UNCONFINED COMPRESSION TEST

APPENDIX 2.6 EXAMINATION OF CONSOLIDATION

APPENDIX 2.6 EXAMINATION OF CONSOLIDATION

The settlement due to consolidation can be estimated as follows:

$$S_c = \frac{C_c}{1+e_0} \cdot H \cdot \log \frac{p_z + \Delta P}{p_z}$$

in which S_c : Settlement due to Consolidation

C_c : Compression Index

e_0 : Void Ratio

H : Thickness of Compressible Layer

p_z : Original Intergranular Pressure at the Depth of Mid-height of the Layer

ΔP : Increase in pressure

$$\Delta P = 4 I_\sigma \cdot \Delta W / (B \cdot L)$$

ΔW : Load of Structure

B, L : Width and Length of the Basement of Structure

I_σ : Coefficient of influence

$$I_\sigma = \frac{1}{4\pi} \left(\frac{2mn\sqrt{m^2+n^2+1}}{m^2+n^2+m^2n^2+1} \frac{m^2+n^2+2}{m^2+n^2+1} + \tan^{-1} \frac{2mn\sqrt{m^2+n^2+1}}{m^2+n^2+m^2n^2+1} \right)$$

$$m = B/z, \quad n = L/z, \quad z: \text{Depth}$$

According to the report on The Multipurpose Cyclone Shelter Programme,

$$\frac{C_c}{1+e_0} = -0.076 + 0.0049 W_L$$

in which W_L : Liquid Limit

The result of examination of consolidation settlement on the each proposed sites are shown as follows:

APPENDIX 3

APPENDIX 3.1 COUNTRY DATA (BANGLADESH)

(I) Basic Indicies

- (1) Name of the Country : The People's Republic of Bangladesh
Capital : Dhaka
Independence day : March 26, 1971

(2) Land and population

- Area : 144 thousand km²
Population : 109.9 million (March, 1991)
Population density : 740 persons/km²
Population increase rate : 2.026% (1981-1991)
Municipal population ratio : 10.7% (1991)
Life expectancy at birth : 56.1 (1991)

(3) Political system

The President shall, as head of state, take precedence over all other persons in the State, and shall exercise the power and perform the duties conferred and imposed on him by the constitution and by any other law. The President shall act in accordance with the advice of the Prime Minister.

The President shall hold office for a term of five years from the date on which he enters upon his office. No person shall hold office as President for more than two terms, whether or not the terms are consecutive.

There shall be a cabinet for Bangladesh having the Prime Minister at its head and comprising also such other Ministers as the Prime Minister may from time to time designate. The executive power of the Republic shall be executed by or on the authority of the Prime Minister.

(4) Religion

About 86.7% Moslems, 12.1% Hindu, with 1.2% Buddhists and Christians.

(5) Language

Bengali is the official language. English is popularized although English speaking ability is dependent upon the age and education levels.

(6) Ethnic composition

The population is overwhelmingly Bengal consisting of various mixed races, and largely divided into Travidian, Mongolian and Aryan races although it is impossible to identify these races in a strict sense

(7) Education

Literacy rate for all ages : 24.8% (1991)

Percent of participation rate

Primary (5-9 years) : 94.6%

Secondary (10-14 years) : 27.6%

Higher (15-24 years) : 4.20%

(8) Currency and exchange rate

Currency Unit : Taka (TK)

Exchange rate : TK 38.63 to US\$1 (in December 1992)

(9) Climate, Geology/Geography and Latitude

1) Climate

The climate belongs to a typical semi-tropical monsoon climate. According to the climatic features, one year is divided into the following three seasons: namely, (1) North-western season (Summer: March through May); (2) Monsoon season (Rainy season: June through October); and (3) Dry season (November through February). The atmospheric temperature is highest in April and reaches 35.06°C in maximum in Dhaka, while the lowest temperature is 11.72°C in January in the dry season. The rainfall is concentrated in the rainy season as roughly 80% of the yearly rainfall takes place during this season.

The rainfall is generally large in the eastern part of the country, and that in the western part is small.

2) Geology/Geography

Located at the eastern edge of the Indian Subcontinent, the majority of the land is occupied by the lower reaches (downstream river sections) of the big three rivers, the Ganges, Jamuna and Meghna rivers, and featured by a typical delta zone where tributaries and distributaries flow in. The land is mostly comprised of vast, low and flat alluvial plain, and the ground consists of weak silty formations.

3) Latitude

Bangladesh is located within lat. 20° 75' - 25° 75' and longitude 88° 30' - 92° 75'. While its western part borders West Bengal of India, its northern part borders Assam and Maharashtra of the country. Moreover, its eastern part successively borders Tripura, Mizoram and other various states of India, the south-eastern part of the country faces Myanmar (Burma) on the Chittagong area hill zone.

(II) Socio-economic Indices

- (1) Gross domestic products (GDP)

GDP (1990-1991)	: US\$21.6 billion
GDP per capita	: US\$185 (1991)
Annual growth rate	: 2.6% (1988)

- (2) Gross national products (GNP)

GNP	: US\$21.0 billion
GNP per capita	: US\$191 (1991)

- (3) Sectoral shares of GDP (Refer to Table 1)
- (4) Configuration of major export/import products (Refer to Table 2)
- (5) International balance of payment (Refer to Table 3)
- (6) Foreign exchange reserves (Refer to Table 4)
- (7) Debt service payments of foreign loans (Refer to Table 5)
- (8) Trade with Japan

Import from Japan	: US\$304 million (1990/91)
Export to Japan	: US\$53 million (1990/91)

- (9) Financial balance (Refer to Table 6)
- (10) Population Distribution (Refer to Table 7)
