CHAPTER 1 INTRODUCTION

The Farm Household Interview Survey (hereinafter referred to as “the Survey”) was carried out in the course of the Feasibility Study on Integrated Agricultural and Rural Development in Highland Area (hereinafter referred to as “the Study”). The period of the Survey was about six weeks from the beginning of October to the middle of November 1999 in the First Stage Fieldwork. The principal objective of the Survey was to clarify the socio-economic conditions of farm households in and around eight model areas, which were the objective Study areas scattered over the highland area in West Java Province. Since the boundary of the irrigable area was delineated afterward in the Second Stage Fieldwork, this Farm Household Interview Survey encompassed the Study area, not only from inside of the irrigable area but also from outside of the irrigable area. All the important outputs from the Survey including the present conditions of farm households and their constraints to the development were examined, and reflected to the basic agricultural development plan. The Survey was executed and managed directly by the Study Team by hiring capable persons for the works of interview survey, checking answered questionnaires and data input to computers.

This Annex consists of three chapters. In Chapter 2, the survey objectives and methodology are presented. All the important survey outcomes, which are supported by a number of data tables, are described in Chapter 3.

CHAPTER 2 SURVEY OBJECTIVES AND METHODOLOGY

2.1 Survey Area

The survey area consisted of eight model areas (1,069 ha in total) located in five districts of West Java Province as shown below^{1/}:

<u>Model Area</u>	<u>Size of Area</u>	<u>District</u>
1) Mekarjaya	100 ha	Bandung district
2) Langensari	72 ha	Bandung district
3) Tugumukti	50 ha	Bandung district
4) Gekbrong	50 ha	Cianjur district
5) Cisurupan	300 ha	Garut district
6) Tanjungkarya	80 ha	Garut district
7) Mekarmukti	167 ha	Sumedang district
8) Cisantana	250 ha	Kuningan district

2.2 Survey Objectives

The objective of the Survey was to clarify the current socio-economic conditions of farm households in each model area. The important survey items were as follows:

- Demographic conditions (population by age, sex, education, occupation, absentees, etc.)
- Involvement in farmers' organizations
- Living conditions (availability of drinking water and major source of fuel for cooking, etc.)
- Food availability conditions
- Land holding status
- Conditions of land tenure
- Cropping patterns and intensities
- Income and expenditures
- Saving status

^{1/} These areas presented here are the ones stated in S/W. However, some of these figures have been changed after the field survey made based on aerial photographs (shot October-November 1999 period).

2.3 Survey Methodology

2.3.1 Organization of Survey Team

The survey team was organized under the Study Team. It consisted of 4 group leaders, 15 enumerators, and five computer operators. For the field interview survey, four groups were organized by dividing 15 enumerators. The interview survey using questionnaires was carried out by the enumerators. The group leaders, at the field level, checked up all answers collected by the enumerators in the questionnaires. After the check, the questionnaires with answers were sent to a head office of the survey team in Bandung. In the head office, the computer operators took responsibility for data input, data cleaning, and data processing using computers. The team leader who was in charge of Rural Society/ Farmers' Organization in the Study Team supervised all the above survey activities and carried out the final tabulation based on the processed data.

2.3.2 Sample Size and Sampling Method

The total sample size was 500, although it has finally become 514. This sample size was decided considering the available time and manpower allocated to the Survey. The distribution of samples in each model area is determined taking into account the size of each model area and average land holding size of farmers which was confirmed based on the secondary data. The final figures of the sample size in each model area are as shown below:

- Mekarjaya:	51 samples
- Langensari:	36 samples
- Tugumukti:	36 samples
- Gekbrong:	32 samples
- Cisurupan:	107 samples
- Tanjungkarya:	35 samples
- Mekarmukti:	107 samples
<u>- Cisantana:</u>	<u>110 samples</u>
Total	514 samples

The samples were randomly selected from among the farm households in the model areas either they were owner, tenant or farm labor households. The sampling was made based on villagers' lists available in the related village offices or BPPs to the respective model areas. Absentee landowner households who live in city or town were not the subjects of the Survey.

The survey was conducted through interviews to a head of each sample household

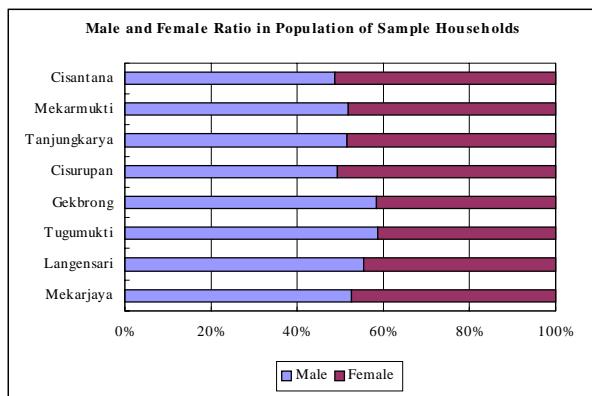

using the questionnaire translated into Indonesian. The questionnaire (English version) used in the household survey is attached to the last part of this Annex as “Survey Questionnaire”.

CHAPTER 3 SURVEY RESULTS

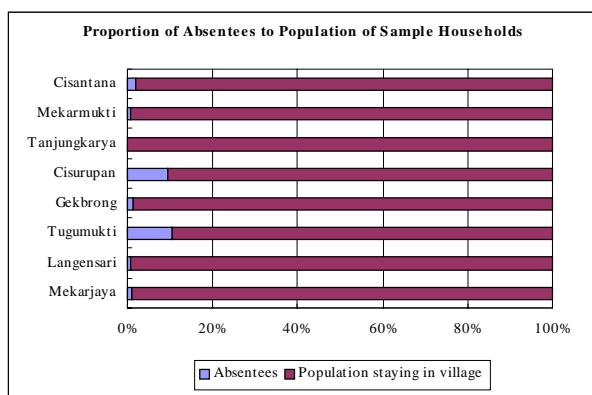

3.1 Demographic Conditions

The data on the demographic conditions are compiled in Tables from IV-1 to IV-12. The important outputs from the analyses made on these data are as follows.

- a) As for male and female ratio, the male population is larger than the female population in six model areas, although they are nearly balanced. Female population is larger than male in two model areas of Cisurupan and Cisantana (see the figure on the right).

