SECTOR IMPLEMENTATION ARRANGEMENTS

9 SECTOR MANAGEMENT FOR MEDIUM-TERM DEVELOPMENT

9.4 Project Management Arrangements

9.4.1 Project Approach/Strategy

PROJECT IMPLEMENTATION ARRANGEMENT AND PROCEDURE

Together with the following Figures (Figure 9.4.1 and 9.4.2), will show the project implementation arrangement and procedure for Level I and sanitation from national level to barangay levels, which are designed to encourage active participation of implementers and beneficiaries in undertaking the project.

(1) National Government Level

Project Planning/Launching Workshop as start-up activity will be conducted to introduce and orient the implementers on the Project, define their roles, responsibilities and relationships among them and formulate provincial action plans. The Consultant, upon completion of the training needs assessment and development of appropriate training programs shall conduct capacity enhancement for the WSS-PMO Staff, NGOs, DPWH and DOH representatives. This activity aims to strengthen their competence in technical, managerial, training and community organizing and gender responsiveness. The trained members are responsible to facilitate the organization/reactivation of the PWSO and information dissemination for the provincial officials to secure their support and commitment to the Project. With the assistance from the Consultant, they will enhance the capacity of the PWSO, the MSLT and COs/NGOs in planning, implementing, monitoring and evaluating the project.

(2) Local Government Level

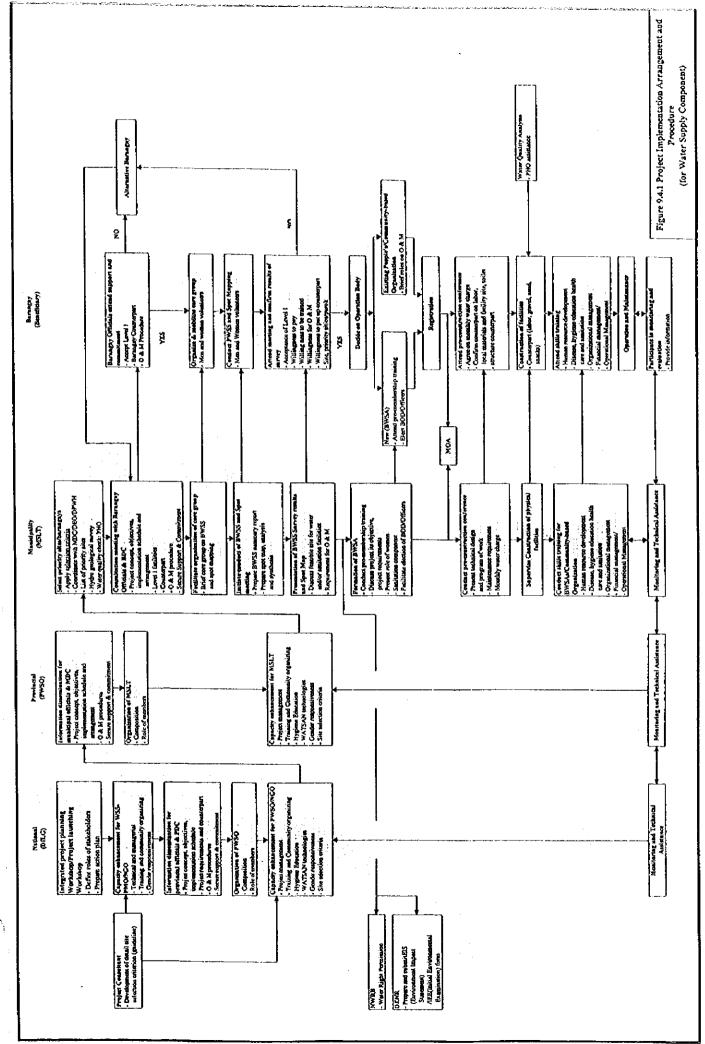

The PWSO shall assist the MSLT in each municipality and conduct information dissemination for the municipal officials to orient them on the project and obtain their support and commitment. With the PWSO assistance, the trained MSLT members shall select priority barangays, in coordination with the municipal development council. The Team will be responsible for facilitating barangay activities such as consultation meetings with barangay officials and community members, barangay survey and spot mapping, formation of BWSA/RWSA, pre-construction conference, and supervision of construction. Skills training will be conducted for the operating body in maintaining

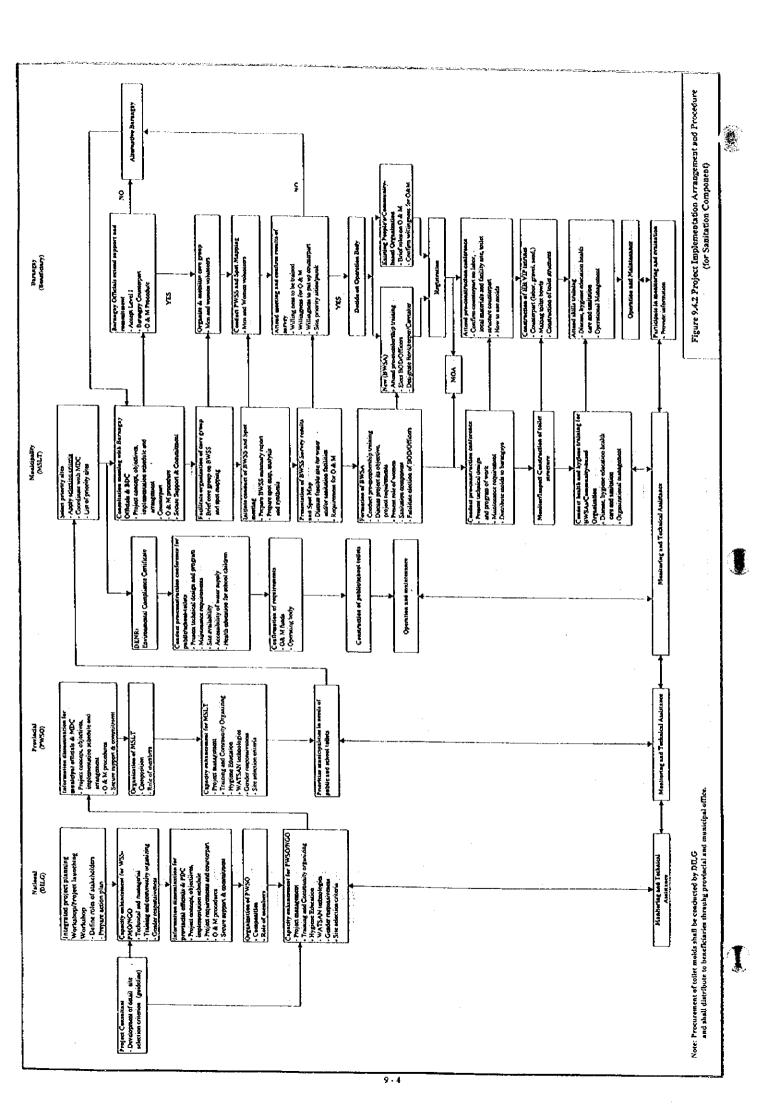

and managing the project. They shall also provide continuing assistance and monitor the activities of the beneficiaries and status of the project.

(3) Barangay Level

The barangay officials/development councils shall provide support to the PWSO and MSLT members in conducting activities and mobilizing resources in the barangay. Men and women volunteer shall conduct barangay survey and spot mapping to confirm their demand for the level of service, HH latrines and willingness to operate and maintain the facilities and counterpart. The community members decide on the operating body, tap existing community-based organization or organize a BWSA/RWSA. They have also to agree on the monthly water fees and provide labor and local materials during the construction of facilities. The BOD/Officers, Bookkeeper and Caretaker of the operating body shall attend skills training to develop their competence in performing their jobs. The beneficiaries shall provide information and request assistance from the PWSO/MSLT members, if necessary.

9.4.2 Project Implementation Arrangement

PROJECT IMPLEMENTATION FOR LEVEL I WATER SUPPLY AND SANITATION

The project implementation for Level I water supply system and sanitation facility is largely divided into three phases, namely; pre-implementation, implementation, and post implementation.

