

## **CHAPTER 4 PROJECT EVALUATION AND RECOMMENDATIONS**

## Chapter 4 Project Evaluation and Recommendations

### 4-1 Examination of Project Appropriateness and Evaluation of Project Effects

The Government of Sri Lanka has been actively investing in the educational field. As a result of providing free schools, the rate of attendance in elementary school in 1995 reached 113% and the percentage of illiteracy in adults was down to 9.8%. However, the educational facilities in regional areas are still far behind, with lessons being conducted simultaneously in big rooms and classrooms without windows or doors. As schools are not clearly divided into elementary, junior and senior high schools, it is affecting the course of students who wish to move on to higher grades.

In order to solve structural problems in the educational system and improve the quality of education, the Government of Sri Lanka set up the NEC, which is an advisory council of the President to modify the educational system. It is presently conducting the SRS with the aid of the World Bank in order to reorganize the elementary, junior and senior secondary schools into Junior Schools and Senior Schools.

The objective of this Project is to improve the educational surroundings of the schools in Ratnapura and Kegalle in the Province of Sabaramugawa, and Gampaha in the Western Province where SRS has already been conducted. By constructing classrooms and additional facilities and by providing equipment, it will support the country's School Rationalization Programme, together with improving the quality of junior school education. The following results may be expected through the implementation of this Project.

#### 1) Promotion of Educational Reforms

Each Project School site was surveyed and information and data of the school, such as the number of teachers and students, and the number of usable classrooms, were collected. Based on these data and the future planning figures for the year 2001 prepared by the MOEHE, the number of students at each Project school in the year of 2003, in which time the number of students was considered to be the smallest, was forecasted. Then, the number of lacking classrooms in that year was calculated. As a result, the number of classrooms to be included in the Project was set as being 200 that would be the number of the lacking classrooms of the Project schools. As a part of the Educational Reform, the MOEHE revised the standard classroom floor area per student from 10 sf (approximately 0.9 m<sup>2</sup>) to 15 sf (approximately 1.4 m<sup>2</sup>). Thus, it is expected that the construction of 200 classrooms needed for the School Rationalization Programme for Project schools by adopting the new school construction standards of the MOEHE will contribute to the promotion of the Educational Reform of the country.

## 2) Improving the Educational Surroundings

As the results of the site surveys of 25 Project schools, it was found that the 81% (92 school buildings) of the total of 113 classroom buildings either had no classrooms partition walls or only 1.2 m high movable partitions and more than one lesson was simultaneously conducted in those classrooms.

Noise in classrooms interferes with the lessons. Further, the classroom buildings are provided with no sash windows and lessons are often suspended because of rainwater entering the classrooms. The constructing of school buildings having partition walls, aluminum sash windows and wooden doors under the Project will greatly contribute to improve the educational surroundings.

## 3) Improving School Management

As a result of the site surveys of 25 Project schools, only 36% of the Project schools were found to have teacher rooms. The average floor area of a teacher room is approximately 20 m<sup>2</sup> and can accommodate at most four teachers for resting. In view of this situation, the Project will provide two types of teacher rooms (one for 12 teachers and one for 16 teachers) having desks and chairs (each to be shared by three teachers at most), principal rooms, and storage rooms next to the principal rooms to store teaching equipment and materials in order to improve the school management work of each Project school.

## 4) Improving Sanitary Conditions

As a result of the site surveys of 25 Project schools, it was learned that the schools had the toilets whose urinals were surrounded only by low partitions and toilet bowls that were enclosed by about 1 m by 1 m walls and had no water supply. No consideration was given to maintain appropriate distances from wells. There is a possibility of contaminating the wells and their sanitary condition is very poor. In this situation, toilet buildings having water supply systems will be built more than 30 m apart from existing wells for each Project school by adopting the standards of the MOEHE. Thus, the Project will contribute to improve the sanitary condition of each Project school.

