9.5 Community Development

9.5.2 CD Structure and Linkages

Responsibilities and Qualifications of a CO/CD Worker

1. Tasks of a CD/CO Worker

(a) As Facilitator

- > Enhances individual and group strengths and helps minimize weaknesses and conflicts;
- Heightens community unity; and,
- Assists individuals and groups to respond to common interests.

(b) As Trainor and Educator

- Discerns educational needs of people;
- > Helps in consciousness-raising to enable group or individual capability development;
- Assists leaders in developing new leaders;
- > Continually dialogues with people; and,
- > Helps develop self-determination among leaders and members.

(c) As Advocate

- > Helps analyze and articulate critical issues;
- Assists others to understand and reflect upon these issues; and
- > Evokes and provokes relevant discussion and actions.

(d) As Researcher

- > Conducts social analysis
- > Engages in participatory research with the people as partners;
- > Helps create research designs for people's use and interest; and
- > Integrates with the people to understand social phenomenon from the people's viewpoint.

(e) As Planner

- > Conducts initial analysis of area resources and potentials;
- Assists local group's planning, strategizing and creative action; and
- > Helps systematize people's actions to attain desired goals.

(f) As Catalyst

- Initiates discussions and actions regarding critical issues; and
- > Monitors and nurtures growth of individuals and groups to facilitate long-term social change for people's welfare.

2. Personal characteristics of a CD/CO Worker

- a) Must possess an innate and genuine love for people, which enables them to share with the people in their desire for change;
- b) Must have a commitment to help people in the desire to participate in changing society. The commitment sustains them and enables them to persevere.
- c) Must have a basic trust in the people, be willing to learn from them, and have faith with them.
- d) Must be adaptable, flexible, able to adjust to people and circumstances and able to move with people when and where they decide to move.
- e) Must be ready to learn and unlearn, be open to self-assessment and accept criticism; be able to drop pre-determined notions and stereotypes; and swallow their pride while remaining resourceful in the process.
- f) Must have patience with people but not with situations so that they can keep the people moving. The people must not be pushed. A CO must keep pace with them.
- g) Must be able to analyze problems, communicate with the people in their own language and work at the people's level. Only then can they start a process of critical awareness.
- h) Must be able to follow the growth of critical awareness by generating with the people appropriate action towards change and transformation of the community.

3. Lifestyle and Method of Work of CD/CO Worker

(a) In Method of Work

- > People-oriented, i.e. serving the interest of the people by not insisting on own project proposals.
- > Able to work informally among people, and not be overburdened with committee structures.
- Able to protect the community from outside intervention such as inappropriate projects.

(b) In Lifestyle

- > Humble, simple and immerse oneself in the life of the community;
- > Free of self-interest and committed, and expects no reward;
- > Able to identify with the people, see themselves as different, and be aware of the limitations of such;
- Open to be transformed by identification with, and involvement in the community;
- > Able to develop the internal strength to accept frustrations and loneliness at times.

4. The CD/CO Worker: A Catalyst, Missionary and Visionary

- a) He/she works with people, not for them.
- b) He/she considers people as intelligent and with numerous experiences.
- c) He/she lets the people grow.
- d) He/she builds up the people's cohesiveness.
- e) He/she builds up the people's organization.
- f) He/she believes that people can change and can bring about change in society.

5. Desired Characteristics of a CD/CO Worker

- a) Should have respect for and faith in the people they are working with; believe in the potential power and age-old wisdom of the masses.
- b) Should go to the people as learners, not as teachers; listen more than talk; facilitate more than lead. Should not have the messianic or redeemed complex but instead believe that it is the masses who will be their own redeemer.
- c) Should try to know the people, their socio-economic, political and cultural situation and problems before starting any program or action.
- d) Should be simple and austere in lifestyle.
- e) Should have the capacity and humility to withdraw as soon as the people are ready to manage their own affairs; aims at becoming dispensable.
- f) Capable of improving other's skills and knowledge.
- g) Is needed in order to maintain the community's interest and participation, as well as, to maintain and accelerate the momentum needed.
- h) Requires that the CO be at least several steps ahead of the community, but having in mind the direction of the community will be going and how to reach the desired goals.

FRAMEWORK FOR COMMUNITY DEVELOPMENT

Phase I: FORMATION OF ORGANIZATION

A. Pre-Entry/Preparatory

The Water Chapters	Provincial/Municipal CD Specialists	Provincial/Municipal CD Specialist	CD-C0 worker/s	CD-CO worker/s
Section 2	Review of track records; Interview and screening of applicants	Group discussion	Data gathering	Site visits

PHASE III — CONSOLIBATION AND SUSTENANCE OF ORGANIZATION

Typical CD Work

Community Organizing for Water Supply and Sanitation

Community organizing for water supply and sanitation projects is aimed at forming user groups through a process that integrates the hardware (technical aspects) and software (social aspects) components of a water supply and sanitation project.

