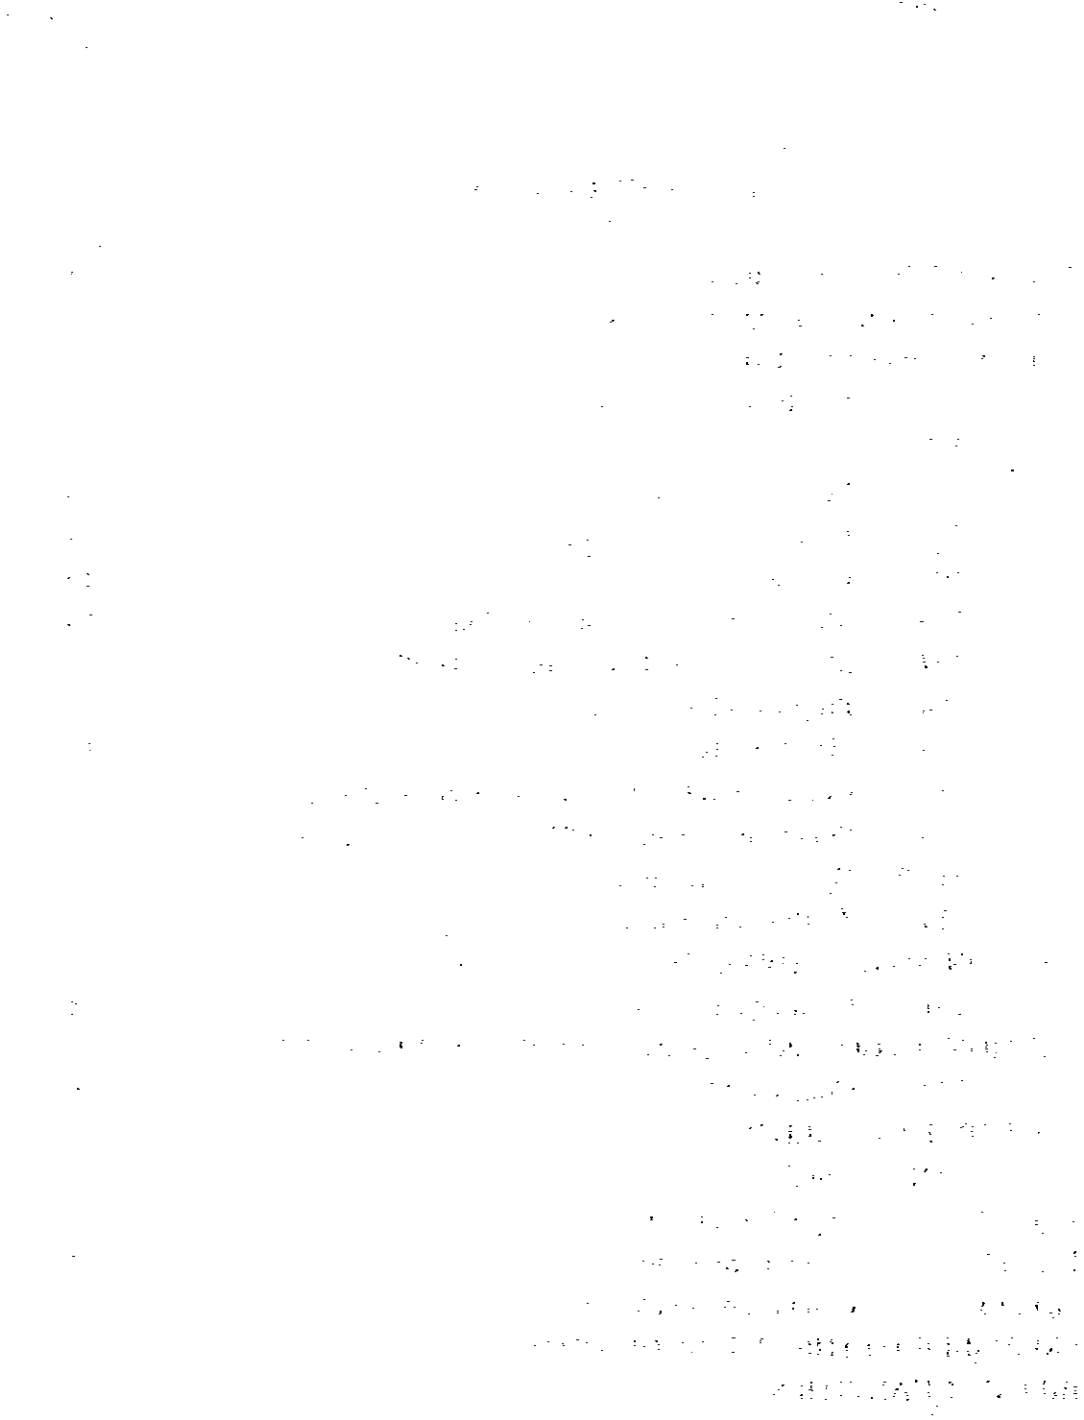
TABLE OF CONTENTS



SPECIAL SPECIFICATION

The Special Specification stipulated in these Tender Documents defines, modifies, extends, substitutes or deletes the relevant portions of the Sultanate of Oman General Specification for Roads, April 1994 and Highway Design Manual February 1994, referred to in the Prime Document.

The General Specification and Special Specification constitute the applicable specification referred to in this Tender.

Section and clause numbers in the Special Specification are related to those stipulated in the General Specification for Roads.

1138494 [8]

BRIEF DESCRIPTION OF WORKS

The Project comprises of undertaking all works and services in connection with the Construction, Completion and Maintenance of Flyovers at Sohar Roundabout the Batinah Highway. The Contractor is required to carry out all works, including surveying, setting out, excavations, temporary works, permanent works, erections, finishing, installation of ancillary facilities and maintenance for 1 year from the date of issue of the Certificate of Completion.

The Project includes construction of flyover bridges and embankment to bridge approaches and rampways, reconstruction of some affected service roads, removal and relocation of the facilities and some ancillary works.

The salient feature of this project is the construction of the proposed facilities over the existing highway. Special attentions are therefore required to minimize the interference with the operation of the highway and other human activities around the site(s). Contractor shall pay particular attentions to safety on site; such as during erection of structural members, traffic control or diversion, warnings during night work, and other traffic safety measures to avoid any accidental hazards as a result of the construction activities.

SECTION 100 GENERAL

104 ENGINEER'S OFFICE

104.1 ENGINEER'S OFFICE

Specification