### 4-2 Recommendations

As mentioned before, satisfactory results may be obtained by this Project and the appropriateness as a Grant Aid Project is understood. In order that the facilities and equipment may be effectively used, the following measures are recommended to be taken by Sri Lanka:

1) Implementation of School Rationalization Programme

As the scales for the Project have been set according to the figures estimated by the SRS, the full implementation of the School Rationalization Plan will lead to the appropriate use of the facilities. Thus, the Ministry of Education will need to closely monitor the rationalization process and supervise the regional education offices and schools, for the completion of the School Rationalization Plan.

2) Completion of Work to be Borne by the Sri Lanka Side

This Project will be conducted through the efforts of both Japan and Sri Lanka. The work to be borne by the Sri Lanka side must be carried out without fail, as it is of great importance to the Project. Especially, the work that must be conducted prior to the Project, such as preparing the site and removing the existing buildings that will be done in a short period, must be done without delay. Sri Lanka will have to adequately consider the budget allotment and operation plan and conduct detailed meetings with Japan.

3) Securing Teachers

In order that lessons may be conducted in the newly added classrooms, the number of teachers need to be increased. However, as mentioned before, there should be no problems in securing the necessary number of teachers. Teachers need to be relocated by the MOEHE to these schools upon completion of the Project schools without delay.

4) Adequate Maintenance and Management

After completion of the Project, the maintenance and management of the schools will be conducted under the budget of the MOEHE and provincial councils. Upon evaluating the budget of the MOEHE, it is judged that maintenance and management will be possible. However, in order to maintain the agreeable educational environment for a long period of time, daily cleaning by the teachers and students, repair of damaged parts and the assistance of the school operating committee is thought to be advisable.

5) Effective Use of Science Material

The stipulations of the MOEHE state that a science and math teacher will be dispatched to each school. However, in some cases these lessons are conducted by ordinary teachers who may not be able to adequately use the science material. The science materials has been selected to be utilized even if science teacher is not assigned. However, it is advisable to provide ordinary teachers with science training or assign science teachers in order to utilize those science materials more effectively.

Even though specialist teachers may not be present, the science materials selected are the same for each school. Thus, in order that these material may be used effectively, the teachers must be reeducated or specialist teachers must be dispatched.

## **APPENDIX**

## **1. Member List of the Survey Team**

### **Basic Design Team (February 15 through March 14, 1998)**

#### 4. Minutes of Discussion

**Minutes of Discussions  
Basic Design Study on  
the Project for Improvement of Junior Schools by Divisional Secretariats(IJSD)  
in  
the Democratic Socialist Republic of Sri Lanka**

Based on the results of the Preliminary Study, the Japan International Cooperation Agency (hereinafter referred to as "JICA ") decided to conduct a Basic Design Study on the Project for Improvement of Junior Schools by Divisional Secretariats (hereinafter referred to as "the Project").

JICA sent to the Democratic Socialist Republic of Sri Lanka the Basic Design Study team (hereinafter referred to as "the Team"), which is headed by Mr. Masaru TAKIMOTO, Development Specialist, JICA, and is scheduled to stay in the country from February 15 to March. 13.

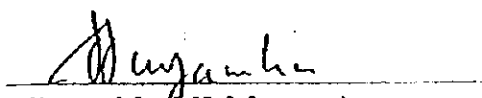

The Team held discussions with the representative officials of the Government of Sri Lanka and conducted a field survey of the study area.

In the course of the discussions , both parties have confirmed the main items of the Project as described on the attached sheets. The Team will proceed to further works and prepare the Basic Design Study Report.

Sri Lanka, the 26th February, 1998

  
Mr. Masaru TAKIMOTO  
Leader  
Basic Design Study Team  
JICA

  
Mr. A. Andrew de Silva  
Secretary  
Ministry of Education and Higher Education

  
Witness: Mr. H. J. Jayamaha  
Director, External Resources  
Ministry of Finance and Planning

## ATTACHMENT

### 1. Objective of the Project

The objectives of the Project are to improve the physical environment for junior level (grade 1-9) education in disadvantaged rural area by designing and reconstructing buildings, providing basic equipment for existing schools, and to contribute the human resources development in Sri Lanka.

A typical building plan which accommodates the new curriculum for junior level will be provided through the Basic Design Study and implementation of the Project, which will support the on-going educational reform programme in Sri Lanka.