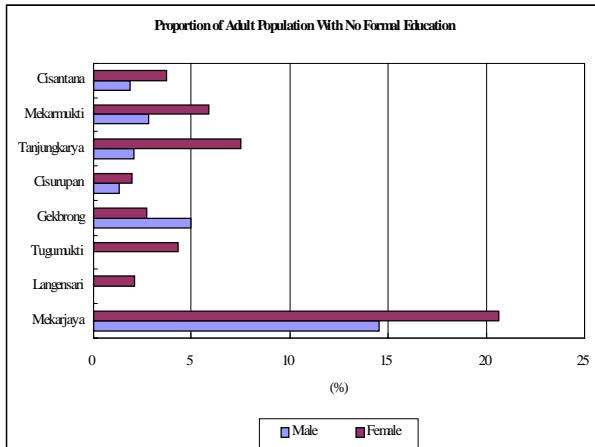

- b) The proportion of absentees who are absent in the village for more than four months in a year is comparatively low at less than 1% in Mekarjaya, Langensari, Tanjungkarya and Mekarmukti. However, the proportion is comparatively high in Tugumukti (10%) and Cisurupan (9%). Most of them are absent due probably to schooling reasons, because education level is comparatively high in these two model areas (see the figure above).

- c) The education level of adult population (over 18 years old) is low in Mekarjaya, Gekbrong, and Tanjungkarya. In these model areas, the adult population classified into “no formal education” and “not complete primary school” is about 30%, 23% and 27%, respectively. On the other hand, the education level is comparatively high in Tugumukti, Cisurupan and Cisantana. In these model areas, the adult population classified as “high school graduates” and “educated more than high school” is about 20%, respectively.

As for the education levels of males and females, the males' level is higher than the females' in model areas with the exception of Gekbrong in terms of proportion of adult population without formal education (see the figure on the right).

- d) Occupational status of the economically active population (15-60 years old) is summarized in the table below. As seen in the table, about 40-70% of the population is a farmer (operator) in the model areas. The proportion of farm labors is the highest in Gekbrong (25%) and the lowest in Mekarmukti (2%). This result reveals that the most of farming works are conducted by family labors in the latter area, which belongs to paddy production area. The proportion of economically active population in private business (e.g. shop managers and middlemen) is generally low in the model areas, except for Tanjungkarya (10%) and Langensari (8%).

Percentage Distribution of Economically Active Population by Occupation

Model Area	Farmer (%)	Wage Labor On-farm (%)	Wage Labor Off-farm (%)	Salary Worker (%)	Private Business (%)	Others (%)	Farmer + Wage L. On-farm (%)	Total (%)
1. Mekarjaya	41.5	17.6	2.1	6.3	2.1	30.3	(59.2)	100.0
2. Langensari	48.7	7.0	5.2	1.7	7.8	29.6	(55.7)	100.0
3. Tugumukti	41.1	15.9	2.8	0.9	5.6	33.6	(57.0)	100.0
4. Gekbrong	45.7	25.0	1.1	3.3	5.4	19.6	(70.7)	100.0
5. Cisurupan	38.5	13.2	2.6	6.9	4.0	34.8	(51.7)	100.0
6. Tanjungkarya	47.7	10.3	1.9	0.9	10.3	29.0	(57.9)	100.0
7. Mekarmukti	71.5	1.5	4.6	4.9	3.4	14.1	(73.0)	100.0
8. Cisantana	61.9	3.6	1.5	7.1	2.4	23.5	(65.5)	100.0
Total or Average	51.8	9.7	2.7	5.1	4.3	26.4	(61.5)	100.0

3.2 Estimated Population and Households in Model Areas

Based on the data on the demographic conditions and the land holding status, the population and households in each model area are estimated as shown in the table below. The total population is about 9,700 persons. The model areas with comparatively larger population are Mekarjaya, Cisurupan, Mekarmukti and Cisantana. The total number of households in 8 model areas is 2,200, and an average size of household is about 4.4 persons.

Population, Households and Average Size of Household in Model Areas

Model Area	Study Area (ha)	Population				Total H'hold (No.)	Ave. Size of H'hold (persons)		
		Male		Female					
		(persons)	(%)	(persons)	(%)				
1. Mekarjaya	160	716	52.5	646	47.5	1,362	320		
2. Langensari	110	388	55.4	313	44.6	700	150		
3. Tugumukti	80	106	58.6	74	41.4	180	40		
4. Gekbrong	80	110	58.3	79	41.7	189	40		
5. Cisurupan	190	889	49.2	916	50.8	1,805	370		
6. Tanjungkarya	130	412	51.5	388	48.5	800	140		
7. Mekarmukti	270	873	52.1	804	47.9	1,677	460		
8. Cisantana	330	1,455	48.6	1,537	51.4	2,992	690		
Total or Average	1,350	4,948	51.0	4,757	49.0	9,705	2,210		
							4.39		

Source: Farm Household Interview Survey, JICA Study Team (October - November 1999)

3.3 Participation in Farmers' Organizations

The data on the organizational membership of the households are compiled in Tables from IV-13 to IV-22. The important outcomes from the analyses are described below.

3.3.1 Organizations Surveyed

The organizations surveyed are listed as follows:

- Farmer group which is a unit of extension and credit services,
- KUD which is a multipurpose primary agricultural cooperative usually located at Sub district level covering some 10 to 20 villages,
- Women's Association (PKK) which is an organization nation-wide in its scope. At village level, PKK supports women's health and hygiene betterment,
- Religious organization which supports Islamite at village level,
- Young farmer group which is a farmer group for youth,
- Farm water users association (WUA) which is an organization responsible for operation and maintenance of irrigation facility, and
- Other organizations.

