Department of Labour  
Pre-Employment Training  
Course Outline  
for  
Machine Shop

---

1. Objective :

This course is offered to provide trainees with the basic skills in machine shop and related subjects in order to meet the employment needs of industries. The objectives of the course are classified as follows :

- 1.1 To bring up machine shop craftsmen for industries.
- 1.2 To bring up competent skilled workers in this field to be assistant technicians.
- 1.3 To give the trainees a sound foundation in order to up-grade themselves.
- 1.4 To train and to encourage the skilled workers to own their business.
- 1.5 To stimulate in trainees' good habits, attitudes and relational thinking, to be good members of society.

2. Length of Training :

The trainees will be trained both in theoretical and practical course at UBISD for 10 months, followed by 2 months in-plant training.

3. Qualifications :

- 3.1. 16-25 years of age
- 3.2. Passed 3 years secondary level
- 3.3. Physically fit
- 3.4. Passed the entrance examination given by UBISD

4. Certification :

The graduates of this course will receive a certificate on pre-employment training as machine shop craftman issued by the UBISD, Department of Labour.

Outline of the Course  
for  
5.1 General Fitting Work.

No.	Subject	Period		
		Theory	Pr.	Total
1.	General Safety in Machine Shop	4	-	4
2.	Measurement	20	20	40
3.	Reading Blue Prints-Drawing	28	32	60
4.	Shop Mathematics	32	-	32
5.	Engineering Materials	24	-	24
6.	Basic Fitting Work	22	138	160
7.	Fitting Work 1	34	286	320
8.	Turning 1	56	264	320
9.	Milling 1	52	286	338
10.	Fitting Work 2	48	272	320
	Total	320	1280	1600
	Rate	20%	80%	100%

Outline of the Course  
for  
5.2 Lathe Operator

No.	Subject	Period		
		Theory	Practice	Total
1.	General Safety in Machine Shop	4	-	4
2.	Measurement	20	20	40
3.	Reading Blue Prints-Drawing	28	32	60

Pre - Employment Training  
Course Outline  
for  
Welding & Sheet Metal  
Ubon Institute for Skill Development

---

1. Objective :

This course is offered to provide trainees with the basic skill in welding & sheet metal in order to meet the employment needs of industries. The objectives of this course are classified as follows :

- 1.1 To bring up competent welding & sheet metal craftsmen for industries.
- 1.2 To bring up skilled workers in the field of welding & sheet metal to be assistant technicians.
- 1.3 To give the trainees a sound foundation in order to up - grade themselves.
- 1.4 To train and to encourage the trainees to set up their own business.
- 1.5 To stimulate in trainees' good habits and attitude and relational thinking to be a good member of society.

2. Length of Training :

The trainees will be trained both in theoretical and practical courses at UBISD for 10 months followed by 2 months in - plant training.

3. Qualifications :

- 3.1 16 - 25 years of age
- 3.2 Passed 4 years for primary schooling or equivalent
- 3.3 Physically fit
- 3.4 Pass the entrance examination given by UBISD

4. Certification :

The graduate of this course will receive a certificate of pre - employment training as welding & sheet metal craftman, issued by the UBISD, Department of Labour.

5. Course Outline

## 6. Description

### 1. Working Disciplines

- To have punctual
- To have good attitude for job
- To have good human relation
- To have adjustable themselves to environment
- To have good cooperative working

### 2. General Safety :

- Important of work shop safety
- Typical of accident course and correction
- Accident prevention

### 3. Engineering Materials :

#### 3.1 Materials in Welding Shop

- To study different materials in their characteristics properties

#### 3.2 Carbon steels and Alloy steels

- Explain the different

#### 3.3 Other Materials

- Erass
- Copper
- Aluminium
- Fiber
- Plastic
- To explain their characteristics and properties

#### 3.4 Lubricant

- Characteristics
- Type of lubricant

#### 3.5 Colour

- Characteristics
- Composition

### 4. Shop Mathematics :

#### 4.1 Computation in function

- Meaning of function
- Function operation

#### 4.2 Computation in decimal

- Meaning of decimal
- Decimal operation
- Transsfer decimal to function

- 4.3 Measurement Units
  - Iso
  - British
  - Transfer unit
- 4.4 Computation in area and volume
  - Area and volume unit
  - Computation in many shapes
- 4.5 Computation in weigh
  - Weigh unit
  - Computation in many shapes
- 4.6 Transmission power by belt
  - Computation in revolution
  - Computation in speed ratio

5. Measuring Instruments :

- 5.1 Type of measuring instruments
  - Scale type
  - Fixed type
- 5.2 Steel rule
  - To read steel rule
  - Caution
  - Maintenance
- 5.3 Square
  - Type of square
  - Using
  - Maintenance
- 5.4 Water level
  - Using
  - Maintenance
- 5.5 Vernier Caliper
  - Vernier part
  - To read vernier ( Iso, British )
  - Maintenance

6. Mechanical Drawing :

- 6.1 Basic knowledge in drawing
  - Equipment
  - Maintenance
  - Standard of paper
  - Standard of line

## 6.2 Method to make geometrical shape

- To divide line and angle
- To make straight or curve line to join with original line
- To make polygon
- To make ellipse

## 6.3 Three dimension

- Different between oblique and isometric
- Through three dimension to two dimension

## 6.4 Projection rule

- Iso
- American
- To find relation of point in three dimension and projection

## 6.5 Assignment dimension

## 6.6 Welding symbol

# 7. Using of General Tools :

## 7.1 Lay - out

- Equipment of scribe and center punch
- Lay - out produce

## 7.2 Vises

- Type of vises
- To set up
- Using and Maintenance

## 7.3 Files

- Type of files
- To put in and take off handle
- Using file
- Maintenance

## 7.4 Hand saw

- Type and principal parts of hand saw
- To put in and take off blade
- Using hand saw
- Maintenance

## 7.5 Hammers

- Type and principal parts of hammers
- To put in handle
- Using and caution
- Maintenance

