing agency for the implementation of the project. The Mt. Pinatubo Rehabilitation Project Management Office (MPR-PMO) of the DPWH is responsible for the supervision as well as operation and maintenance of facilities and equipment provided under the Project.
- 2) The Philippine side should inform the Japanese side if there are any changes concerning the management structure of the Project in the future.

3. Japan's Grant Aid System

- 1) The Government of the Philippines has understood the system of Japanese Grant Aid Program which was explained by the Team.
- 2) The Government of the Philippines will take necessary measures described in Annex for smooth implementation of the Project on condition that the Grant aid by the Japanese Government is extended to the Project.

4. Further Schedule

- 1) The Government of the Philippines will send further comments on the Draft Report, if any, through the diplomatic channels to JICA, not later than 28th February, 1993.
- 2) The Team will prepare the final report in accordance with the confirmed items, considering the comments and suggestions by the Philippine side on the Draft Final Report. The Final Report will be sent to the Government of the Philippines around May, 1993.

5. Other Important Issues Related to the Project

- 1) Both sides have confirmed all the items appearing in the Minutes of Discussions signed on 26th November 1992, a copy of which has been reproduced in the Draft Report.
- The Government of the Philippines will make internal arrangements, such as securing of clearance from the Investment Coordination Committee (ICC), which are essential to facilitate the prompt implementation of the Project.
- 3) The equipment and vehicles procured under the Japan's Grant Aid should be properly maintained and be exclusively used for the Project during the whole implementation period. A 31

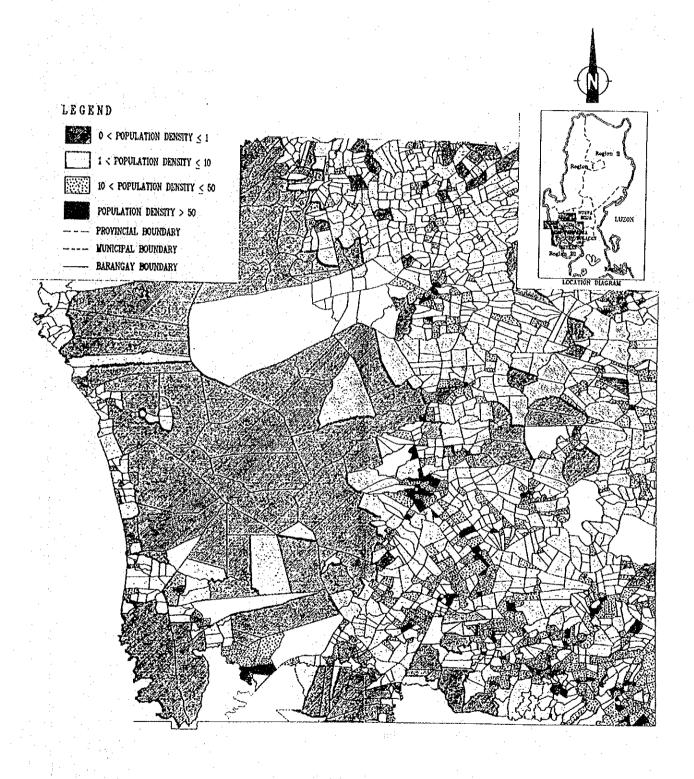

170

ANNEX: Necessary measures to be taken by the Government of the Philippine in case Japan's Grant Aid is extended.

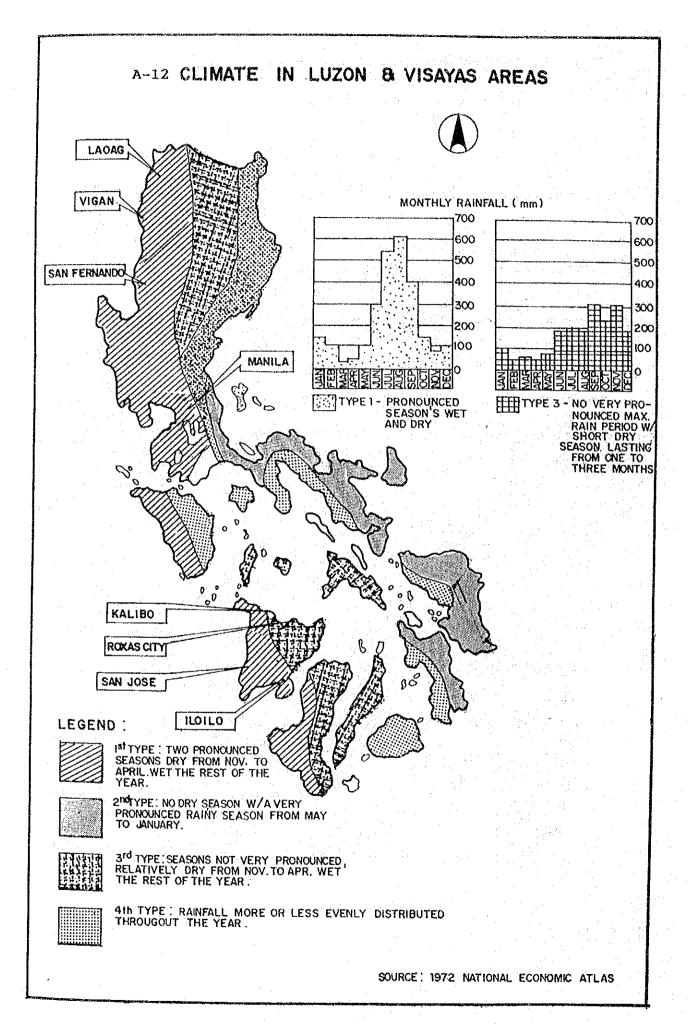

- 1. To secure the site for the Project.
- 2. To undertake any related works which may become necessary in and around the site during the construction.
- 3. To provide land as sites for temporary offices and stockyard for the equipment and machinery during the implementation period.
- 4. To bear commissions to the Japanese foreign exchange bank for the banking services based upon the Banking Arrangement.
- 5. To exempt taxes and to take necessary measures for customs clearance of the materials, vehicles and equipment brought for the project at the port of disembarkation in the Philippines.
- 6. To accord Japanese Nationals whose services may be required in connection with the supply of products and the services under the verified contract such facilities as may be necessary for their entry into the Philippines and stay therein for the performance of their work.
- 7. To maintain and use properly and effectively the facilities constructed and equipment and vehicles purchased under the Grant.
- 8. To bear all the expenses, other than those to be borne by the Grant, necessary for the construction of the facilities as well as for the transportation of the equipment and vehicles.
