**CHAPTER 4 TECHNICAL TRANSFER** 

#### CHAPTER 1 OUTLINE OF THE STUDY

- 1. Background and Purpose of the Follow-up Study
- 1-1. Background of the Follow-up Study

Once the development studies were completed, it had been often difficult for JICA to grasp the progress of the proposed projects and the extent of the utilization of the results of the study, due to such factors that it usually takes considerable time before the implementation of the proposed projects and it is difficult to trace a variety of ways to utilize the results of the study, and to obtain sufficient information from the side of the recipient countries. The Follow-up Study of Development Studies was started in 1984 to tackle these problems.

#### 1-2. Purpose of the Study

The purpose of the Follow-up Study is to ascertain the outcome, and the circumstances thereof, of each completed development study systematically, to feed back the findings toward the improved performance of future development studies in terms of project identification, study design and execution, and project analysis and evaluation, and thereby to enhance the realization of the proposed projects/programs.

The FY 1995 Follow-up Study gathered and compiled relevant information on the development studies initiated its preliminary stage after August 1 of 1974 and completed by the end of FY 1995 (the end of March 1995). The result of the analysis are presented by country and region, by year of completion as well as by type of study and by sector. This report provides a clear definition of each concept concerning the present status of the use of study results and/or proposed project(s), and compiles and analyzes the relevant data on development studies in concern based on these concepts.

#### 2. Methods Used in the Follow-up Study

#### 2-1. Guideline of the Follow-up Study

The FY 1995 Follow-up Study is composed of the following surveys as well as collection of information from other relevant sources such as JICA internal materials.

- 1) A questionnaire survey of the consulting firms which undertook the respective development studies.
- 2) A questionnaire survey of relevant government agencies of the recipient countries through JICA overseas offices.
- 3) A survey conducted by JICA's overseas follow-up missions and/or by appointed local consultants in the selected sectors and countries.

#### 2-2. Coverage

The FY 1995 Follow-up Study covers those development studies which were financed by the development study budget under the purview of the Social Development Study Department and the Agriculture, Forestry and Fisheries Development Study Department of Japan International Cooperation Agency (JICA), and were initiated their preliminary stage after August 1 of 1974 and completed by the end of FY 1994 (the end of March 1995). A number of studies are excluded from coverage: basic design studies and special project studies conducted as part of the grant aid program.

The total number of studies in concern comes to 877 (621 in Social Development Sectors and 256 in Agriculture, Forestry and Fisheries Sectors).

#### (1) Classification of Development Studies by FY of Completion

The FY of Completion is defined as the FY during which the final report of the respective development study was submitted to JICA. Financial statements and attached specification and Annual Report of JICA in respective fiscal year, and the replies of consulting firms to the follow-up questionnaire are referred to for determining the FY of completion.

#### (2) Classification of Development Studies by Country and by Region

The country and region of development studies are shown by the name listed in the most recent issue (January 1993) of <u>JICA Practical Handbook on Statistics</u>. Those studies the site or area of which ranges over several countries or regions are classified into "plural countries".

#### (3) Classification by Type of Study

Studies are classified into six types as shown below.

Type of Study Definition 1. M/P Studies for formulating master plans 2. M/P+F/S Studies which comprise M/P and F/S 3. F/S Feasibility studies 4.D/D Studies for detailed designs 5. Basic Studies Studies to provide basic data, such as maps of various types, nautical charts and groundwater surveys, forestry and fishery resource studies, and agricultural verification studies 6. Others Studies to prepare guidelines, operation manuals and other institutional proposals, including follow-up studies

Table 1-1 Type of Studies

#### (4) Definition of Development Studies by Type of Studies

The definition of each of these types of development studies is given according to the objectives as follows.

#### i) Master Plan Studies (M/P)

A master plan study is carried out to determine a basic development strategy by formulating a comprehensive sectional or regional plan. The formulation of a master plan is the first stage in the development project cycle. It serves to coordinate and facilitate efficient implementation of various individual projects. The project proposed by a master plan study may be implemented in line with the recommendation of the study immediately after the completion of the study or may be carried out several years after its implementation.

# ii) Master Plan/Feasibility Studies (M/P+F/S)

These are studies in which both the master plan and feasibility studies are undertaken.