- 9.2 Welding Machine
  - Type of welding machine
  - To select welding machine
- 9.3 Equipment
  - Electric wire
  - Helmet
  - Plier
- 9.4 Electrode
  - Function of flux
  - Standard ( AWS )
  - To select electrode to suitable with basic metal
  - Keeping
- 9.5 Basic arc welding technique
  - Current setting
  - Angle of electrode
  - Arc length
  - Arc strike
  - Start, stop, and restart
  - Correction fault in Arc welding
- 9.6 Bead Welding in flate position
  - Preparation workpiece
  - Current adjustment
  - Bead travel
- 9.7 Bead Welding in flate position ( To swerve hand )
- 9.8 Layer Welding
  - Workpiece in Layer Welding
  - Produce in welding
- 9.9 Square butt joint welding in flate
  - Preparation workpiece
  - Current adjustment
  - Bead travel and electrode angle
  - Visual inspection
- 9.10 Lap joint Welding
  - Preparation workpiece
  - Current adjustment
  - Bead travel and electrode angle
  - Correction of fault bead
  - Visual inspection
- 9.11 Bevel butt joint in flate position
  - Preparation workpiece
  - Tack welding
  - To lay down workpiece
  - Electrode size and Using current
  - Root weld and other lay technique
  - Inspection and testing

#### 7.6 Chisels

- Type and principal parts of chisel
- Using and caution
- To grind chisel
- Maintenance

#### 7.7 Drills

- Type and principal parts of Drill
- Angle of drill
- To select drill
- To grind drill
- Maintenance

#### 7.8 Drilling Machine

- Body of drilling machine
- To hold workpiece
- To select speed
- Step of using
- Maintenance

### 8. Basic General Fitting :

#### 8.1 Exercise 1

- To fit workpiece in size

#### 8.2 Exercise 2

- Lay - out
- To make center
- To drill
- To enlarge a hole
- Tap

#### 8.3 Exercise 3

- Sawing
- To chisel
- To fit workpiece
- To drill for tap
- To die
- To fit curve surface

#### 8.4 Exercise 4

- To complete C - Clomp

### 9. Electric - Arc welding :

#### 9.1 Safety in Electric - Arc welding

- Any danger from electric and prevention
- Any danger from fume and prevention
- Any danger from ray and prevention
- Any danger from heat and prevention

- 9.12 Bead welding in vertical ( up and down )
  - Current adjustment
  - Bead travel and electrode angle
- 9.13 Tee joint welding in vertical ( up & down )
  - Preparation workpiece
  - Current adjustment
  - Bead travel and electrode angle
  - Correction of fault bead
  - Inspection & testing
  - Different of up and down welding
- 9.14 Bevel butt joint welding in vertical
  - Preparation workpiece
  - Current adjustment
  - Bead travel and electrode angle
  - Root weld & other lay technique
  - Correction of fault bead
  - Inspection & testing
- 9.15 Bead welding in horizontal
  - Preparation workpiece
  - Current adjustment
  - Bead travel and electrode angle
  - Correction of fault bead
- 9.16 Tee joint welding in horizontal
  - Preparation workpiece
  - Current adjustment
  - Bead travel and electrode angle
  - Correction of fault bead
  - Inspection & testing
- 9.17 Bevel butt joint welding in horizontal
  - Preparation workpiece
  - Tack weld
  - Current adjustment
  - Bead travel and electrode angle
  - Root weld & other lay technique
  - Correction of fault bead
  - Inspection & testing
- 9.18 Bead welding in overhead
  - Preparation workpiece
  - Current adjustment
  - Bead travel and electrode angle
  - Correction of fault bead

9.19 Tee joint welding in overhead

- Preparation workpiece
- Current adjustment
- Bead travel and electrode angle
- Correction of fault bead
- Inspection & testing

9.20 Bevel butt joint welding in overhead

- Preparation workpiece
- Tack weld
- Current adjustment
- Bead travel and electrode angle
- Root weld & other lay technique
- Correction of fault bead
- Inspection & testing

9.21 Pipe welding

- Bevel butt joint
- Flange
- Preparation workpiece
- Current adjustment
- Bead travel and electrode angle
- Correction of fault bead
- Inspection & testing

10. Gas Welding :

10.1 Safety in gas welding

- Danger from heat and prevention
- Danger from ray and prevention
- Danger from gas and prevention

10.2 Equipment & Machine

- Tip
- Torch
- Pressure regulator
- Cylinders
- To joint all together
- Caution & Maintenance

10.3 Basic knowledge in gas welding

- To open and close valve gas
- Pressure adjustment
- Flame adjustment : Carburizing, neutral, oxidizing.
- Angle of rod and tip
- Forehand & Backhand technique

#### 10.4 Basic Welding

- Carrying a puddle with out filler rod
- Edge joint with out filler rod
- To fall down edge joint
- To weld uniform bead

#### 10.5 Butt joint welding

- Preparation workpiece
- Rod angle and movement
- Tip angle and movement
- Correction of fault bead
- Visual inspection

#### 10.6 Lap joint welding

- Preparation workpiece
- Rod angle and movement
- Tip angle and movement
- Correction of fault bead
- Visual inspection

#### 10.7 Horizontal position welding

- Uniform bead
- Preparation workpiece
- Rod angle and movement
- Tip angle and movement
- Correction of fault bead
- Visual inspection
- Parallel lines welding
- Butt joint
- Tee joint
- Lap joint
- Edge joint

- 10.8 vertical position welding
  - Uniform bead
  - Preparation workpiece
  - Rod angle and movement
  - Tip angle and movement
  - Correction of fault bead
  - Visual inspection
  - Parallel lines welding
  - Butt joint
  - Tee joint
  - Lap joint
  - Edge joint
- 10.9 Overhead position welding
  - Uniform bead
  - Preparation workpiece
  - Rod angle and movement
  - Tip angle and movement
  - Correction of fault bead
  - Visual inspection
  - Parallel lines welding
  - Butt joint
  - Tee joint
  - Lap joint
  - Edge joint
- 10.10 Brazing
  - Flame adjustment
  - Preparation workpiece
  - Function of flux
  - Rod angle and movement
  - Tip angle and movement
- 10.11  $O_2 - C_2 H_2$  Cutting
  - Cutting out fit
  - Pressure adjustment
  - Flame adjustment
  - Caution
- 10.12 Exercise
  - Straight cutting
  - Curve cutting
  - Pipe cutting
- 10.13 Plasma Cutting
  - Basic knowledge of plasma cutting
  - Equipment & Machine
  - Exercise

