Anexo-39 Formularlo de Encuestas a la Comunidad Local (Bosque Piloto)

Nosotros estamos formulando un plan que contribuya a la sociedad regional a través de la conservación y desarrollo de los bosques y de la promoción de la silvicultura e industria forestal. Para los efectos, solicitamos a usted exponernos su opinión sobre el tema:

1

T

T

Comprende el objetivo y tiene interés por la naturaleza del plan.

Comprende el objetivo pero no tiene mayor interés por el plan. No está de acuerdo con el objetivo del plan. (Motivo

No comprende el objetivo del plan က် ပော် ပဲ ပော် တဲ

Anexo-40 Encuestas en Bosque Piloto

Ţ:

1. Resultados

(1) Familias Encuestadas

Las encuestas fueron dirigidas a un total de 69 familias, que incluían 67 de la aldea El Durazno y 2 de Sibabaj. En cuanto a los habitantes de Las Anonas, que no residen en la Finca, se entrevistaron a 9 familias, seleccionando tres de cada caserío; Las Anonas, Chiteo y Saguesitas. En el Cuadro 1 se presenta el número de familias encuestadas, incluyendo aquellas que no se encuestaron por ausencia o negación de responder a las preguntas.

Cuadro 1 Desglose de las Familias Encuestadas

Unidad: familias

Unidad administrativa	Entrevistas realizadas	Negación	Ausencia	Total
El Durazno (Subtotal)	55	3	9	67
Sector I	20	1	4	25
Sector II	11	1	3	15
Sector III	21	1	2	24
Aguacate	3	0	0	3
Sibabaj	2	0	0	2
Las Anonas (Subtotal)	6	3	• 0	9
Las Anonas	3	0	0	3
Chiteo	3	0	0	3
Saguesitas	0	3	0	3
Total	63	6	9	78

(2) Número de Respuestas

Estas se obtuvieron de 55 familias de El Durazno, 2 de Sibabaj y 6 de Las Anonas, sumando un total de 63. Conviene indicar que en éstas se incluyen las preguntas sobre la situación de la mujer, por lo que el número real de familias a las que se dirigieron las interrogantes generales es de 62. A continuación se presenta el número de los representantes de familia encuestados en forma general, según el sexo.

Cuadro 2 Número de Encuestados Principales según Sexo

Unidad: personas

Sexo	Masculino	Femenino	Total
Encuestados	45	17	62

En lo que corresponde a las preguntas referentes a la situación de la mujer, éstas se realizaron a todas las familias, logrando obtener respuestas solamente de 39, ya que algunas estaban ausentes o se negaron.

(3) Estado Civil de los Encuestados

Las encuestas fueron dirigidas a los jefes de familia, y en su ausencia, a un representante suyo. (ver Cuadro 3)

Cuadro 3 Estado Civil de los Encuestados

Unidad: personas

Casado	Convivencia	Soltero	Viudo	Desconocido	Total
48	11	2	1	1	63

La especificación "casado" se refiere al matrimonio oficial y "convivencia" a la pareja que no ha registrado legalmente el casamiento.

(4) Años de Asentamiento

El 70% de los habitantes de la Finca Nacional residen desde su nacimiento, la mayor edad registrada en la encuesta fue de 72 años. Deduciéndose que la colonización se inició hace más de setenta años.

(5) Ocupación de los Jefes de Familia

En el cuadro siguiente se presentan sus principales ocupaciones:

Cuadro 4 Ocupación de los Jefes de Familia (62 Encuestados)

Unidad: respuestas

Ocupación	Total	Ocupación principal	Ocupación secundaria
Agricultor con tierras exclusivas	58	46	12
Empleado agrícola	37	7	30
Empleado de GUATEL	3	2	1
Empleado de DIGEBOS	3	3	0
Empleado de DIGESA	2	0	2
Empleado de empresa privada	3	3	0
Agricultor arrendatario	1	1	0
Comerciante intermedio	1	0	1
Sin ocupación	15	0	15
Se desconoce	1	0	ı

Agricultor con tierras exclusivas: Agricultor que cultiva una determinada superficie de tierras dentro de la Finca Nacional.