### 2. Project Sites

The project sites are located in Kegalle and Ratnapura districts of Sabaragamuwa Province.

A few sites in Gampaha district of Western Province would be chosen as a pilot project.

The sites for the Project will be selected from the list described in Annex 1 in accordance with the criteria for the site selection described in Annex 2.

### 3. Responsible and Executing Organization

The Ministry of Education and Higher Education (MOEHE) is the responsible and executing organization of the Project in collaboration with the provincial education authorities.

After the implementation, the provincial education authorities (PEA) will be responsible for the maintenance of the school buildings and equipment granted under the Japan's Grant Aid, and the MOEHE will monitor it.

### 4. Items Requested by the MOEHE

The contents of the request from the MOEHE are as follows:

#### (1) Construction of School Facilities

School buildings (Normal classrooms, Multi-purpose room, Library, Staff room, Storage) and Toilets/Latrines

#### (2) Procurement of Equipment

Furniture, blackboards and basic educational equipment for junior schools

The extent of each item will be finalized in accordance with the criteria described in Annex 3 and Annex 4.

### 5. Japan's Grant Aid System

(1) The MOEHE has understood the system of Japanese Grant Aid explained by the Team as described in Annex 5.

(2) The MOEHE will take the necessary measures, described in Annex 6, for smooth

implementation of the Project on condition that the Grant Aid assistance by the Government of Japan is extended to the Project.

#### 6. Schedule of the Study

- a) The consultants in the Team will proceed to further studies in Sri Lanka until March 13, 1998.
- b) JICA will prepare the draft report and dispatch a mission in order to explain its contents around the middle of May.
- c) In case that the contents of the report is accepted in principle by the MOEHE, JICA will complete the final report and send it to the MOEHE by September, 1998.

#### 7. Others

- a) For the effective implementation of the Project, the Project Steering Committee will be established as described in Annex 7.
- b) The list of requested equipment shall be submitted to the Team by the 12th March, 1998.

## ANNEX-1 Project Sites for Selection

RATNAPURA DISTRICT		
ZONE	DIV SCR.	SCHOOL NAME
EMBILIPITIYA	Kolonna	Godewala M.V.
		Maduwanwela Sri Sarananda V.
	Embilipitiya	Halmilaketiya V.
	Godakawela	Rahula P. S.

## ANNEX-2 Criteria for the Site Selection

1. Give a priority to the existing schools which are dangerous to continue to use because of physical damages by overaging or natural disasters, and do not satisfy the basic functions as a junior level school.
2. Give a priority to the existing schools located in the divisions in which any major investment to physical facility improvement for junior level schools has not been implemented in past five (5) years.
3. Give a priority to the existing schools which are motivated to develop teaching techniques and require the improvement of facilities in order to achieve the results.
4. Give a priority to the existing schools which will be necessary to extend classrooms in order to convert double shift session to single shift.
5. There must exist minimal required pupils in the school wherein a project site is located.
6. Any plan for school construction or other projects, by either the MOEHE or international / bilateral donors, should not exist on the same project sites.
7. The legal rights for using a project site must be secured. The site clearance, including demolition of existing facilities proposed by the Team, must be completed by the MOEHE prior to the commencement of the construction work.
8. Proper access road must exist in order to carry construction materials and equipment into each project site.
9. A project site being topographically inappropriate for construction (e.g. steep land, swamp, etc.) shall be eliminated.
10. On each project site, there shall be no foreseen natural and environmental or social hazards which endanger the workers safety during the construction.

### **ANNEX-3 Criteria for the Building Design**

1. Buildings should satisfy the minimal functions complied with the curriculum for basic education at present and near future.
2. The number of classrooms and other rooms in a building should accommodate the minimal necessity complied with circumstances at present and near future, such as the educational system, school age population in Sri Lanka, etc.
3. The specification of buildings shall follow the building standards and city code in Sri Lanka.
4. Buildings should have the enough durability against the climate and predictable natural disasters.
5. The most portion of the buildings should be able to be built with materials procured or imported easily and cost effectively in Sri Lanka.
6. Buildings should be able to be built and maintained with locally procurable techniques.
7. Buildings should be able to be maintained locally and cost effectively under the responsibility of the PEA and MOEHE.
8. Norms will be decided in consultation with the MOEHE.

