Concrete description of the way how those publications have been utilized

So far there is no investigation in this matter. However, some library, like National library and Universities library request the proceedings of the Seminar and STC News which have ISBN and ISSN number respectivelly to add their students knowledge on sabo technology.

2. CONCRETE CONTENTS OF SEMINAR

1. The First Seminar on Sabo Engineering (SSE-1) (1992/1993)

1) Theme　: Effect of Sabo Works to Human life

2) Purpose : (1) To exchange of knowledge on erosion and sediment disaster prevention

(2) To disseminate sabo technology

3) Subtheme and topics

(1) Endeavour to Protect Human life and Activities

a. Present countermeasures against debris/ sediment flow

b. Present countermeasures against agradation and degradation.

c. Critical rainfall for generating debris/sediment flow

d. Present evacuation system for disaster management

e. Present countermeasures against landslide

f. Regulation on sediment related disaster prevention

(2) Influence of Sabo Works to living of Inhabitants and Socio Economic Activities.

a. Influence of sabo works on agricultural production

b. Influence of sabo works on developing of isolated area

c. Influence of sabo works on job creation

d. Influence of sabo works on water resources development

e. Influence of Sabo Works to living of instabitants

4) Date

February 17 - 20, 1993. (4 days)

5) Site

Sabo Technical Centre and Multipurpose sabo dam at Pabelan River, Mt Merapi.

6) Number of Presented Paper : 13 pcs

7) Number of participants (72 ps)

Consist of :

(1) JICA

a. JICA Indonesia office	:	2 ps
b. JICA Expert to DOR	:	2 ps
c. JICA long-term expert to STC	:	4 ps
d. JICA short term expert to STC	:	1 ps
		9 ps

(2) Indonesian Participant

a. Directorate of River	:	2 ps
b. STC	:	14 ps
c. Research Institute for Water Resources Development	:	4 ps
d. Sabo project	:	8 ps
e. River project	:	4 ps
f. Local government	:	5 ps
g. Universities	:	11 ps
h. Related institution	:	15 ps
		63 ps

2. International Seminar on Erosion and Sediment Control (ISESC) (1993/1994)

1) Theme : Development and Proper Application of Sabo Technology Based on Regional Characteristics.

2) Purpose :

(1) To exchange experience and knowledge of sediment disaster countermeasures among disaster prone countries.

(2) To disseminate sabo (erosion and sediment control) technology

3) Date

January 11 - 14, 1994. (4 days)

4) Site

Sabo Technical Centre and Sabo fasilities at Putih River, Mt. Merapi area.

5) Number of Papers

(1) Presented papers

a. Special Reports	:	6 pcs
b. Country Reports	:	9 pcs
c. Additional Paper	:	1 pc
		16 pcs
(2) Un-presented papers	:	9 pcs
Total	:	25 pcs

6) Number of Participants (78 ps)

(1) International Organization : 8 ps
(UNDHA - Geneva, JSECE - Japan, ADPC - Thailand, IRTCES - China, UNDP - Indonesia office, UNESCO - Indonesia office)

(2) Country Representation

a. Indonesia	:	2 ps
b. Nepal	:	2 ps
c. Philippine	:	1 ps
d. Venezuela	:	1 ps
e. Honduras	:	1 ps
f. Japan	:	1 ps
g. China	:	1 ps
		9 ps

(3) JICA

a. JICA Indonesia office	:	3 ps
b. JICA Expert to DEWRD / DOR	:	2 ps
c. JICA long-term expert to STC	:	4 ps
d. JICA short term expert to STC	:	1 ps
		10 ps

(4) Japan Sabo Society : 4

(5) Consultant : 1

(6) Indonesian participants

a. STC Project	:	14 ps
b. Directorate of Rivers	:	3 ps
c. Research Institute for Water Water Resources Development	:	3 ps
d. Sabo Project	:	8 ps
e. River Project	:	3 ps
f. Local government	:	2 ps
g. Related institutions	:	12 ps
h. Universities	:	3 ps
		48 ps

3. The Third Seminar on Sabo Engineering (SSE-3) 1994/1995

1) Theme : Environment and sabo

2) Purpose :