## 11. Sheet Metal

- 11.1 Safety in sheet metal
- 11.2 Using all of sheet metal handtool
  - Caution
  - Maintenance
- 11.3 Pattern drafting in sheet metal
  - To arrange pattern in sheet metal for saving
- 11.4 Cutting simple pattern and construction
  - Square
  - Triangle
  - Circle
  - Sawtooth
- 11.5 Edging and Seaming
  - Type of edge and seam
  - Edging and seaming principle
- 11.6 Sheet metal wiring
  - Sheet metal wiring principle
- 11.7 Riveting
  - Basic theory of riveting
  - Calculation
  - Drilling
  - Riveting
- 11.8 Spot welding
  - Spot welding machine operation
  - Using machine
  - Caution and maintenance
- 11.9 Making bottom
  - Cylindrical
  - Rectangular
- 11.10 Exercise "Tool tray"
- 11.11 Exercise "Keeping trash"
- 11.12 Exercise "Cylindrical cor"
- 11.13 Basic theory of pattern development
  - Parallel line
  - Radial line
  - Triangulation
- 11.14 Parallel line development and construction
  - Straight rectangular duct
  - Straight rectangular duct cut at a miter
  - Round pipe with mitered ends
  - Elbow

#### 11.15 Radial line development and construction

- Cone
- Cone with mitered ends
- Pyramid
- Pyramid with mitered ends

#### 11.16 Triangulation and construction

- True Length
- To find true length
- Pyramid with square base and round end

#### 11.17 Soldering

- Basic soldering principle
- Equipment
- Caution

#### 11.18 Exercises or projects

- Waste basket
- Cone
- Tank for watering
- etc.

### 12. Semi - Automatic Welding

#### 12.1 Safety in semi - automatic welding

- Danger from inert gas
- Danger from electric shock

#### 12.2 Semi - automatic welding process

- Fundamental of semi-automatic welding
- Advantage of semi-automatic welding

#### 12.3 Semi-automatic welding equipment

- Using
- Maintenance

#### 12.4 Welding technique

- Pushing and pulling
- Penetration
- Striking arc
- Faults correcting

#### 12.5 Welding practice

- Bead welding
- Butt joint
- Tee joint
- Lap joint

13. Special Activities & Group Dynamics

13.1 Social Sciences

13.2 Psychology

13.3 Human Relations

13.4 Ethics

13.5 Business Making

●ウボン職業訓練センター（UBISD）

UBON INSTITUTE FOR SKILL DEVELOPMENT  
DEPARTMENT OF LABOUR  
PRE-EMPLOYMENT TRAINING  
COURSE OUTLINE FOR  
AUTO-MECHANICS

---

<1> OBJECTIVE

This course is to provide for trainees with the basic skill in Auto mechanics in order to meet the employment needs of industry.

The aim of standard to be achieved is as follows:

- 1.1 To bring up auto-mechanics with basic knowledge and skill for industries and local factories.
- 1.2 To give the trainees a sound foundation in order to upgrade themselves.
- 1.3 To contribute auto-mechanic's technology to Thai industrial development.
- 1.4 To understand the meaning of safety and health and then contribute an accident prevention and a prevention against occupational diseases.
- 1.5 To stimulate in trainees good habits and attitudes, initiative and rational thinking; to be good members of society.

<2> LENGTH OF TRAINING

The trainees will be trained theoretical and practical courses at the UBISD for 10 months, followed by 2 months in-plant training.

<3> QUALIFICATIONS:

- 3.1 16-25 years of age
- 3.2 passed the elementary school or equivalent
- 3.3 live in the place that the UBISD covers for authority ( 8 provinces )
- 3.4 pass the entrance examination given by the UBISD

<4> CERTIFICATION:

The graduates of this course will receive a certificate of pre-employment training as an auto-mechanic issued by the UBISD, Department of Labour.

<5> OUTLINE OF THE COURSE:

The training at the auto-mechanics workshop of the UBISD for 10 months ( 1,600 periods ) is emphasized on practice about 80 percent and 20 percent in theory.

OUTLINE OF THE COURSE

No.	Subject	Theory (Period)	Practice (Period)	Total (Period)
(1).	General Fitting and Relation Subjects	80	40	120
1.1	Working Disciplines	4	0	4
1.2	Safety Precaution in Working	4	0	4
1.3	Shop Mathematics and Basic Engineering Science	16	0	16
1.4	Assembly Engineering Drawing	8	0	8
1.5	Measuring Tools	16	0	16
1.6	General Tools for Auto RepairShop and Fitting	8	40	48
1.7	Fundamental of Engine	24	0	24
(2).	Gasoline Engine	62	258	320
2.1	Component of Engine	24	144	168

DEPARTMENT OF LABOUR  
PRE-EMPLOYMENT TRAINING  
COURSE OUTLINE FOR  
AGRO-MECHANICS

---

<1> OBJECTIVE

This course is to provide for trainees with the basic skill in Agro-Mechanics in order to meet the employment needs of industry.

The aim of standard to be achieved is as follows:

- 1.1 To bring up agro-mechanics with basic knowledge and skill for industries and local factories.
- 1.2 To give the trainees a sound foundation in order to upgrade themselves.
- 1.3 To contribute agro-mechanic's technology to Thai industrial development.
- 1.4 To understand the meaning of safety and health and then contribute an accident prevention and a prevention against occupational diseases.
- 1.5 To stimulate in trainees good habits and attitudes, initiative and rational thinking; to be good members of society.