This item shall consist of the provision, erection, furnishing, maintenance, including consumable items for prefabricated unit(s) or rented building for Engineer's Office as approved by the Engineer for the sole use of the Engineer and his staff together with the provision of installation and maintenance of services, including 2 local telephone lines and fax machine. It also includes replacement of any item provided in this section.

The Engineer's facilities shall consist of:

Engineer's office, 96 sq.m (Type A)	1 No.
Store for Survey Equipment, 9 sq.m	1 No.
Shaded Carport for 6 vehicles	1 No.
Fire Extinguisher	1 No.

The prefabricated unit's or rented building, furniture, equipment and service shall be made available in full working order within the time period stipulated in 'Appendix to Form of Tender' and shall continue to be so available during the progress of the work until the Certificate of Completion for the whole of the works has been issued or as directed by the Engineer.

Description

The office shall be air conditioned, furnished and with all the necessary utilities, i.e. power, water, sewerage, lighting and gas and waste disposal facilities and completely maintained during the contract period as approved by the Engineer.

The Contractor shall provide office for occupancy before start of construction, for the sole use of the Engineer. The office will have a minimum of 5 rooms and store and a floor area of not less than 96 square metres. Typical plan is attached as Figure 1. The Contractor shall provide adequate office furniture including filing cabinets, storage cupboards, bookshelves, adequate supplies of pencils, pens, drawing paper, writing pads, stationery and similar expendable materials etc.

The Contractor shall provide office furnishings equipment at least equal to the following list and as per approval of the Engineer. All furnishings and equipment are for the exclusive use of the Engineer.

(i) Resident Engineer's Office

Desk 150 cm x 80 cm with swivel chair.	1 Set.
Visitors chairs	2 Nos.
Conference Table, 240 cm x 120 cm with 8 chairs	1 Set.
Filing cabinet, 4 drawers	1 No.
Bookcase with 4 shelves	1 No.
Air Conditioner, 18000 B.T.U.	1 No.