People's participation, which can be gauged against the extent to which they themselves are involved in the decision-making processes, their willingness to stake local resources, (both in cash and in kind) and the extent to which trainings have improved the knowledge, skills and attitudes of the people are some of the indicators of a good community organizing work.

The Community organizing process is developing a partnership with the community. The Community organizer is simply a catalyst in the community's efforts to build their self-confidence to operate, maintain and sustain their water supply and sanitation service.

The CO Framework

The CO Handbook is one of the tools that a community worker may use as a guide in organizing user's groups for community-managed water supply and sanitation facilities. It is presented in three (3) major stages following the community-organizing framework. These stages are a) Formation of Organization; b) Development of Organization; and c) Consolidation of Organization.

The process contains a chronology of activities that starts with the deployment of community organizer and ends up with his/her exit from the community.

Except for steps 9 and 10 of Stage II and Step 20 of Stage III which need not be undertaken for a Level I, all the rest applies to Levels I and II water supply projects. level I water supply projects refer to point source facility catering to a cluster of ten to fifteen households while level II refers to a waterworks that has a distribution system such as multiple tapstands.

The Formation of Organization stage covers activities intended to enlist community participation and make community understand the concepts, processes and importance of organizing a group that will become responsible for eliciting maximum participation for WATSAN activities.

The Development of Organization stage covers activities intended to build capability of water users' organization, which include trainings and full participation in both technical and social activities. It also includes the CO worker's sharing and transferring of organization development and community organizing technology to the leaders of the water users' association. In this way, the community will be able to increase their capability for self-management.

The Consolidation of Organization stage consists of activities intended to "tie loose ends." This is to ensure that at the exit of the CO worker, the water users' association can sustain its operations without an external catalyst.

The last part of the Handbook is a compilation of useful tips in recording the minutes of the community meetings, contents of a spot map, sample (apstand membership form and tapstand membership list, characteristics of a CO worker and community leaders and others. All these

are appended as additional guides to enhance the organization process and facilitate the attainment of the CO objective.

Community Organizer

The community organization worker as a catalyst is one who believes that the people are the main actors in the processes and that his/her role is that of facilitating the community organizing process; improving the skills and knowledge of the community; and that he/she has to withdraw as soon as the people are ready to manage their affairs.

Objectives of the CO Work

The General Objective of the CO work is to form a community-based water user's association that will operate, maintain and sustain their water supply and sanitation facilities.

Stages of CO Work

Each of the three stages of CO work as contained in the framework is distinctly characterized by various activities needed to ensure that the organization will continue to function even after the exit of the CO worker.

Phase I is characterized by the formal entry of the CO worker to the community. This is marked by courtesy call first to the barangay leaders and then to the community. These activities require thorough understanding of the nature of the project.

The CO worker needs various tools to undertake these activities. A chart preferably in the local dialect that explains the concept of the project and the roles of the various stakeholders is very important. The community profile is one tool that also needs to be validated by the community themselves. The profile serves as a CO tool in facilitating community decisions.

Phase II is characterized by a series of trainings intended to provide adult learning processes to the water users' association. This includes practical and workable approaches needed to synchronize activities and provide appropriate mix of technical and social knowledge and skills to the water users.

Phase III begins when the organization is formalized, water system potability is ensured, legal documents are executed and facility is turned-over to the water users' association for their operation and maintenance. This phase ends when the community organizer exits from the community, leaving behind an organization with positive indicators for sustainability.

1. ENTRY STRATEGIES

CO DEPLOYMENT

Objective : Indorse the CO worker to the community by

provincial and municipal level implementors

也最后也不可能的 \$P\$ (Park and IPP) 2007 (Park \$P\$)

法人的复数形式 医电流性神经炎 化二氯化

Expected Result : CO worker is introduced to the barangay

officials and the community

Suggested Strategy : Community meeting

Facilitator : Barangay Chairman

Co-facilitator : Municipal Level Implementor

Agenda in the first orientation meeting and courtesy call to barangay council:

- Title of the project
- Objectives
- Stakeholders and their roles, responsibilities and accountabilities
- Funding and counterparting
- Project features or components
- How the project will be executed
- Timetable
- Inputs and outputs (largely trainings)
- Role of the intermediaries (NGOs)
- Solicit/request for CO volunteers to participate in profiling and spot mapping

VALIDATION OF COMMUNITY PROFILE AND SPOT MAPPING

Objective

To establish socio-economic, political and technical information about community directly or indirectly related to water and

sanitation.

