2) Deletion

When Basic Information is deleted, do 3).

When Bonded Storage Operator is deleted, do 4).

When Bonded Storage is deleted, do 5).

When Duty Free Shop is deleted, do 6).

i) Confirmation

Display a response-requiring message (Message ID: R0000003).

ii) Deletion

Delete record from the database.

iii) Output

Display a normal message if succeeded (Message ID: N0000004). Display an error message if did not succeeded (see Table 3.3-2).

3) Deletion Basic Information

i) Retrieve

Retrieve the Basic Information from the database. Display the Basic Information on the Deletion Window 2. Table 3.3-6 shows details of the items on the window.

ii) Confirmation

Display a response-requiring message (Message ID: R0000003).

iii) Deletion

Delete the record from the database. Table names of the database are shown in Table 3.3-6.

iv) Output

Return to Deletion Window 1 with displaying corresponding items in the window.

4) Deletion Bonded Storage Operator

i) Retrieve

Retrieve the Operator Information from the database. Display the Operator Information on the Deletion Window 3. Table 3.3-7 shows details of the items on the window.

ii) Confirmation

Display a response-requiring message (Message ID: R0000003).

iii)Deletion

Delete the record from the database. Table names of the database are shown in Table 3.3-7.

iv)Output

Return to Deletion Window 1 with displaying corresponding items in the window.

5) Deletion Bonded Storage

    i) Retrieve

    Retrieve the Bonded Storage Information from the database. Display the Bonded Storage Information on the Deletion Window 4. Table 3.3-8 shows details of the items on the window.

    ii) Confirmation

    Display a response-requiring message (Message ID: R0000003).

    iii) Deletion

    Delete the record from the database. Table names of the database are shown in Table 3.3-8.

    iv) Output

    Return to Retrieval Window.

6) Deletion Duty Free Shop

    i) Retrieval

    Retrieve the Duty Free Shop Information from the database. Display the Duty Free Shop Information on the Deletion Window 5. Table 3.3-9 shows details of the items on the window.

    ii) Input

    When Decree of Duty Free Shop is deleted, do 7).

    When Location of Duty Free Shop is deleted, do 8).

    v) Output

    Return to the Deletion Window 5 with displaying corresponding items in the window.

7) Decree of Duty Free Shop

    i) Retrieval

    Retrieve the Duty Free Shop Information from the database. Display the Duty Free Shop Information on the Deletion Window 6. Table 3.3-10 shows details of the items on the window.

    ii) Confirmation

    Display a response-requiring message (Message ID: R0000003).

    iii) Deletion

    Delete the record from the database. Table names of the database are shown in Table 3.3-10.

    iv) Output

    Return to the Deletion Window 5 with displaying corresponding items in the window.

8) Location of Duty Free Shop

i) Retrieve

Retrieve the Location of Duty Free Shop Information from the database. Display the Location of Duty Free Shop Information on the Deletion Window 7. Table 3.3-11 shows details of the items on the window.

ii) Confirmation

Display a response-requiring message (Message ID: R0000003).

iii) Deletion

Delete the record from the database. Table names of the database are shown in Table 3.3-11.

iv) Output

Return to the Deletion Window 5 with displaying corresponding items in the window.

3.4 Bonded Storage Retrieval

Volume II Figure 2.3.2-5 and Table 2.3.2-5 show the outline of Bonded Storage Retrieval Process. As a result of System Design, the process is designed as below. Volume III Appendix A is referred to understand how to view figures and tables.

- Process Procedure

  1) Retrieval of Basic Information, Bonded Storage Operator, Bonded Storage and Duty Free Shop

     i) Input

        Read data from the Retrieval Window. Table 3.4-3 shows details of data items on the window.

     ii) Input Check

        Check value of inputted data by following Table 3.4-4.

     iii) Retrieval for List Retrieval Window

        Table names of the database are shown in Table 3.4-3.