(ii) Typist/Record Keeper

Ordinary Desk, 137 cm x 60 cm.	2 No.
Chair	2 Nos.
Filing Cabinets, 4 drawers	1 No.
Bookcase with 4 shelves	1 No.
Air conditioner, 18000 B.T.U.	1 No.

(iii) Supervisory Staff Office (3 rooms)

Engineer's Desk, 137 cm x 60 cm with chair	1 set each
Utility tables, 100 cm x 150 cm	1 set each
Visitors chair	2 No. each
Filing cabinet, 4 drawers	1 No. each
Plan file with 5 drawers	1 No. each
Plan stick file	1 No. each
Air Conditioner, 18000 B.T.U.	1 No. each
Word Processor (Computer)	1 No.
Printer	1 No.
Scientific Calculators	3 Nos.
A3 size paper copier	1 No.

The Contractor shall also provide kitchen/pantry and toilet facilities with Engineer's office, for the sole use of the Engineer's Staff, the following:

(i) Kitchen/Pantry Utilities

Refrigerator, 350 litres.	1 No.
Utility table, 100 cm x 150 cm.	1 No.
Cupboards	1 No.
Electric Kettle	1 No.
Drinking Water	as required.
Cups, Saucers, Tea Spoons (12 pcs.)	1 set.
Cutlery (12 pcs).	1 set.
Drinking glasses (12 PCs).	1 No.
Chair/stall	1 No.
Exhaust Fan	1 No.

Air Conditioner, 12000 B.T.U.	1 No.
Sink with hot and cold water supply	1 No.
Tea Towels	10 Nos.
Waste Baskets	2 Nos.
Exhaust Fan	1 No.

(ii) Toilet Facilities (Type A)

European WC Suite	1 No.
Wash basin with cold and hot water supply	1 No.
Roller Towel Fitting	1 No.
Toilet paper roller fitting	1 No.
Mirror	1 No.
Exhaust fan	1 No.

In addition, the following manuals (latest edition) are to be supplied.

- ASTM Volume relevant to the project.
- AASHTO volumes relevant to the project.
- ACI volumes relevant to the project.
- BS Specification relevant to the project.
- Standard documents for Building and Civil Engineering Works, third edition July 1981, prepared by the Ministry of Finance and Economy, Financial Affairs, Sultanate of Oman.

Upon completion of project, the above documents/standard specification shall revert to the Contractor.

Plans, Specification and Availability of Office

In case of prefabricated unit(s), it shall be constructed of such materials and furnishings which shall be approved by the Engineer. The foundation shall be taken down to solid bottom and the finished floor level shall be at least 60 cms. above natural ground level. All floors shall have PVC tiles laid wall to wall as approved by the Engineer.

The Contractor shall furnish his plans and specification for these prefabricated units not later than (one) 1 week after the signing of the Contract and shall complete and make ready for occupation all these structures within (three) 3 weeks after receipt of Engineer's written acceptance of such plans and specification. If the completion is not effected within the specified time, the Contractor shall provide at his own expense adequate accommodation as approved by the Engineer until occupancy is possible.

No separate payment will be made for providing the Engineer and his staff with temporary offices as specified above, the cost of which will be deemed to be included in the items of mobilisation.

The Contractor shall provide adequate vehicular access to the offices.

Upon completion of the contract or at such time as the Engineer deems that it is no longer required the ownership of the prefabricated unit(s), furnishings and equipment shall return to the Contractor whose responsibility will be to remove them from the site in accordance with Clause 33 of Conditions of Contract.

104.3 SURVEYING INSTRUMENTS

The surveying instruments to be supplied and maintained for the use of the Engineer include the following:

Sr. No.		Quantity
1	Suitable Theodolite centesimal system, with 4 decimal partition complete with adequate tripod	1
2	Suitable high precision automatic level complete with tripod	1
3	EDM measuring equipment, 2000 m minimum systems, complete with battery, battery charger, cabling, three (3) reflectors, related tripods and accessories to the satisfaction of the Engineer	1
4	Levelling staves 4 m with levelling plates, levelling bubbles	2
5	Fiber tapes 30 m in case	2
6	50 m steel tape	2
7	Steel pocket tapes, 5 m long	4
8	Surveying umbrella	1
9	Ranging rods, 2.5 m long	4
10	Printed level books	

10

11 Field books

5

12 Water Cooler jug

1

13 String lines, 50 m long

2

104.7 LABORATORY AND ITS FURNISHINGS

Laboratory

The following clauses describes the type of Site Laboratory to be provided by the Contractor together with defining the responsibilities of the Contractor for such laboratory.