La ocupación predominante de los jefes de familia que utilizan las tierras de la Finca Nacional fue la agricultura con tierras exclusivas. Si se agrega el número de familias que desarrolla la misma modalidad como ocupación secundaria, suma un total de 58 (de las 62 familias). Por otro lado, el 60% aproximadamente, es decir 37 de los 62 encuestados respondieron que trabajan como jornaleros agrícolas ya sea como ocupación principal o secundaria.

Estas cifras reflejan la situación ocupacional de la región en la que es difícil subsistir únicamente de la agricultura en tierras exclusivas, debido a esto prestan su servicio como jornalero para complementar el ingreso familiar.

(6) Nivel Educativo de los Jefes de Familia.

En el cuadro 5 se resume este aspecto. Como se puede observar, el índice de escolaridad es sumamente bajo. En la aldea El Durazno existe una escuela primaria la cual fue reconstruida en 1994. Anteriormente no se contaba con una institución educativa en esta área, con lo que podría explicarse el bajo nivel educativo de la población de adultos. Sin embargo, el reducido número de los egresados de primaria entre los que han recibido la educación, no explica que el bajo índice de escolaridad se deba a la falta de escuelas.

^{**} Empleado agrícola: Trabajador jornalero en plantaciones dentro y fuera de la Finca Nacional

^{***} Una persona puede seleccionar más de una respuesta

Cuadro 5 Nivel Educativo de los Jefes de Familia

1				وسيست من المساومة الم					
	Nivel	Nulo	1 <u>cr</u> . grado	2º grado	3 <u>cr</u> . grado	4º grado	5º grado	6º grado	Total
	Personas	23	2	8	17	4	5	3	62

(7) Estructura Poblacional de los Habitantes de la Finca Nacional

En el cuadro 6 se presenta este indicador.

Cuadro 6 Estructura Poblacional Según Sexo

Unidad: personas

Sexo	0-12 años	13 años ó más	Total
Masculino	72	95	167
Femenino	74	103	177
Total	146	198	344

El promedio de integrantes por cada familia es de 6.0 personas.

De acuerdo con la información suministrada por el Comité Promejoramiento, existen en El Durazno 72 familias que corresponden a 632 habitantes. Sin embargo, las encuestas revelaron que existen 67 familias con un promedio de 6.0 personas por cada una, por lo que se estima que actualmente la población total es de 402 habitantes.

(8) Economía Familiar

Para conocer esta situación, se solicitó a los encuestados enumerar y jerarquizar las fuentes de ingreso, así como indicar el monto mensual de los gastos.

Cuadro 7 Jerarquización de las Fuentes de Ingresos (62 Encuestados)

Unidad: respuestas

Orden	Venta de cultivos	Venta de productos ganaderos	Jornal	Sueldos	Venta de productos forestales
1	26	3	18	7	· 4
2	11	16	18		2
3		11	6	2	
4		2			
Total	37	32	42	9	6

^{*}Una persona puede seleccionar más de una respuesta

La mayor fuente de ingreso es la venta de los cultivos producidos según respuestas. Sin embargo, muy raras veces una familia puede subsistir sólo de la comercialización de sus cultivos, y en la mayoría de los casos, se debe complementar los ingresos en efectivo prestando servicios de jornalero o comercializando productos ganaderos. En Las Anonas, 4 de los 6 encuestados respondieron que su mayor fuente de ingresos es la venta de productos forestales, uno contestó que es su segunda fuente más importante, lo cual refleja la importancia que reviste la silvicultura para esta aldea.

En cuanto a los gastos, una familia desembolsa un promedio de Q.296 al mes, lo cual se destina para los siguientes:

Cuadro 8 Principales Gastos

Unidad: respuestas

Orden	Alimentos	Medicina	Ropa
ı	53	2	2
2	2	8	24
3	2	12	6
4			2
Total	57	22	34

^{*}Una persona puede seleccionar más de una respuesta

El rubro de gastos más importante fue el de alimentos básicos como maíz y frijol los cuales son cultivados en su mayoría por los habitantes, sin que su producción cubra el 100 % del consumo familiar. Además de estos se incluyen los complementarios como azúcar, sal y aceite. En lo que respecta a los gastos médicos, los centros de salud públicos ofrecen el servicio gratuito de diagnóstico, sin otorgar los medicamentos, por lo que los usuarios deben sufragar estos gastos. El monto de este rubro tiende a incrementarse en proporción al número de niños por familia.