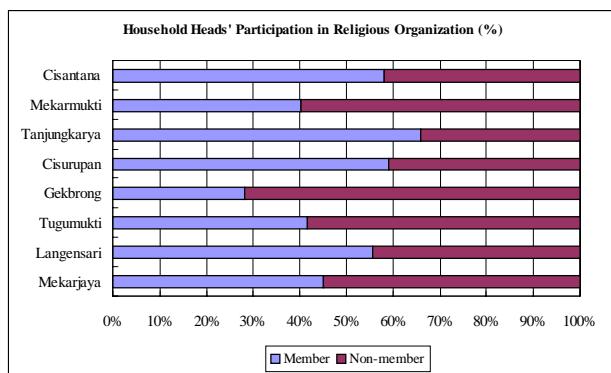

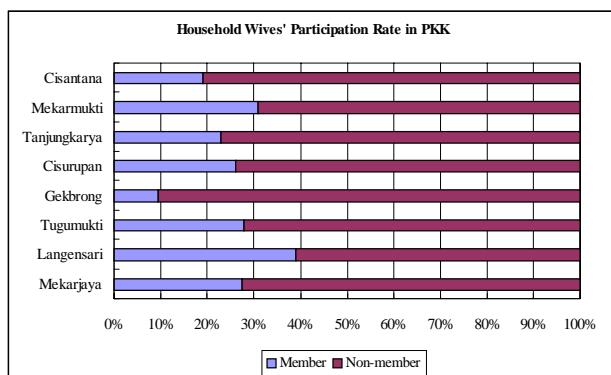

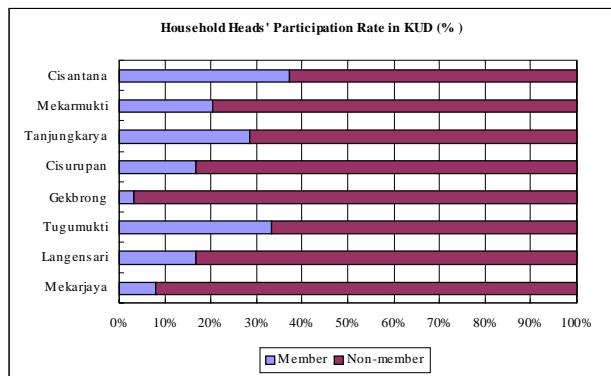

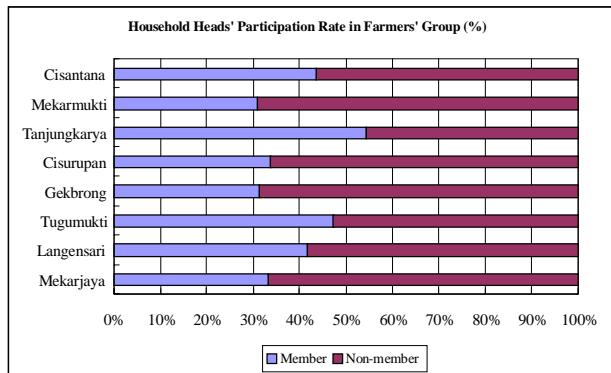

3.3.2 Participation rate in Farmers' Organizations

As for the farmer group, the participation rate of household heads is the highest at 54% in Tanjungkarya, and the lowest at 31% in Mekarmukti (see the figure on the right). In case of wives, the participation rate to the farmer group is generally low in model areas, and about 10% even in the model areas showing comparatively higher rates (Tugumukti, Tanjungkarya and Cisantana).

As for KUD, the participation rate of household heads is comparatively high in Tugumukti (33%) and Cisantana (37%), and lower in Gekbrong (3%) and Mekarjaya (8%) (see the figure on the right). In case of wives, the participation rate is less than 10% in all the model areas.

As for PKK, the participation rate of wives is the highest at 39% in Langensari, and the lowest at 9% in Gekbrong (see the figure on the right).

As for religious organization, the participation rates are comparatively high both for the household heads and wives in the model areas ranging from 30% to 60%, except for Gekbrong. In Gekbrong, the rate is about 28% for the household heads and 25% for the wives (see the figure on the right for the household heads).

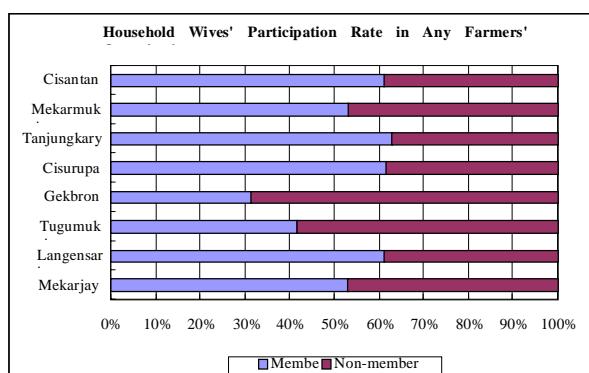

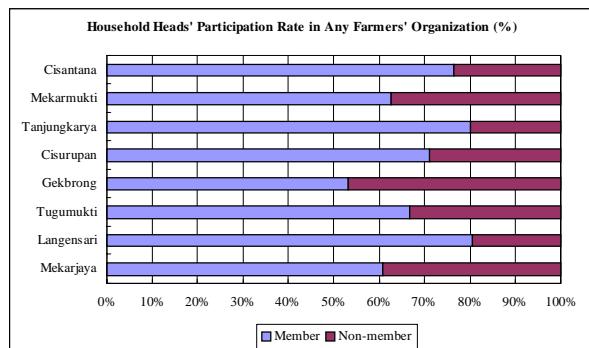

As for WUA and young farmer group, the participation rates are low in all the model areas both for the household heads and their wives.

In addition, the proportion of household heads who do not participate to any farmers' organization is analyzed as shown in the figure on the right.

In the same manner, the proportion of wives who do not participate to any farmers' organizations is also analyzed as shown in the figure on the right.

The proportion of household heads who do not participate to any farmers' organizations is the highest at 47% in Gekbrong followed by Mekarjaya (39%) and Mekarmukti (37%). In case of the household wives, the proportion is the highest at 69% in Gekbrong followed by Tugumukti (58%) and Mekarjaya (47%). It could be concluded that the organizational activities are inactive in these model areas (i.e. Gekbrong, Mekarjaya, Mekarmukti and Tugumukti). It might be necessary to consider such conditions in the project planning of the farmers' organizations.

3.4 Living Conditions

The data related to the living conditions are compiled in Tables from IV-23 to IV-39. The important outputs from the analyses made on these data are described below.

3.4.1 Availability of Drinking Water

The survey results reveal the major sources of domestic water in the model areas are as follows (each parenthesis shows the percentage of households by water source in the dry season).

- a) Mekarjaya: Spring (41%) and wells (29%)
- b) Langensari: Wells (50%) and piped gravity (25%)

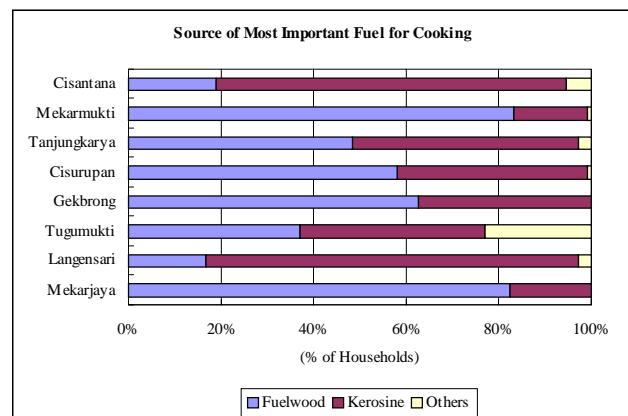

- c) Tugumukti: Spring (67%) and piped gravity (33%)
- d) Gekbrong: Piped gravity (75%) and spring (25%)
- e) Cisurupan: Piped gravity (50%) and spring (26%)
- f) Tanjungkarya: Piped gravity (69%) and spring (14%)
- g) Mekarmukti: Piped gravity (78%) and spring (16%)
- h) Cisantana: Piped gravity (97%)

The domestic water supply is short in Gekbrong for about 47% of households in the dry season. In other model areas, such shortage occurs for about 10% to 20% of the households.

3.4.2 Fuel for Cooking

The major source of fuel for cooking in each model area is presented in the figure on the right.