Whenever the term "Laboratory" is used, it shall include the building, utilities, sampling and testing equipment hereinafter detailed.

Type of Laboratory

Laboratory shall be stationary or mobile and located within the vicinity of Engineer's office. It shall be constructed of weather-proof prefabricated construction may be rented subject to the approval of the Engineer and have a floor area of not less than 100 square metres.

On completion of the project, or at such time as the Engineer deems that it is no longer required, the Laboratory and furnishing and equipment shall be reverted to the Contractor.

Use of Laboratory

The Engineer shall have exclusive use of the Laboratory at all times during the Contract period. When so ordered by the Engineer, the Contractor shall, at his own expense, provide one (1) technician and three (3) skilled labourers to perform sampling, testing and related duties under the direct supervision of the Engineer. The Laboratory provided shall not be used for other Contracts without written permission of the Engineer.

Details of Laboratory

The Contractor shall provide the field laboratory by the end of the mobilisation prior and to be approved and accepted by the Engineer.

The laboratory building shall have a net area of approximately 100 sq.m. divided into rooms with net areas as follows:

a)	Office	15 sq.m.
b)	Asphalt Laboratory	25 sq.m.
c)	Soils and Concrete Laboratory	25 sq.m.
d)	Washroom with Shower, Wash Basin and Mirror	7.5 sq.m.
e)	Store room with shelving	20 sq.m.

Concrete floors of approved quality shall be provided in the laboratory.

Services

All rooms except the store room, washroom and toilet shall be air conditioned to maintain a temperature as specified and or approved by the Engineer.

The Contractor shall provide sufficient power supply for laboratory requirements. The power supply shall be 220 volts 50 cycles, unless otherwise necessary to fit the equipment. Sufficient outlets shall be provided in the laboratory rooms.

The Contractor shall supply fuel-gas (natural or artificial) for ovens, burners etc. where required. All rooms shall be provided with standard office lighting of the fluorescent tube as approved by the Engineer.

Concrete pedestals for special equipment will be constructed as specified by the Engineer. All rooms shall have doors fitted with locks and keys. The water supply shall be maintained by an elevated or pressure tank with a capacity of 4500 litres. Water taps shall be provided in the aggregate testing room.

The toilet shall be connected to a septic tank of adequate capacity for 10 people with a 10 cm sanitary pipe and ventilation stack. A telephone shall be installed in the office.

Furnishings

The Contractor shall provide office furnishings at least equal to the following list. Substitution of type may be made only upon approval of the Engineer. All furnishings and equipment shall be for the exclusive use of the Engineer.

a) Laboratory Office

Filing cabinet 4 drawers	1 No.
Bookcase with 4 shelves	1 No.
Visitors chairs	2 Nos.
Air conditioner, 1800 B.T.U.	1 No.
Engineer's desk, 135 cm x 60 cm. with chair.	1 No.
Work tables, heavy duty, 1.5 x 2.5 m or as directed by	

the Engineer	2 Nos.
Chairs	2 Nos.
Plan file, 3 drawers	1 No.
Scientific calculator, programmable	1 No.
Air-conditioner, 24000 B.T.U. each.	2 Nos.
Fire extinguisher.	1 No.

Work counters at least 10 metres long along the walls with one stainless steel basin and water tap. Cabinets with shelves shall be under the counters. Location will be as directed by the Engineer.

b) Storage

Shelving as directed by the Engineer.

Approval of Laboratory

Prior to the start of work, the Engineer shall inspect the proposed laboratory to ensure its compliance with these specification. Should the Contractor fail to comply with these specification at any time during the Contract period, the Engineer may order any or all of the following:

1. Stoppage of all work until the specification have been complied with.

2. Stoppage of any portion or phase of the work until the specification have been complied with.

3. Sampling and testing to be performed at any other laboratory designated by the Engineer with such fees and charges to be deducted from any amounts due to the Contractor.