#### iii) Feasibility Studies (F/S)

A feasibility study is made to study the rationale, appropriateness, investment effects, etc. of a particular development project. In general, it is to determine systematically and objectively whether the proposed project is viable and feasible socially, technically, economically and financially as well as from other important consideration, e.g. operation and maintenance, organization and institution, and preservation of social and natural environment. The feasibility report serves as important reference for the concerning government agencies and officials to make a policy decision whether the country should proceed to the implementation of the given proposed project(s). It also provides the bilateral and multilateral aid agencies to which a request for financial assistance is addressed with necessary information to examine whether the proposed project is appropriate to be given such assistance.

# iv) Detailed Design Studies (D/D)

A detailed design studies are used to develop the design documents (including data and specific draft drawings and specifications) needed to begin project construction work as planned. In this phase, since the study has to cover all the detailed investigations related to a project's detailed design, considerable cost and a long study period are generally required. This type of studies are followed by the selection of the constructor through competitive bidding, and the actual construction. Detail design studies are indispensable to implement the project orderly and to facilitate the effectiveness of financial assistance.

v) Basic Studies (Long-term Studies, Topographical Studies, Ground-water Development Studies, Studies on the Amount of Forestry and Fishery Resources, etc.)

# Long-tenn Studies

Formulation of region-wide plans such as river conservation or irrigation plan and of integrated regional resource development plan and examination of alternative policy measures for environmental protection often require long-term and continuous accumulation of relevant basic data. The lack of such data or of abilities to collect and compile such data may become a major impeding factor against the implementation of

development plans. In this type of studies, a team of experts are sent to stay in the recipient country for a long period, and collect, record, compile and analyze relevant basic data through long-term observations.

#### **Topographical Studies**

The presence of basic maps of national land and cities is a necessary condition for planning and implementation of development projects. However in many regions of developing countries, topographical drawings of national territories and cities have been virtually non-existent, or not appropriate for practical use if ever exist, due to the lack of standard in the method of construction and information contents. This situation leads to difficulty in formulating and implementing development projects as well as in coping with urban problems that are becoming increasingly serious. The results of these studies greatly serve to overcome such difficulties in developing countries by providing basic data and information.

#### **Ground-water Development Studies**

These studies survey prospect for ground water and investigate the feasibility of its utilization for irrigation, the supply of drinking water and the supply of water for industry. It is an urgent task to secure the supply of drinking water in such places as the dry land where severe drought hits frequently or as the regions where the quality of water is not suitable for drinking. Also, some regions face such problems that the quality of drinking water is being deteriorated or is being dried up due to overconsumption. Thus, the ground-water development is urgently needed in order to stabilize the lives of the residents in those regions.

#### Studies on the Amount of Forestry and Fishery Resources

In forestry and fishery, grasp of resource accumulation is premised for overall planning of development and policy making. These studies aim to transfer study technology as well as to provide basic information and contribute to various development planning based on appropriate control of resource through the study.

#### **Agricultural Verification Studies**

These studies aim to collect basic data on meteorology, hydrology, pedology and other natural conditions, and to conduct verification studies such as experiments on introduction of new varieties, experiments on the methods of cultivation of new varieties under different conditions and experiments on the introduction of the methods of

transplants.

#### vi) Other Studies (Studies for Aftercare Services, etc.)

Studies for Aftercare services are carried out when a review on the same project is required several years after the completion of the former study due to the change of socio-economic or natural conditions. There are two types of studies for Aftercare services, which are undertaken in response to the request made by a recipient country. The first type is to be conducted for a short period and relatively small in scale because it is considered to be a supplement to a previous study. The second type of study is to be undertaken with the objective of the promotion of a project proposed by a previous study which has been classified into the group of "Delayed Studies". In this case, the Aftercare study is relatively large in scale so as to reformulate a project on the basis of the results of such Aftercare study. The Aftercare studies are considered to be quite important to facilitate the utilization of the study results by a recipient country. Prefeasibility studies are also classified into "Other Studies".

#### (5) Classification by Sector

The sectors are shown by the following classification employed by <u>JICA</u> <u>Practical Handbook on Statistics</u>.

Table 1-2 Sector of Studies

Sector	Subsector	Sub-subsector
1.Planning &	(1) Development Plan	1) General
Administration		2) Integrated Regional Development
	· · ·	Plan
	(2) Administration	1) General
		2) Public Finance & Banking
		3) Environmental Problems

#### 3. Criteria for Classification of Present Status of Use of Study Results

Two sets of criteria for classification of the present status of the use of the study results are defined and used according to the types of development studies.