1. Pre-implementation phase

The pre-implementation phase includes the preparatory activities. In line with the revised cost sharing arrangement between the national government and local government units, the government through DILG, shall secure the re-confirmation of the concerned LGUs to participate in the proposed project by disseminating the project concept, objectives, implementation schedule and arrangement as follows:

- Scope of the Project
- · Financial arrangement
- Project implementation arrangement (construction period, contract methods, procurement package)
- · Roles and responsibilities of the LGUs (Provinces, Municipalities and Barangays)

2. Project Implementation Phase

The Project implementation phase includes the detailed design, community development and construction works. The detailed design stage covers both technical and institutional/community development activities. It shall include the preparatory work, socio-economic, gender and water source survey, development of site selection criteria and preparation of bidding documents. The institutional/community and gender in development aspect includes an assessment of training needs, review of existing training strategies and materials and development of training modules and materials, and conduct of training for WSS-PMO, NGOs, and LGUs. It shall also include the implementation of model study for site selection, gender analysis, formation of pilot BWSAs and skill training.

(1) Site Selection

 Water supply component: Selection criteria for the priority sites shall be developed during the detailed design stage. In applying the selection criteria, all barangays can be ranked and the PPDC, as a head of PWSO, shall approve the priority sites. The criteria shall be composed of the following aspects:

- a) Physical requirements for Level I water system shall be assessed to rank all barangays on the basis of the following items.
 - · No alternative water source
 - · Acceptance of Level I facility
 - Water source availability (quality and quantity)
 - Present coverage
 - · Incidence of water-borne diseases
 - Accessibility to water source
 - · Coverage of community
 - · Family income
- b) Community participation and interest shall be assessed to evaluate the willingness to participate in the project of barangays on the basis of the following items.
 - Willingness to assume responsibility for O&M
 - · Willingness to be trained on O&M
 - · Willingness to pay water fees
 - · Willingness to put up counterpart

No alternative source and acceptance of Level I should be highly prioritized as required item for the order of involvement in the project. PROPOSED SITE SELECTION CRITERIA is referred to this 9.4.2, Supporting Report.

Water source investigation through actual hydrogeological survey shall be conducted in the target barangays during the detailed design so that water source availability may be properly confirmed. The LGUs, through their technical representatives from the PWSO/MSLT (PEO or MEO) shall ensure that the construction undertaken by the private contractors shall be in accordance with the designed program of work and standard specifications for Level I water systems. In the course of detailed design or construction supervision, the Consultants should utilize the technical capability of DPWH and DOH personnel on the basis of MOA.

2) Sanitation Component

a) Latrine: The provision of household latrines by distributing toilet bowls shall be primarily based on the demand of households. The proposed criteria shall include the following:

- · No existing household latrines
- · Willingness to put up counterpart
- High incidence of water bome and water related diseases
- · Accessibility to water supply
- Number of household members.
- b) Public/School Toilet: The provision of public/school toilet shall be based on the following:
 - No existing public/school toilet
 - Suitable site
 - Willingness to assume responsibility for O&M
 - Willingness to integrate health education to school children
 - Willingness to raise funds for operation and maintenance
 - Accessibility to water supply for washing

(2) Civil Works and Equipment Procurement

Water supply and sanitation components are composed of well drilling and general construction works for toilet buildings. Each province shall engage the services of private contractors to under take the construction of water supply and sanitation facilities separately. The contracts shall be reviewed, evaluated, and endorsed by the committee of PBAC (Procurement, Bidding, Award, and Contract) of each agency.

(3) Capacity Enhancement Program

The capacity-enhancement program shall be composed of courses in strengthening the capacities of the LGUs in planning, implementing, managing, monitoring and evaluating gender responsiveness WATSAN projects. Training needs assessment (TNA) shall be conducted at various levels to determine the appropriate kind of training program intervention suited and relevant to their level of attainment. The TNA shall be administered for the WSS-PMO staff, PWSO, MSLT and NGO/COs to assess their present knowledge and skills in technical and social aspects of WATSAN projects (refer to 9.4.2, Supporting Report, for PROPOSED CAPACITY ENHANCEMENT PROGRAM).

(4) Community Management Program

- 1) Demand Assessment: Considering the time constraint during the detailed design stage, demand assessment shall be initially undertaken at the barangay officials/ development councils level, but subject to further validation in the results of the barangay survey and spot map during the construction stage. Community demand shall be assessed through the following activities to be undertaken in the target barangays:
 - a) Consultation with barangay officials/development council: As entry-point of all development activities, barangay officials/development council is primarily responsible for the identification and prioritization of community projects/needs and preparation of barangay development plans. The decision regarding the acceptance of Level I water facility and barangay counterpart shall emanate from them. This activity serves as an initial step in assessing community demand as well as securing their support and commitment to the project.
 - b) Barangay Survey: Through the Barangay Water and Sanitation Survey (BWSS), the beneficiaries' demand for the level of service shall be validated. The barangay survey will provide an information on the prospective users' willingness to undertake the responsibility for the O&M of the facilities, willingness to pay and to be trained on O&M as well as the provision local counterpart. The survey results will also identify the potential households to be served and to be provided with latrines/toilet facilities. Likewise, the survey will indicate the cultural habits of the community members in terms of water usage and sanitation practices that are important factor in determining the appropriate intervention in the community.
 - c) Spot Map: The survey results and spot map shall be presented to the community members for confirmation of their demand. The spot map will identify the most feasible site for Level I facilities, household latrines (VIP), school and pubic toilets. The prospective users shall decide on the actual site of the facilities in the barangay, upon confirmation of the technical representative from the PWSO/MSLT (PEO/MEO) as to the technical feasibility of the selected sites. They will also decide on the priority sitios/puroks that will be provided with water facilities based on their readiness to give local counterpart. Households that are ready to give counterpart for toilet structure shall be given priority in the provision of latrines (refer to 9.4.2, SAMPLE SPOT MAP, Supporting Report).

To avoid duplication of activities in the barangay, LGUs shall possibly utilize available barangay profile/spot map prepared by other national government agencies.

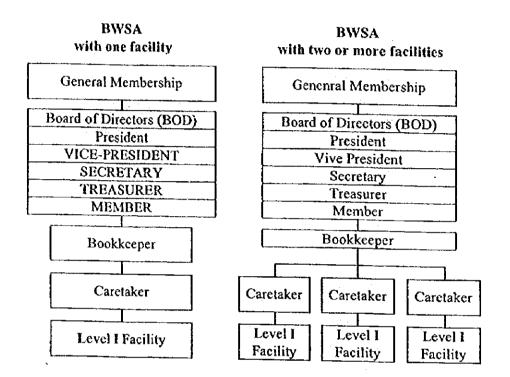

2) Formation of BWSA: A BWSA (Barangay Waterworks and Sanitation Association) is an organization of water supply and sanitation beneficiaries in a barangay whose objective is to own, operate and maintain the water systems. RA 6716 requires its formation to ensure the provision of adequate, potable and accessible water supply to its members through proper operation and maintenance of the water facilities. The organizational structure of BWSA is quite simple and depends on the number of facilities, need, culture and situation in a particular barangay.

The decision to tap existing community-based organization, merge/consolidate with the existing water association or to form a new association is lodged with the community members. Should the decision is to form a new association as operating body of the facilities, it shall be known as BWSA.

The formation activities of the BWSA are divided into three phases: preformation/social preparation, formation and post formation (refer to PROPOSED COMMUNITY MANAGEMENT PROGRAM attached here for the detailed activities in each phase). During the formation phase, pre-membership training and election of BDO and Officers are held. In this phase, individual member interest and community commitment are manifested through application for membership in the association and signing of Manifesto Resolution (refer to the sample formats attached hereafter).

Adequate social preparation through pre-formation activities in the barangay shall be made prior to the formation of BWSA. A more participatory approach in the formation process will promote exercise of leadership, communication, problem solving/decision making, which are important requirements of sustainable association. The organizers' intervention must ensure a clear understanding of the project and the beneficiaries' individual and collective responsibility in the operation and maintenance of the facilities. Post formation activities such as provision of skills training, monitoring and continuing technical assistance are vital to nurture the growth of BWSA to become self-sustaining water association.

a) BWSA Organization Set-Up: The BWSA organizational set-up shall be flexible. It shall depend on the number of facilities, need, culture and arrangement in a particular barangay. Inter-barangay, inter-sitios/puroks or cluster of community organizations shall be allowed, if acceptable in the locality. The following chart tepresents the BWSA organizational structure.