Handwritten signature and initials in the bottom right corner of the page.

#### **ANNEX-4      Criteria for the Equipment Selection**

1. Each equipment should satisfy the minimal requirement complied with the curriculum for junior level education.
2. Each equipment should have the enough durability against the climate and in proper use.
3. Each equipment should be procured in Sri Lanka in principle.
4. Each equipment should be maintained with materials procured locally or imported easily and cost effectively in Sri Lanka, and its consumable materials are able to be supplied easily and continually.

## ANNEX-5 JAPAN'S GRANT AID SYSTEM

### 1. Grant Aid Procedures

1) Japan's Grant Aid Program is executed through the following procedures.

- Application

Request made by the recipient country

- Study

Basic Design Study conducted by JICA

- Appraisal & Approval

Appraisal by the Government of Japan and Approval by the Cabinet

- Determination of Implementation

The Notes exchanged between the Governments of Japan and the recipient country

2) Firstly, the application or request for a Grant Aid project submitted by a recipient country is examined by the Government of Japan (the Ministry of Foreign Affairs) to determine whether or not it is eligible for Grant Aid. If the request is deemed appropriate, the Government of Japan assigns JICA (Japan International Cooperation Agency) to conduct a study on the request.

Secondly, JICA conducts the study (Basic Design Study), using (a) Japanese consulting firm(s).

Thirdly, the Government of Japan appraises the project to see whether or not it is suitable for Japan's Grant Aid Program, based on the Basic Design Study report prepared by JICA, and the results are then submitted to the Cabinet for approval.

Fourthly, the project, once approved by the Cabinet, becomes official with the Exchange of Notes signed by the Governments of Japan and the recipient country.

Finally, for the smooth implementation of the project, JICA assists the recipient country in such matters as preparing tenders, contracts and so on.

### 2. Basic Design Study

#### 1) Contents of the study

The purpose of the Basic Design Study conducted by JICA on a requested project is to provide basic document necessary for the appraisal of the Project by the Japanese Government. The contents of the Study are as follows:

a) Confirmation of the background, objectives, and benefits of the requested Project and also institutional capacity of agencies concerned of the recipient country necessary for the Project's implementation.

b) Evaluation of the appropriateness of the Project to be implemented under the Grant Aid

Scheme from the technical, social and economic point of view.

- c) Confirmation of items agreed on by both parties concerning the basic concept of the Project.
- d) Preparation of a basic design of the Project
- e) Estimation of costs of the Project.

The contents of the original request are not necessarily approved in their initial form as the contents of the Grant Aid project. The Basic Design of the Project is confirmed considering the guidelines of Japan's Grant Aid Scheme.

The Government of Japan requests the Government of the recipient country to take whatever measures are necessary to ensure its self-reliance in the implementation of the Project. Such measures must be guaranteed even though they may fall outside of the jurisdiction of the organization in the recipient country actually implementing the Project. Therefore, the implementation of the Project is confirmed by all relevant organizations of the recipient country through the Minutes of Discussions.

## 2) Selection of Consultants

For smooth implementation of the Study, JICA uses (a) registered consultant firm(s). JICA select (a) firm(s) based on proposals submitted by interested firms. The firm(s) selected carry(ies) out a Basic Design study and write(s) a report, based upon terms of reference set by JICA.

The consulting firm(s) used for the Study is(are) recommended by JICA to the recipient country to also work on the Project's implementation after the Exchange of Notes, in order to maintain technical consistency and also to avoid any undue delay in implementation.

## 3. Japan's Grant Aid Scheme

### 1) What is Grant Aid?

The Grant Aid Program provides a recipient country with non-reimbursable funds needed to procure the facilities, equipment and services (engineering services and transportation of the products, etc.) for economic and social development of the country under principles in accordance with the relevant laws and regulations of Japan. Grant Aid is not supplied through the donation of materials as such.