(9) Necesidades Básicas

Las mencionadas por los encuestados fueron:

Cuadro 9 Necesidades Básicas

Rubros	Transporte	Agua potable	Electricidad	Puestos de salud	Mejoramiento de caminos	Oportunidades de trabajo	Tierras
Respuestas	9	9	32	15	12	9	8

El rubro predominante fue la infraestructura eléctrica, a la que le siguen los puestos de salud. Estas son las más importantes para los habitantes locales, por lo que actualmente el Comité Promejoramiento está tramitando la solicitud a las autoridades correspondientes. Los caminos existentes en la Finca Nacional son de terracería. El principal empieza de la carretera asfaltada (RN-17) pasando por la entrada principal de la finca hasta llegar a la antena telefónica de GUATEL, siendo transitable todo el año (ext. aprox. 5 km). Existen otros que son de tipo forestal construidos en años anteriores, manifestando la comunidad el desco que se mejoren estas infraestructuras viales. En lo que corresponde al abastecimiento de agua, la mayoría de las familias dispone de un sistema de suministro sencillo, y no se ha tenido mayores inconvenientes en este aspecto. Sin embargo, dado que el agua proviene de los manantiales, existe un déficit del recurso durante la sequía. Dentro de las respuestas de 9 encuestados manifestaron que hay una falta de oportunidades de trabajo, lo refleja el deseo de conseguir una fuente complementaria de ingresos, dada la dificultad de subsistir sólo de la producción agrícola. También, algunos respondieron que desean obtener el título de propiedad de las tierras.

(10) Uso Actual del Suelo

Los colonos actualmente utilizan las tierras de la Finca Nacional como residencia, área agrícola y ganadera. En cuanto al uso de las praderas, no se ha cuantificado exactamente por la forma que se utilizan, ya que muchos de los encuestados respondieron que están utilizándolas en forma comunitaria. Por lo que, en el siguiente Cuadro, se indica la superficie media de las tierras utilizadas para residir y cultivar.

Cuadro 10 Promedio de Superficie de Tierras Residenciales y Agrícolas de la Finca Nacional

Unidad: Superficie/respuestas

Unidad administrativa	Residencial	Agrícola
El Durazno		:
Sector I	6.751 ha/19	42.49 ha/17
Sector II	7.145 ha/10	18.60 ha/11
Sector III	10.032 ha/21	66.15 ha/21
Aguacate	0.790 ha/ 3	2.24 ha/ 3
Sibabaj	0.012 ha/ 2	
Las Anonas	<u> </u>	7.70 ha/ 6
Total	24.730 ha/55	137.18 ħa/58
Promedio por cada familia	0.450 ha	2.37 ha

(11) Variación de la Cosecha

A continuación se resume el número de respuestas obtenidas sobre la variación de la cosecha en los últimos diez años.

Cuadro 11 Variación de la Cosecha

Variación	Incremento	Sin variación	Reducción	Total
Respuestas	8	18	32	58

Según respuestas, 8 de los encuestados manifestaron que ha habido un incremento de la cosecha, esto por el avance de las técnicas agrícolas y aplicación de fertilizantes químicos. 32 respondieron que se ha reducido, argumentando que el motivo de la pérdida de la productividad es por debilitamiento de la tierra, arrastre del suelo y de fertilizantes. En realidad, aún sigue habiendo requerimientos por convertir los bosques en tierras de cultivo, lo que se traduce en una potencial reducción de las áreas forestales por la explotación agrícola.

(12) Principales Cultivos

En la Finca Nacional se trabajan principalmente maíz, frijol, tomate y café, con un porcentaje de superficie cultivada de 97%, 85%, 70% y 66%, respectivamente. A continuación se resume el área cultivada y lo cosechado de cada productos en promedio y por familia.