- b) Registration: An operating body shall be registered to acquire legal personality to enter into a contractual obligation such as in the execution of MOA, imposition of water charge, sanction for non and delayed payment of user-members. BWSA (and RWSA) is mandated to register with DILG.
- c) BWSA Skills Training: Skills training for the beneficiaries shall be designed to provide them with appropriate knowledge, skills, positive attitude and confidence to assume their roles and responsibilities in operating and maintaining the facilities that will eventually facilitate the sustainability of the project (refer to PROPOSED CAPACITY ENHANCEMENT PROGRAM, 9.4.2 Supporting Report, for the proposed course content for the operating body).

3. Post Implementation Phase

(1) Operation, Maintenance, and Cost Recovery

The post-implementation phase consists of actual system utilization, fee collection, O&M by beneficiaries and monitoring/evaluation by implementing agency.

11) Operation, Maintenance, and Cost Recovery

Minor repair such as replacement of spare parts (sealing packing), handle of handpump, etc. shall be undertaken by the beneficiaries themselves. Hence, it is imperative for the operating body to collect water fees from the end-users and properly administered the funds for the repair and maintenance of the facilities. The water fee contribution shall be the main source of income for the association. Payments must be properly documented so that all members know the status of their monthly payments. The information is also necessary so that the BWSA Officers can plan for future expenditures (refer to PROCEDURES FOR BWSA FINANCIAL OPERATIONS, 9.4.2, Supporting Report, for the procedures to record financial transactions and prepare financial reports).

Depending upon the users' income level, water charge shall be determined and agreed among the water users. The estimated water charge for the O&M cost which varies between six to eight pesos per household per month, is quite affordable which is within one percent of household income. Furthermore, if the users will pay for water charge up to 2% of their income or sixty pesos per household per month, the beneficiaries can afford the minor repair of handpump, rehabilitation, and reconstruction of well, provided that well life is assumed to be 20 years.

LGUs shall include in their supply management plan a procurement of bulk spare parts for future need of the beneficiaries at reasonable cost. Upon request from the end-users, major repair like rehabilitation of well or water quality surveillance, shall be undertaken in technical cooperation with LGUs (PEO/MEO/PHO trained members), utilizing procured rehabilitation equipment or water quality analysis kit.

Major rehabilitation work, beyond the capacity of the associations, shall be referred to the municipality for action. Clear definition of "major rehabilitation work" is needed. All costs incident to the rehabilitation shall be to the account of the association O&M

reserve fund. The municipality supported by PWSO will assist, if needed, the association in securing soft loans, if the reserve funds are inadequate.

12) Monitoring and Evaluation

Participatory monitoring and evaluation shall be conducted in partnership between the PWSO/MSLT and operating body (existing community-based organization or BWSA). The Team members from MHO through the RHU and its network of barangay health workers shall be tapped to monitor the project. DILG's Barangay Government Operations Officer (BGOO) shall also be tapped to monitor. MHO shall assist the beneficiaries to monitor water quality and quantity once in three month as stipulated in the Philippine national Standards for Drinking Water.

Monitoring and evaluation shall start during project implementation. The system must have the right and clear objectives and right indicators - sustainability, effective use and replicability.

SPOT MAP

INSTRUCTIONS FOR COPLETING BARANGAY MAP

This sample barangay map is a rough sketch of an entire barangay showing the households, with and without sanitation facilities. The map also shows location, type and condition of existing water facilities and plot location of proposed water sources.

- 1) The map will be used for BWSA planning.
- The map can be used as a planning tool to determine best locations for future water sources.
- 3) The map can also be used to support funding requests for other water and/or sanitation facilities.
- 4) The map may also be entered into a national data base.

To make a map of your barangay, use the legend at the bottom of the sample to indicate information and landmarks. Follow these procedures when completing the map:

- 1) Indicate location of highways and roads, including name and number of road if any.
- 2) Draw approximate boundaries of your barangay and indicate names of adjacent barangays.
- 3) Indicate direction of north line.
- 4) Locate public buildings, cemeteries, schools, or other prominent landmarks.
- 5) Locate natural land features (like rivers, rice field, hills, etc.) and animal pens.
- 6) Show households by drawing a clear square.
- 7) Show all sanitation facilities in households by darkening bottom of square.
- 8) Show water sources location and condition by drawing a clear circle for existing water sources, a half dark circle if source is not in operation and a darkened circle for proposed facility. (Proposed facilities should be at least thirty (30) meters away from the nearest latrine and animal pen).
- Show water source type like deepwell, shallow well, spring, etc. Following legend on the map.
- 10) Next to exiting facilities, write the distance in meters to the nearest latrine or animal pen. Proposed facilities should be at least 30 meters away from the nearest latrine and animal pen.
- 11) Show kilometer posts along the road by drawing a darkened small square.

PROPOSED COMMUNITY MANAGEMENT PROGRAM

| Cost | | P600 | P500 |
|---------------------|---|---|--|
| Duration (Day) | 0.5 | ૪ | 0.5 |
| Responsible | CO/NGO; PWSU/MSLT; Barangay Officials Development Council | CO/NGO; PWSU/MSLT; Men and Women Volunteers | CONGO; PWSU/MSLT; Prospective Users |
| Barangay Activities | Pre-Formation/Social Preparation Phase Consultation with barangay officials/development councils (First Meeting) The activity aims to obtain the support, commitment and active participation in planning, implementation and managing the project. They are primarily responsible for the identification and prioritization of community needs. The decision on the acceptance of Level I water facility and barangay counterpart shall emanate from them. | Barangay Water Supply and Sanitation Survey/Spot Map A core group composed of men and women volunteers will conduct BWSS and spot mapping. The BWSS results provide information on the prospective users willingness to undertake the responsibility for the O&M as well as provision of counterpart. Spot map will identify the most feasible site for Level I facilities, HH latrines, school and public toilets. | Presentation of survey results and spot map (Second Meeting) The survey results and spot map will be presented to the barangay officials, core group and prospective water users of the facilities. The decisions of the community members will be confirmed in terms of acceptance of Level I water facilities, site of the water facility/ies, willingness to contribute for water fee, operate and maintain the facilities, to be trained and to put up counterpart such as labor, site, and local materials. The results of the survey and spot map are discussed relative to the most feasible site of the water facilities in the barangay as well as the most feasible site of sanitation facilities and houses in need of latine. The community members will be given priority in the provision of water and sanitation facilities. The community members will also decide on the operating body, whether to tap existing community-based organization, form a new one (BWSA) or merge/consolidate with existing water association. |

| 8. Construction of Water and Sanitation Facilities The operating body shall ensure that the materials delivered are all accounted for and in accordance with the approved specifications in the technical design. Labor, local materials such as gravel and sand, and snacks are provided as counterpart. The prospective users actively participate during construction and test run of water facilities. Upon completion, the facility is turned-over to the operating body. The President, in behalf of the association, shall receive the water systems from the LGUs. Simple turnover ceremony is held witnessed by barangay officials/leaders. BOD/officers and members the association and P/MSLT members. | 9. Skills Training (Sixth Meeting) Skills training aims to build the capacity of project beneficiaries in planning, proper operation, repair and maintenance of water and sanitation facilities. This will also create and awareness among the project beneficiaries on the importance of proper hygiene and the need to main a health environment BOD/officers will be trained on organizational management, bookkeeper on financial management/bookkeeping and caretaker on operational management (operation, maintenance and repair of wells hand-pumps, etc). | 10. Health and Hygiene Education Health and hygiene education services shall be continuously provided to the community members focusing on the interdependence of safe water supply and sanitary toilet facilities to achieve overall health and environmental benefits. | L. Fost Formation Flass 11. Monitoring, Evaluation and Technical Assistance Periodic monitoring and evaluation will be conducted in partnership between MSLT and beneficiaries. M&E will Start from project implementation. Technical assistance will be provided, if necessary. | TOTAL |

DUTIES AND RESPONSIBILITIES OF BOD/OFFICERS AND MEMBERS

The management of the BWSA rests on the Board of Directors/Officers who are elected by the general membership. The Board elects from among themselves the Officers of the association: President, Vice-President, Treasurer and Secretary. The President designates the Bookkeeper and Caretaker of the BWSA. The duties and responsibilities of the Board/Officers, Bookkeeper and Caretakers are shown below.

