

Plate 9 : Pilot Project in Mersin

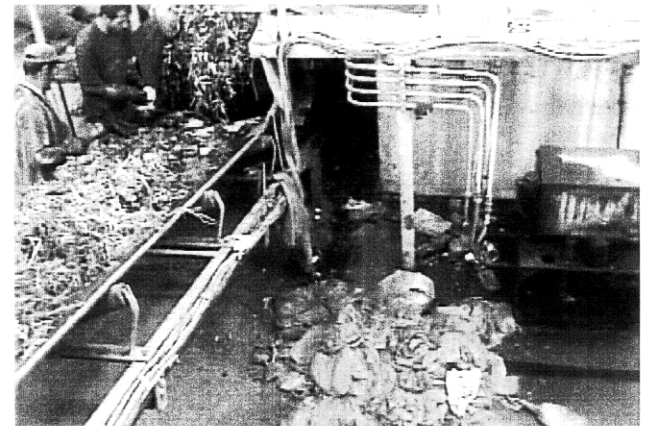

A notice board to gain the co-operation of residents in Guven Sitesi Housing Complex.

Green plastic container for compostable wastes and metallic container for non-compostable wastes for separate collection experiment.

Green plastic bags were distributed to each family in the Guven Sitesi Housing Complex for the discharge of compostable wastes.

Plastic bags used for compostable waste collection were segregated by the workers manually from compostable wastes.

Watering to promote maturation of compost.

Windrows of composting materials which were collected separately in Guven Sitesi.