        When keys other than Decree number are inputted on the Retrieval Window, retrieve data from the database under the inputted condition.

     iv) Confirmation

        When the number of records that match the retrieval condition is between 10 to 99,999, display a response-requiring message (Message ID: R0000004).

     v) Output of List Retrieval Window

        Output of the List Retrieval Window as follows:

        - When Decree Type is PKB, PGB, PKB also PDKB or PGB also PPGB

          When keys other than Decree Number are inputted on Retrieval Window, edit retrieved data and display the List Retrieval Window 1 by descending order of Date of Decree Number. Table 3.4-5 shows details of data items on the window.

        - When Decree type is Duty Free Shop

          When keys other than Decree Number are inputted on Retrieval Window, edit retrieved data and display the List Retrieval Window 2 by descending order of Date of Decree Number. Table 3.4-6 shows details of data items on the window.

     vi) Retrieval for Retrieval Result Window

        - When Decree Type is PKB, PGB, PKB also PDKB or PGB also PPGB

          When Decree Number is inputted on Retrieval Window, or when one Decree is selected from the List Retrieval Window 1, retrieve data from the database and code tables.

- When Decree type is Duty Free Shop

  When Decree Number is inputted on Retrieval Window, or when one Decree is selected from the List Retrieval Window 2, retrieve data from the database and code tables.

- Decree type is PPGB or PDGB

  When Decree Number is inputted on the Retrieval Window, retrieve data from the database and code tables.

Table 3.4-1 shows list and location of codes to be used.

Table 3.4-1: List of codes

Code	Location of Table	Note
Identity Type Code	Client	Used for NPWP Type
NPWP 12 Digit	Server	—
NPWP 10 Digit	Server	—
Management in Charge Code	Client	—
Bonded Storage Type Code	Client	Used for Bonded Type
Duty Free Shop type Code	Client	Used for Type of DFS
Province Code	Client	—

vii) Output of Retrieval Result Window

- Decree Type is PKB, PGB, PKB also PDKB or PGB also PPGB

  When Decree Number is inputted on the Retrieval Window, or when one Decree Number is selected from the List Retrieval Window 1, edit retrieved data and display the Retrieval Result Window 1. Table 3.4-7 shows details of data items on the window.

- Decree Type is PDKB or PPGB

  When Decree Number is inputted on the Retrieval Window, edit retrieved data and display the Retrieval Result Window 2. Table 3.4-8 shows details of data items on the window.

- Decree type is Duty Free Shop

  When Decree Number is inputted on the Retrieval Window, or when one Decree Number is selected from the List Retrieval Window 3, edit retrieved data and display the Retrieval Result Window. Table 3.4-9 shows details of data items on the window.

- Window Layout / Report Layout
  - Windows
    - Retrieval Window   Figure 3.4-1
    - List Retrieval Window 1   Figure 3.4-2

   ▫ Reports

      None.

- Error Procedure

Display an error message following Table 3.4-2.

Table 3.4-2: Error Procedure

Case	Error Contents	Message ID	Note
1)-ii)	An error is detected at Input Check.	See Table 3.4-4	—
1)-iii), 1)-vi)	SQL retuened an error code.	E0000001	Fill in the blank part of the message text with the error code.
1)-iii), 1)-vi)	The record to be retrieved does not exist.	E0000002	—
1)-iv)	The number of records that match the retrieval condition exceeded 99,999.	E0000013	—
1-vi)	The code to be retrieved does not exist in the code table.	E0000008	—

- Restriction

None.
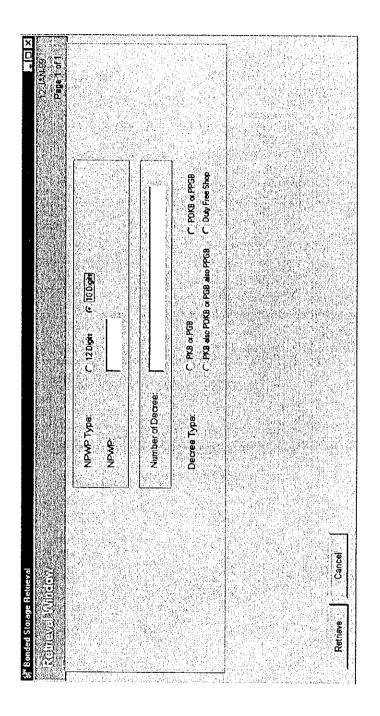

- Note

For details of each message, see Volume II 1.4.