(1) To understand what is the principle of sabo works

(2) To understand human interact in implementing sabo works with their environment

(3) To find the significant environmental impact of sabo to human activities, safety and security

(4) To find out how far the environmental legislation has been applied in sabo area

(5) To collect opinion for the improvement of sabo facilities to increase the environmental quality in sabo area

3) Sub theme

(1) The impact of sabo upon the environment

(2) Improvement of environmental quality

4) Date

November 21 - 24, 1994 (4 days)

5) Site

Sabo Technical Centre and Sabo facilities at Bebeng River, Mt. Merapi

6) Number of Expected Papers : 13 ps

7) Number of Expected Participants : 60 ps

Consist of :

- Ministry of Public Works
- Ministry of Mine and Energy
- Ministry of Forestry
- Ministry of Social Welfare
- State Ministry by of Environmental
- Local Government
- JICA
- JICA Expert to STC (longterm and short term experts)
- Related Institutions.

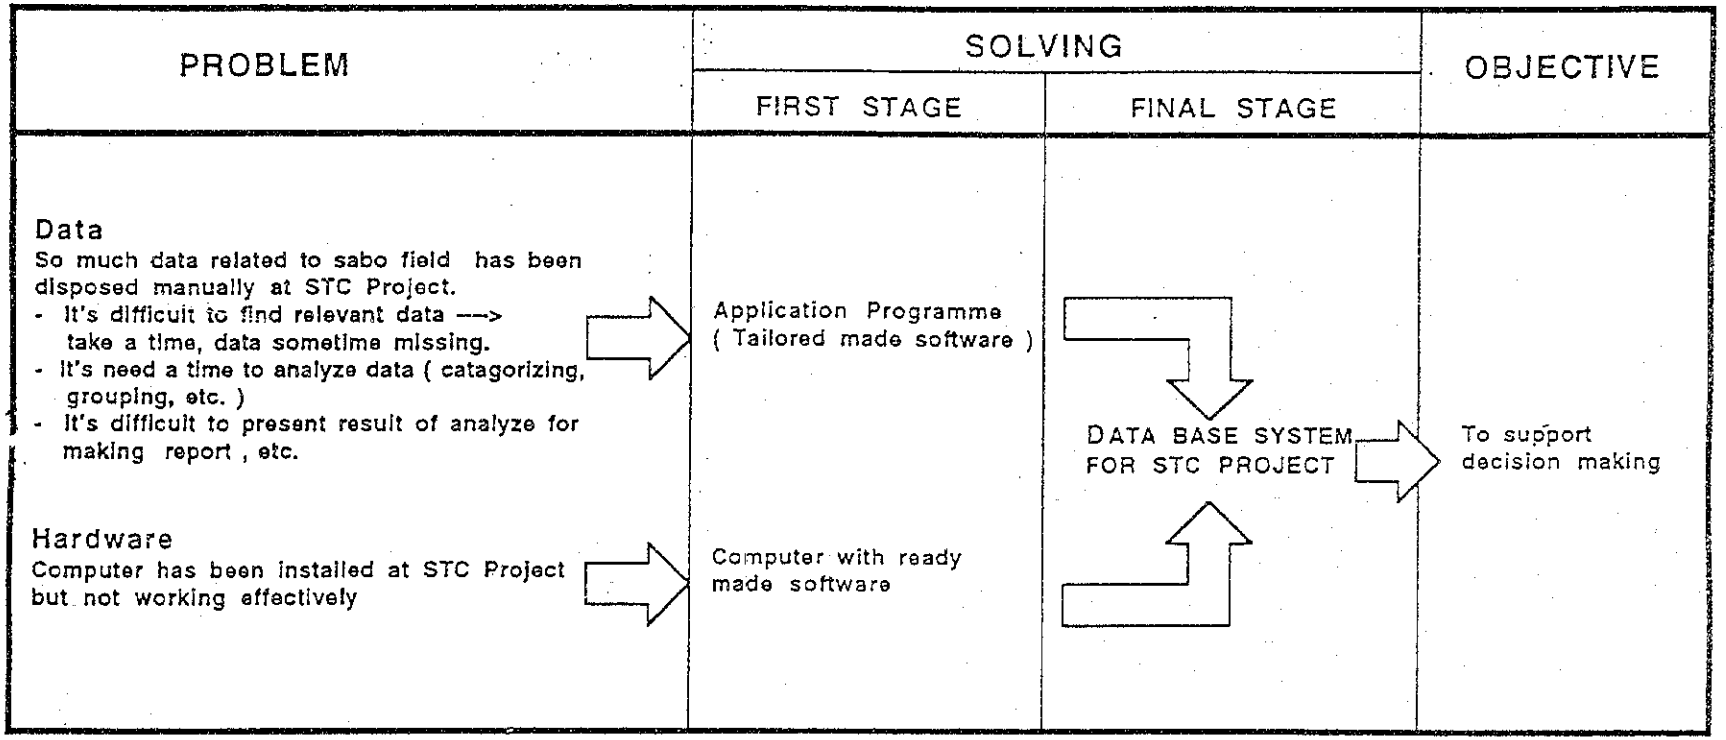
⑤－4　データベースの概念

DATA BASE

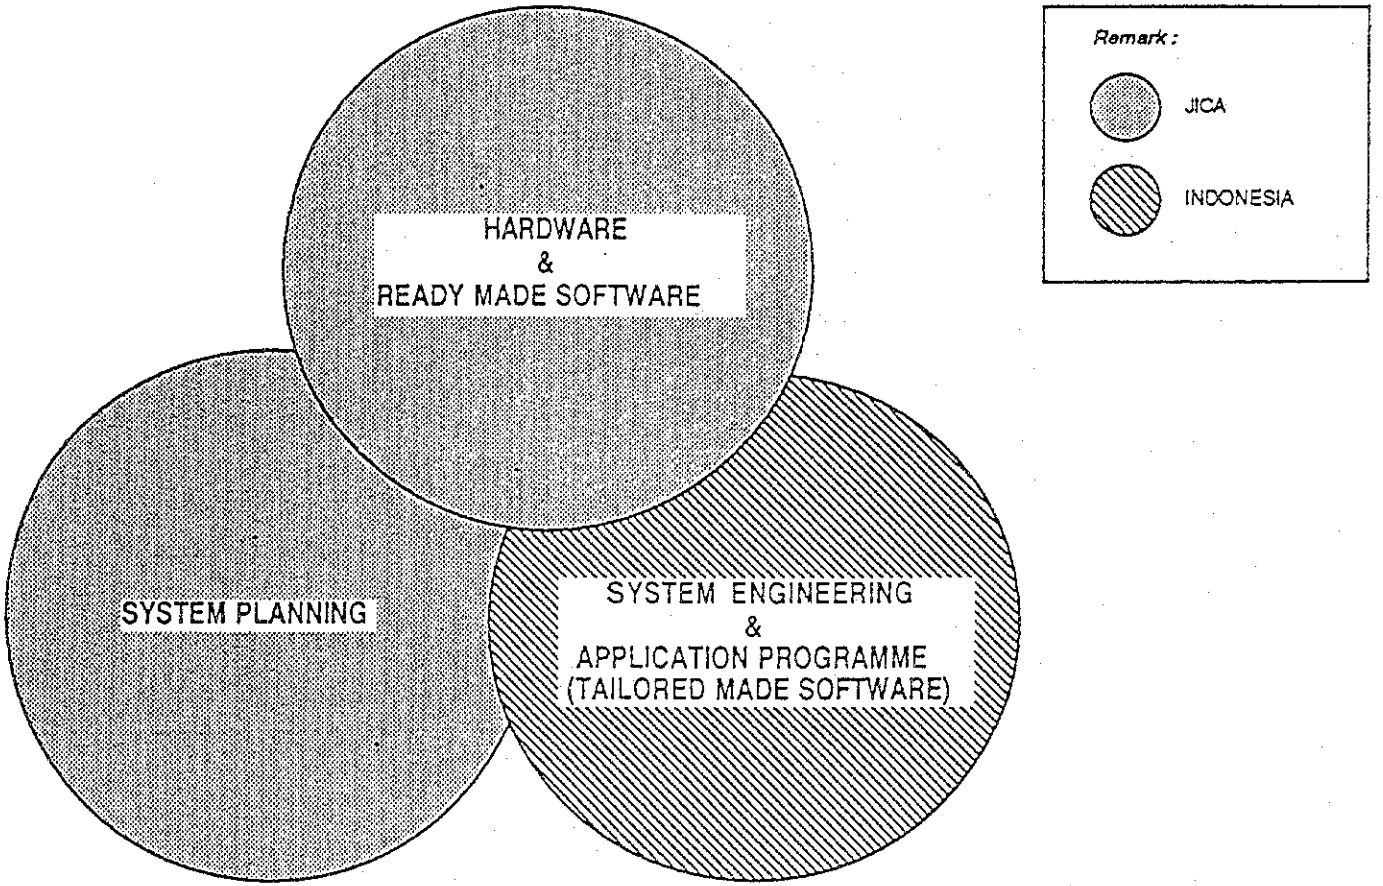
1. Purpose
   (1) Development policy on sabo works
   (2) The five year plan on sabo works (annual report, midterm review)
   (3) Technical advice to local government
   (4) Maintenance of sabo facilities
   (5) Simplification of sabo management at STC Project