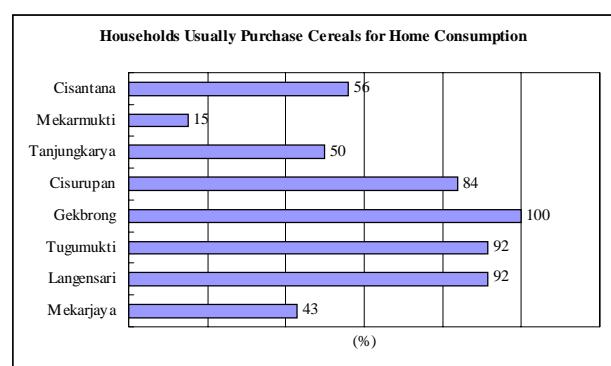

Fuel wood is the most important source for more than 80% of the households in Mekarjaya and Mekarmukti. On the other hand, kerosine is the most important source for more than 70% of the households in Langensari and Cisantana.

3.4.3 Degree of Food Self-sufficiency

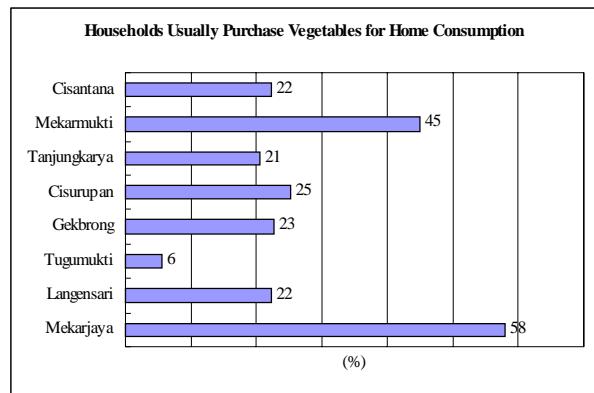

The degree of food self-sufficiency in the households was surveyed for five food items, i.e. cereals, vegetables, roots and tubers, meat, and fishes.

As for cereals, the proportion of households always purchasing for home consumption is considerably high at more than 90% in Langensari, Tugumukti and Gekbrong. These model areas are belonging to the vegetable production area. On the other hand, this proportion is comparatively low in Mekarmukti which belongs to the paddy production area

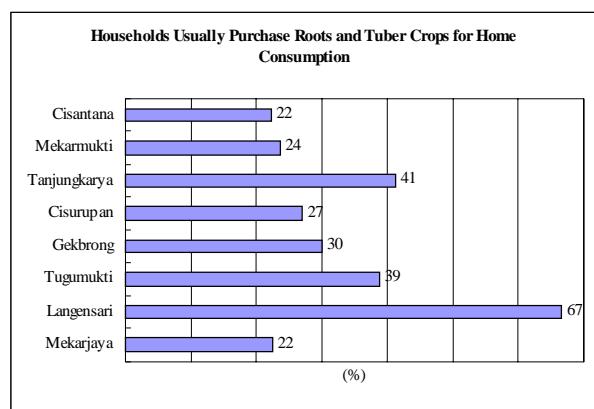

(see the figure above).

As for vegetables, the proportion of households always purchasing for home consumption is comparatively high in Mekarjaya and Mekarmukti. However, the proportion is comparatively low in other areas (see the figure on the right).

As for roots and tubers, the proportion of households always purchasing for home consumption is extremely high in Langensari. In this area, the farmers may be dislike to cultivate low profitable crops such as roots and tubers in their small farmland. In other areas, this proportion is ranging from 22% to 41% (see the figure on the right).

As for meat, there are small differences among the model areas, and more than 90% of the households are always purchasing. As for fishes, about 80-100% of households are always purchasing, with the exception of Tanjungkarya where water availability for fishponds is better than other model areas.

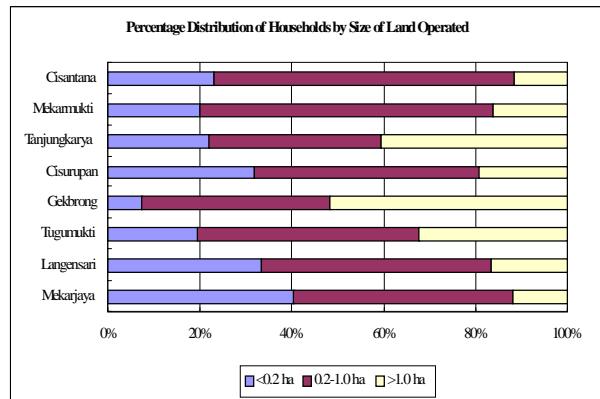

3.5 Land Holding and Land Tenure

The data related to the land holding and land tenurial status are compiled in Tables from IV-40 to IV-59. The important outputs from the analyses made on these data are described below.

3.5.1 Land Holding Size

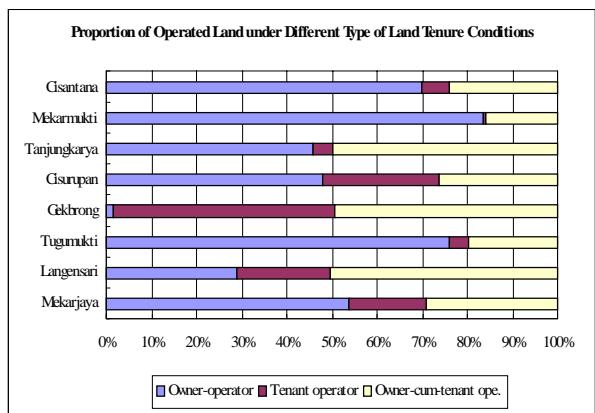

The average size of land operated per household differs among the model areas. It is comparatively large in Tugumukti (0.87 ha), and Gekbrong (0.42 ha) . The proportion of small land operators is comparatively high in Mekarjaya, Langensari and Cisurupan. In these model areas, more than 30% of the households operate small land less than 0.2 ha. On the other hand, the proportion of large land

operators whose lands are more than 1 ha is comparatively high in Gekbrong, Tanjungkarya and Tugumukti. The typical land holding size (median of distribution) is 0.12 ha (Mekarjaya) to 0.37 ha (Gekbrong).