Expected Results

Validated secondary data from the community

Suggested Strategies:

- Home visits
- Focus group discussion
- Visit to RHUs, MPDO, MHO, local school
- Community meeting.

CONTENTS OF THE SPOT MAP

- Natural features (creeks, river, lakes, mountains, water sources)
- Man-made structure (houses, buildings, bridges, roads, schools, cemetery, halls, markets, water system facilities)
- Technical data (distance, north orientation, elevations, scale, date prepared, source of information, persons/agencies involved, names of places, boundaries, legend, index to adjoining sheets, coordinates)

2. PRESENTATION OF VALIDATED PROFILE TO THE COMMUNITY

Objective

To further enrich and refine data in the profile

Expected Results :

- Profile validated by the community
- Surfacing of thoughts on:

How project will be implemented on the site

How the facility will be designed and constructed

How the community perceived their role in the project

- Solicit counterpart
- Determine/recommend long list of potential core group members

Facilitator

CO worker

Audience

Key informants (farmers, church leaders, teachers, etc.)

3. DEVELOPMENT OF CRITERIA FOR SELECTION OF CORE GROUP

Objectives

To enlist people interested to work actively that will assist in CO

activities

Expected Results

Core group members elected

- Role and function of core group drawn
- Adhoc committees formed and functions drawn
- Committee chairman selected
- Plan of action done

IDEAL SELECTION CRITERIA FOR CORE GROUP MEMBERS

- Must have the time and commitment to do community development activities in their locality
- Proven leadership skills
- · Direct exposure and experience in community development project/activities
- Have some basic knowledge and/or skills in community organizing
- Good moral standing
- No criminal record
- Should be one of the beneficiaries
- With good interpersonal relationship with the community
- Should be literate

ROLES AND FUNCTIONS OF THE WATER CORE GROUP

- Initiates the planning and implementation of action on water related activities
- Preparation of water project feasibility study/design community survey and spot map to further validate the importance of the project to the community at large
- Mobilize community resources specifically: the time, skills and efforts of the people
- Resources of the local agency, i.e., money, technical know-how, equipment, machines
- Disseminate information, keeps the community informed about the status of the water project
- Hears and considers suggestions of people with regards to the appropriate activities of the project
- Facilitates the expansion of water core group into Barangay/Rural Waterworks Association.

COMPOSITION OF THE CORE GROUP

- · Technical persons who can be trained on the technical aspects of the project
- Individual who are trusted and respected by community
- Those who have a strong liking to work for people
- Those who have a spirit of volunteerism
- Those who are resourceful
- Individuals who are understanding and patient enough to go with the pace of the community
- Together with the community, they should be able to identify the:
 - Objectives of the group
 - Define roles and responsibilities
 - Clear expectations to members and group as a whole

ADHOC COMMITTEES CO-TERMINUS WITH THE CORE GROUP

- Education and recruitment
- Monitoring, evaluation and control
- Coordination and manpower
 - Documentation (to include preparation of legal documents)

Sallie fred the Ballie Department of Sallier Commission for the Commission of

FUNCTIONS OF THE COMMITTEES

- a. Education and recruitment
- Project information drive
 - Advocacy on water supply, sanitation, health care and hygiene

- b. Monitoring, evaluation and control
 - Inspects and accepts hardware, tools and equipment
 - Acts as property custodian
 - Monitor the evaluation
 - Initiate action planning relative to construction activities
- c. Coordination and manpower
 - Coordinate resources from stakeholders
 - Do follow-ups and issue reminders
 - planning and manpower scheduling in terms of number and distribution
 - Coordinate technical activities in project site

d. Documentation

- Facilitate the issuance of legal documents such as right of way permit, deed of donation, certification water source site, etc.

4. ASSIST IN SITE SELECTION AND FEASIBILITY STUDY

Objectives

: To identify potential water source sites

Expected Results

Water source site for development identified (or prospecting for

wells)

Suggested Strategy

Technical data gathered

5. PRESENTATION OF TECHNICAL FINDINGS

Objectives

To come up with recommendations on the technical study

Expected Results

Decision by the community on the technical findings

Water samples collected from agreed upon water source site (for

spring only)

Suggested Strategy

Meeting of the core group

Facilitator

LGU Technical Team

CO-facilitator

: CO worker

By the end of Phase I of Community organizing work, the following milestones must have been achieved:

- Water Core Group formed
- Adhoc Committees formed and chairman named
- Water source site identified and initial studies done
- Community profile and spot map completed and validated

While at this stage, there is no way yet of gauging the certainty of making the project succeed in terms of a community-managed facility, a thorough understanding by the beneficiaries of the project features, stockholders, tasks, inputs, outputs and other important information about the project which is done formally as the opening salvo of the CO to the community and, later, on a more informal manner, as the CO integrates to the community is one of the most critical part of this phase.