### 2) Exchange of Notes (E/N)

Japan's Grant Aid is extended in accordance with the Notes exchanged by the two Governments concerned, in which the objectives of the Project, period of execution, conditions and amount of the Grant Aid, etc., are confirmed.

### 3) The period of the Grant Aid means the one fiscal year which the Cabinet approves the Project

for. Within the fiscal year, all procedures such as exchanging of Notes, concluding contracts with (a) consultant firm(s) and (a) contractor(s) and final payment to them must be completed. However in case of delays in delivery, installation or construction due to unforeseen factors such as weather, the period of the Grant Aid can be further extended for a maximum of one fiscal year at most by mutual agreement between the two Governments.

4) Under the Grant Aid, in principle, Japanese products and services including transport or those of the recipient country are to be purchased.

When the two Governments deem it necessary, the Grant Aid may be used for the purchase of the products or services of a third country.

However the prime contractors, namely, consulting, constructing and procurement firms, are limited to "Japanese nationals". (The term "Japanese nationals" means persons of Japanese nationality or Japanese corporations controlled by persons of Japanese nationality.)

5) Necessity of "Verification"

The Government of recipient country or its designated authority will conclude contracts denominated in Japanese yen with Japanese nationals. Those contracts shall be verified by the Government of Japan. This "Verification" is deemed necessary to secure accountability to Japanese taxpayers.

6) Undertakings required of the Government of the Recipient Country

(As described as Annex-6)

7) "Proper Use"

The recipient country is required to maintain and use the facilities constructed and the equipment purchased under the Grant Aid properly and effectively and to assign staff necessary for this operation and maintenance as well as to bear all the expenses other than those covered by the Grant Aid.

8) Re-export

The products purchased under the Grant Aid should not be re-exported from the recipient country.

9) Banking Arrangements (B/A)

a) The Government of the recipient country or its designated authority shall open an account in the name of the Government of the recipient country in an authorized foreign exchange bank in Japan (hereinafter referred to as "the Bank"). The Government of Japan will execute the

8

Grant Aid by making payments in Japanese yen to cover the obligations incurred by the Government of the recipient country or its designated authority under the Verified Contracts.

- b) The payments will be made when payment requests are presented by the Bank to the Government of Japan under an authorization to pay issued by the Government of the recipient country or its designated authority.

Handwritten signature and initials in the bottom right corner of the page.

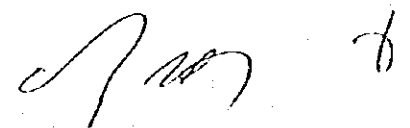

## **ANNEX-6 Necessary Measures to be taken by the MOEHE**

Following necessary measures should be taken by the MOEHE on condition that the Grant Aid by the Government of Japan is extended to the Project:

1. To provide data and information necessary for the Project.
2. To prepare the land for the Project and secure the rights to build a building.
3. To secure, clear, level and reclaim the site for the Project prior to the Project implementation.
4. To provide proper access road to the Project area.
5. To undertake incidental outdoor works, such as landscaping, fencing, exterior lighting, and other incidental facilities in and around the Project site, if necessary, but not for the use of contractors.
6. To provide facilities for distribution of electricity, water supply, telephone, drainage, sewage and other incidental facilities into the Project site borderline, if necessary.
7. To allocate appropriate budget and teaching and administrative staff members for proper and effective operation and maintenance of buildings and equipment provided under the Grant Aid.
8. To monitor the operation and maintenance of the facilities and equipment provided under the Grant Aid after the completion and turn over of the Project and submit reports periodically to the Japanese side.
9. To bear commissions to the Japanese foreign exchange bank for its banking services based upon the Banking Arrangement, namely the advising commission of the "Authorization to Pay" and payment commission.
10. To ensure prompt unloading, tax exemption, customs clearance at the port of disembarkation and prompt internal transportation therein of the materials and equipment for the Project purchased under the Grant Aid.
11. To exempt Japanese juridical and physical nationals engaged in the Project from customs duties, internal taxes and other fiscal levies which may be imposed in Sri Lanka with respect to the supply of the products and services under the verified contracts.
12. To accord Japanese nationals whose services may be required in connection with the supply of the products and the services under the verified contract such facilities as may be necessary for their entry into Sri Lanka and stay therein for the performance of their work in accordance with the relevant laws and regulations of the Democratic Socialist Republic of Sri Lanka.
13. To provide necessary permissions, licenses and other authorizations for implementing the Project, if necessary.