<2> LENGTH OF TRAINING

The trainees will be trained theoretical and practical courses at the UBISD for 10 months, followed by 2 months in-plant training.

<3> QUALIFICATIONS:

- 3.1 16-25 years of age
- 3.2 passed the elementary school or equivalent
- 3.3 live in the place that the UBISD covers for authority ( 8 provinces )
- 3.4 pass the entrance examination given by the UBISD

<4> CERTIFICATION:

The graduates of this course will receive a certificate of pre-employment training as an agro-mechanic issued by the UBISD, Department of Labour.

<5> OUTLINE OF THE COURSE:

The training at the agro-mechanics workshop of the UBISD for 10 months ( 1,600 periods ) is emphasized on practice about 80 percent and 20 percent in theory.

Pre-Employment Training  
Course Outline  
Electrics and Electronics  
Ubon Institute for Skill Development

Electronics Trade

---

1. Objectives :

This course is offered to provide trainees with the basic skills of electronics mechanic in order to meet the employment needs of industries . The course objectives are as follows :

1.1 To bring up electronics mechanic in this field for industries.

1.2 To enlighten skilled workers in this field to be assistant technicians.

1.3 To give the trainees a sound foundation in order to upgrade themselves.

1.4 To stimulate in trainees good habits and attitudes, initiative and rational thinking, to be good members of society.

2. Length of Training :

The trainees will be trained both in theoretical and practical courses at UBISD for 10 months (1800 period), followed by 2 months in-plant training. The trainees who attend at least 80% training period will be allowed to sit for the final examination.

3. Certification :

The graduate of the course will receive a certificate on pre-employment training as an electronics mechanic issued by the UBISD, Department of Labour.

4. Qualification

4.1 16-25 years of age

4.2 Passed 6 years primary schooling or equivalent

4.3 Physically Fit

4.4 Passed the entrance examination given by UBISD

Course Description  
Electronics Trade

1. Safety

Basic knowledge about general safety for electronics trade.

2. Basic Soldering

How to choose and operate the soldering iron, soldering lead for electronics and basic practice soldering on electrical wire and PCB, basic de-soldering.

3. Electrical Circuit Theory

Theory and practice on type of electrical generation, OHM's law, electrical power and energy, series circuit, parallel circuit and combine circuit.

4. R-L-C

Practice on type, usage, series-parallel circuit of resistor, type and usage of inductor, type and usage of capacitor.

5. Tool and Electronics Instrument

Basic usage machine tool ; plier, screw-driver, file, hand electric drill, bench electric drill, electric grinder. Practice on basic usage of Voltmeter, Am-meter, Multimeter, Oscilloscope and AF generator.

6. Diode Rectifier and Rectifier

Theory and practice on semi-conductor diode ; rectifier diode, zener-diode, varicap-diode ; type of rectifier diode, terminal checking by multimeter; rectifier circuit, half-wave, full-wave (center trape transformer, bridge), dual supply (half-wave bridge and filter for rectifier.

7. PCB, Basic Making

Theory on PCB making type; silk screen, letter-press, glue-paper and practice on PCB making , glue-paper method.

8. Basic Transistor

Knowledge about basic operation transistor, usage and checking transistor method, practice on basic regulator.

9. Small Amplifier

Learning types of transistor amplifier ; I/P and O/P transformer, OTL and OCL transformer. Practice on OTL (I/P transformer) amplifier under third skill standard.

10. Vacuum Tube Amplifier

Operation of vacuum tube amplifier (class -A and push-pull Amplifier), type of phase inverter. Practice on small circuit vacuum amplifier and basic repairing.

11. Turntable Recorder and Tape Recorder

Operation of turntable recorder and guide to repairing, type of tape recorder ; operation, guide to repairing.

12. Radio Tape and Amplifier for Home

Home-audio and speaker system, theory and practice on radio-tape recorder.

13. Car Audio

Installation and noise rejection of car audio, practice on car audio repairing.

14. High Power Amplifier

Theory on high power amplifier ; vacuum tube circuit, transistor circuit, MOS-FET circuit, IC circuit. Theory on type of tone-controller, pre-amplifier, power supply and regulator.

15. Commercial Speaker

Theory on type and usage speaker, speaker connection and cross over network, long speaker and matching transformer.

16. Industrial Electronics and Electrical Control System

Theory and practice on magnetic contactor ; jogging circuit, direct-on-line circuit, forward-reverse circuit, reverse-after-stop, basic of star-delta. Knowledge about regulator, digital circuit, basic DC motor control, light dimmer, step light control, sound light control.

17. Vacuum Tube and AM Radio

Theory on type of vacuum tube, number code; USA standard, Germany standard, basic Bias.

18. AM Radio  
Theory on frequency transmission ; AM,FM,SSB,DSB. and block diagram of AM radio,radio circuit and repairing.
19. FM, FM-MPX Radio  
Theory on FM,FM-MPX transmission,practice on FM-MPX making, repairing,tuning aliment.
20. Black and White TV.Transmission  
Theory signal for TV. transmission and block diagram of TV. receiver.
21. Black and White TV. Receiver  
Theory on high frequency circuit and video circuit,blocking OSC and multi-OSC, Sync-separation,Scanning circuit,and picture tube control circuit,low-voltage supply,high-voltage supply. Practice on repairing,signal-measurement.
22. Colour TV. Transmission  
Theory on basic light colour,compatibility,combination between B&W TV. to Colour TV.,colour signal transmission.
23. Colour TV. Receiver  
Theory and practice on antenna and feeder,colour TV. circuit and colour bar.Practice on convergence adjust,purity adjust, colour signal measurement,basic repairing.
24. Basic Operation and Maintenance of VTR  
Theory and practice on usage and connection to colour TV. receiver,VTR head cleaning.

