**EQUIPMENT AND REQUIREMENT, SELECTION UNDER CONSIDERATION**

A. Basic Principles			C. Criteria for Decision				Y		X
(1)	(2)	(3)	(1)	(2)	(3)	(4)	(5)	(6)	(7)
(1) Adequacy for the function and return of the hospital.	adjustable	not adjustable	Equipment which have any danger of conflict for the laws and regulations on the country in both in Suriname and/or Japan.						none
(2) Consistency with the existing equipment.	keep possible	impossible	Equipment which require new construction or big reconstruction of the building.						not necessary
(3) Equipment which don't require new medical staff (doctors, paramedical staffs.).	not overlapping	overlapping	Microscope equipment and relative equipment.						not to be used
(4) To avoid overlapping of the items and quantity with existing equipment.	not overlapping	overlapping	Equipment which use stereo-Duamie-Carbon and/or other materials which involve environmental problem.						not to be used
(5) To avoid overlapping from other donors.	expensive possible	cheap impossible	Equipment which require new clinical department or introduction of new clinical technical.						not to be for purpose
B. Criteria for Priority			(6)	(7)	(8)	(9)	(10)		plural
(1) Basic equipment for medical services.	keep possible	impossible	Equipment easy to furnish in the country and easy to purchase by the budget of the hospital itself.						not easy
(2) Equipment which you can handle by simple and established skills.	possible	impossible	Equipment which overlap the item and/or its function in the equipment the hospital.						to be repeated
(3) Equipment which you can possibly confirm the necessary condition and propriety for the medical services. (i.e. number of patients, number of materials...)	possible	impossible	Equipment which already have been acquired or have been included in the budget after the request.						to be taken
(4) Equipment which is more effective per cost.	expensive possible	cheap impossible	Equipment without agency available for maintain and control and which seem to be hard to maintain in the country.						not difficult for operation and maintenance
(5) Equipment of which the receptor can afford the maintenance cost.									difficult for operation and maintenance

EQUIPMENT AND REQUIREMENT, SELECTION UNDER CONSIDERATION

A. Basic Principles			C. Criteria for Decision			X		Z		
(1)	(2)	(3)	(1)	(2)	(3)	adjustable	none	none	keep	
(1) Adequate for function and removal of the hospital. (2) Consistency with the existing equipment. (3) Equipment which don't require new medical staff (doctors, paramedical staffs). (4) To avoid overlapping of the item and quantity with existing equipment. (5) To avoid overlapping from other donors.			(1) Equipment which have any danger of conflict for the laws and regulations on the equipment in force in both in Suriname and/ or Japan. (2) Equipment which require new construction or big reconstruction of the building. (3) Radioisotope equipment and related equipment. (4) Equipment which use chloro-fluoro-carbon and/or other materials which involve environmental problem. (5) Equipment which require new clinical department or introduction of new clinical technique. (6) Requirement of articles for consumption and respect by themselves. (7) Equipment easy to furnish in the country and easy to purchase by the budget of the hospital itself. (8) Equipment which overlap the item and/or its function in the equipment list mailed after the request. (9) Equipment which already have been acquired or have been included in the budget after the request. (10) Equipment without agency available for maintain and control and which seem to be hard to maintain in this country.			adjustable	none	none	keep	necessary
B. Criteria for Priority			D. Criteria for Priority			X		Z		
(1)	(2)	(3)	(1)	(2)	(3)	adjustable	none	none	keep	
(1) Basic equipment for medical services. (2) Equipment for the renewal or replacement of the existing equipment. (3) Equipment which you can handle by simple and established skills. (4) Equipment which you can modify conform the necessary condition and property for the medical services. (as a number of patients, number of materials...) (5) Equipment which is more effective per cost. (6) Equipment of which the receptor can afford the maintenance cost.			(1) Equipment which already have been acquired or have been included in the budget after the request. (2) Equipment which overlap the item and/or its function in the equipment list mailed after the request. (3) Equipment without agency available for maintain and control and which seem to be hard to maintain in this country.			possible	impossible	impossible	possible