2. Contents
   (1) Disposition of sabo fasilities information
   (2) Disposition of sediment related disaster information
   (3) Disposition of STC Project data

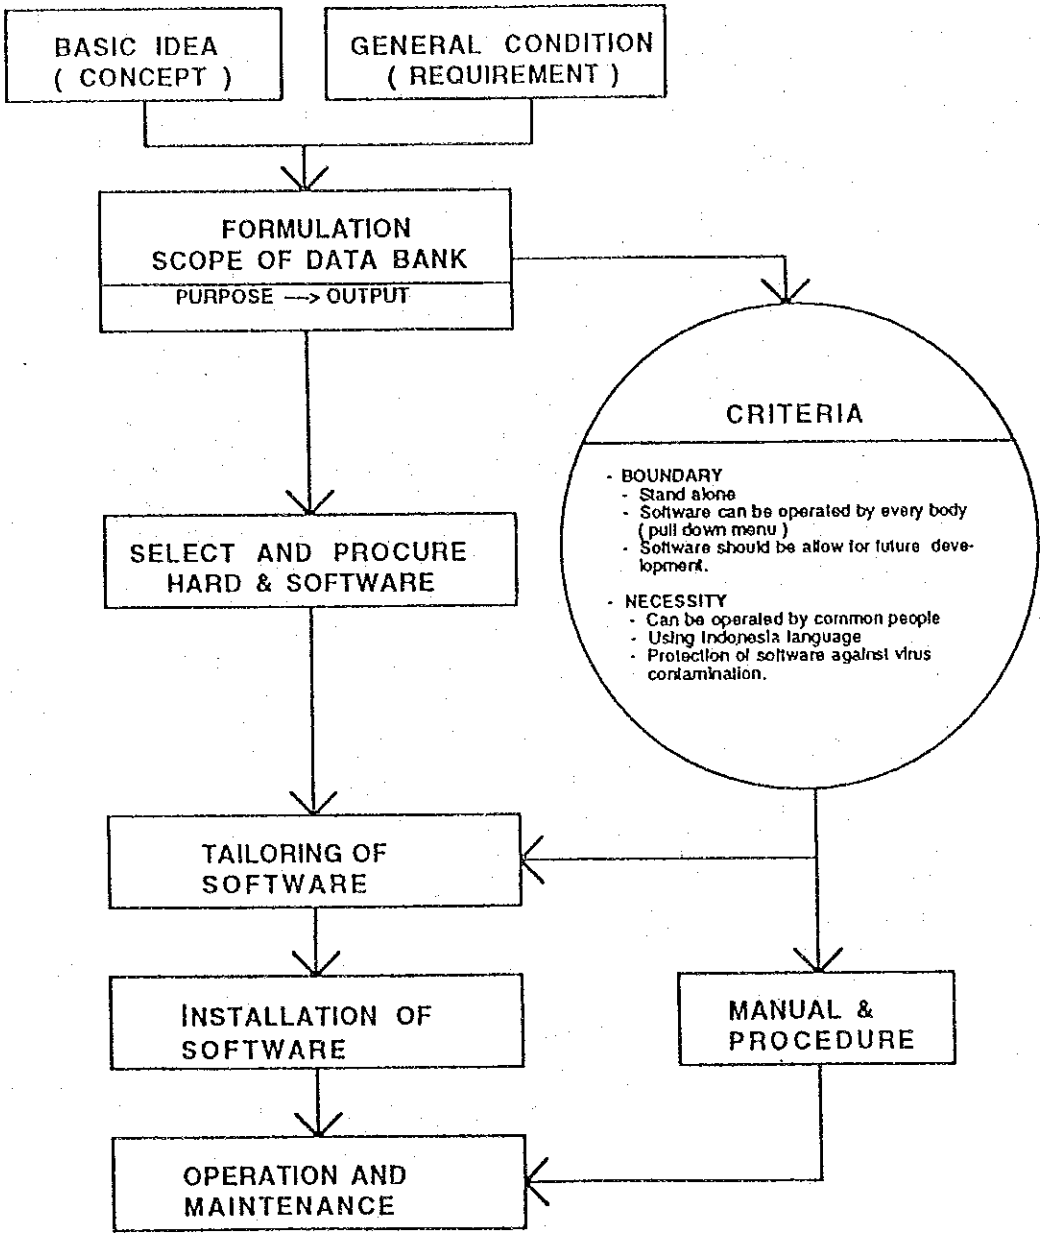
BASIC CONCEPT OF THE DATA BASE SYSTEM IN STC PROJECT



CONSTRUCTION OF DATA BASE IN STC PROJECT



GENERAL IDEA OF DATA BASE SYSTEM IN STC PROJECT



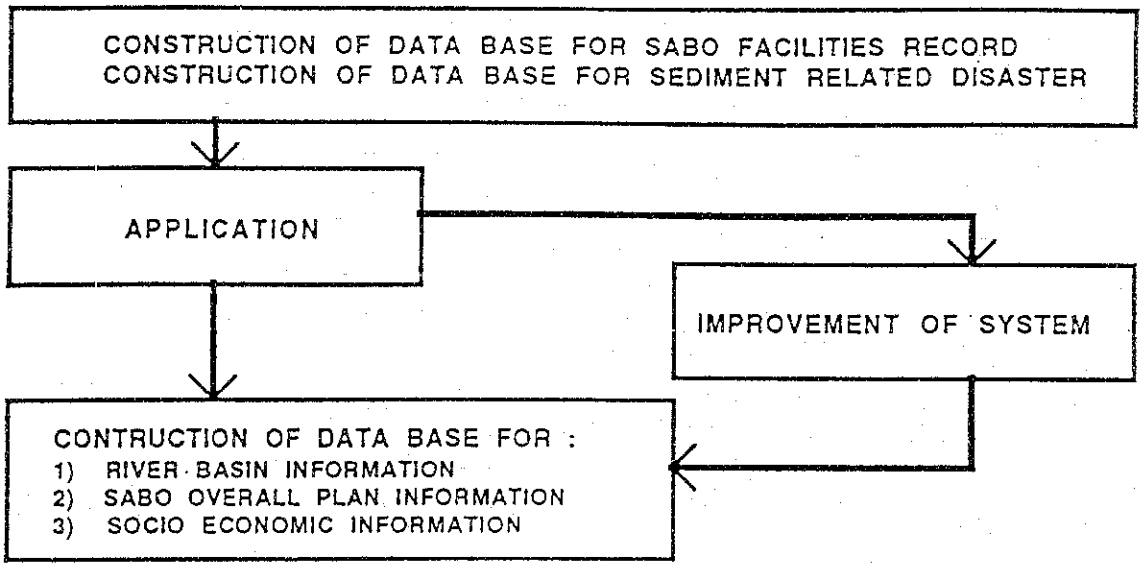
TARGET OF DATA BASE ON STC PROJECT

SCOPE OF DATA BASE	TARGET
1. DISPOSITION OF SABO FACILITIES INFORMATION	1) In order to examine the adequate design to the jobsite (for example : proposition on improvement points, sellection of the proper method, the detail figure, the damage points of the facilities and the condition around them will be arranged and will be looked up easily. 2) In order to explain the invesment amount in the river of sabo facilities will be arranged.
2. DISPOSITION OF SEDIMENT RELATED DISASTER INFORMATION	1) In order to explain the disaster to public. 2) In order to adequate measures in occurence of disaster. 3) In order to make the plan of sabo facilities and forecasting/ warning system, features of debris flow, landslides and slope failures will be exposed.