Testing Equipment, Test and Specification

The Contractor shall furnish and maintain the laboratory equipment, apparatus and supplies necessary to permit execution of all standard tests required by the Specification for the quality control of the executed works. The Contractor shall submit to the Engineer for his approval within (15) days after signing of Contract a complete listing of the equipment, apparatus and suppliers he proposes to furnish for the laboratory. The list shall include the manufacturer's name and descriptive literature.

The equipment apparatus and supply of materials for the laboratory shall permit the execution of all AASHTO and / or ASTM standard tests for soils, aggregates, bituminous materials and concrete as required by General and Special Specification.

Maintenance of Laboratory

The Contractor shall maintain the laboratory building, utilities, laboratory testing equipment and testing equipment for Field Control in the satisfactory working condition at all times to enable the Engineer for testing the material and workmanship of the works during the construction time. Whenever required, damaged testing equipment shall be replaced by the Contractor and consumable goods such as filter paper, trichlorethylene, speedy moisture reagent, S.E. stock solution etc. shall be supplied in sufficient quantities when ordered by the Engineer for the sole use of testing the construction works. All operational expenses shall be met by the Contractor.

Sampling and Testing

It shall be the responsibility of the Contractor to perform sampling and testing under the direct supervision of the Engineer, as and when required. The samples shall be collected/transported to the laboratory by the Contractor at his own cost.

Upon the completion of the project, laboratory and its furnishings shall become the property of the Contractor.

106 CONTRACTOR'S COMPOUND

106.1 MOBILISATION AND DEMOBILISATION

The Contractor shall mobilise all the necessary equipment, plant, material and personnel to the location approved by the Engineer to be used as the Contractor's site compound and shall substantially complete the construction of the site offices, stores, sheds, workshops, accommodation etc. by the end of the specified mobilisation period.

At the end of the construction period, the Contractor shall, with the agreement of the Engineer, remove all equipment, plant, site camp surplus material and personnel off the site compound, clean and restore the ground to its original character all to the satisfaction of the Engineer and the Employer. Unless otherwise stipulated any permanent buildings that the Contractor may build for his camp(s) on government land shall if desired by the Engineer and upon the completion of the works, become the property of the employer and shall be handed over in good condition unfurnished with all utility installations complete in place.

CONTRACTOR'S CAMP FACILITIES

The Contractor shall provide a temporary, weather tight site office for his own use complete with facilities for filing, drawings, specification, correspondence etc. and other appurtenances necessary for proper execution of the work. He shall also make his own provision for suitable accommodation and transportation of his personnel his workshop and all other elements of his camp(s) and shall provide all necessary power, water, sewerage, lighting and all other facilities necessary for his personnel, equipment, material and all other operations of his camp(s).

The Contractor's camp shall include an air conditioned clinic adequately furnished (including a refrigerator), provided with first aid and other medicines normally required on camp sites and operated by a qualified person approved by the Ministry of Health and the Engineer.

The location of the Contractor's camp(s) shall be at location(s) designated and approved by the Engineer. The Contractor shall be responsible for making all arrangements and payments in respect of any land required for the sitting of his camp(s).

The Contractor shall be paid a monthly payment for his camp as quoted by him for the corresponding rate in the Bill of Quantities (item 106.2, Maintenance of Contractor's compound) till the completion of whole of the works inclusive of works instructed as variation order and Additional works, if any. This payment shall be deemed to cover all costs related to the provision, running and maintenance of the Contractor's camp.

107 MAINTENANCE AND PROTECTION OF TRAFFIC

Considering importance of maintaining the traffic on the Batinah Highway, temporally carriageway during construction works for public use shall be maintained properly. This temporally carriageway principally shall be constructed out side of bridge and retaining wall construction site.

The Contractor shall prepare a plan for the maintenance and protection of traffic in accordance with the Standards and regulations of Royal Oman Police (ROP), concerned authorities (if required) and Ministry of Communications, showing details of detours, locations of different types of signs and flashing signals, lights by night, flagmen, barricades, torches etc. and get the plan approved from the R.O.P. and concerned authorities (if required) and shall provide, erect and maintain all the facilities in accordance with the approved plan. He will remove all the above facilities after they are no longer required subject to the approval from the Engineer, R.O.P. and the concerned authorities at no additional cost.