(1) Duties and responsibilities of the Board of Directors

- Oversee the activities of the BWSA
- · Formulate policies and procedures to carry out the affairs of the BWSA
- Elect the BWSA officers
- · Attend all meetings of the Board and the General Assembly
- Attend trainings for BOD/Officers conducted by PWSU/MSL3

(2) Duties and responsibilities of the President

- · Conduct/Preside over all meetings of the General Assembly
- Preside over BOD meetings
- Execute policies relative to the management of the Association and the maintenance of the water facility
- Act as arbitrator in settling conflicts among members regarding BWSA operations
- · Represent the Association in any activity involving BWSA operations
- Investigate the current condition of the Association and recommend measures for its improvement or solutions to its problems
- · Perform such other duties as may be assigned by the Board of Directors

(3) Duties and responsibilities of the Vice-President

In the event of death, incapacity or refusal of the President to perform higher duties and responsibilities, the Vice-President shall assume the Presidency. He shall perform the duties of the President and such other duties as may be assigned by the Board of Directors.

(4) Duties and responsibilities of the Secretary

- Attend all meetings and record the minutes
- Call meetings in the absence of the President and the Vice-President find preside until a temporary presiding officer is chosen
- · Prepare and send notice to all Association meetings
- Keep all papers/documents pertinent to the Association
- Perform such other duties as may be assigned by the Board of Directors

(5) Duties and responsibilities of the Treasurer

- Attend all meetings of the Board and the General Assembly
- Take proper custody of all funds and properties of the Association
- Ensure the proper issuance of official receipts for money received by the Association
- Ensure that all expenditures are authorized by the Board and are covered by official receipts
- Deposit all funds of the Association in a bank designated by the Board; and
- Produce periodic reports and account reconciliations as prescribed
- Perform such other duties as may be assigned by the Board of Directors

(6) Duties and responsibilities of Bookkeeper

- · Keep the financial records of the Association;
- Collect water fee contributions from and issue receipts to user members;
- Remit collected water contributions to the BWSA treasurer;
- Submit a quarterly financial status report to the Board of Directors or as often as the Board may require;
- Attend BOD meetings and BWSA training/activities conducted by the PWSU/MSLT
- Perform such other duties as may be assigned by the Board of Directors

(7) Duties and responsibilities of Carctaker

- · Remind the members of the proper use of the facility
- Ensure that the water facility is in good operating condition
- Keep the record of the operation and maintenance of the water facility
- Report to the Board of Directors (BOD) any damaged or repair needs of the facility
- Perform minor repairs of the water facility
- Assist in the collection of water be contributions
- Attend meetings of the Board as may be required
- Attend skills training on operation and maintenance conducted by the PWSU/MSLT
- Perform such other duties as may be assigned by the Board of Directors

(8) Duties and responsibilities of Members

- · Pay monthly water fee contribution;
- Attend meetings and training activities designed for members;
- Observe rules and regulations and policies approved by the BOD/Officers;
- Remind other water users to use the facility properly;
- Keep the premises of the water facility clean, sanitary and free from excess water which may cause contamination of the water source; and
- Adopt proper health and sanitation practices.

PROCEDURES FOR BWSA FINANCIAL OPERATIONS

Bookkeeping records an organization's financial transactions involving the receipt and expenditure of money in an organization. The organization may be a small business or large corporation. It may be government or a non-government organization. Regardless of the size of the organization, it provides a standard method for recording and reporting financial transactions of all kinds. The information obtained from accurate and timely bookkeeping provides timely information on the financial health of the operation.

The information contained herein will enable the BWSA bookkeepers to record financial transactions and prepare financial reports. The manual presents the overall picture, through the General Accounting Plan procedures. A step-by-step guide follows the General Accounting Plan through all the transactions, entries and reports. Each transactions, entry and report has a corresponding form. Each form is presented with explanations on its function and how it relates to the other forms. Instructions are provided line-by-line for a clear understanding.

(1) BWSA Business Operation

The BWSA business operation is simple. Funds are generated through water fees. Although there may be other sources of income, user fees will be the main source of income. Money is spent to maintain the barangay water system and other properties owned by the association. Other funds spent include expenses for administration, parts and supplies.

With only a few sources of income and expenses, financial transaction entries can be made quickly as they occur. If transactions pile up, even a simple operation can become very complicated. It is recommended that all transactions be recorded daily. If this is done regularly, periodic reports can be prepared quickly and accurately.

(2) Maintenance and Custody of Documents and Records

Safekeeping the books of accounts, related records, accounting forms and reports is a major responsibility of the bookkeeper. Accounting forms used as the basis for recording should be arranged and filed separately in sequence. All records and documents should be locked up and access should be limited to authorized BWSA officers and personnel.

The BWSA officers should agree on the reports to be prepared, who received the reports and how frequently. It is recommended that certain records be maintained and certain reports be complied. It is up to the BWSA officers to determine how often these reports are to be made and if additional reports are necessary. Some larger BWSAs may need monthly reports. Smaller BWSAs may only require quarterly reports.

(3) General Accounting Plan (GAP)

The flow of accounting and reporting is shown in the General Accounting Plan, Figure 1. The GAP will guide users through this section as each procedure is explained. The GAP contains four columns of boxes. Columns are headed:

- · Transactions consisting of cash and non-cash transactions
- · Document for recording different types of financial transactions
- Books to maintain a record of financial transactions
- · Reports to summarize all financial transactions for given period.

(4) Transaction Defined

The BWSA financial transactions are classified as:

- · Cash Transactions
 - Cash-In (cash receipts)
 - Cash Out (cash disbursements)
- Non-Cash Transactions

Money, incoming and outgoing, is classified as eash transactions. The GAP shows two kinds of eash transactions, eash-in (eash receipts) and eash-out (disbursement). There are also non-eash transactions which document money owed to the BWSA or money that the BWSA owes.

1) Documents for Cash Transactions

The Official Receipt (OR), (See Figure 2) and the Voucher (See Figure 3) are the source documents for cash transactions. ORs and vouchers are called source document because they initiate the bookkeeping process.

Each time a person gives money or its equivalent to the BWSA, an OR is issued to the person. Each time the BWSA pays money to a person, a voucher is completed to show that it is an authorized expenditure. The voucher also records to whom the money was given and for what purpose.

Both the OR and voucher are numbered and all numbered documents should be accounted-for. This means that if an OR or a voucher has been incorrectly filled out, it must be kept for the record.

- a) The OR records all money received BWSA and must specify:
 - The date funds are actually received
 - The name and address of the person paying the money
 - · The amount received, both in words and in figures
 - · An explanation or purpose of the payment
 - Confirmation of receipt as shown by the authorized collector's signature, usually the bookkeeper
 - The billing form number, if money is for payment of water fees
- b) The voucher records all money paid out by the BWSA. Each numbered voucher must specify:
 - · The date money is actually paid
 - The name and address of the person receiving the money
 - The total amount of money paid, is words and in figures
 - Details of payment, including invoice number
 - Signature of person authorized to approve payment
 - Confirmation of receipt as shown by the authorized collector's signature, usually the bookkeeper, of the person paying money
 - Signature of person receiving the money and date received

2) Document for Non-Cash Transactions

The sources for recording non-cash transactions are the billing form and the invoices. The billing form documents money that is owed to the BWSA. Invoices or statements of account are documents made by others showing money owed by the BWSA. These are transactions which do not involve cash collection or payments, and therefore, are not to be recorded in the Cash Record Book.

a) The Billing Form (See Figure 4) is used to notify water consumers of the fees owed to the BWSA covering a certain billing period. Billing forms may be made monthly or quarterly as the Association decides. Billing forms must specify:

- List of services rendered
- The name and address of the person being billed
- Period covered by this bill, beginning and ending dates
- The total amount of money owed
- Date of billing
- · Date the bill should be paid
- Official signature, usually the bookkeeper

Unaccounted Water Fees are examples of non-eash transactions which should be recorded in the Receivable Book.