3. DISPOSITION OF STC PROJECT DATA	1) Management of books reports and maps. 2) Management of facilities and equipments,etc. 3) Management of finance,personality etc. 4) Record ofsurvey investigation in job site, etc. 5) Record of training activities (syllabus, curriculum, record of participant, etc.)

Remark :

At first these data base system will be made separately, then in future, these will be compiled to one system, and be utilized as network system.

AN OUTLINE OF PROCESS OF THE DATA BASE



SUBJECT	REMARKS
River Basin Information	Topography, geology,climate, rivers,etc.
Sabo Overall Plan Information	Name, location, river name, construction year, cost, plan items, design items, photo, topographical map, longitudinal section, design drawing, etc.
Soci Economic Information	population,land utilities, infrastructures (housing, public fcilities), etc.

CONTENTS AND NUMBER OF DATA BASE SYSTEM

NO	KIND OF DATA BASE	NUMBER OF DATA BASE	CONTENTS OF DATA BASE
1	Disposition of sabo facilities information	Sabo dam, dike,training dike, channel works, sand pocket etc.	Location, river name, planning discharge, planning rainfall, blue print, topographical map, longitudinal map. Date of construction, cost,rehabilitation measures, etc.
2	Disposition of sediment related disaster information	Debris flow, mud flow, sediment flow	Location,date,rainfall (one day, max. one hour, max. two hours) Deposit condition (shape, scale, bed slope, max.grain size etc) Damages (person, houses,field etc.), urgent countermeasures, topographical map drawing the deposit area.