#### 3-1. Group A Studies

For master plan studies (M/P), basic studies (B/S) and other studies, collectively named Group A Studies, the information is sought on whether or not their recommendations (including overall plans and priority programs) or outputs (such as maps, bodies of basic data, and guidelines) have been adopted or utilized toward the realization of development goals. The present status is classified into three categories: 1) In progress or in use, 2) Delayed, and 3) Discontinued.

The criteria for determining the present status for Group A Studies is as follows.

Table 1-3(a) Status for Group A Studies

a.	In progress	A study is classified into this category when its results or
	or in use	proposals are satisfactorily utilized in the following manner.  1) Based on the proposals, more specific and detailed studies are, or have been, undertaken. Or, the study results are utilized to undertaken some development study or planning.
		<ol> <li>Japanese technical cooperation is started on the basis of the proposals or study results.</li> <li>Proposals are incorporated into the development policy or plan of the recipient country. Or, study results are consulted to formulate the development policy or plan.</li> <li>The government of the recipient country is taking some preparatory step to utilize the proposals.</li> </ol>
b.	Delayed	A study is classified as "delay", when its results or proposals are in one of the following conditions.  1) No significant action has been taken by the government of the recipient country to utilize the proposals or results.  2) The government of the recipient country began to act on the proposals, or utilize the results, but the effort was halted for some reason.
c.	Discontinued	A study is classified as "discontinued", when its results or proposals are in one of the following conditions.  1) The government of the recipient country made an explicit decision not to act on the proposals.  2) The government decided to act on, or utilize, different proposals or results from other sources.  3) A study has been classified as "delay "for the considerable period of time.

#### 3-2. Group B Studies

For feasibility studies (F/S), master plan/feasibility studies (M/P+F/S) and detailed design studies (D/D), collectively named Group B Studies, the information is sought on whether or not the projects or programs they appraised or proposed have been implemented. The present status is classified into four categories: 1) Completed or in progress, 2) Promoting, 3) Delayed or suspended, and 4) Discontinued or canceled. The category of "Completed or in progress" is further divided into four sub-categories: 1a) Completed, 1b) Partially completed, 1c) Implementing, and 1d) Processing.

The criteria for classification of proposed project(s) are shown in the table below.

Table 1-3(b) Status for Group B Studies

Present Status	Criteria
A. Completed	
or in progress	
A1. Completed	The proposed development project has been already implemented and
	in use.
A2. Partially	The proposed development project is partially completed and in use.
Completed	
A3. Implementing	The implementation of the project is underway.
A4. Processing	The project is at one of the following stages.
	1) Tenders have been invited.
	2) Financing of the project has been secured.*
	3) Following the completion of the JICA feasibility study, the basic
	design study or some other specific step is being undertaken with
	bilateral or multilateral financial assistance.
	4)For some other reasons, the project concerned is considered highly
	likely to be implemented in the future.
B. Promoting	The project concerned is at one of the following stages.
	1) The government of the recipient country is requesting financial
	support from international lending organizations and/or foreign
	governments including Japan.
	2) The government of the recipient country has been undertaking the
	detailed design study or other additional studies subsequent to the
	JICA feasibility study.
	3) The recipient country is otherwise actively promoting the
	implementation of the project.
C. Delayed	The project concerned is at one of the following stages.
or Suspended	1) The government of the recipient country has not taken any specific
	action after the completion of the JICA study.
	2) The government of the recipient country has at one point promoted
	the proposed project but suspended the effort for some reason.
D. Discontinued	The project concerned is at one of the following stages.
or Cancelled	1)The government of the recipient country officially cancelled the
	proposed project.
	2)The government of the recipient country implemented the

alternative which was substantially different from the proposal of the
JICA study.
 3)A study has been classified as "delayed" for the considerable
 period of time.

#### 4. Related Information

As for the collection of related information, various internal materials and reports were utilized to supplement what had not been included in the previous reports.

#### CHAPTER 2 A FULL VIEW OF COMPLETED DEVELOPMENT STUDIES

#### 1 Classification of Development Studies by Year of Completion

The total number of development studies completed by the end of FY 1994 (the end of March 1995) is 877; 621 in Social Development Sector and 256 in Agriculture, Forestry and Fisheries Sector (See Table 2-1). The number of studies was around 20-30 per annum during the 1970s, and has been settled around 40-50 per annum since the 1980s.

