Remarks: a) Load factor for calculation of peak load in MVA is assummed as 85% for Western-North, Western-South and Colombo and 90% for other areas.

b) Peak load in MVA of Kollipitiya and Fort grid substations is calculated in the basis of day-time peak, i.e 0.65 for Kollipitiya and 0.5 for Fort.

b) Peak load in MVA of Kollipitiya and Fort grid substations is calculated in the basis of day-time peak, i.e 0.65 for Kollipitiya and 0.5 for Fort.
c) Only rearrangement of 33kV feeders and transformer addition are considered.