		Landslide, slope failure	Location,date,cause (rainfall-one day, max.one and two hours). Condition of collapse, landslide, damage (person, houses, field etc.). Urgent countermeasures. Topographical map with the landslide/slope failure.
3	Disposition of STC Project data	Training division	Trainees,lecturers, teaching materials.
		Technical development division	Investigation record (date,researcher,budget,purpose,result) Experiment (date,researcher,purpose,result,detail of condition).
		Information division	Seminars, workshop, conferences.
		Administration division	Books and reports such as in Yokota Library. Equipment

DATA UTILIZATION

Example

DATA SUPPLIER: TOSHIAKI UDONO

DATE OF INVESTIGATION: 93.11.29

⑥ 現地調査

⑥－1　ハウゼアにおける地すべり対策

家屋を巻き込んだ大きな地すべり地で、村の幾つもの家屋に地すべりによるクラックが確認される。雨期の後半に移動量が多いことから、降雨に影響されていると思われるが、各家に設けられた生活用水や食用のコイのためのため池も大きな要因と考えられている。

現地調査の状況

地すべりによってクラックの入った家

地すべりの一要因と考えられる各家に設けられたため池

⑥－3　94年スメル火山噴火災害状況

94年3月に噴火し、大規模火砕流災害が発生したスメル火山南西麓のコバアン川を中心に視察した。噴火後、火砕流堆積物の流出による大規模土石流が発生し、コバアン第7、第5ダムが壊滅的ダメージを受けた。このダムは技術開発項目の1つである、ダムの天端磨耗対策の試験施工サイトとなっており、復旧の進捗状況によっては、計画の見直しを考えなければならないが、現在、砂防技術センターの技術支援を受けた復旧工事が急ピッチで行われており、予定通り施工できる見通しである。

・ゴバアン川第7ダムの被災状況(下流より)
この上流に建設予定の主ダムの水通しに天端磨耗対策の試験施工を行う予定であった。

・ゴバアン川第7ダム(ソデより)