Table 2-1 Time Trend of the Number of Development Studies

Fiscal Year	Social	Agri Forestry & Fisheries		Fiscal Year	Social	Agri,Forestry & Fisheries	
Completed	Development	Development	Total	Completed	Development	Development	Total
1974	1	0	1	1985	39	12	51
1975	5	0	5	1986	28	12	40
1976	9	4	13	1987	43	10	53
1977	20	7	27	1988	30	19	49
1978	25	7	32	1989	45	23	68
1979	24	12	36.	1990	36	23	59
1980	30	7	37	1991	31	14	45
1981	27	9	36	1992	40	. 17	57
1982	34	18	52	1993	41	12	53
1983	32	13	45	1994	42	22	64
1984	39	15	54	Total	621 (70.8%)	256 (29.2%)	877 (100.0%)

#### 2. Classification of Development Studies by Region

The number of studies carried out in Asia is 521, which accounts for 59.4% of the total. It indicates that development studies have been centered in Asia. The seven countries of ASEAN account for 42.0% (368 studies) of the total. Central and South America ranks next (17.2%) white Near Middle East and Africa have a share of about 10% respectively. We cannot see a marked difference in the distribution of type of study across different regions. All of studies, M/P, M/P+F/S and F/S, are concentrated in Asia, especially in the ASEAN countries. Also, there is no significant difference in the distribution of studies by sector across different regions. Transportation has the largest share in every region except for Near Middle East.

However, difference can be observed at the sub-subsector level of Transportation. In the ASEAN countries and Africa, the share of Road is the largest while, in non-ASEAN countries in Asia and in Central and South America, a largest portion of studies have been conducted in Port. Likewise, in ASEAN countries, Social Infrastructures, Communication & Broadcasting together have a high share, while the share of Agriculture is small compared with other regions.

Table 2-2 Classification by Region

Region	Social Dev	elopment	Agriculture, Fish	1	Total		
Asia	375	60.4%	146	57.0%	521	59.4%	
ASEAN Others	(274) (101)	(44.1%) (16.3%)	(94) (52)	(36.7%) (20.3%)	(368) (153)	(42.0%) (17.4%)	
Middle East	56	9.0%	28	10.9%	84	9.6%	
Africa	63	10.1%	28	10.9%	91	10.4%	
Middle & South America	103	16.6%	48	18.8%	151	17.2%	
Oceania	10	1.6%	6	2.4%	16	1.8%	
Europe	8	1.3%	0	0.0%	8	0.9%	
Plural Countries	6	1.0%	0	0.0%	6	0.7%	
Total	621	100.0%	256	100.0%	877	100.0%	

# 3. Classification of Development Studies by Country

The seven countries of ASEAN have 368 studies conducted. It is a region that have received a bulk of development studies within the Asian region. Among them Indonesia has received the largest number of studies (132 studies), followed by Thailand (95 studies), Philippines (88 studies) and Malaysia (46 studies). The next comes China with 42 studies. Apart from these countries, the following 13 countries have had more than 10 development studies conducted: Bangladesh, Nepal, Pakistan and Sri Lanka (in Asia); Egypt (in Middle East), Kenya and Tanzania (in Africa); Bolivia, Brazil, Columbia, Honduras, Mexico and Paraguay (in Central and South America).

#### 4. Distribution of the Number of Studies by Type of Study

The number of the development studies conducted since 1974 is 877. F/S account for 47.7% of the total development studies. M/P account for 20.8% while M/P+F/S account for 18.4%. The number of M/P has been settled from 10 to 20 per annum since FY 1989 while the annual number of F/S has been between 13 and 31. It is notable that, while the number of F/S, D/D and other studies shows a downward tendency, that of M/P+F/S exhibits an upward tendency. In the recent years, Group A Studies have become increasingly important, and feasibility studies have tended to accompany a master plan study in the same development study. It is inferred that the tendency to fully make use of the results of master plan studies has become strong.

Table 2-4 Distribution by Type of Study

#### 5. Distribution of the Number of Studies by Sector

#### Outlook

94.4% of the completed development studies are concentrated in two sectors, the Public Works and Utilities Sector and the Agriculture, Forestry and Fisheries Sector. The Public Works and Utilities Sector accounts for 65.2% (572 studies) followed by the Agriculture, Forestry and Fisheries Sector (29.2%, 256 Studies) while the Planning and Administration Sector and the Commerce and Tourism Sector accounts for only 4.6% (40 studies) and 1% (9 studies) respectively. As for the subsectors under the Public Works and Utilities, there are 301 studies in the subsector of Transportation, accounting for 34.3% and 148 studies in Social Infrastructure (16.9%). In the Agriculture, Forestry and Fisheries Sector, 207 studies are categorized under Agriculture, accounting for 23.6%.