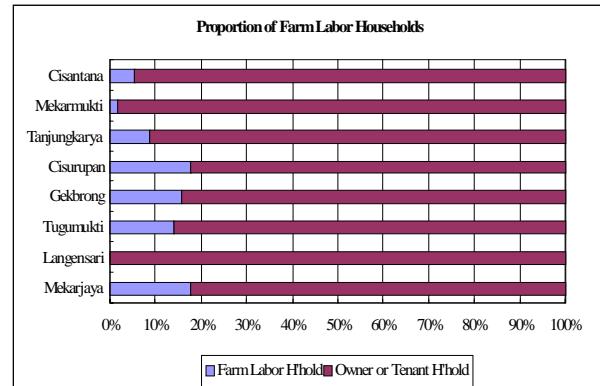

3.5.2 Land Tenure

The households in each model area are classified into “owner operators”, “tenant operators”, “owner-cum-tenant operators” and “owner-non-operators (who are land owners, but non-operators)”. As seen in the figure on the right, the proportion of owner operators is comparatively high in five model areas, i.e. Mekarjaya (57%), Tugumukti (65%), Tanjungkarya (56%), Mekarmukti (85%) and Cisantana (73%). As a matter of course, the proportion of tenant operators is comparatively low in Mekarmukti (2%) and Tanjungkarya (9%). The proportion of tenant operators is extremely high at 56% in Gekbrong in which the proportion of owner operators is only 7%. The proportion of tenant operators is comparatively high in Mekarjaya, Langensari, Tugumukti and Cisurupan. In these areas, however, existence of owner-non-operators was not confirmed except in Cisurupan. This result may indicate that a certain proportion of lands is owned by city landowners who invested in land in vegetable production areas. It is said that the proportion of land owned by such city landowners is considerably large in Langensari, Tugumukti and Gekbrong.

The farmland classified in terms of its tenurial status is presented in the figure on the right. As seen in the figure, more than 70% of farmland is operated by owner operators in Tugumukti, Mekarmukti and Cisantana. On the other hand, farmland operated by tenant operators is extremely high at 49% in Gekbrong. However, such proportion is comparatively low in other areas.

The existence of farm labor households was also clarified in the farm household interview survey. According to the survey results, the proportion of farm labor households is comparatively high at about 18% both in Mekarjaya and Cisurupan. Such proportion is comparatively low in Mekarmukti (2%) and Langensari (0%).

3.6 Cropping Pattern

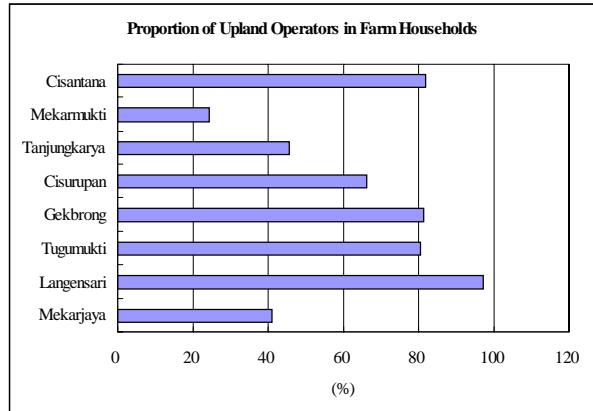

The data on cropping patterns are compiled in Tables from IV-60 to IV-66. The major outputs from the analyses made on these data are as follows.

3.6.1 Proportion of Upland Operators

The proportion of farmers who operate the upland differs among the model areas ranging from 97% in Langensari to 24% in Mekarmukti (see the figure on the right).

Non-upland operators may operate rainfed paddy and/or irrigated paddy lands. This

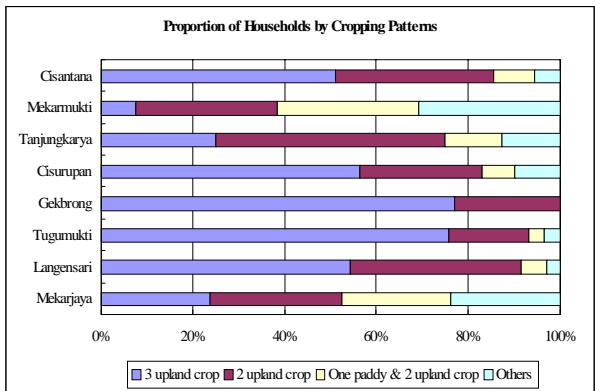

reveals that the considerable proportion of the target group of Mekarjaya, Tanjungkarya and Mekarmukti is paddy cultivators whose technology for vegetable cultivation is not always high. Such aspects have to be taken into account in the project planning.

3.6.2 Cropping Pattern in Upland

The cropping patterns practiced by the farmers in the upland are presented in the figure shown below.

As seen in the figure, a considerable proportion of farmers practices three cropping a year in Langensari, Tugumukti, Gekbrong, Cisurupan and Cisantana. On the other hand, upland paddy, which productivity is generally low, is cultivated with a considerable proportion in Mekarjaya and Mekarmukti in the upland.

Tables

Table IV-1 Total Household Members by Sex and Household Heads by Sex

Model Area	Total No. of H'hold Members (FN9)						Sex of H'hold Members (SEX)						Ave. Size of H'hold (person)	Sex of H'hold Heads (SEX)			
	Sample H'hold (No.)	Respon-dent (No.)	Total (person)	Max. (person)	Min. (person)	Ave. (person)	Male (person)	Female (person)	Total Population (person)	Male (%)	Female (%)	Sex Ratio (M/F)		Male (person)	Female (person)	Total Population (person)	Female HH Head (%)
1. Mekarjaya	51	51	217	8	2	4.25	114	103	217	52.53	47.47	110.7	4.25	44	7	51	13.73

Code for Non-Cultivation

1. Labor shortage 4. Others

2. Working capital shortage

3. Water shortage

Survey Questionnaire

FARM HOUSEHOLD INTERVIEW SURVEY**M D Y**Date : ____ / ____ / ____ (*FN1*)Enumerator : ____ (*EN2*) G.Leaders : ____ (*EN3*)Model Area (see Code) : ____ (*FN4*)Code for Model Area

- | | | | |
|----------------|---------------|---------------|---------------|
| 1. Tugumukti | 2. Langensari | 3. Mekarjaya | 4. Gekbrong |
| 5. Tanjunkarya | 6. Chisurupan | 7. Mekarmukti | 8. Chisantana |

Name of Sub-village : ____ (*FN5*)

(Group Leader shall prepare a map which shows the location of Sub-village in the village map.)

SECTION I GENERAL INFORMATIONI-1 Name of interviewee: ____ (*FN6*), Sex: (M / F): ____ (*FN7*), Age : ____ (*FN8*)

(He or she should be a head of household. In case that he/she is out of the village, other person who knows the household economic and production status can be an interviewee.)

I-2 Total number of household members ____ (*FN9*) persons

(Temporal absentees who are out of house are included. Therefore, this number of persons should be the same with that in I-3.)

I-3 Household members in the same house including the interviewee and temporal absentees.

<u>SEX</u>	<u>AGE</u>	<u>EDU</u>	<u>FARM</u>	<u>OCC</u>	<u>PA</u>	
Sex	Age	Education (see Code) (Y / N)	Farming #1 (see Code)	Main Occupation	Present / Absent #2	
1. M / F			Y / N		P / A	Head
(A household member of No. 1 should be a household head even he/she is out of village.)						
2. M / F			Y / N		P / A	
3. M / F			Y / N		P / A	
4. M / F			Y / N		P / A	
5. M / F			Y / N		P / A	
6. M / F			Y / N		P / A	
7. M / F			Y / N		P / A	
8. M / F			Y / N		P / A	
9. M / F			Y / N		P / A	
10. M / F			Y / N		P / A	

Note: #1: Asking whether or not he/she engages in farming (including livestock raising, and fishing).