OK

Pre-Employment Training  
Course Outline  
Ubon Institute for Skill Development

Electric Trade

---

1. Objectives :

This course is offered to provide trainees with the basic skills of electricians craftman in order to meet the employment needs of industries. The course objectives are as follows ;

- 1.1 To bring up electricians craftman in this field for industries.
- 1.2 To enlighten skilled workers in this field to be assistant technicians.
- 1.3 To give the trainees a sound foundation in order to upgrade themselves.
- 1.4 To stimulate in trainees good habits and attitudes, initiative and rational thinking, to be good members of society.

2. Length of Training :

The trainees will be trained both in theoretical and practical courses at UBISD for 10 months (1600 period), followed by 2 months in-plant training. The trainees who attend at least 80% period will be allowed to sit for the final examination.

3. Certification :

The graduates of the course will receive a certificate on pre-employment training as an electricians craftman issued by UBISD, Department of Labour Ministry of Interior.

4. Qualification :

- 4.1 16-25 years of age
- 4.2 Passed 6 years primary schooling or equivalent
- 4.3 Physically fit
- 4.4 Passed the entrance examination given by UBISD

CODE	SUBJECT	TH.	PR.	TOTAL

	TOTAL	404	1196	1600
	PERCENT	25%	75%	100%

## Course Description

### 1. Safety

General safety, danger from electricity, first aid and regulation for electricians trade.

### 2. Basic Machine Tool

Theory and practice on basic tool for electricians ; measurement tape, steel ruler, electric drill, hand saw, file and unit measurement. Theory and practice on vernier, micro-meter, tachometer.

### 3. Basic Skill Practice

Theory and practice on electric hammer making (250 g.)

### 4. Electric Calculation

Theory on electric unit, type of electric generation, conductor and insulator, Ohm's law, electric power and electric energy, series circuit, parallel circuit, and compound circuit.

### 5. Electrical Measurement

Theory and practice on multi-meter, volt meter, AM meter and clip-on meter, megger ohm meter, watt meter and watt-hour meter, line frequency meter, power factor meter.

### 6. Electrical Wire and Wire-Connection

Theory on type of electrical wire, wire connection, wire soldering, electric tape covering.

### 7. Motor Theory

Theory on type of motor, operation, usage, motor cable calculation, motor breaker calculation.

### 8. Basic Electrical Welding

Theory and practice on horizontal electrical welding.

### 9. Basic Gas Welding

Theory and practice on gas welding

### 10. Basic Industrial Painting

Theory and practice on iron oxide remove, background colour

paint, color mixing and paint, color mixing and spray.

11. Basic Draft and Drawing

Theory and practice on basic draft and drawing, 3-dimension drawing, basic pattern applied.

12. Basic of Symbol and Electrical Draft

Theory and practice on interior wiring drawing (America and German type), conduit wiring drawing, basic motor control circuit and up to step-delta circuit.

13. Estimate Material

Theory and practice on estimate material (continuous from 12)

14. Belt Wiring

Theory and practice on horizontal line, vertical line, ceiling line, curve line, wood working for electricians and electrical circuit (lamp and plaster) ; lamp circuit, bell-circuit, outlet-circuit, F-lamp circuit 3 way switch circuit, in both junction wire system and loop wire system. Theory and practice on plaster working, hole making, plaster method.

15. Conduit Wiring

Theory and practice on conduit bend ; PVC, EMT, thick conduit, conduit equipment, push-in and pull-out the wire, electric circuit in conduit, conduit installation and load center.

16. Electrical Control for Motor

Theory on electrical control equipment, jogging, direct-start for forward-reverse, reverse after stop, star-delta circuit (2 magnetic, 3 magnetic) step-by-step. Theory and practice on water pump control

17. Basic Industrial Electronics

Theory on R-L-C, semi-conductor diode, transistor and rectifier, basic amplifier, triac, diac, SCR.

18. Home Applicant Repairing

Theory and practice on home applicant repairing ; electric stove electric iron, electric rice cooker, hair dryer and electric washing machine ( 2 pot type)

19. Motor Wiring Draft and Drawing

Theory and practice on motor wiring drawing.

20. One Phase Motor Wiring

Theory and practice on 1 phase motor wiring ; splite phase, electric fan, ceiling fan, shaded pole motor, and universal motor.

21. Three Phase Motor Wiring

Theory and practice on 3 phase motor ; single layer, 1-2 speed 3 phase motor.

22. Auto-car Generator Wiring

Theory and practice on auto-car generator wiring, both stator and commutator, bearing, carbon brush changing.

23. Small Transformer Wiring

Theory on transformer wiring and design.

Pre-Employment Training  
Course Outline  
Electrics and Electronics  
Ubon Institute for Skill Development

Refrigerator Trade

---

1. Objectives :

This course is offered to provide trainees with the basic skills of refrigerator mechanic in order to meet the employment needs of industries. The course objectives are as follows :

- 1.1 To bring up refrigerator mechanic in this field for industries.
- 1.2 To enlighten skilled workers in this field to be assistant technicians.
- 1.3 To give the trainees a sound foundation in order to upgrade themselves.
- 1.4 To stimulate in trainees good habits and attitudes, initiative and rational thinking, to be good members of society.

2. Length of Training :

The trainees will be trained both in 25% theoretical and 75% practical courses at UBISD for 10 months (1600 period), followed by 2 months in-plant training. The trainees who attend at least 80% training period will be allowed to sit for the final examination.

3. Certification :

The graduate of the course will receive a certificate on pre-employment training as a refrigerator mechanic issued by the UBISD, Department of Labour.

4. Qualification

- 4.1 18-25 years of age
- 4.2 Passed 6 years primary schooling or equivalent
- 4.3 Physically Fit
- 4.4 Passed the entrance examination given by UBISD

### Course Description

#### 1. Safety

General safety  
 Safety for Refrigerant  
 Working Discipline

#### 2. Machine Tool

Practice on basic machine tool : measurement tape, steel ruler  
 bench drill, electric drill, bench vice, hand saw, file, vernier  
 and micro-meter.

#### 3. Technical Math

Theory on mathematic +, -, \*, /, power root, percentage, surface area  
 and volume.

#### 4. Technical Science

Theory on cool, heat, humidity, temperature, unit and unit changing  
 heat transfer, concealing heat, heat conductor and heat  
 resistance.