14. To maintain and use properly and effectively the facilities constructed and the equipment provided under the Project in responsibility of the PEA monitored by MOEHE.
15. To bear all the expenses, other than those to be borne by the Japan's Grant Aid within the scope of the Project.

A handwritten signature in black ink, appearing to be 'Sam' followed by a small symbol or mark.

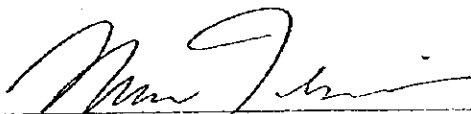

**Minutes of Discussions  
on  
the Basic Design Study on  
the Project for Improvement of Junior Schools  
in  
the Democratic Socialist Republic of Sri Lanka  
(Consultation on Draft Report)**

In February 1998, the Japan International Cooperation Agency (JICA) dispatched the Basic Design Study Team on the Project for Improvement of Junior Schools (hereinafter referred to as "the Project") to the Democratic Socialist Republic of Sri Lanka, and through discussions, field survey, and technical examination of the result in Japan, has prepared the draft Basic Design report of the study.

In order to explain and consult the Ministry of Education and Higher Education on the component of the draft report, JICA sent a study team, which is headed by Mr. Masaru TAKIMOTO, Development Specialist, JICA, and is scheduled to stay in Sri Lanka from 31st May to 8th June, 1998.

As a result of discussions, both parties confirmed the main items described on the attached sheets.

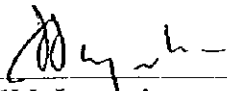

Colombo, the 5th June, 1998.

Masaru TAKIMOTO  
Leader  
Basic Design Study Team  
JICA

Mr. A. Andrew de Silva  
Secretary  
Ministry of Education and Higher Education

Witness: J.H.J. Jayamaha  
Director, External Resources  
Ministry of Finance and Planning

## ATTACHMENT

### 1. Components of the Draft Design Report

The Ministry of Education and Higher Education (MOEHE) has agreed and accepted the components of the draft Basic Design report proposed by the Team.

### 2. Responsible and Executing Organization

Ministry of Education and Higher Education (MOEHE) is the responsible and executing organization of the Project in collaboration with the provincial education authorities (PEA).

After the implementation, PEA will be responsible for the maintenance of the school buildings and equipment granted under the Japan's Grant Aid, and MOEHE will monitor it.

### 3. Component of the Items of the Project

Both sides has confirmed the twenty four (24) sites and each items which will be constructed or procured under the Japanese Grant Aid attached as Annex-1.

### 4. Japan's Grant Aid Programme

The MOEHE has understood the system and characteristics of Japan's Grant Aid Programme explained in Annex-2 by the team.

### 5. Necessary measures to be Taken by the MOEHE

(1) On condition that the Grant Aid Programme by the Government of Japan is extended to the Project, the MOEHE will take the necessary measures described in Annex-3 for smooth implementation of the Project. Moreover, the implementing agency will secure the proper and effective operation and maintenance if the buildings as well as the equipment provided under the Project.

(2) Japanese side requested MOEHE to implement the proper allocation of students as well as teaching and administration staff members necessary to operate the project schools.

(3) Sri Lanka side shall complete the site preparation attached as Annex-4 by the commencement of the construction. Further detail of schedule would be discussed during the detailed design stage.

6. The team has taken notes of the following items suggested by the MOEHE and will report to the Government of Japan.

- a) Galpaya School (R7) should be included in the Project instead of Ranwwala School (R9).
- b) The following technical matters should be examined further;
  - Sliding windows should be applied for the Project instead of jalousie windows
  - Gutters and down spouts for the third story buildings should be installed
  - Male and female toilets should be designed in the separate buildings
  - Equipment for sports activities and cooking pots should be included in the Project
  - The contents of science equipment will be examined further

#### 7. Further Schedule of the Study

JICA will complete a final report of the Study in accordance with the confirmed items, and send it to Sri Lanka by the end of August, 1998.