#2: "P" means he / she live in the house throughout the year.

"A" means he / she live in other places more than four months in a year.

Code for education:Code for occupation:For Adult (over 18 years)

- | | |
|--------------------------------------|---|
| 1. No formal education | 1. Farmer (owner/tenant) |
| 2. Drop-out SD. | 2. Wage labor on farm |
| 3. Graduate SD | 3. Wage labor other than farm |
| 4. Drop-out SMP | 4. Salary worker |
| 5. Graduate SMP | 5. Private business |
| 6. Drop-out SMA | 6. House activities (cooking, child care, etc.) |
| 7. Graduate SMA | 7. Student |
| 8. More than SMA | 8. No job |
| <u>For children (below 18 years)</u> | |
| 9. Presently in school | (below school age) |
| 10. No schooling | 10. Others |

11. Before schooling age

I-4 Is the Household Head a member of Village Organization below? (Y / N) (*no input*)

- | | |
|--|------------------------------|
| 1. Member of Kelompok Tani | <u>Y / N</u> (<i>FN10</i>) |
| 2. Member of Water Users Group | <u>Y / N</u> (<i>FN11</i>) |
| 3. Member of KUD | <u>Y / N</u> (<i>FN12</i>) |
| 4. Member of PKK | <u>Y / N</u> (<i>FN13</i>) |
| 5. Member of Religious Organization | <u>Y / N</u> (<i>FN14</i>) |
| 6. Member of Youth Organization | <u>Y / N</u> (<i>FN15</i>) |
| 7. Member of other users' group
(specify _____) | <u>Y / N</u> (<i>FN16</i>) |
| 8. Non-member | <u>Y / N</u> (<i>FN17</i>) |

I-5 Is the wife of Household Head a member of Village Organization below? (Y / N) (*no input*)

- | | |
|--|------------------------------|
| 1. Member of Kelompok Tani | <u>Y / N</u> (<i>FN18</i>) |
| 2. Member of Water Users Group | <u>Y / N</u> (<i>FN19</i>) |
| 3. Member of KUD | <u>Y / N</u> (<i>FN20</i>) |

| 5. Member of Religious Organization | <u>Y / N</u> (<i>FN22</i>) |
| 6. Member of Youth Organization | <u>Y / N</u> (<i>FN23</i>) |
| 7. Member of other users' group
(specify _____) | <u>Y / N</u> (<i>FN24</i>) |
| 8. Non-member | <u>Y / N</u> (<i>FN25</i>) |

SECTION II LIVING CONDITION

II-1 Drinking Water

	<u>Main Source</u> (Choose one from Code)	<u>Distance (m)</u> (from house to water)	<u>Sufficiency</u> (see Code)
Dry Season	<u>(FN26)</u>	<u>(FN27)</u> meter	<u>(FN28)</u>
Wet Season	<u>(FN29)</u>	<u>(FN30)</u> meter	<u>(FN31)</u>

- Code for source :
- | | |
|------------------------|--------------------|
| 1. Piped gravity water | 5. Well |
| 2. Springs (natural) | 6. Purchased water |
| 3. River | 7. Others |
| 4. Reservoir | |

- Code for sufficiency :
- | | |
|----------------|---------------|
| 1. Sufficient | 3. Short |
| 2. Just enough | 4. Very short |

II-2 Source of fuel for cooking

(Choose up to 2 major fuels in order 1 (most important) and 2 (secondly important))

	<u>Importance (put 1 and 2)</u>	<u>Availability</u> (Choose from Code)
1. Fuelwood	<u>(FN32)</u>	<u>(FN33)</u>
2. Kerosine	<u>(FN34)</u>	<u>(FN35)</u>
3. Charcoal	<u>(FN36)</u>	<u>(FN37)</u>
4. Gas cylinder	<u>(FN38)</u>	<u>(FN39)</u>
5. Others	<u>(FN40)</u>	<u>(FN41)</u>

Code for availability

1. Easy to obtain 3. Very difficult to obtain
2. Difficult to obtain

II-3 Food condition /availability of household (for your own products / harvest in normal year)

	<u>Condition</u> (see Code)
1. Cereals (paddy, maize, etc.)	<u>(FN42)</u>
2. Roots and tuber crops	<u>(FN43)</u>
3. Vegetables (including beans)	<u>(FN44)</u>
4. Meat	<u>(FN45)</u>
5. Fish	<u>(FN46)</u>

Code for condition: 1. Own harvest / product exceeds the household demand.

1. Own harvest / product exceeds the household demand.
 2. Own harvest / product is just enough to meet the household demand.
 3. Purchased (or exchanged) to meet the household demand.

II-4 Availability of facility in your house. (Y / N) (no input)

1. Radio	<u>Y / N</u> (<i>FN47</i>)
2. TV	<u>Y / N</u> (<i>FN48</i>)
3. Bicycle	<u>Y / N</u> (<i>FN49</i>)
4. Motorcycle	<u>Y / N</u> (<i>FN50</i>)
5. Car	<u>Y / N</u> (<i>FN51</i>)
6. Audio	<u>Y / N</u> (<i>FN52</i>)
7. Toilet	<u>Y / N</u> (<i>FN53</i>)

SECTION III LAND HOLDING, TENURE AND CROPPING PATTERN

III-1 Land Holding Status (only for farm land)

	<u>Land Owned by this H'hold (*1)</u>	<u>Land Rented from Others (*2)</u>	<u>Land Leased to Others (*3)</u>	<u>Land Operated</u>
1. Irrigated Sawah	<u>(FN54)</u> bata	<u>(FN55)</u> bata	<u>(FN56)</u> bata	<u>(FN57)</u> bata
2. Rainfed Sawah	<u>(FN58)</u> bata	<u>(FN59)</u> bata	<u>(FN60)</u> bata	<u>(FN61)</u> bata
3. Upland for field crop	<u>(FN62)</u> bata	<u>(FN63)</u> bata	<u>(FN64)</u> bata	<u>(FN65)</u> bata
4. Upland for tree crop	<u>(FN66)</u> bata	<u>(FN67)</u> bata	<u>(FN68)</u> bata	<u>(FN69)</u> bata
5. Total	<u>(FN70)</u> bata	<u>(FN71)</u> bata	<u>(FN72)</u> bata	<u>(FN73)</u> bata

(Note: a/ \cdot 1 ± 2 - 3 = land operated by this household)

(Note: b/ 1 ha = 700 bata or tunbak 1 bata = 0.0014 ha)

(Note: 3/4 ha = 0.750000 area of landbank, 1 ha = 0.0014 ha.)