#### 5-1 Distribution of Development Studies by Sector

As for the sectional distribution of studies, there is not a large difference among different sectors. Transportation has the largest share in all types of studies except for basic studies (see Table 2-5). Due to the nature of the study, basic studies comprises such studies as topographical studies and underground water development. Thus, many basic studies fall in the category of Social Infrastructure. The share of Forestry and Fisheries, which includes studies on the amount of forestry and fishery resources, is also high in basic studies. In case of F/S, the development studies categorized under the Social Development Sector account for 60% while the share of those categorized under the Agriculture, Forestry and Fisheries Development Sector is 30%. On the other hand, in case of M/P, the share of development studies under the Social Development Sector and the Agriculture, Forestry and Fisheries Development Sector is 70% and 20% respectively.

# 5-2. Distribution of Studies in Major Sub-sector <u>Transportation</u>

Transportation subsector is further classified into nine sub-subsectors. There have been 301 studies conducted for the last 21 years. There are particularly many studies in three sub-subsectors: 88 studies in Road (29%), 71 in Port (24%) and 44 in Railway(15%). These three sub-subsectors account for 68% of the total studies in this subsector. Air Transportation & Airport and Urban Transportation comes next.

Table 2-6 Transportation

Total	301 (100%)

#### Social Infrastructure

Social infrastructure subsector comprises six sub-subsectors. There have been 148 studies conducted during the last 21 years. Among these subsectors, the studies are concentrated in two sub-subsectors: 56 in Water Resource Development (38%) and 53 in River & Erosion Control (35%). These two sub-subsectors account for more than 70% of the total studies in this subsector.

Table 2-7 Social Infrastructure

Survey & Mapping	21 (14%)
Total	148(100%)

#### **Public Utilities**

Public Utilities subsector is divided into four sub-subsectors. There have been 60 studies carried out during the last 21 years. 28 studies (47% of total) are in Water Supply, 17 studies (29%) in Sewerage, and 15 studies (24%) in Urban Sanitation. No study has been conducted in General (Public Utilities).

Table 2-8 Public Utilities

Subsector	Number of Studies
General	0 (0%)
Water Supply	28 (47%)
Sewerage	17 (29%)
Urban Sanitation	15 (24%)
Total	60 (100%)

#### Communications & Broadcasting

Communications & Broadcasting subsector is classified into four sub-subsectors. There have been 63 studies conducted during the last 21 years and the overwhelming studies are in Telecommunication (46 studies, 73%)

Table 2-9 Communications & Broadcasting

Subsector	Number of Studies
General	6 (10%)
Post	0 (0%)
Telecommunication	46 (73%)
Broadcasting	11 (17%)
Total	63 (100%)

# Agriculture and Animal Husbandry

Agriculture sub-sector is divided into five subsectors, which are General Agriculture, Sericulture, Irrigation, Drainage and Reclamation, Agricultural Machinery and Agricultural Processing. For the last 21 years, 207 studies have been carried out, 84% of which are in General Agriculture. In particular, no study has been conducted in

Sericulture and Agricultural Machinery. In Animal husbandry sub-sector, only two studies have been carried out since 1974.

#### **Forestry and Fisheries**

Forestry sub-sector comprise two sub-subsectors; Forestry Conservation and Timber Processing. All of 25 studies carried out in Forestry sub-sector for the last 21 years are exclusively in Forestry Conservation. As well as Forestry sub-sector, Fisheries sub-sector is composed of two sub-subsectors; Fisheries and Fish Processing. All of 22 studies conducted in this sub-sector are in Fisheries and no study has been ever conducted in Fish Processing.

#### **CHAPTER 3**

#### THE PRESENT STATUS OF THE UTILIZATION OF STUDY RESULTS

#### 1. Introduction

The present status of utilization of study results is classified in two sets of categories; Groups A Studies and Group B Studies.

The present status of master plan studies, basic studies and other studies (Group A Studies) is classified into the three groups as shown in Table 3-1(a). Those studies for which information obtained from domestic and overseas surveys is not sufficient are tentatively classified into the category of "Delayed". The present status of feasibility studies, master plan-cum feasibility studies and detailed design studies (Group B Studies) is classified into the four groups as shown in Table 3-1(b).

The classification above is based on the fact that Group A and Group B Studies are different in the use of their study results, and thereby in the appraisal of and the criteria for the present status.