### ANNEX-3 Necessary Measures to be taken by the MOEHE

Following necessary measures should be taken by the MOEHE on condition that the Grant Aid by the Government of Japan is extended to the Project:

1. To provide data and information necessary for the Project.
2. To prepare the land for the Project and secure the rights to build a building.
3. To secure, clear, level and reclaim the sites for the Project prior to the Project implementation.
4. To provide proper access road to the Project area.
5. To undertake incidental outdoor works, such as landscaping, fencing, exterior lighting, and other incidental facilities in and around the Project sites, if necessary, but not for the use of contractors.
6. To provide facilities for distribution of electricity, water supply, telephone, drainage, sewage and other incidental facilities into the Project site borderlines, if necessary.
7. To allocate appropriate budget and teaching and administrative staff members for proper and effective operation and maintenance of buildings and equipment provided under the Grant Aid.
8. To monitor the operation and maintenance of the facilities and equipment provided under the Grant Aid after the completion and turn over of the Project and submit reports periodically to the Japanese side.
9. To bear commissions to the Japanese foreign exchange bank for its banking service based upon the Banking Arrangement, namely the advising commission of the "Authorization to Pay" and payment commission.
10. To ensure prompt unloading, tax exemption, customs clearance at the port of disembarkation and prompt internal transportation therein of the materials and equipment for the Project purchased under the Grant Aid.
11. To exempt Japanese juridical and physical nationals engaged in the Project from customs duties, internal taxes and other fiscal levies which may be imposed in Sri Lanka with respect to the supply of the products and services under the verified contracts.
12. To accord Japanese nationals whose services may be required in connection with the supply of the products and the services under the verified contract such facilities as may be necessary for their entry into Sri Lanka and stay therein for the performance of their work in accordance with the relevant laws and regulations of the Democratic Socialist Republic of Sri Lanka.
13. To provide necessary permissions, licenses and other authorizations for implementing the Project, if necessary.
14. To maintain and use properly and effectively the facilities constructed and the equipment provided under the Project in responsibility of the PEA monitored by MOEHE.
15. To bear all the expenses, other than those to be borne by the Japan's Grant Aid within the scope of the Project.

## ANNEX-2 JAPAN'S GRANT AID SYSTEM

### 1. Grant Aid Procedures

1) Japan's Grant Aid Program is executed through the following procedures.

·Application

Request made by the recipient country

·Study

Basic Design Study conducted by JICA

·Appraisal & Approval

Appraisal by the Government of Japan and Approval by the Cabinet

·Determination of Implementation

The Notes exchanged between the Governments of Japan and the recipient country

2) Firstly, the application or request for a Grant Aid project submitted by a recipient country is examined by the Government of Japan (the Ministry of Foreign Affairs) to determine whether or not it is eligible for Grant Aid. If the request is deemed appropriate, the Government of Japan assigns JICA (Japan International Cooperation Agency) to conduct a study on the request.

Secondly, JICA conducts the study (Basic Design Study), using (a) Japanese consulting firm(s).

Thirdly, the Government of Japan appraised the project to see whether or not it is suitable for Japan's Grant Aid Program, based on the Basic Design Study report prepared by JICA, and the results are then submitted to the Cabinet for approval.

Fourthly, the project, one approved by the Cabinet, becomes official with the Exchange of Notes signed by the Governments of Japan and the recipient country.

Finally, for the smooth implementation of the project, JICA assists the recipient country in such matters as preparing tenders, contracts and so on.