- b) The Invoice or Statement of Account (See Figure 5) is a document prepared by the seller and presented to the BWSA showing money owed to the seller by the BWSA. Invoices usually contain:
 - An invoice number
 - The person or company sending the invoice
 - The name of the BWSA that owes the money
 - Particulars of goods or service provided
 - The breakdown of money owed and total amount due
 - A payment due date
 - Name or signature of the person requesting payment

Unpaid invoices on repair and maintenance and other unpaid expenses, such as honoraria are recorded in the Payable Book.

(5) Book of Accounts

The book of account are basic records used to record all financial transactions. Three books of accounts are maintained as described below.

1) Cash Record Book

The Cash Record Book is used to record all eash incoming and out-going transactions. The OR is recorded in the Credit column (Money Received). The voucher is recorded in the Debit Column (Money Disbursed). All entries are recorded by date, including all cancelled forms, properly notes. After each credit or debit entry, the amount is added or subtracted from the Daily Balance. At the end of

the month, the entries form the bases for preparing the Statement of Operation and the Cash Position Statement.

2) Receivable Book

Unaccounted account from the members and outside parties are recorded in the Receivable Book (See Figure 7). This book shows the transaction date, the billing number, the household head, the amount and explanation or remarks about the nature/condition of the account.

3) Payable Book

Unpaid accounts on the expenses incurred by the BWSA such as salaries or wages, repair and maintenance and other expenses are recorded in the Payable Book (See Figure 8). This book shows the transaction date, the payee, the nature/explanation of the unpaid account and the amount.

(6) Financial Reports

The BWSA reports are usually prepared monthly or quarterly. The financial reports are prepared to inform the BWSA financial members of the Association's financial status. In preparing the BWSA financial reports, the bookkeeper reviews all source documents supporting the transaction to countercheck the amount appearing in the books. The recorded transactions should be summarized and arranged chronologically to produce a report easily understood by BWSA officers and members.

1) Statement of Operations

The statement of Operations (See Figure 9) is prepared monthly to record the income and expenses incurred by the Association in its operation during the period. The statement shows the revenues earned, the operating expenses incurred and the income or loss as a result of operation.

2) Cash Position Statement

The sources of information when preparing the Cash Position Statement (See Figure 10) are the cash record books and the statement of operations. The report is prepared to determine if the Association can cover its operating expenses. This statement shows the beginning cash balance, the cash receipts for the period, the cash disbursement, and the cash balance ending for the period.

3) Financial Summary Report (Annual Report)
The financial Summary Report (See Figure 11) is prepared to summarize the periodic reports prepared during the year and the supporting schedules.

(7) Bookkeeping Procedures

A step-by-step review of all BWSA transactions can be accomplished by following the accounting entries and reports.

F. MAP OF THE AREA

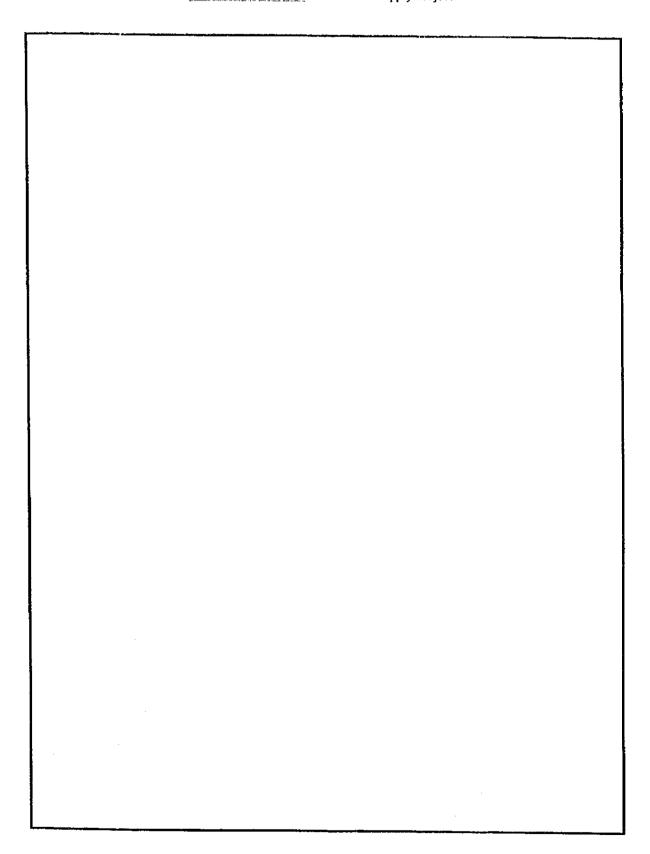

Please attach map of the area proposed to be served. Indicate location of houses, buildings and other structures to be served including roads, the water source(s) and possible locations of storage tanks. The map should preferably be drawn to scale.

Important: If map cannot be drawn to scale, indicate distance measurements between important points along roads, or possible routes of distribution pipes with households properly indicated. For rolling terrain, indicate elevation differences between measurement points.

9.5 Community Development

9.5.2 CD Structure and Linkages

Responsibilities and Qualifications of a CO/CD Worker

1. Tasks of a CD/CO Worker

(a) As Facilitator

- > Enhances individual and group strengths and helps minimize weaknesses and conflicts;
- > Heightens community unity; and,
- > Assists individuals and groups to respond to common interests.

(b) As Trainor and Educator

- > Discerns educational needs of people;
- > Helps in consciousness-raising to enable group or individual capability development;
- > Assists leaders in developing new leaders;
- > Continually dialogues with people; and,
- > Helps develop self-determination among leaders and members.

(c) As Advocate

- > Helps analyze and articulate critical issues;
- > Assists others to understand and reflect upon these issues; and
- > Evokes and provokes relevant discussion and actions.

(d) As Researcher

- > Conducts social analysis
- > Engages in participatory research with the people as partners;
- > Helps create research designs for people's use and interest; and
- > Integrates with the people to understand social phenomenon from the people's viewpoint.

(e) As Planner

- Conducts initial analysis of area resources and potentials;
- > Assists local group's planning, strategizing and creative action; and
- > Helps systematize people's actions to attain desired goals.

(f) As Catalyst

A State of

- > Initiates discussions and actions regarding critical issues; and
- > Monitors and nurtures growth of individuals and groups to facilitate long-term social change for people's welfare.

2. Personal characteristics of a CD/CO Worker

- a) Must possess an innate and genuine love for people, which enables them to share with the people in their desire for change;
- b) Must have a commitment to help people in the desire to participate in changing society. The commitment sustains them and enables them to persevere.
- c) Must have a basic trust in the people, be willing to learn from them, and have faith with them.
- d) Must be adaptable, flexible, able to adjust to people and circumstances and able to move with people when and where they decide to move.
- e) Must be ready to learn and unlearn, be open to self-assessment and accept criticism; be able to drop pre-determined notions and stereotypes; and swallow their pride while remaining resourceful in the process.
- f) Must have patience with people but not with situations so that they can keep the people moving. The people must not be pushed. A CO must keep pace with them.
- g) Must be able to analyze problems, communicate with the people in their own language and work at the people's level. Only the can they start a process of critical awareness.
- h) Must be able to follow the growth of critical awareness by generating with the people appropriate action towards change and transformation of the community.

3. Lifestyle and Method of Work of CD/CO Worker

(a) In Method of Work

- > People-oriented, i.e. serving the interest of the people by not insisting on own project proposals.
- > Able to work informally among people, and not be overburdened with committee structures.
- > Able to protect the community from outside intervention such as inappropriate projects.

(b) In Lifestyle

- > Humble, simple and immerse oneself in the life of the community;
- > Free of self-interest, which makes commitment unclear and dubious, and expect to reward;
- > Able to identify with the people, see themselves as different, and be aware of the limitations of such;
- > Open to be transformed by identification with, and involvement in the community;
- > Able to develop the internal strength to accept frustrations and loneliness at times.

