Communications and Tourism

Shinji Kataoka

Leader,

Preparatory Study Team

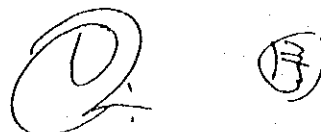

Japan International

Cooperation Agency

The Preparatory Study Team for the Study on Ports Development in Kiribati, headed by Mr. Shinji Kataoka, Director of Planning and Design Standard Division, Port & Harbour Research Institute, Ministry of Transport, has stayed in Kiribati from November 24, 1993 for site visit to several ports in five islands, held meetings with the officials of Ministry of Transport Communications and Tourism and other Ministries concerned with the Study for several times.

In these meetings, both sides agreed on the Scope of Work for the Study, and the minutes of meeting on the Scope of Work are noted as follows:-

1. Kiribati side and Preparatory Study Team agreed that the feasibility Study on the improvement Plan of Betio Port will be the main component of the Study.
2. Kiribati side pointed out the following two problems to be considered mainly and solution for them should be made in the Study.
 - i) Harbour basin is too shallow even for inter-island vessels to enter, and area of it is insufficient for effective port activities.
 - ii) Cargo handling area is so narrow that the cargo handling is inefficient even for the present cargo handling demand.
3. Both sides agreed that the facilities to be proposed in the Improvement Plan of Port of Betio (Feasibility Study) would be as follows:
 - i) Vessels between Betio and outer islands will have access to land for loading cargo at least.
 - ii) Expansion of the cargo handling area will be made by land reclamation.
4. Kiribati side requested to conduct environmental study in consideration with the draft environmental guidelines to be presented to the Preparatory Study Team. The Preparatory Study Team agreed to taking it into account in the Study to a reasonable extent.

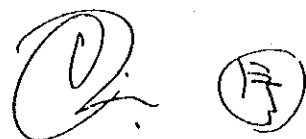

5. Both sides agreed that the Port Authority, which is established under an Act, is very important for maintenance of ports, even though it has not been actually set up.

Therefore, assessment of the Port Authority will be made in the Study.

6. The Preparatory Study Team pointed out that problems of unsatisfactory maintenance dredging exist in Betio Port as well as Kiritimati and outer islands.

Therefore, both sides agreed that the Study will include recommendations on maintenance dredging system covering Betio Port, London Wharf, and outer islands.

A handwritten signature, possibly 'D.', is written to the left of a circular stamp. The stamp contains a stylized symbol or monogram.