### 2. Basic Design Study

#### 1) Contents of the study

The purpose of the Basic Design Study (hereinafter referred to as "the Study"), conducted by JICA on a requested project (hereinafter referred to as "the Project") is to provide basic document necessary for the appraisal of the Project by the Japanese Government. The contents of the Study are as follows:

a) Confirmation of the background, objectives, and benefits of the requested Project and also institutional capacity of agencies concerned of the recipient country necessary for the Project's implementation.

b) Evaluation of the appropriateness of the Project to be implemented under the Grant Aid Scheme from the technical, social and economic point of view.

c) Confirmation of items agreed on by both parties concerning the basic concept of the Project.

d) Preparation of a basic design of the Project.

e) Estimation of costs of the Project.

The contents of the original request are not necessarily approved in their initial form as the contents of the Grant Aid project. The Basic Design of the Project is confirmed considering the guidelines of Japan's Grant Aid Scheme.

The Government of Japan requests the Government of the recipient country to take whatever measures are necessary to ensure its self-reliance in the implementation of the Project. Such measures must be guaranteed even though they may fall outside of the jurisdiction of the organization in the recipient country actually implementing the Project. Therefore, the implementation of the Project is confirmed by all relevant organizations the recipient country through the Minutes of Discussions.

2) Selection of Consultants

For smooth implementation of the Study, JICA uses (a) registered consultant firm(s). JICA select (a) firm(s) based on proposals submitted by interested firms. The firm(s) elected carry(ies) out a Basic Design study and write(s) a report, based upon terms of reference set by JICA.

The consulting firm(s) used for the Study is(are) recommended by JICA to the recipient country to also work on the Project's implementation after the Exchange of Notes, in order to maintain technical consistency and also to avoid any undue delay in implementation should the selection process be repeated.

3. Japan's Grant Aid Scheme

1) What is Grant Aid?

The Grant Aid Program provides a recipient country with non-reimbursable funds needed to procure the facilities, equipment and services (engineering services and transportation of the products, etc.) for economic and social development of the country under principles in accordance with the relevant laws and regulations of Japan. Grant Aid is not supplied through the donation of materials as such.

2) Exchange of Notes (E/N)

Japan's Grant Aid is extended in accordance with the Notes exchanged by the two Governments concerned, in which the objectives of the Project, period of execution, conditions and amount of the Grant Aid, etc., are confirmed.

3) The period of the Grant Aid means the one fiscal year which the Cabinet approves the Project for. Within the fiscal year, all procedures such as exchanging of Notes, concluding contracts with (a) consultant firm(s) and (a) contractor(s) and final payment to them must be completed.

However in case of delays in delivery, installation or construction due to unforeseen factors such as weather, the period of the Grant Aid can be further extended for a maximum of one fiscal year at most by mutual agreement between the two Governments.

4) Under the Grant Aid, in principle, Japanese products and services including transport or those of the recipient country are to be purchased.

When the two Governments deem it necessary, the Grant Aid may be used for the purchase of the products or services of a third country.

However the prime contractors, namely, consulting, constructing and procurement firms, are limited to "Japanese nationals". (The term "Japanese nationals" means persons of Japanese nationality or Japanese corporations controlled by persons of Japanese nationality.)

5) Necessity of "Verification"

The Government of recipient country or its designated authority will conclude contracts denominated in Japanese yen with Japanese nationals. Those contracts shall be verified by the Government of Japan. This "Verification" is deemed necessary to secure accountability to Japanese taxpayers.

6) Undertakings required of the Government of the Recipient Country  
(As described as Annex-6)

7) "Proper Use"

The recipient country is required to maintain and use the facilities constructed and the equipment purchased under the Grant Aid properly and effectively and to assign staff necessary for this operation and maintenance as well as to bear all the expenses other than those covered by the Grant Aid.

8) Re-export

The products purchased under the Grant Aid should not be re-exported from the recipient country.

9) Banking Arrangements (B/A)

a) The Government of the recipient country or its designated authority shall open an account in the name of the Government of the recipient country in an authorized foreign exchange bank in Japan (hereinafter referred to as "the Bank"). The Government of Japan will execute the Grant Aid by making payments in Japanese yen to cover the obligations incurred by the Government of the recipient country or its designated authority under the Verified Contracts.

b) The payments will be made when payment requests are presented by the Bank to the Government of Japan under an authorization to pay issued by the Government of the recipient country or its designated authority.