The payment shall be full compensation for detours, handling of traffic during construction, for the provision and maintenance of barricades, signs, flares, torches, flagman, flashing signals and all other items necessary for proper completion of the works to the satisfaction of the concerned authorities. This item shall be paid as lump sum against BOQ item 107.1 over the construction period.

108 PROGRESS PHOTOGRAPHS

The Contractor shall supply colour photographs of size 15 cm x 10 cm, glued on an A-4 size paper with its corresponding caption, 6 photographs per set, complete with negative, for each month throughout the Contract period. These shall record the progress of the work during the month.

The name of the Project
Chainage or other location data
Type of work
Serial number of the photographs
Date of photography

109 SIGN BOARDS

Further to the General Specification, the Contractor shall provide Two (2) wooden sign boards, details of Contract Sign - Boards are included in Figure - 5, Page 27.

110 COMMEMORATIVE PLAQUE AND OPENING CEREMONY

110.1 SUPPLY AND ERECTION OF COMMEMORATE PLAQUE

Delete this Claus entirely in the General Specification for Roads, Sultanate of Oman, April 1994, and substitute with:

The Contractor shall erect one (1) Commemorative Plaque with a platform, detail as shown in Figure - .6, page 28. The size of the Carrara Marble Plaque with Arabic inscription and Khanjar Emblem as shown in the drawing shall be 1.45 m. x 1.5m. x 30 mm. thickness. The location shall be at place designated by the Engineer and agreed with the Employer and Wali of the Wilayat.

The cost of the Commemorative Plaque shall deemed to include the platform erection, materials, and all related items necessary for the completion of the works, accepted and approved by the Engineer.

110.2 OPENING CEREMONY

In addition to Clause 110.2 of the General Specification for Roads, Sultanate of Oman, April 1994, the Contractor shall provide, supply and erect a canvass tent, complete with accessories and posts, enough to cover the area of the designated ceremonial ground. All the works completed will be to the satisfaction and approved by the Engineer.

The cost of the Tent shall deemed to be included at the Opening Ceremony Lump Sum in the Bill of Quantities.

113 AS BUILT DRAWINGS

Further to Clause 113.1 of the General Specification, the Contractor shall keep accurate records of executed work during the Contract period. The Engineer shall, at any time during the Contract, have the right to inspect these records and check that they are

correct and up to date. Service drawings shall be colour coded.

The Contractor shall produce a sample of a finished drawings for the approval of the Engineer, and the approved drawings will be submitted with the Final Accounts within three(3) months from the last date of the construction period.

No separate payment shall be made for preparation and producing "As Built Drawings". The cost shall be considered subsidiary to other items of B.O.Q.

SECTION 200 EARTHWORKS

201 CLEARING AND GRUBBING

In addition to Clauses of the General Specification for Roads, Sultanate of Oman, April 1994, regarding removal of trees which have trunk diameter 300 mm or greater inside the construction limits, the Contractor shall remove and trans-plant the trees which have trunk diameter less than 300 mm, in case they were planted previously along the highway as landscaping works.

Also the Contractor shall remove and store the existing steel safety barriers along median side of the carriageway in the construction limits, and shall place along median side of the proposed flyover carriageway in embankment sections after completion of the said section.

SECTION 500 CONCRETE AND CONCRETE STRUCTURE

502 CONCRETE MIXES

In addition to the concrete class prescribed in Table 5.3: Concrete Classes of the General Specification of Roads, Sultanate of Oman April 1994, the Class 40 Concrete which is prescribed in the following table shall be added.

Class	Maximum Water Cement Ratio	Characteristic strength (N/mm^2) cylinder	cube	Normal Maximum size of Aggregate (mm)	Minimum Cement Contents (kg/m^3)
40	0.45	40	50	20	450

The Contractor shall test the concrete of the said class prior to the actual applications and shall get an approval of the Engineer.