5. Basic Electric and Refrigerant Circuit  
Theory on type of electrical generation, electrical conductor and insulation, Ohm's law, electrical power and energy, how to pay for electrical power and energy, electrical circuit for water cooler, domestic refrigerator and air-conditioner.
6. Electrical Measurement  
Theory and practice on volt meter, am meter, multi-meter and clip-on meter.
7. Basic Skill  
Practice for skill on hand saw, file, bench vice and bench drill, electric hammer.
8. Electric Welding and Gas Welding Job  
Theory on welding safety, welding equipment and practice on basic electrical welding and gas welding.
9. Basic Draft and Drawing  
Theory and practice on basic mechanical drawing, basic electric drawing, refrigerant electrical circuit.
10. Refrigerant Pipe Job  
Theory on refrigerant pipe, cutting and bending pipe, flaring and swaging pipe, welding and de-welding pipe, welding between copper pipe and steel pipe.
11. Basic Refrigeration System.  
Theory on compression system, condensing system, evaporating system, refrigerant injection, refrigerant liquid type, refrigerant pressure and temperature, volume of liquid and gas.
12. Refrigerator Equipment  
Theory and practice on refrigerator equipment, water cooler, refrigerant pipe circuit, electrical circuit and checking each equipment. Theory and practice on compressor checking (R-12)
13. Separating and Connecting Equipment  
Theory and practice on separating and connecting the equipment; compressor, evaporator, condenser, temperature control, electrical equipment, refrigerant injection equipment, compressor oil test and checking, practice on removing and combining the inner-body and outside body and glass-fibre changing.

14. Vacuum and Re-fill R-12  
Theory and practice on vacuum, re-fill R-12, leakage test (high pressure method)
15. Electrical Circuit and Repairing  
Theory and practice on compressor terminal checking, electrical equipment of compressing checking, electrical equipment checking electrical circuit (water cooler, refrigerator)
16. Water Cooler and Refrigerator Repairing  
Theory and practice on trouble shooting and repairing
17. Compressor Repairing  
Theory and practice on compressor cutting, separating and combining the compressor spare parts. Theory and practice on coil re-winding, seal changing and valve adjustment, closed welding compressor.
18. Air-Conditioner  
Theory on air-conditioner equipment both refrigerant loop and electrical loop, both ordinary compressor type and rotary type pressuring compressor checking.
19. Air-Conditioner Cleaning, Separating and Combining Equipment  
Theory and practice on air-conditioner cleaning both window type and split type. Practice on separating air-conditioner (refrigerant loop) and combining air-conditioner (refrigerant loop)
20. Keep the R-22 to Tank, Vacuum and Re-fill R-22  
Theory and practice on keep the R-22 from air-conditioner to tank. Practice on vacuum and leakage test (low pressure method)  
Theory and practice on re-fill R-22;
21. Electrical Circuit  
Theory on circuit breaker, electrical wire for air-condition, electrical circuit both window and split type, both direct switch and magnetic circuit, magnetic contactor circuit ; direct on-line, star-delta in 1-phase, 2-phase.
22. Air-Conditioner Installation  
Interior wiring both belt wiring and conduit wiring, basic plaster, installation both window type and split type :

- a) Both compressor and evaporator setting in the same level
- b) Setting compressor higher level than evaporator
- c) Setting compressor lower level than evaporator

23. Air-Conditioner Repairing

Theory and practice on trouble shooting and repairing

24. Engine tune-up before Installation

Theory and practice on spark plug checking, oil injection system, engine revolution for auto-air conditioner installation

25. Auto-Air Conditioner Base

Theory and practice on thick pipe base design.

26. Auto-Air Condition Equipment

Theory on type of auto-air compressor, compressor equipment, refrigerant loop equipment and electrical equipment.

27. Installation and Water-cooler Tank Cleaning

Theory on condenser size, practice on removing and cleaning water-cooler tank. Theory and practice on compressor installation, evaporator and other equipment.

28. Electrical Circuit

Theory and practice on electrical wiring under engine worked, and not relate to engine worked.

29. Vaccum and Re-fill R-12

Theory and practice on vaccum, leakage test (low pressure and high pressure method), re-fill R-12.

30. Repairing

Theory and practice on trouble shooting and repairing.

31. Colour Painting

Theory on hoe, primary and secondary colour, colour tone.

32. Body Repairing

Theory and practice on refrigerator-body, air-conditioner-body preparing before painting.

33. Equipment Usage

Theory and practice on using method of air-compressor, air-gun, and other equipment for painting.

34. Colour Mixing  
Theory and practice on colour tone changing, tinner mixing, clearing mixing.
35. Colour Support  
Theory and practice on colour support ,for oxide protection.
36. Colour Plaster  
Theory and practice on plaster for refrigerator body reprove.
37. Colour Support Polishing  
Sandpaper theory, sandpaper polishing.
38. Painting  
Theory and practice on refrigerator-body painting.
39. Colour Polishing  
Wax polishing, work clearing.
40. Cost Estimation  
Material estimation ,capital and allowence.

## II. 養成訓練カリキュラム・シラバス (改定版)

機械系 (機械科)

●ウボン職業訓練センター (UBISD)

# PRE-EMPLOYMENT THE 4TH

1. TRAINING OBJECTIVE
2. TRAINING CALENDER
3. ANNUAL TRAINING SCHEDULE
4. TIME TABLE OF MONTHLY&WEEKLY
5. CURRICULUM
6. SYLLABUS