III-2 Evaluation of Land Holding Status

(Enumerator should evaluate the land holding status of this Household based on the answers of III-1.)

1. This Household operates only “Owned Land”. (Y / N) (*FN74*)
2. This Household operates both “Owned Land” and “Rented Land”. (Y / N) (*FN75*)
3. This Household operates only “Rented Land”. (Y / N) (*FN76*)
4. This Household does not operate any land. (Y / N) (*FN77*)

III-3 Conditions for Land Tenure (This question is to be made only for “Rented Land” operator.)

1. Land rental charge (How or how much do you pay to the owner?)

- 1) In Cash ; Y / N (**FN78**), if yes; 1. Irrigated Sawah; Rp. _____ (**FN79**) _____ /100 bata /year
2. Rainfed Sawah; Rp. _____ (**FN80**) _____ /100 bata /year
3. Upland; Rp. _____ (**FN81**) _____ /100 bata /year

- 2) In Kind ; Y / N (FN82), if yes; 1. Irrigated Sawah; (FN83) % of harvest
 Production cost is paid by (FN84) (see Code)
 2. Rainfed Sawah; (FN85) % of harvest
 Production cost is paid by (FN86) (see Code)
 3. Upland; (FN87) % of harvest
 Production cost is paid by (FN88) (see Code)
 3) Free of charge; Y / N (FN89)
 4) Others; Y / N (FN90), (Specify; _____)

Code for Production Cost paied by: 1. Owner
 2. Tenant
 3. Both Owner and Tenant

2. Who is a decision maker in crop selection in rented land? (choose one from the Code):
 1.Irrigated Sawah (FN91)
 2. Rainfed Sawah (FN92)
 3. Upland (inc. land for tree crop) (FN93)

Code for answer
 1. Land owner
 2. Tenant
 3. Both
 4. Other (specify: _____)

III-4 Cropping Pattern in Your Land Operated (Choose major one pattern from the Code)

- | Land
Operated | | | |
|---|--|--|--|
| 1. Irrigated Sawah | <u>(FN94)</u> | | |
| 2. Rainfed Sawah | <u>(FN95)</u> | | |
| <u>Code for cropping pattern:</u>
(for Sawah) | 1. Paddy-Palawija-Palawija
2. Paddy-Palawija
3. Paddy
4. Palawija-Palawija-Palawija | 5. Palawija-Palawija
6. Paddy-Paddy-Paddy
7. Other | |
| 3. Upland for field crop | <u>(FN96)</u> | | |
| <u>Code for cropping pattern:</u>
(for Upland) | 1. Palwija-Palawija-Palawija
2. Palawija -Palawija
3. Palawija
4. Paddy-Palawija-Palawija | 5. Paddy-Palawija
6. Paddy
7. Other | |

III-5 Cropping Intensity by Land and Crop Season

	Wet Season <u>Cropping</u>	Dry Season I <u>Cropping</u>	Dry Season II <u>Cropping</u>	Total
1. Irrigated Sawah	<u>(FN97)</u> %	<u>(FN98)</u> %	<u>(FN99)</u> %	<u>(FN100)</u> %
2. Rainfed Sawah	<u>(FN101)</u> %	<u>(FN102)</u> %	<u>(FN103)</u> %	<u>(FN104)</u> %
3. Upland for field crop	<u>(FN105)</u> %	<u>(FN106)</u> %	<u>(FN107)</u> %	<u>(FN108)</u> %

III-6 If you do not cultivate 100% in Wet Season, why? : (FN109) (Choose one from the Code)

If you do not cultivate 100% in Dry Season-I and/or -II why? : (FN110) (Choose one from the Code)

- Code for reason:
1. Labor shortage (busy in other work, owner became sick, etc.)
 2. Working capital shortage
 3. Water shortage
 4. Others (specify; _____)

SECTION IV INCOME AND EXPENDITURE

IV-1 Cash income sources of the household and their values
(cash income of all family members in last year)

	(Y / N)	(Amount)
1. Selling paddy/rice	<u>Y / N (FN111)</u>	<u>(FN112)</u> Rp/ Yr
2. Selling vegetables (including beans)	<u>Y / N (FN113)</u>	<u>(FN114)</u> Rp/ Yr
3. Selling fruits	<u>Y / N (FN115)</u>	<u>(FN116)</u> Rp/ Yr
4. Selling flowers	<u>Y / N (FN117)</u>	<u>(FN118)</u> Rp/ Yr
5. Selling livestock/ poultry products	<u>Y / N (FN119)</u>	<u>(FN120)</u> Rp/ Yr
6. Selling fishes	<u>Y / N (FN121)</u>	<u>(FN122)</u> Rp/ Yr
7. Salary from permanent job	<u>Y / N (FN123)</u>	<u>(FN124)</u> Rp/ Yr
8. Wage from temporary job(s) on farm	<u>Y / N (FN125)</u>	<u>(FN126)</u> Rp/ Yr
9. Wage from temporary job(s) out of farm	<u>Y / N (FN127)</u>	<u>(FN128)</u> Rp/ Yr
10. Private business (trading, shop, etc.)	<u>Y / N (FN129)</u>	<u>(FN130)</u> Rp/ Yr
11. Remittance from family members	<u>Y / N (FN131)</u>	<u>(FN132)</u> Rp/ Yr
12. Selling fuelwood	<u>Y / N (FN133)</u>	<u>(FN134)</u> Rp/ Yr
13. Selling of handicraft/cottage industry products	<u>Y / N (FN135)</u>	<u>(FN136)</u> Rp/ Yr
14. Selling forest vegetables/ crops	<u>Y / N (FN137)</u>	<u>(FN138)</u> Rp/ Yr
15. Others	<u>Y / N (FN139)</u>	<u>(FN140)</u> Rp/ Yr
(Specify: _____)		
16. Total		<u>(FN141)</u> Rp/ Yr

IV-2 Crop Production Cost (Please estimate carefully based on the answers.)

(In case of landless labor farmers, this question is not necessary to ask.)