The Group A Studies are evaluated with "Utilization Rate" white Group B Studies are assessed with "Realization Rate". Group A Studies classified into "In progress or in use" are regarded as "Utilized". The study is classified into "In progress or in use" if (1) the investment fund is, or has been, secured for a proposed project, and thereby, the proposed project has been either implemented or completed or (2) the study findings are incorporated into the development policy or plan of the recipient country. On the other hand, Group B Studies are regarded as "Realized" if a proposed project has been implemented or is highly likely to be implemented. In this case the study is classified into "Completed or in progress".

The use of the study results of master plan and other Group A Studies is not confined to the implementation of proposed project(s). An even more important role of these studies is to contribute to the policy making of government agencies and to the formulation of development plans both at national and regional levels. Basic studies and Other studies are aimed at being used for particular purposes such as facilitation of national land development and development planning by collection and compilation of long-term basic data, and providing recommendations on institutional building by drawing up-guidelines, and so forth. On the other hand, it is considered that the implementation of Group B Studies is premised on the assumption that a proposed project will be implemented after a study ascertains technical, economical and financial feasibility of such project. Therefore, a study is regarded as "Realized" only if a proposed project

is, or has been, implemented.

This chapter attempts to analyze the present situation of the use of master plan and other Group A Studies in detail, by noticing the specific nature of these development studies. It also provides analysis of feasible studies and other Group B Studies by centering on the degree of realization of the proposed project(s).

# 2. Present Status of the Use of Study Results of Group A Studies (Master Plan Studies, Basic Studies and Other Studies)

The total number of Group A Studies, which have been completed from 1974 to 1994 is 281. 248 out of 281 are classified into "In Progress or In Use". The utilization rate is 88.3%. During the 1970s which the Follow-up Studies started, because only very few development studies were conducted, the utilization rate of completed studies varied each year. However, since 1979, the number of development studies has been stable, and the utilization rate has been settled around 85%. It can be judged that the results of the development studies have been well-utilized by recipient countries.

Table 3-1 Present Status of Group A Studies by the Year of Completion

#### 2-1 Analysis by Region

Here the utilization rate will be analyzed by region except for the Oceanic and the European regions where the small number of development studies has been conducted. In Asia, 130 out of 148 Group A Studies are classified into "In Progress or In Use" and the utilization rate is 87.8% which is almost equivalent to the average utilization rate of all Group A Studies. The utilization rate in Middle and South America is 91.5%, which is the highest among all regions. However, even in the African and the Middle East regions where the utilization rates are lower than average, they are 84.4% and 82.1% respectively. It can be concluded that the results of studies are well-used across regions.

Table 3-2 Utilization Rate by Region

Present			1	Asia

Discontinued	4	(6.8%)	0	(0.0%)	0	(0.0%)		(0.0%)	. 18	(6.4%)	
Total	59	(100.0%)	4	(100.0%)	5	(100.0%)	5	(100.0%)	281	(100.0%)	

### 2-2 Analysis by Type of Studies

The utilization rate of basic studies is higher than two other studies; M/P and other studies. 59 out of 63 basic studies are considered utilized. As for M/P, 159 out of 182 are classified into "In Progress or In Use" while 83% of other studies (30 out of 36) are in such category. Therefore, it can be said that all three studies are well-utilized.

Table 3-3 Utilization Rate by Types of Studies

Present Status	M/P		Basic	Studies	Other	Studies	Total		
In Progress or In Use	i59	(87.4%)	59	(93.7%)	30	(83.3%)	248	(88.3%)	
Delayed	12	(6.6%)	. 2	(3.2%)	1	(2.8%)	15	(5.3%)	
Discontinued or Cancelled	11	(6.0%)	2	(3.2%)	5	(13.9%)	18	(6.4%)	
Total	182	(100.0%)	63	(100.0%)	36	(100.0%)	281	(100.0%)	

#### 2-3 Analysis by Sector

The number of development studies in the Social Development Sector is 208 while 73 studies are in the Agriculture, Forestry and Fisheries Development Sector. In the Social Development Sector, 182 are in "In Progress or In Use" and the utilization rate is 87.5%. In the Agriculture, Forestry and Fisheries Development Sector, 66 out of 73 are utilized and the utilization rate is 90.4%.

Among the sub-sector in the Social Development Sector, Transportation has the largest number of development studies conducted. 68 out of 77 completed studies in this sub-sector are classified into "In Progress or In Use" and the utilization rate is 88.3%. In the Social Infrastructure sub-sector in which 74 development studies have been completed, 60 of them are utilized and the utilization rate is 81.1%. No marked difference is observed concerning the utilization rate among sub-sectors. The utilization rate in total is beyond 80%.