Each concrete class shall be properly applied to the structure types as follows:

Class 16/20 concrete shall be used for blinding and masonry works.
Class 24/20 concrete shall be used substructure, retaining wall, box culvert
Class 32/30 concrete shall be used floor slab, cross beam, ferro guard & parapet cast in place concrete pile
Class 40/20 concrete shall be used only for prestressed concrete girder.

SECTION 1700 UTILITIES

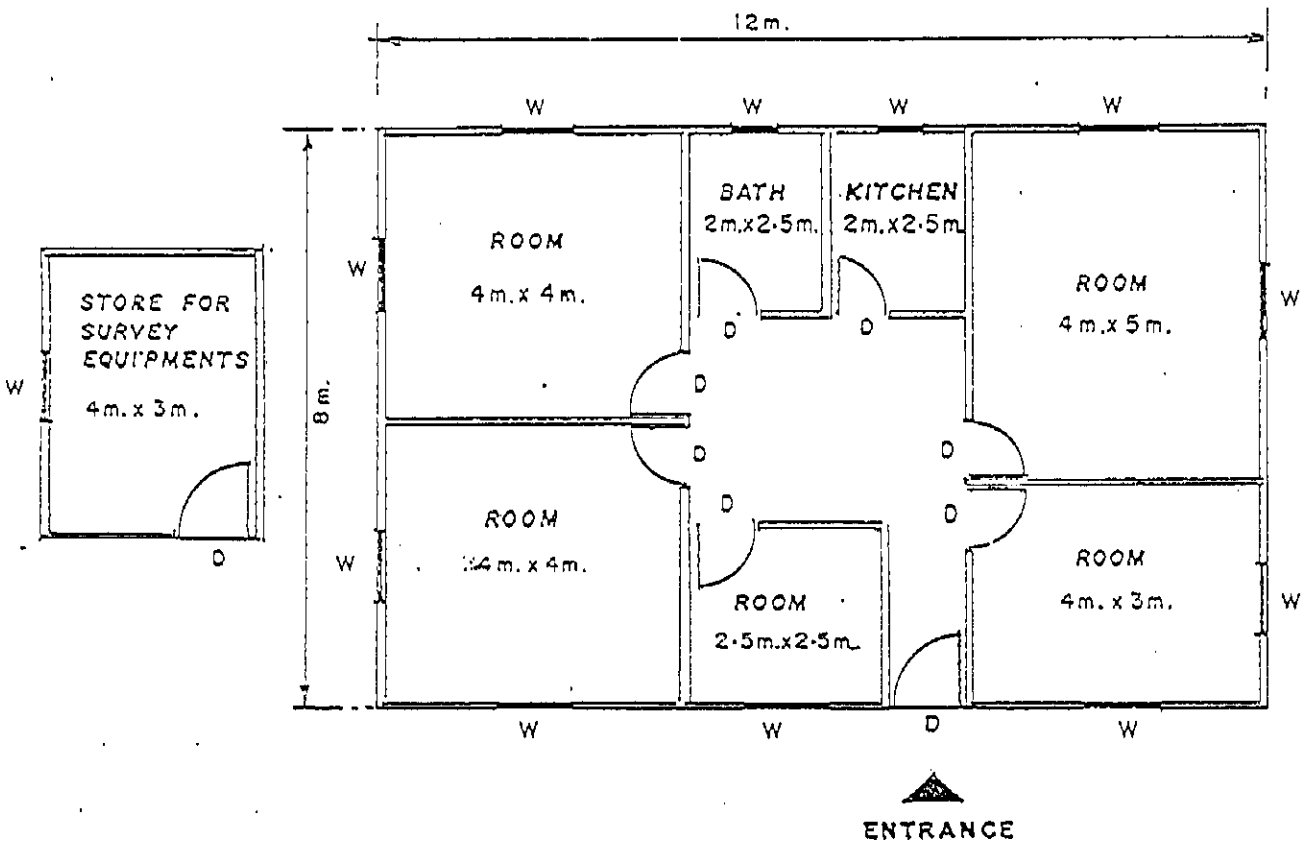
1701 UTILITIES

In addition to clauses of the General Specification for Roads, Sultanate of Oman April 1994, the Contractor shall locate, protect, uphold, temporarily divert if necessary, and maintain all pipes, ducts, drains, sewers, service mains, overhead or underground electrical/telephone cables, etc., during execution of the works. The Contractor shall make good any damage to existing service and/or property, and to reinstate the same at his own expense to the satisfaction of the Engineer.