Cuadro 12 Principales Cultivos

Rubros	Promedio de la superficie cultivada	Promedio de cosecha	Porcentaje de comercialización
Maíz	0.99 ha	867 kg	12.5%
Frijol	0.35 ha	203 kg	14.3%
Tomate	0.15 ha	297 cajas*	88.9%
Café	-	-	28.6%

^{* 1} caja= 50 lib. = 50×0.454 Kg. = 23 Kg. aprox.

Aparte, se cultiva caña de azúcar, chile, col y frutas como plátano, durazno, naranja, etc., estos últimos, son plantados alrededor de la vivienda.

El maíz y el frijol son, en su mayoría, destinados para consumo familiar, mientras que el tomate pasa al canal comercial. El café, al igual que las frutas, son plantados

alrededor de la vivienda en reducida magnitud, por lo que el porcentaje de comercialización también es bajo. Sin embargo, el café sigue siendo un producto que genera ingreso en efectivo. Los precios del tomate varían según la temporada, oscilando de Q.10 - Q.20 a Q.150 - Q.200 por caja. Dada la dificultad de efectuar el cultivo continuo, se alterna con frijol y maíz, o se desplazan a otras tierras. El tomate es plantado en uno ó dos ciclos al año, según las condiciones dadas, y se cosecha de tres a cinco veces por ciclo.

(13) Quema

Sólo el 30% de los encuestados respondió que efectúa la quema, por lo que esta no constituye una práctica habitual. Su objetivo es la eliminación de malezas y desechos, no habiendo quien respondiera que lo hace para preparar el terreno de pastoreo.

(14) Ganadería

Es una actividad complementaria a la agricultura, y no tiene a una magnitud que podría llamarse "administración de granjas". Los productores comercializan el ganado, según su necesidad, para complementar la economía familiar. En los siguientes cuadros se presenta el porcentaje de cría y el número de cabezas de ganado que se desarrolla en la Finca Nacional.

Cuadro 13 Porcentaje de Cría de Ganado

Ganado	Vacuno (came)	Vacuno (leche)	Buey	Porcino	Equino	Avícola	Pato
Porcentaje de Cría	48%	58%	5%	42%	15%	90%	27%

Cuadro 14 Número de Cabezas

Unidad: cabezas

Ganado	Vacuno (came)	Vacuno (leche)	Buey	Porcino	Equino	Avícola	Pato
Total	77	72	4	47	14	816	66
Promedio familiar	2.6	2.0	1.3	1.8	1.5	14.6	3.9

(15) Uso del Bosque

Para obtener esta información se plantearon varias interrogantes a las que los encuestados respondieron afirmativa o negativamente. Estas fueron la obtención de "madera", "leña y ocote", "uso para el pastoreo", "caza", "recolección de plantas alimenticias", "plantas medicinales" y "otros". Las respuestas afirmativas se resumen en el cuadro que se presenta a continuación.

Cuadro 15 Número de Respuestas Afirmativas sobre las Modalidades de Uso del Bosque

Uso	Madera	Leña y ocote	Pastoreo	Caza	Alimentos	Medica- mentos
Respuestas afirmativas	46	. 60	24	4	49	17
% frente al total	74%	97%	39%	6%	79%	27%

El uso predominante que se le da al bosque en esta región es la obtención de leña y ocote. También se detecta un alto índice por lograr madera (74%). De las 46 respuestas proporcionadas, 44 contestaron que la madera es destinada para la construcción y reparación de su vivienda, 2 replicaron que la comercializan. Para el corte de los árboles que se encuentran en la Finca Nacional y su aprovechamiento para consumo familiar, se requiere de la autorización de la Sub-dirección regional II-4 de DIGEBOS, de lo cual los habitantes tiene conocimiento, de esto sólo 2 ó 3 respondieron que han tramitado autorización.

El segundo uso más importante dentro del bosque es la "recolección de alimentos", mencionando la mayoría de los encuestados las plantas de el macuy y chipilín, las cuales cocinan para obtener sopa.

(16) Daños Forestales

De los 62 encuestados, 40 respondieron que los perciben, mencionando principalmente la plaga del gorgojo del pino (*Dendroctonus* spp.) (30) y el incendio forestal (18). Conviene señalar que 2 se refirieron al corte ilegal por habitantes de otras aldeas.