MACHINE SECTION

22. JUN. , 1992 ~ 7. APR. , 1993

TRAINING OBJECTIVE

1. To have a knowledge and skill of Measuring, Drawing and Usage of General tools.  
สามารถเข้าใจและรู้วิธีปฏิบัติพื้นฐานในการวัด การเขียนแบบ และการใช้ เครื่องจักรต่างๆ
2. To have a skill of Turning machine, Grinding machine and Drill with a proper knowledge of safety.  
สามารถใช้เครื่องกลึง เครื่องไส และสว่านในสภาพและลักษณะที่ปลอดภัย
3. To have a knowledge of Machine, a part of machine, material, lay out of work and safety.  
มีความรู้เกี่ยวกับการใช้เครื่องจักร ชิ้นส่วนของเครื่องจักร วัสดุที่ใช้ แบบ และความปลอดภัย
4. To provide the trainee for standard National skill level grade 3.  
สามารถปฏิบัติงานได้ในระดับมาตรฐานฝีมือช่างแห่งชาติ ชั้น 3
5. To have a knowledge of Safety, and prevent the cause of accidents and diseases.  
มีความรู้ด้านความปลอดภัยสาเหตุของอุบัติเหตุ สาเหตุของโรคและการป้องกัน
6. To have competent mechanical for Industry Business.  
สามารถทำงานในธุรกิจอุตสาหกรรมได้โดยใช้ความรู้และทักษะที่เรียนมา
7. To have good attitude and be a good member of society.  
มีความประพฤติดีเพื่ออยู่ร่วมในสังคมได้

### Ⅲ. 指導員訓練コースの内容

1. 教材開発
2. 指導技法 (機械)
3. 指導技法 (電子)

●中央職業訓練センター (NISD)

指導員訓練コース内容

(資料4-2)

分野	教材開発	定員	10	日数	5
コース名	視聴覚教材作成コース(基礎)				
訓練目標	視聴覚教材、特にビデオ教材の作成に関する基本的知識及びビデオ教材作成機器の基本的な操作方法について修得する。				
対象者	地方職業訓練センターAV教材作成担当者及び指導員				
日程及び訓練内容					
1	・視聴覚教材の意味と特徴	・ビデオ教材作成プロセス			
2	・カメラ操作とカメラワーク	・ライティング			
3	・撮影実習	・映像編集			
4	・企画書及び構成表	・台本作成			
5	・美術品の作成	・音声編集			
主な教材	テキスト(カンパリウガイイタ)、コース指導の手引				
主な機器	VTR、ビデオカメラ、編集機、モニター、ミキサー、ライティングキット、マイクロフォン、その他				

指導員訓練コース内容

(資料4-3)

分野	教材開発	定員	5	日数	10
コース名	視聴覚教材作成コース(応用)				
訓練目標	具体的なビデオ教材を作成することで、台本作成から撮影、編集など実践的なビデオ教材作成技術を修得する。				
対象者	地方職業訓練センターAV教材作成担当者及び指導員				
日程及び訓練内容					
1	・役割分担      ・企画書及び構成表の作成      ・台本作成				
2	・台本作成				
3	・美術品作成				
4	・撮影				
5	・撮影				
6	・撮影				
7	・映像編集				
8	・映像編集				
9	・音声編集				
10	・音声編集      ・講評				
主な教材	テキスト、コース指導の手引				
主な機器	VTR、ビデオカメラ、編集機、モニター、ミキサーライティングキット、マイクロフォン、その他				

指導員訓練コース内容

(資料4-4)

分野	教材開発	定員	8	日数	5
コース名	視聴覚教材作成コース (TP)				
訓練目標	視聴覚教材、特にTP教材の作成に関する基本的知識およびTP教材作成機器の基本的な操作方法について修得し、実際に訓練で使用できるTPを作成する。				
対象者	地方職業訓練センターAV教材作成担当者及び指導員				
日程及び訓練内容					
1	・TPの特徴と種類	・TP用レタリングと描画法			
2	・グラフ/図表の作成法	・TP作成用機器の使用法			
3	・TPデザインと原稿作成	・個別課題 (訓練用TP作成)			
4	・個別課題 (訓練用TP作成)				
5	・OHPの効果的な使用法	・個別発表と評価			
主な教材	テキスト (OHPとTP)、TPフィルム、カラーシート 参考資料				
主な機器	OHP、TP MAKER、コピー機				

## 技術協力によるN I S D指導員訓練コース

分野	機械加工	定員	10	日数	5
コース名	NCフライス盤作業（初級）				
訓練目標	NC工作機械の基礎的知識を学び、その重要性を理解する。 NCフライス盤作業における基本的なプログラミングを修得する。 NCフライス盤の基本操作を修得する。 作業前の段取りの重要性と段取り作業を修得する。 加工における流れを修得する。				
対象者	地方職業訓練センター機械加工分野指導員				
日程及び訓練内容					
1	NC工作機械の概要・デモンストレーション加工による研修コースの把握				
2	NCプログラミングの基礎				
3	NCプログラミング作成				
4	機械操作・段取り作業				
5	加工実習・測定				
主な教材	テキスト・プログラミング練習課題				
主な機器	NCフライス盤・各種ツール・測定機器・テーブル作成機・その他				

## 技術協力によるN I S D指導員訓練コース

分野	機械加工	定員	10	日数	5
コース名	N Cフライス盤作業（中級）				
訓練目標	<p>基礎的なN Cフライス盤作業の内容を再確認する。</p> <p>プログラミングにおいて、より効果的な命令を修得する。</p> <p>複雑な形状及び加工要素の多い品物のプログラミング作成とその加工の技術を修得する。</p>				
対象者	地方職業訓練センター機械加工分野指導員				
日程及び訓練内容					
1	基礎的な知識・機械操作・加工について再確認する。				
2	N Cプログラミング（固定サイクル・サブプログラミング・その他）				
3	N Cプログラミング作成				
4	加工実習				
5	加工実習・測定				
主な教材	テキスト・プログラミング練習課題				
主な機器	N Cフライス盤・各種ツール・測定機器・テープ作成機・その他				