4. The CD/CO Worker: A Catalyst, Missionary and Visionary

- a) He/she works with people, not for them.
- b) He/she considers people as intelligent and with numerous experiences.
- c) He/she lets the people grow.
- d) He/she builds up the people's cohesiveness.
- e) He/she builds up the people's organization.
- f) He/she believes that people can change and can bring about change in society.

5. Desired Characteristics of a CD/CO Worker

a) Should have respect for and faith in the people they are working with; believe in the potential power and age-old wisdom of the masses.

- b) Should go to the people as learners, not as teachers; listen more than talk; facilitate more than lead. Should not have the messianic or redeemed complex but instead believe that it is the masses who will be their own redeemer.
- c) Should try to know the people, their socio-economic, political and cultural situation and problems before starting any program or action.
- d) Should be simple and austere in lifestyle.
- e) Should have the capacity and humility to withdraw as soon as the people are ready to manage their own affairs; aims at becoming dispensable.
- f) Capable of improving other's skills and knowledge.
- g) Is needed in order to maintain the community's interest and participation, as well as, to maintain and accelerate the momentum needed.
- h) Requires that the CO be at least several steps ahead of the community, but having in mind the direction of the community will be going and how to reach the desired goals.

Typical CD Work

Community Organizing Handbook for Water Supply and Sanitation

Community organizing for water supply and sanitation projects is aimed at forming user groups through a process that integrates the hardware (technical aspects) and software (social aspects) components of a water supply and sanitation project.

People's participation, which can be gauged against the extent to which they themselves are involved in the decision-making processes, their willingness to stake local resources, (both in cash and in kind) and the extent to which trainings have improved the knowledge, skills and attitudes of the people are some of the indicators of a good community organizing work.

The Community organizing process is developing a partnership with the community. The Community organizer is simply a catalyst in the community's efforts to build their self-confidence to operate, maintain and sustain their water supply and sanitation service.

The CO Framework

The CO Handbook is one of the tools that a community worker may use as a guide in organizing user's groups for community-managed water supply and sanitation facilities. It is presented in three (3) major stages following the community-organizing framework. These stages are a) Formation of Organization; b) Development of Organization; and c) Consolidation of Organization.

The process contains a chronology of activities that starts with the deployment of community organizer and ends up with his/her exit from the community.

Except for steps 9 and 10 of Stage II and Step 20 of Stage III which need not be undertaken for a Level I, all the rest applies to Levels I and II water supply projects. level I water supply projects refer to point source facility catering to a cluster of ten to fifteen households while level II refers to a waterworks that has a distribution system such as multiple tapstands.

The Formation of Organization stage covers activities intended to enlist community participation and make community understand the concepts, processes and importance of organizing a group that will become responsible for eliciting maximum participation for WATSAN activities.

The Development of Organization stage covers activities intended to build capability of water users' organization, which include trainings and full participation in both technical and social activities. It also includes the CO worker's sharing and transferring of organization development and community organizing technology to the leaders of the water users' association. In this way, the community will be able to increase their capability for self-management.

The Consolidation of Organization stage consists of activities intended to "tie loose ends." This is to ensure that at the exit of the CO worker, the water users' association can sustain its operations without an external catalyst.

The last part of the Handbook is a compilation of useful tips in recording the minutes of the community meetings, contents of a spot map, sample tapstand membership form and

tapstand membership list, characteristics of a CO worker and community leaders and others. All these are appended as additional guides to enhance the organization process and facilitate the attainment of the CO objective.

Community Organizer

The community organization worker as a catalyst is one who believes that the people are the main actors in the processes and that his/her role is that of facilitating the community organizing process; improving the skills and knowledge of the community; and that he/she has to withdraw as soon as the people are ready to manage their affairs.

Objectives of the CO Work

The General Objective of the CO work is to form a community-based water user's association that will operate, maintain and sustain their water supply and sanitation facilities.

Stages of CO Work

Each of the three stages of CO work as contained in the framework is distinctly characterized by various activities needed to ensure that the organization will continue to function even after the exit of the CO worker.

Phase I is characterized by the formal entry of the CO worker to the community. This is marked by courtesy call first to the barangay leaders and then to the community. These activities require thorough understanding of the nature of the project.

The CO worker needs various tools to undertake these activities. A chart preferably in the local dialect that explains the concept of the project and the roles of the various stakeholders is very important. The community profile is one tool that also needs to be validated by the community themselves. The profile serves as a CO tool in facilitating community decisions.

Phase II is characterized by a series of trainings intended to provide adult learning processes to the water users' association. This includes practical and workable approaches needed to synchronize activities and provide appropriate mix of technical and social knowledge and skills to the water users.

Phase III begins when the organization is formalized, water system potability is ensured, legal documents are executed and facility is turned-over to the water users' association for their operation and maintenance. This phase ends when the community organizer exits from the community, leaving behind an organization with positive indicators for sustainability.

1. ENTRY STRATEGIES

CO DEPLOYMENT

Objective

: Indorse the CO worker to the community by provincial and municipal level implementors

Expected Result : CO worker is introduced to the barangay

officials and the community

Suggested Strategy

: Community meeting

Facilitator

: Barangay Captain

Co-facilitator

: Municipal Level Implementor

Agenda in the first orientation meeting and courtesy call to barangay council:

- Title of the project

- Objectives

- Stakeholders and their roles, responsibilities and accountabilities

Funding and counterparting
 Project features or components

How the project will be executed

- Timetable

Inputs and outputs (largely trainings)Role of the intermediaries (NGOs)

Solicit/request for CO volunteers to participate in profiling and

spot mapping

VALIDATION OF COMMUNITY PROFILE AND SPOT MAPPING

Objective

: To establish socio-economic, political and technical information about community directly or indirectly related to water and

sanitation.

Expected Results

: Validated secondary data from the community

Suggested Strategies

Home visits

- Focus group discussion

Visit to RHUs, MPDO, MHO, local school

Community meeting

CONTENTS OF THE SPOT MAP

- Natural features (creeks, river, lakes, mountains, water sources)

Man-made structure (houses, buildings, bridges, roads, schools,

cemetery, halls, markets, water system facilities)

Technical data (distance, north orientation, elevations, scale, date prepared, source of information, persons/agencies involved, names of places, boundaries, legend, index to adjoining sheets, coordinates)

2. PRESENTATION OF VALIDATED PROFILE TO THE COMMUNITY

Objective

To further enrich and refine data in the profile

Expected Results

Profile validated by the community

Surfacing of thoughts on:

How project will be implemented on the site How the facility will be designed and constructed How the community perceived their role in the project

Solicit counterpart

Determine/recommend long list of potential core group members

Facilitator

CO worker

Audience

Key informants (farmers, church leaders, teachers, etc.)

3. DEVELOPMENT OF CRITERIA FOR SELECTION OF CORE GROUP

Objectives

To enlist people interested to work actively that will assist in CO

activities

Expected Results : Core group members elected

- Role and function of core group drawn
- Adhoc committees formed and function's drawn
- Committee chairman selected
- Plan of action done

IDEAL SELECTION CRITERIA FOR CORE GROUP MEMBERS

- Must have the time and commitment to do community development activities in their locality
- Proven leadership skills
- Direct exposure and experience in community development project/activities
- Have some basic knowledge and/or skills in community organizing
- Good moral standing
- No criminal record
- Should be one of the beneficiaries
- With good interpersonal relationship with the community
- Should be literate

ROLES AND FUNCTIONS OF THE WATER CORE GROUP

- Initiates the planning and implementation of action on water related activities
- Preparation of water project feasibility study/design community survey and spot map to further validate the importance of the project to the community at large
- Mobilize community resources specifically: the time, skills and efforts of the people
- Resources of the local agency, i.e., money, technical know-how, equipment, machines
- Disseminate information, keeps the community informed about the status of the water project
- Hears and considers suggestions of people with regards to the appropriate activities of the project
- Facilitates the expansion of water core group into Barangay/Rural Waterworks Association.