	Wet Season <u>Cropping</u>	Dry Season I <u>Cropping</u>	Dry Season II <u>Cropping</u>	Total
1. Paddy in sawah	Rp. <u>(FN142)</u>	Rp. <u>(FN143)</u>	Rp. <u>(FN144)</u>	Rp. <u>(FN145)</u>
2. Palawija in sawah	Rp. <u>(FN146)</u>	Rp. <u>(FN147)</u>	Rp. <u>(FN148)</u>	Rp. <u>(FN149)</u>
3. Palawija in upland	Rp. <u>(FN150)</u>	Rp. <u>(FN151)</u>	Rp. <u>(FN152)</u>	Rp. <u>(FN153)</u>
4. Paddy in upland	Rp. <u>(FN154)</u>	Rp. <u>(FN155)</u>	Rp. <u>(FN156)</u>	Rp. <u>(FN157)</u>
5. Annual crop in upland	Rp. <u>(FN158)</u>	Rp. <u>(FN159)</u>	Rp. <u>(FN160)</u>	Rp. <u>(FN161)</u>
6. Total	Rp. <u>(FN162)</u>	Rp. <u>(FN163)</u>	Rp. <u>(FN164)</u>	Rp. <u>(FN165)</u>

(Note: a/ Production cost includes fertilizer, labor, draft power, chemicals and seeds.)

(Note: b/ Inputs provided by the family (e.g. family labor, draft power, compost) are not necessary to include.)

IV-3 Expenditure for Consumption

(Ask about expenditure on monthly basis first. After that estimate annual income. Then, the total annual income should be compared with the total cash income above. If the annual expenditure is larger than the annual income, something is wrong in this questionnaire.)

Sample No. _____

1. Food	Rp. <u>(FN166)</u> /month,	Rp. <u>(FN167)</u> /Yr
2. Health	Rp. <u>(FN168)</u> /month,	Rp. <u>(FN169)</u> /Yr
3. Education	Rp. <u>(FN170)</u> /month,	Rp. <u>(FN171)</u> /Yr
4. Clothes	Rp. <u>(FN172)</u> /month,	Rp. <u>(FN173)</u> /Yr
5. Firewood/Kerosene/electricity	Rp. <u>(FN174)</u> /month,	Rp. <u>(FN175)</u> /Yr
6. Transportation	Rp. <u>(FN176)</u> /month,	Rp. <u>(FN177)</u> /Yr
7. PBB	Rp. <u>(FN178)</u> /month,	Rp. <u>(FN179)</u> /Yr
8. Others	Rp. <u>(FN180)</u> /month,	Rp. <u>(FN181)</u> /Yr
9. Total	Rp. <u>(FN182)</u> /month,	Rp. <u>(FN183)</u> /Yr

IV-4 Investment of Productive and Fixed Assets in the last two years

	(Amount)	(Source of Investment; Code)
1. Livestock	Rp. <u>(FN184)</u>	<u>(FN185)</u>
2. Farm machinery/ tools	Rp. <u>(FN186)</u>	<u>(FN187)</u>
3. Housing (building & maintenance)	Rp. <u>(FN188)</u>	<u>(FN189)</u>
4. Private business	Rp. <u>(FN190)</u>	<u>(FN191)</u>
5. Land	Rp. <u>(FN192)</u>	<u>(FN193)</u>
6. Transportation means	Rp. <u>(FN194)</u>	<u>(FN195)</u>
7. Others	Rp. <u>(FN196)</u>	<u>(FN197)</u>

Code for condition:

1. Own money.
2. Borrowed (from formal sources, e.g. bank).
3. Borrowed (from informal sources, e.g. friend, money lenders, etc.).
4. Others

SECTION V CONDITIONS OF FARM LABOR WORKS

V-1 Do you or your family member(s) have wage income from farm labor work? (Y / N) (FN198)
(Please cross-check with the answer in IV-1-8.)

V-2 If "Yes" in V-1, how much do you get?

	(FN199)	(Wage/day)	(Days Worked/Yr)
1) In cash; Y / N, if yes;	1. Work in irrigated sawah; Rp. <u>(FN200)</u> /day	<u>(FN201)</u> days	
	2. Work in rainfed sawah; Rp. <u>(FN202)</u> /day	<u>(FN203)</u> days	
	3. Work in upland; Rp. <u>(FN204)</u> /day	<u>(FN205)</u> days	
	4. Work in others; Rp. <u>(FN206)</u> /day	<u>(FN207)</u> days	
2) In kind; Y / N, if yes; (In kind should be converted to Rp.) <u>(FN208)</u>	1. Work in irrigated sawah; Rp. <u>(FN209)</u> /day	<u>(FN210)</u> days	
	2. Work in rainfed sawah; Rp. <u>(FN211)</u> /day	<u>(FN212)</u> days	
	3. Work in upland; Rp. <u>(FN213)</u> /day	<u>(FN214)</u> days	
	4. Work in others; Rp. <u>(FN215)</u> /day	<u>(FN216)</u> days	
3) Others; Y / N, <u>(FN217)</u>	Rp. <u>(FN218)</u> /day	<u>(FN219)</u> days	
(Specify; _____)			

SECTION VI SAVINGSVI-1 Do you have savings of any type at present? (Y / N) (FN220)VI-2 If "Yes", your savings are in terms of (FN221) (Choose the most important one from the Code)

- Code for type of savings:
1. money in Bank
 2. Land
 3. Livestock
 4. Just cash
 5. Others

VI-3 If "Yes", what is your purpose of your saving? (FN222) (Choose one from the Code)

- Code for reason:
1. For safety
 2. Saving for future expenditure
 3. Saving for emergency needs

VI-4 If "No", what is the reason you do not save? (FN223) (Choose one from the Code)

- Code for reason:
1. No idle money
 2. Credit is available anytime
 3. Others

SECTION VII LIVESTOCK

VII-1 Livestock and feed

	Numbers	Feed Sufficiency	
		Wet Season (select major one)	Dry Season (select major one)
1. Cows / oxen	<u>(FN224)</u>	<u>(FN225)</u>	<u>(FN226)</u>
2. Water Buffalo	<u>(FN227)</u>	<u>(FN228)</u>	<u>(FN229)</u>
3. Goat/sheep	<u>(FN230)</u>	<u>(FN231)</u>	<u>(FN232)</u>
4. Pig	<u>(FN233)</u>		
5. Chicken	<u>(FN234)</u>		
6. Duck	<u>(FN235)</u>		

Code for feed sufficiency:

1. Sufficient
2. Just enough
3. Short
4. Very short

SECTION VIII FROUTS TREES

VIII-1 Horticultural trees owned

	No. of trees		No. of trees
1. Orange trees	<u>(FN236)</u>	9. Jackfruits trees	<u>(FN237)</u>
2. Lime trees	<u>(FN238)</u>	10. Leichi trees	<u>(FN239)</u>
3. Lemon trees	<u>(FN240)</u>	11. Guava	<u>(FN241)</u>
4. Mango trees	<u>(FN242)</u>	12. Abocado	<u>(FN243)</u>
5. Papaya trees	<u>(FN244)</u>	13. Rambutan	<u>(FN245)</u>
6. Coconut trees	<u>(FN246)</u>	14. Tamarind	<u>(FN247)</u>
7. Banana trees	<u>(FN248)</u>	15. Others	<u>(FN249)</u>
8. Mangosteen	<u>(FN250)</u>		

(Thanking for your cooperation.)