## 技術協力による N I S D 指導員訓練コース

分野	機械加工	定員	6	日数	5
コース名	CNC旋盤作業（初級）				
訓練目標	NC工作機械の基礎的知識を学び、その重要性を理解する。 CNC旋盤作業における基本的なプログラミングを修得する。 CNC旋盤の基本操作を修得する。 作業前の段取りの重要性と段取り作業を修得する。 加工における流れを修得する。				
対象者	地方職業訓練センター機械加工分野指導員				
日程及び訓練内容					
1	NC工作機械の概要・デモンストレーション加工による研修コースの把握				
2	NCプログラミングの基礎				
3	NCプログラミング作成				
4	機械操作・段取り作業				
5	加工実習・測定				
主な教材	テキスト・プログラミング練習課題				
主な機器	CNC旋盤・各種ツール・測定機器・テープ作成機・その他				

分野	機械加工	定員	6	日数	5
コース名	CNC旋盤作業（中級）				
訓練目標	<p>基礎的なCNC旋盤作業の内容を再確認する。</p> <p>プログラミングにおいて、より効果的な命令を修得する。</p> <p>テーパ切削・ネジ切り加工を修得する。</p> <p>複雑な形状及び加工要素の多い品物のプログラミング作成とその加工の技術を修得する。</p>				
対象者	地方職業訓練センター機械加工分野指導員				
日程及び訓練内容					
1	基礎的な知識・機械操作・加工について再確認する。				
2	NCプログラミング（ノーズR補正・固定サイクル・サブプロ・その他）				
3	NCプログラミング作成				
4	加工実習				
5	加工実習・測定				
主な教材	テキスト・プログラミング練習課題				
主な機器	CNC旋盤・各種ツール・測定機器・テーパ作成機・その他				

## 指導員訓練コース内容

(資料6-1)

分野	指導技法	定員	20	日数	15
コース名	新任指導員訓練コース (90H)				
訓練目標	1. 職業訓練指導員としての役割や責任などの知識を修得する。 2. 職業訓練のプロセスを理解し、指導技法を修得する。 3. 訓練教材に関する知識及び作成技術を修得する。 4. 安全衛生作業や安全規則に関する知識を修得する。				
対象者	新任職業訓練指導員				
日程及び訓練内容					
1	・オリエンテーション ・技能開発局紹介 ・NISD紹介				
2	・訓練管理の方法 ・注意規定				
3	・報告書様式 ・物品管理				
4	・安全衛生 ・討議 (訓練生の問題)				
5	・教材の意義 ・OHPの使い方 ・ステンシル印刷				
6	・スライド及びビデオ機器の使い方 ・チャートの使い方				
7	・図書室の利用法 ・黒板の使い方 ・スケッチの方法				
8	・TPシート作成 ・見学				
9	・学習と興味 ・個性の違い ・訓練カリキュラム				
10	・訓練目標の書き方 ・試験と評価法 ・授業の進め方				
11	・授業の進め方 ・講義の方法 ・第1回演習 (講義)				
12	・第1回演習 (講義) ・実演の仕方				
13	・第2回演習 (実技)				
14	・授業準備 ・第3回演習 (授業)				
15	・第3回演習 (授業) ・まとめと試験 ・評価				
主な教材	職業訓練指導員マニュアル				
主な機器	OHP、VTR、スライド				

指導員訓練コース内容

(資料6-5)

分野	電気・電子	定員	5	日数	5
コース名	ロボット制御コース (30H)				
訓練目標	ロボットの知識・構造を理解し、ロボットの制御方法（プログラミング）、実際の工場内でのロボットの制御理論に関する知識・技能を修得する。				
対象者	地方職業訓練センター電気・電子担当指導員				
日程及び訓練内容					
1	・ 3軸直行型ロボットの知識、構造 ・ 座標の知識				
2	・ 3軸直行型ロボットのプログラミング				
3	・ 多間接型ロボットの知識、構造 ・ 各コマンドの理解				
4	・ 多間接ロボットの手動制御				
5	・ プログラムによる多間接ロボットの自動制御 ・ まとめ				
主な教材	ロボット制御指導マニュアル ロボット制御実習教材、ロボットリモートコントロールモータ				
主な機器	教育用ロボット、パーソナルコンピュータ				

分野	コンピュータ	定員	10	日数	5
コース名	業務のコンピュータ処理コース (30H)				
訓練目標	初めてパソコンを操作する人を対象に、コンピュータの扱い方、基本的なファイル操作及びワードプロセッサの操作方法を修得する。				
対象者	地方職業訓練センター指導員及び一般事務職員				
日程及び訓練内容					
1	・コンピュータの知識と操作方法    ・OSの知識				
2	・OSのコマンド操作				
3	・ワードプロセッサの知識と操作				
4	・ワードプロセッサによる文書作成				
5	・各種アプリケーションソフトの紹介    ・まとめ				
主な教材					
主な機器	パーソナルコンピュータ OHP				

指導員訓練コース内容

(資料6-7)

分野	コンピュータ	定員	10	日数	5
コース名	DBASE III コース (30H)				
訓練目標	ソフトウェアDBASE IIIを使用して、情報をデータベース化するための知識及び操作方法を修得する。				
対象者	地方職業訓練センター指導員及び一般事務職員				
日程及び訓練内容					
1	・データベースの知識 ・DBASE IIIの基本操作				
2	・データベースファイルの作成 ・データの検索操作				
3	・データの各種検索操作と印刷操作				
4	・DBASE IIIのコマンド操作				
5	・DBASE IIIのプログラム ・まとめ				
主な教材	DBASE III マニュアル				
主な機器	パーソナルコンピュータ OHP				

指導員訓練コース内容

(資料6-8)

分野	コンピュータ	定員	10	日数	5
コース名	LOTUS1-2-3コース (30H)				
訓練目標	表計算ソフトウェアLOTUS1-2-3を使用して、コンピュータによる表計算の知識及び操作方法を修得する。				
対象者	地方職業訓練センター指導員及び一般事務職員				
日程及び訓練内容					
1	・表計算の知識 ・LOTUS1-2-3の基礎知識と基本操作				
2	・表作成と演算機能操作 ・印刷機能操作				
3	・グラフ作成機能操作				
4	・データベース機能操作				
5	・課題実習 ・まとめ				
主な教材	LOTUS1-2-3 マニュアル				
主な機器	パーソナルコンピュータ OHP
