EDUCATION
INDICATORS

1996/97

About “Education Indicators, 1996-97”

What it is about

The “**Education Indicators, 1996/97**” is a collection of statistical information which provides benchmarks on the school system of Cambodia for the school year 1996-1997. It provides selected indicators on enrollment, repetition, promotion, transition and other rates that have a direct bearing on the quality of education. The statistical indicators provide the status of educational development for the whole kingdom as well as for each province.

What it is for

The “**Education Indicators, 1996/97**” is primarily intended for professionals, administrators, and managers at various levels of MoEYS and users among different organizations. It provides school information that are specifically related to **the problems of access to education, the internal efficiency and quality improvement of basic and general education in Cambodia for the school year 1996-1997**. It provides essential and identical information to all administrators at various levels to make effective decisions in policy planning and management for education development.

How it was collected

The Planning and Aid Coordination Unit (PACU) developed a 4-page “Annual School Census Form” and distributed to all schools throughout the country via the Provincial and District Education Service Offices. The School Principals took the responsibility to complete the forms and the District and Provincial Offices checked the data and sent them back to PACU.

Separate survey forms were used to collect information for Teacher Training, Higher and Technical Education and Nonformal Education. This information will be processed and disseminated separately.

How it was processed

The EMIS Center (Education Management Information Center) at PACU received, checked, collated, edited and coded all forms manually before data were entered into the computer. Specially prepared computer programs checked errors and accepted data that were logically correct. Forms were sent back to the previous step down the line if data were not complete, sometimes to the provinces to check with the schools.

The national staff trained in data processing and computer technology operates the EMIS Center. The Center is equipped with Ethernet LAN with a number of workstations, and uses Visual dBase 5.5 for database, SPSS 6 for analysis, and EXCEL 7 software for producing information.

The EMIS Center is jointly supported by UNICEF and the UNDP/UNESCO Project. UNICEF provided a fully furnished building for EMIS Center.

Selection of Indicators

Statistical indicators were selected from an array of standard educational indicators used by UNESCO and related agencies for measurement in educational development. The selection of indicators were based as much as possible on the usability in monitoring and evaluating the educational goals and targets set by the Ministry of Education, Youth and Sports. Any other indicator or set of indicators that need to be used for specific purposes may be developed from “**Education Statistics, 1996/97**” (issued separately) or by administering specific surveys.

How it is disseminated

The “**Education Indicators, 1996/97**” is disseminated by the PACU to all Education departments at the Central, Provincial and District levels for their planning, monitoring and evaluation purposes. A limited number of copies are made available to education-related ministries and organizations on request.

ACKNOWLEDGEMENT

This is the first attempt in publishing basic school information on Pre-School and General Education in Cambodia. The Principals of the Schools provided the basic school data. The District and Provincial level offices also provided help in securing accurate data.

However, there are two points to take into account: 1) In the absence of the National Census figures, population figures provided by the district educational offices were used. They were estimates from the head count survey in the community. 2) In 1996/97, there was a major change in the schooling period for General Education in Cambodia from eleven to twelve years. As such there were some discrepancies in defining 'promotion' and 'repetition' during this year.

Both these factors effected the quality of information produced in this booklet. It is suggested that caution should be used in interpreting tables like, gross and net enrollment ratios, gross and net admission rates, and the student flow rates.

The UNDP/UNESCO Project, in collaboration with UNICEF, provided technical assistance in developing EMIS and in producing information for management use.

Explanatory notes on Table 1: Schools, Classes, Students and Staff

Number of Schools: Total number of schools in the specified area or with the specified characteristics.

Disadvantaged Schools: A disadvantaged school is defined as the school with all the following 5 conditions:

- (i) at least 50 per cent of its rooms do not have good roof;
- (ii) at least 50 per cent of its rooms do not have good floor;
- (iii) at least 50 per cent of its rooms do not have good wall;
- (iv) does not have drinking water supply; and
- (v) does not have latrine facilities.

Number of Classes: Total number of classes in the schools.

Classes in Pagoda: Total number of classes which are situated in the pagoda compound, irrespective of the location of the schools. The school may be inside or outside the pagoda compound.

Enrollment (Total): Total enrollment of both gender in schools.

Enrollment (Girls): Total female enrollment in schools.

Repeaters (Total): Total repeaters of both gender in schools.

Repeaters (Girls): Total female repeaters in schools.

Teaching staff (Total): Total teaching staff (teachers) of both gender in schools. A principal of the school with all grades for the school cycle is classified as teaching staff whether he/she is teaching or not; but the principal of the school without all grades for the school cycle is classified as teaching staff only if he/she is taking at least 1/3 of the normal teaching load prescribed for a teacher.

Teaching staff (Female): Total female teaching staff (teachers) in schools.

Non-teaching staff (Total): Total non-teaching staff of both gender in schools. Non-teaching staff are the school staff who do not directly involve in regular teaching activities in the classrooms. Some school principals, secretary, surveillant, and home economics, workshop and sports teachers together with the clerks and guards are non-teaching staff of a school.

Non-teaching staff (Female): Total female non-teaching staff in schools.

Urban, Rural, Remote Area: Schools are classified as urban, rural or remote, based on the definitions recognized by the respective district education office (DEO) and provincial education services (PES).

Normally, the schools located in the large towns or cities are classified as urban schools; and those located in isolation, with very difficult communication and transport systems are classified as remote. The rest are rural schools.

Pre-school: Schools under Pre-School and General Education Department, for children aged 3-5 years old.

Primary school: Schools which are providing at least one grade of primary education. It can be an annex school. In Cambodia, primary education comprises of grades 1 through 6.

College: Lower Secondary Schools with grades 7 through 9, but some may not have all grades (Total College=351).

Lycee: Upper Secondary Schools with grade 10 through 12, but some may not have all grades (Lycee without Lower Secondary=7). Some Lycee also have Lower Secondary grades (Lycee with Lower Secondary=99). (7+99=106). (99 can be derived by subtracting 351 from 450).

Lower Secondary Level: Counting only for Lower Secondary level education. Include Lower Secondary grades from all Colleges (Total College=351), and all Lower Secondary grades from Lycee (Lycee with Lower Secondary=99). (351+99=450).

Upper Secondary Level: Counting only for Upper Secondary level education. Include Upper Secondary grades from all Lycee (Total Lycee=106).

Cluster - core school: The core (main) school of a primary school cluster.

Cluster - satellite school: The member school in a primary school cluster but not the core school.

School not in cluster: The primary school which is neither core nor satellite school of a primary school cluster.

Annex school: An annex school is a branch of a school located away from but administered by a parent school. Usually the Vice-Principal or a senior teacher is assigned as "in-charge". Annex schools normally do not have all 6 primary grades and located in different village from their parent school.

School in Pagoda: The schools which are totally located in pagoda compound.

Note: School Census Forms from three remote districts with approximately 40 schools were not received on time for analysis.