Existing services may not be fully shown on the drawing and the Contractor shall liaise with the relevant authorities to determine the exact nature and full extent to such services which require protection and maintenance.

Approval shall be obtained a minimum of two weeks in advance of any planned interruption of service.

Ministry of Electricity & Water and GTO regulations require certain works to be carried out by specialist Contractors approved by them and it its the responsibility of Contractor to establish the extent of such work. Contractor will be deemed to have allowed in their rates against the various items of work for employing with MEW and GTO regulations and where necessary, for employing MEW and GTO approved Contractors for such specialist works.



NOTE :

1. THIS SKETCH IS INDICATIVE ARRANGEMENT, ONLY DETAIL DRAWINGS TO BE SUBMITTED TO THE ENGINEER FOR APPROVAL PRIOR TO ORDERING OF UNITS.
2. ALL DOORS (D) AND WINDOWS (W) SHALL BE OF SIZES APPROVED BY THE ENGINEER.

PREAMBLE TO THE BILL OF QUANTITIES

1. General directions and descriptions of items of work given elsewhere in the Tender Documents are not generally repeated in the Bill of Quantities. Reference must be made to the Drawings, Specification and Conditions of Contract for this information.

2. The items of work given in the Bill of Quantities shall comply with the relevant sections of the Specification and with the instructions of the Engineer.

3. The initial part of the item numbers used in the Bill of Quantities correspond to the clause numbers used in the Specification, and the second part is consecutive within each clause reference.

4. In the Preliminaries Bill the Tenderer shall insert a lump sum or rate to each item which he considers has a financial value. Where the Tenderer considers that an item has no financial value he shall insert 'nil'. Lump sums shall not be inserted covering more than one item.

5. The value of services and obligations involved in the Preliminaries shall not be included in rates in other parts of the Bill of Quantities but shall be completely priced against the particular item in the Preliminaries.

6. Quantities of work and materials in the Bill of Quantities are estimated only and are not to be considered as limiting or extending the amount of work to be done and material to be supplied by the Contractor. The Contractor shall not use the quantities as an ordering schedule.

7. Each item in the Bill of Quantities shall be priced as indicated. No Tender will be considered complete unless this requirement has been fulfilled.

8. Unit rates shall be written in ink in the space specified in the Bill of Quantities.

9. The unit rate interested by the Tenderer in the Bill of Quantities for any item of work shall apply to completed work conforming to the Contract Documents covering all expenses of tabour, materials and equipment required for executing that item of work as well as covering the share of that item for the other general expenses to be incurred by the Contractor during the execution of the Works. These general expenses shall include but are not restricted to, the following, unless entered as a separate pay item in the Bill of Quantities.

   i) Preparation and submission of bids including the Site Inspection.

   ii) Employment and accommodation of the Contractor's staff - local and expatriate - including official holidays, annual leave, sick leave, compensation, bonuses, insurances etc.

iii) Costs related to the Contractor's site Camp(s) including the provision of all utility facilities..

iv) Provision for wastage of materials and for consumable materials.

v) Costs of laboratory testing, survey work and assistance to the Engineer as required in the Contract.

vi) For electrical installation, costs shall also include providing, testing and commissioning of the complete installation.

vii) Royalties, duties, customs, taxes, insurance and all other related costs.

viii) Cost of bank guarantees.

ix) Costs for permission to use private or public land.

x) Cost of temporary works.

xi) Cost of work items for which there are no direct payments and which are considered in the Specification and other Contract Documents as subsidiary to other items in the Bill of Quantities.

xii) Overheads and Profit.

xiii) All other expenses the Contractor may encounter in the proper execution of the Contract.

Compliance with the Tender Documents

10. The Tenderer/Contractor shall allow in the Bill of Quantities a lump sum for complying with the conditions and requirements stipulated in the Tender Documents and which are not covered separately in the various pay items of the Bill of Quantities.

11. The tendered lump sum for this item is deemed to cover the whole of the Contract period. Monthly payments against this item shall be made in instalments proportional to the time for completion as stated under Item 5 in the Appendix to the Form of Tender.