(17) Combustibles

Todos los indagados respondieron que utilizan la leña como combustibles y el ocote para la iluminación. Por lo tanto, en el caso de mejorarse las infraestructura eléctrica, se reducirá el volumen de su extracción.

Según la encuesta se logró concluir que la fuente de donde se obtiene la leña es, sin excepción, la Finca Nacional. Más de la mitad de los encuestados (34) respondieron que habrá suficiente para el futuro. Es conveniente señalar que 10 acotaron que hay una falta del material incluso en el presente. Estos señalamientos reflejan que existe una diferencia de perspectivas con respecto a la disponibilidad de leña entre los habitantes.

Las especies utilizadas son *Quercus* spp., y en menor porcentaje *Pinus* spp., la cual se usa cuando se carece de las primeras.

El uso de carbón vegetal no es habitual en el área, la mayoría contestó que no tienen conocimiento de como producirlo

(18) Cuestionario sobre la Situación de la Mujer

Tal como se ha referido anteriormente (inciso (2)), se entrevistó a 39 mujeres para conocer su situación. De las cuales una es soltera, y el resto casadas o en convivencia. Los resultados son:

a. Nivel Educativo

Cuadro 16 Nivel Educativo de las Encuestadas

				Prin	naria		-	Secundaria
Nivel	Nulo	t <u>er</u> . grado	2° grado	3 <u>cr</u> . grado	4° grado	5° grado	6° grado	3 <u>cr</u> . grado
Personas	16	2	7	9	2	1	1 .	1

Al igual que los jefes de familia, el nivel educativo que predomina es haber cursado el tercer grado de primaria, seguidamente el "nulo". El índice de escolaridad es del 87% frente al 80% de los jefes de familia. Esta situación refleja que el tercer grado es la etapa clave, ya que pocos continúan los estudios a partir del cuarto grado.

b. Ocupación Principal de la Mujer

Es realizar los quehaceres domésticos que involucra cocinar, lavar ropa, además de la extracción y recolección de leña. También existe un alto porcentaje que ayuda al esposo en las labores agropecuarias, y comerciar los cultivos en el mercado. A esto hay que agregar la educación de los hijos, en el caso que los hayan. En términos generales, la mujer laboriosa y fuerte, lo cual depende de su personalidad.

1

c. Toma de Decisión en la Familia

Se planteó una pregunta sobre la iniciativa de la educación de los hijos, labores agrícolas, cría de ganado y compras. En el Cuadro II-36 se indica el porcentaje de las señoras que contestaron que esta se hace de común acuerdo entre la pareja:

Cuadro 17 Toma de Decisión según Actividad

Unidad: %

Decisión de:	Ambos	Esposo	Esposa	Total:
Educación de hijos	74	8	18	100
Labores agrícolas	38	0	62	100
Cría de ganado	38	7	55	100
Compras	46	13	41	100

Existe un alto porcentaje de familias donde el jefe decide sobre las principales actividades económicas, agrícolas y ganaderas. Sin embargo, la voz de la mujer es importante en lo que se refiere a la educación de los hijos y las compras.

d. Actividades Sociales de la Mujer

De las 39 encuestadas 3 realizan actividades fuera de la familia, mientras que el resto dedica la mayor parte de su tiempo a los quehaceres domésticos y educación de los niños. Más del 70% manifestaron su deseo de trabajar fuera del hogar, si le da la oportunidad, siendo el objetivo principal contribuir a la economía familiar.

En cuanto a las actividades sociales, la mayoría no asiste a ningún tipo de actividades ya sea por falta de tiempo o por la ausencia de formación de grupos sociales. Sin embargo, en este caso más del 70% contestó que tiene deseo de asistir a este tipo de actividades, en el caso que existiese la oportunidad. Los porcentajes anteriores reflejan la voluntad de la mujer de participar en la sociedad, por motivo de trabajo u otros campos de acción. Se hace la observación que algunas de las entrevistadas contestaron que han participado en actividades del grupo de promejoramiento nutritivo organizado por el puesto de salud, grupo de cultivo de hortalizas organizado por DIGESA y del programa de alfabetización.