COMPOSITION OF THE CORE GROUP

- Technical persons who can be trained on the technical aspects of the project
- Individual who are trusted and respected by community
- Those who have a strong liking to work for people
- Those who have a spirit of volunteerism
- Those who are resourceful
- Individuals who are understanding and patient enough to go with the pace of the community
- Together with the community, they should be able to identify the:
 - Objectives of the group
 - Define roles and responsibilities
 - Clear expectations to members and group as a whole

ADHOC COMMITTEES CO-TERMINUS WITH THE CORE GROUP

Education and recruitment

- Monitoring, evaluation and control
- Coordination and manpower
- Documentation (to include preparation of legal documents)

FUNCTIONS OF THE COMMITTEES

- Education and recruitment
 - Project information drive
 - Advocacy on water supply, sanitation, health care and hygiene
- b. Monitoring, evaluation and control
 - Inspects and accepts hardware, tools and equipment
 - Acts as property custodian
 - Monitor the evaluation
 - Initiate action planning relative to construction activities
- c. Coordination and manpower
 - Coordinate resources from stakeholders
 - Do follow-ups and issue reminders
 - planning and manpower scheduling in terms of number and distribution
 - Coordinate technical activities in project site
- d. Documentation
 - Facilitate the issuance of legal documents such as right of way permit, deed of donation, certification water source site, etc.

4. ASSIST IN SITE SELECTION AND FEASIBILITY STUDY

Objectives

: To identify potential water source sites

Expected Results

Water source site for development identified (or prospecting for

wells)

Suggested Strategy

: Technical data gathered

5. PRESENTATION OF TECHNICAL FINDINGS

Objectives

To come up with recommendations on the technical study

Expected Results

Decision by the community on the technical findings

Water samples collected from agreed upon water source site (for

spring only)

Suggested Strategy

Meeting of the core group

Facilitator

LGU Technical Team

CO-facilitator

CO worker

By the end of Phase I of Community organizing work, the following milestones must have been achieved:

- Water Core Group formed
- Adhoc Committees formed and chairman named
- Water source site identified and initial studies done
- Community profile and spot map completed and validated

While at this stage, there is no way yet of gauging the certainty of making the project succeed in terms of a community-managed facility, a thorough understanding by the beneficiaries of the project features, stockholders, tasks, inputs, outputs and other important information about the project which is done formally as the opening salvo of the CO to the

community and, later, on a more informal manner, as the CO integrates to the community is one of the most critical part of this phase.

As community organizing progresses, the deepening sessions of the CO worker in reinforcing project concepts such as strategies for community initiatives towards addressing key issues affecting their community that are directly or indirectly related to water are reinforcing mechanisms in providing impetus to the development of an informal water users' organization, as infant as a water core group.

6. HUMAN RESOURCE DEVELOPMENT TRAINING

Objective : To build a strong and cohesive team

from among the core group members and barangay officials (if appropriate)

Expected Results : Trained core group members on

Human Resource Development

Facilitator : CO worker

Co-facilitator : Core group members

7. PRESENTATION OF TECHNICAL DESIGN

Objective : Generate community decision on appropriate technology to be

used

Expected Results : Generate community decision on appropriate technology to be

used

Suggested Strategy : Community meeting to discuss

- Initial findings on technical feasibility study

- Presentation of technology options

Facilitator : Technical Team

8. FACILITATION ON LEGAL WORKS AND DOCUMENTS

Objective : Prepare necessary legal documents

Expected Results : Legal documents required in WATSAN projects prepared

Facilitator : Committee Chairman

CO-facilitator : CO Worker

LIST OF DOCUMENTS REQUIRED IN IMPLEMENTING WATSAN PROJECTS

- Barangay Resolution desiring to avail of a water facility to be submitted to the LGU
- Building permit of WATSAN facility, from LGU
- Waiver form DENR (if water system components such as the source, tank, pipelines are situated in areas other that private lands) to use the site(s) for community development
- Right of way permit from private land owners, specifically for spring sites and pipeline routes
- Deeds of donation from private landowners for water tank and tapstand sites
- · Certificate of water quality source to be developed and tapped, from DOH
- · Certificate of water quality produced through the water system facility, from DOH
- Letter of acknowledgment from the municipal mayor endorsing the water system management to the water users' association formed
- Accreditation pertinent papers (needed for the accreditation of RWSAs/BWSAs at the LGU level)

- Water rights
- Water permit
- Drilling permit

PRESENTATION OF DRAFT TECHNICAL DESIGN 9. (Skip This Activity If Level I)

Objective

: To inform the community of the results of the feasibility study conducted

Expected Results:

Location of major components such as well drilling site, transmission and distribution pipelines

Tanks and tapstands are identified Community acceptance of design Local counterpart generated

Suggested Strategies:

Community meeting

Site visit to proposed structures/facilities' location

INFORMATION TO BE PRESENTED TO THE COMMUNITY

Role of technical people

Contents of typical water system technical plan

Presentation of design specifications and explanation of plan contents /drawings in layman's terms

Presentation of program of work (POW), bill of materials and cost estimates

Validation of data gathered and used in the designing

Solicit ideas, opinions, comments and preferences

Come-up with compromises, and if appropriate determine local counterpart

If system is Level II, spring source, dispersed tapstands and dispersed household clusters, technical information is limited to the number of tapstands that can be provided and the approximate location of tapstands relative to the cluster.

MOBILIZATION OF COMMITTEE ON DOCUMENTATION 10. (skip this activity if Level I)

Objective

To facilitate additional legal work requirement for tapstand, pipeline

and other major system components

To ensure a formal listing of tapstand membership

Expected Results

Completed legal documentation requirement membership per

tapstand known

Facilitator

Committee Chairman, Committee on Documentation and

Education and Membership

CO-facilitator

CO worker

11. CONFIRMATION OF MEMBERSHIP BY TAPSTAND

Objective : To confirm final membership by tapstand

To undertake information campaign on the importance

of grouping and houserules formulation

To select tapstand leader

Expected Results : Final listing of membership per tapstand

Formulated tapstand houserules

Tapstand leader selected

Suggested Strategy

Undertake meeting per tapstand

Facilitator

CO worker

CO-facilitator

Chairman, Committee on Education and Recruitment

DISCUSSION POINTS IN FORMULATING TAPSTAND HOUSERULES

a. Getting water:

How will water be fetched? When will water be fetched?

Who can fetch water?

b. Monitoring

List down who fetches and

how much volume of water was taken

c. Water tariff due the specific tapstand

d. Sanitation around the tapstand and around the cluster

e. Beautification and physical development in the tapstand site

f. Financial management regarding water tariffs

12. PRESENTATION OF FINAL TECHNICAL DESIGN

Objective : To present and approve the final technical design

Expected Results : Finalized counterpart agreement

Construction scheduling developed

Suggested Strategy : Meeting among tapstand leaders, core group and

barangay council

13. TRAINING ON HYGIENE, SANITATION AND HEALTH CARE

Objective : Conduct of training on health and hygiene Expected Results : Awareness on community health aspects

Suggested Strategy : Community meeting, or

Meeting by tapstand grouping

Organizer : CO Worker, community and rural sanitary inspector

Training Management: LGU

Audience : Core Group, Barangay Officials, Barangay Health Workers,

Rural Sanitary Inspectors, and Barangay Nutrition Scholars

14. SOURCE FOR EXCRETA DISPOSAL MATERIALS AND/OR FACILITIES

Objective : To make available to the community facilities for excreta

disposal (if conditions and culture warrant)

Expected Results : Materials/facilities for excreta disposal constructed individually

by members of the community in their households

Suggested Strategy : Core group members together with CO worker make

representations with LGUs to source materials or facilities

Facilitator

Core group members

CO-facilitator

CO worker

15. ORGANIZATIONAL MANAGEMENT TRAINING

Organizer

CO and the community

Training Management:

LGU

Audience

tapstand leaders, core group and barangay officials

16. PRE-CONSTRUCTION CONFERENCE

Objective

To generate work plan and tasking for the construction

activities

Expected Results

Activities and roles identified
 Commitment to participate generated

Suggested Strategy

Hold a community meeting

Facilitator

Technical team

Co-facilitator

CO worker

AGENDA IN THE PRE-CONSTRUCTION CONFERENCE

Presentation of schedule of work and tasking

Determine quantities of resources needed

Labor arrangements

· Salaries/wages, if any that will be incurred

Mobilization of committees

Arrangement on materials storage

17. MOBILIZATION FOR DELIVERY OF MATERIALS

Objective

To ensure that materials delivered at the community

are all accounted for

Expected Results

Materials delivered all accounted for and in

accordance to the agreed upon specifications in the

technical design

Suggested Strategy

Specific committee to handle delivery, and storage of materials, and, if need be, disposition of materials

Facilitator

Committee to be agreed upon by the core group

Co-facilitator

: CO worker

18. ACTION PLANNING FOR CONSTRUCTION

Objective

To spell out what to expect during the construction

processes

Expected Results

Smooth implementation of construction activities

Facilitator

CO worker Technical Team

Co-facilitator Suggested Strategy

Core group meeting

STEPS TO BE UNDERTAKEN:

Identify activities related to construction

Define activity schedule and resources required

Identify the type of manpower skills required per activity

Monitoring and documentation of major water system components

Progress reporting, evaluation and action planning

Monitoring and documentation on construction of major water system components

· Repeat cycle until completion

19. DEVELOPMENT OF EXIT PLAN

Objective : To plan for the transfer of responsibility from CO worker to core

group members

Expected Results : Core group informed of activities ahead and the expected time

of withdrawal of the CO worker

An exit plan containing task list and specific person responsible

Organizational development program developed

Suggested Strategy

Core group meeting

Facilitator Co-facilitator CO worker Technical Team

Co-tacilitator
Audience

Community members

At the end of the Development of Organization Phase, the following milestone must have been achieved:

Basic organizational development training such as value formation, leadership and team building and sanitation, health care and hygiene education must be done

- CO exit plan jointly developed by the CO together with the community

- All legal documents completed

- Pre-construction conference done

- Materials for construction delivered and accepted by the community.

Organizational strengthening such as involvement of a greater number of community members participating in mobilization activities and increased awareness on key issues through information exchange

The success of the phase rests on the extent the community had participated in the activities and learned from the processes as inputs to the community's capability for self-management. On the other hand, one of the most crucial factors to participation rests on the depth and broadness of their understanding of the project concept, features, processes, stakeholders, tasks, and responsibilities coupled with the need for water supply facility, a condition validated in the first orientation meeting done by the CO upon entry to the community.

The inputs that will be provided by the CO and the technical team will provide the necessary honing skills for the core group and tapstand leaders to have the confidence to accept more challenges in the next phase. These challenges are contained in the Exit Plan, which was formulated by the local stakeholders. The Plane will be implemented in Phase III stage to signal the weaning process of the community from the CO worker.

20. PRESENTATION, COMPARISON & COLLATION OF TAPSTAND HOUSERULES (skip this activity if Level I)

Objectives

Collate similar houserules formulated in the previous

activity

Expected Results

Collated houserules

Identified houserules

appropriate for by-laws

Suggested Strategy

Meeting of tapstand leaders

Facilitator

CO worker

Co-facilitator

Core Group Member

21. DRAFTING OF CONSTITUTION AND BY-LAWS

Objective

To develop a set of policies and by-laws that will govern the

operation of the organization

Expected Results
Suggested Strategy

Constitution and by-laws ready for ratification Meeting of core group and tapstand leaders

22. RATIFICATION OF CONSTITUTION, BY-LAWS AND POLICIES

Facilitator

CO Worker

Co-facilitator

Core Group Member

Expected Results

Constitution ratified Officers elected

23. FACILITY/SYSTEM TEST RUN

The community participates in ocular operation and test run of facility installed

Facilitator

Technical Team

24. WATER QUALITY TEST

Objective

To ensure potability of water from facility

Expected Result

Water facility is to provide potable water to

community

Suggested Strategy

Collect water sample from tapstand

Submit sample to DOH for test and certification

25. TURN-OVER OF FACILITY/SYSTEM

Officers elected organize and manage facility turnover ceremony

26. OPERATION, MAINTENANCE AND REPAIR TRAINING

Trainer

Technical team

Trainees

Community-appointed Plumber, Meter Reader (if there is a meter

installed), Tapstand leader and RWSA/BWSA officers

27. FINANCIAL MANAGEMENT TRAINING

Trainer

NGO, LGU or Water District

Trainees

Bookkeeper, Tapstand Leader and RWSA/BWSA officer

28. RWSA/BWSA REGISTRATION AND ACCREDITATION

Facilitator

RWSA/BWSA officer

Co-facilitator :

CO worker

Registration of BWSA/RWSA to appropriate government agencies is done. Options on where to register shall be presented and decided upon by the organization.

Possible Options:

In the absence of a clear national policy on B/RWSA registration, the following Registering Agencies could be presented as options:

- Securities and Exchange Commission а
- b. Bureau of Rural Workers
- c. Local Waterworks Utilities Administration
- d. Department of Social Welfare and Development
- c. Cooperatives Development Authority

Accreditation of BWSA/RWSA is done through the municipal local government unit.

29. FORMAL EXIT OF THE CO WORKER

Facilitator

RWSA Officer

Co-facilitator

CO worker

Suggested Strategy

Hold a community meeting

Agenda

Assessment of CO Exit Plan

Planning for the operation and management of water

facility

Scheduling of CO visits

Scheduling of RWSA/BWSA and CO formal linking

with other organizations and agencies

Formal turn-over of CO responsibility to RWSA/BWSA

At the end of the Consolidation Phase, the following milestones are achieved:

Facility is turned-over he RWSA/BWSA and is functioning as intended and has it set of officers, constitution and by-laws and policies

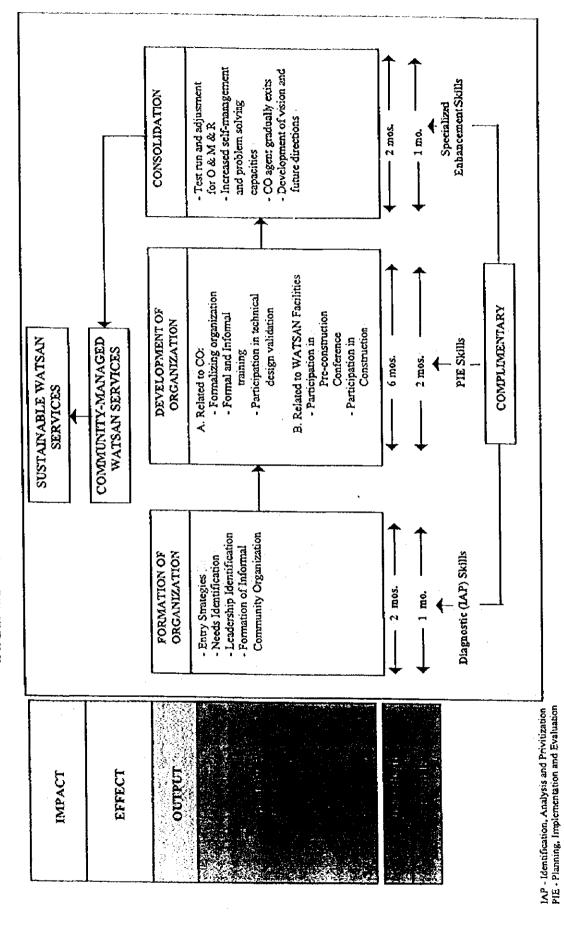

Plan for operation, maintenance and repair of system is installed

At the end of the community organizing process, the degree of capability of RWSA/BWSA in the operation and maintenance of water supply facility and maintaining their organizational health can be gauged on the extent of participation of the members in resolving problems and making decisions. The extent of focus of team building and leadership inputs is crucial in how the members of the RWSAs/BWSAs are willing to make amend allow some compromises among each other. On the other hand, the technical soundness of the design and execution of the construction ensures the long-term sustainability of the system.

By this time, the CO has exited but maintains monitoring visits until he/she is fully confident that the organization is strong enough to take decisions, plan and implement their WATSAN related activities and knows where to access support (in terms of financial, institutional and technical) when needed.