Table 3-4 Utilization by Sector

### 2-4 Details of "In Progress or In Use" Studies

As for Group A Studies, 248 out of 281 are classified into "In Progress or In Use": 159 for M/P, 59 for basic studies and 30 for other studies. In general 248 studies are fallen into either or both of the following two categories:

- A proposed project has been implemented after the finance for the project was secured; and/or
- 2. Proposals are incorporated into the development policy or plan of the recipient country. Or, study results are consulted to formulate the development policy or plan.

The largest number of "In Progress or In Use" studies is in category 1. 121 out of 248 studies (48.8%) have been reported to be secured the finance for the proposed projects. In particular, 70.0% of other studies (30 studies) have been already financed since their completion. On the contrary, only 25.4% of basic studies have been financed. This is because basic studies focus on the provision of the basic data or the formulation of topographical map, etc. Proposals made by 62 out of 248 "In Progress or In Use" studies (25.0%) are incorporated into the development policy or plan of the recipient country. Especially, 33.3% of "In Progress or In Use" basic studies are utilized in the formulation of development policy or plan of the recipient country. There are development studies, the projects proposed by which have been implemented as well as whose proposals are incorporated into the development policy or plan of the recipient country.

Concerning 33 studies, Japanese technical cooperation has been undertaken: 13 for the project-type technical cooperation and 20 for the dispatch of experts.

Table 3-6 Details of "In Progress or In Use" Studies of Group A

3. Present Status of the Use of Study Results of Group B Studies (Feasibility Studies, Master Plan/Feasibility Studies and Detailed Design Studies)

The number of Group B Studies which was completed from 1974 to 1994 is 596. 418 of them are F/S (70.0%), 161 are M/P+F/S (27.0%) and 17 are D/D (3.0%). The number of the development studies which are classified into the category of "Completed or In Progress" is 369, 61.9% of total. The number of the "Promoting" Studies is 122 (20.5%). 48 studies (8.1%) are fallen into "Delayed or Suspended" because no significant action has been undertaken by the government of the recipient country to utilize their proposals or results. And 57 development studies (9.5%) are considered to be "Cancelled" on the ground that the government of the recipient country made an explicit decision not to act on the proposals, or no significant action has been undertaken by the government for the considerable period of time.

The table 3-7 shows the number of studies and their present status according to the year of completion. For the first five years, the annual number of development studies completed was around 10 and the realization rate was notably high with over 70%. As the increase of the number of development studies from the late 1970s to the 1980s, the realization rate shows the downward tendency and is approximately 60%. Since 1990 the annual number of Group B Studies has been further increased. Most of these studies completed lately are classified into "Promoting" because few years have passed since their completion. It is considered a few more year will be taken before the implementation of the projects proposed by these studies.

#### 3-1 Analysis by Regions

Table 3-8 shows the realization rate by regions. In Asia 251 out of 373 studies are in "Completed or In Progress". The realization rate is 67.3% which is higher than the average of Group B Studies (61.9%). No difference in the realization rate is observed concerning the ASEAN countries and the non-ASEAN countries in Asia. In both regions, the realization rates are 67.3%. In Middle East, the realization rate is higher than one in Asia. 39 out of 56 studies are classified into "Completed or In Progress". The realization rate is 69.6%. In Africa, it is 50.8% and in Central and South America, it is 46.7%. Because the number of studies completed in Oceania, Europe and Plural countries is very small, it is difficult to make any generalization concerning the realization rate of those regions. Focusing on the difference in the present status of studies in the Asian region and other regions, 18.2% of studies conducted in Asia are in "Promoting" while in Central and South America 29.3% of studies are in "Promoting", which means more studies in Central and South America are in process for implementation. In Africa and in Central and South America, 27.2 % and 23.9% are classified into either "Delayed or Suspended" or "Cancelled" respectively. This is the major factor to lower the realization rate of these regions. This is because in these regions the economic situation became worsen from the 1980s, which resulted in the difficulty to obtain the required amount of foreign currencies to promote the proposed projects. However, in Central and South America, the improvement of both economic condition and political situation has been observed since the mid-1990s. Therefore, it is highly likely that the "Promoting" studies, which will be implemented and the realization rate will be improved.

# 3-2 Analysis by Type of Studies

Table 3-9 shows the realization rate by type of studies. 369 out of 596 completed studies are considered "Completed or In Progress". The realization rate is 61.9%. 88.2% of D/D are classified into "Completed or In Progress". The realization rate of D/D is highest among three Group B Studies. The realization rates of F/S and M/P+F/S are alike to each other.

Table 3-9 Realization Rate by Type of Studies

Present Status	M/P+F/S	F/S	D/D	Total	
Completed or In Progress	95 (59.0	3%) 259 (62.0	%) 15 (88.2%)	369 (61.9%)

## 3-3 Analysis by Sector

Out of 596 Group B Studies, 413 are in the Social Development Sector and 183 are in the Agriculture, Forestry and Fisheries Sector. The realization rate is 64.6% for the former and 55.7% for the latter. In the Social Development Sector, the realization rate of F/S is 64.6% and of M/P+F/S is 62.5% while that of D/D is 85.7%. The reason why the realization rate of D/D is much higher than the rest is because D/D is undertaken on condition that the proposed project will be financed after the completion of study. The similar tendency is observed in the Agriculture, Forestry and Fisheries Sector in which the realization rate of D/D is remarkably higher than that of F/S and M/P+F/S. The realization rate in the Agriculture, Forestry and Fisheries Sector is, however, lower than that in the Social Development Sector. The realization rate of M/P+F/S is 40.0% and of F/S is 57.4%, which are lower than those in the Social Development Sector. The major cause of this difference between two sectors is because in the Agriculture, Forestry and Fisheries Sector more studies are classified into "Promoting" than those in the Social Development Sector: 22% for F/S and 48% for M/P+F/S.

Table 3-10 Realization Rate by Sector

Among the sub-sectors in the Social Development Sector, Transportation sub-sector has the largest number of development studies completed and its realization rate is 61.6%, which is almost equivalent to that of all Group B Studies. In Transportation, the largest number of studies have been conducted in Road sub-subsector and the realization rate is higher (71.6%) than that of all Group B Studies. In the Agriculture, Forestry and Fisheries Sector the overwhelming number of studies has been completed in the Agriculture sub-sector (166 out of 183 studies). The realization rate in this sector is 56.0% which is lower than that of all Group B Studies. The number of development studies completed in Animal Husbandry, Forestry and Fisheries has been so small that no proper realization rate can be obtained.

## 3-4 Details of "Completed or In Progress" Studies

369 out of 596 completed studies are classified into "Completed or In Progress" and the realization rate is 61.9%. Most of "Completed or In Progress" studies have been already secured the finance for the proposed projects. It is considered that once the finance is secured, the project is implemented smoothly. On the contrary, a few studies

are classified into this category without having had a funding secured. The realization of the project proposed by these studies are determined to be highly likely although their financial sources have been yet to be confirmed. One of these studies is "Development of Chittagong Airport" in Bangladesh, in which the subsequent studies has been already implemented and the finance for which is likely to be secured in near future.

The financial sources of these studies vary; OECF, the Japanese grant aid, the World Bank, the Asian Development Bank, other donor countries etc. Among the various financial sources, the OECF loan, Yen Credit, has been the most important source of fund. However, recently the number of projects implemented with Japanese grant aid or domestic funding has been increasing as well as the number of projects undertaken with private capital. This is because the Asian countries (especially the ASEAN countries) have been making steady economic growth, which enables them to implement projects with domestic funding or private capital without receiving the loan from donors. Also, in non-ASEAN countries and Africa, more projects, mainly the projects in the Agriculture, Forestry and Fisheries, which can be realized with a small amount of capital investment, are now implemented with Japanese grant aid.

In order to facilitate the implementation of the proposed projects it is crucial that the projects are conformed to the development objective and policies of the country and receive high priority among alternative development programs/projects. It is most desirable that each development study propose projects with appropriate scale and design during the stage of the survey and a prompt step toward implementation be taken soon after the survey is completed.

## CHAPTER 4 TECHNICAL TRANSFER

In general, technical transfer is carried out in the way of either the provision of OJT or the holding of the seminar at the study period in the recipient country or the provision of technical training in Japan. The technology transferred is expertise or method which can be utilized in research or planning. While the recipient country is usually contented with technical transfer conducted by the Japanese experts, some express their dissatisfaction. The training in Japan as well as OJT in the recipient country have been widely carried out as a method of technical transfer. To make technical transfer more useful to counterparts, it shall be necessary to improve the quality of the training and to conduct the training which is carefully planned for each participants. It should be considered to have counterparts participate into the seminar initiated by JICA.