As community organizing progresses, the deepening sessions of the CO worker in reinforcing project concepts such as strategies for community initiatives towards addressing key issues affecting their community that are directly or indirectly related to water are reinforcing mechanisms in providing impetus to the development of an informal water users' organization, as infant as a water core group.

6. HUMAN RESOURCE DEVELOPMENT TRAINING

Objective : To build a strong and cohesive team

from among the core group members and barangay officials (if appropriate)

Expected Results: Trained core group members on

Human Resource Development

Facilitator

CO worker

Co-facilitator : Core group members

7. PRESENTATION OF TECHNICAL DESIGN

Objective : Generate community decision on appropriate technology to be

used

Expected Results : Generate community decision on appropriate technology to be

used

Suggested Strategy : Community meeting to discuss

- Initial findings on technical feasibility study

- Presentation of technology options

Facilitator : Technical Team

8. FACILITATION ON LEGAL WORKS AND DOCUMENTS

Objective : Prepare necessary legal documents

Expected Results : Legal documents required in WATSAN projects prepared

Facilitator : Committee Chairman

CO-facilitator : CO Worker

LIST OF DOCUMENTS REQUIRED IN IMPLEMENTING WATSAN PROJECTS

- Barangay Resolution desiring to avail of a water facility to be submitted to the LGU
- Building permit of WATSAN facility, from LGU
- Waiver form DENR (if water system components such as the source, tank, pipelines are situated in areas other that private lands) to use the site(s) for community development
- Right of way permit from private land owners, specifically for spring sites and pipeline routes
- Deeds of donation from private landowners for water tank and tapstand sites
- Certificate of water quality source to be developed and tapped, from DOH
- Certificate of water quality produced through the water system facility, from DOH
- Letter of acknowledgment from the municipal mayor endorsing the water system management to the water users' association formed
- Accreditation pertinent papers (needed for the accreditation of RWSAs/BWSAs at the LGU level)
- Water rights
- Water permit
- Drilling permit

9. PRESENTATION OF DRAFT TECHNICAL DESIGN

to be a parallat the an electric store that if which is a time to

(Skip This Activity If Level I)

Objective : To inform the community of the results of the feasibility study conducted

Expected Results:

Location of major components such as well drilling site,

transmission and distribution pipelines

Tanks and tapstands are identified
 Community acceptance of design

Local counterpart generated

Suggested Strategies:

Community meeting

Site visit to proposed structures/facilities' location

INFORMATION TO BE PRESENTED TO THE COMMUNITY

· Role of technical people

• Contents of typical water system technical plan

- Presentation of design specifications and explanation of plan contents /drawings in layman's terms
- Presentation of program of work (POW), bill of materials and cost estimates
- Validation of data gathered and used in the designing
- Solicit ideas, opinions, comments and preferences
- Come-up with compromises, and if appropriate determine local counterpart

10. MOBILIZATION OF COMMITTEE ON DOCUMENTATION (skip this activity if Level 1)

Objective : To facilitate additional legal work requirement for tapstand, pipeline

and other major system components

To ensure a formal listing of tapstand membership

Expected Results: Completed legal documentation requirement membership per

tapstand known

Facilitator : Committee Chairman, Committee on Documentation and

Education and Membership

CO-facilitator : CO worker

11. CONFIRMATION OF MEMBERSHIP BY TAPSTAND

Objective : To confirm final membership by tapstand

To undertake information campaign on the importance

of grouping and houserules formulation

To select tapstand leader

Expected Results : Final listing of membership per tapstand

Formulated tapstand houserules

Tapstand leader selected

Suggested Strategy

Undertake meeting per tapstand

Facilitator

: CO worker

CO-facilitator

Chairman, Committee on Education and Recruitment

DISCUSSION POINTS IN FORMULATING TAPSTAND HOUSERULES

a. Getting water:

How will water be fetched?When will water be fetched?

Who can fetch water?

b. Monitoring

List down who fetches and

how much volume of water was taken

c. Water tariff due the specific tapstand

d. Sanitation around the tapstand and around the cluster

e. Beautification and physical development in the tapstand site

f. Financial management regarding water tariffs

12. PRESENTATION OF FINAL TECHNICAL DESIGN

Objective

To present and approve the final technical design

Expected Results

Finalized counterpart agreement

Construction scheduling developed

Suggested Strategy

Meeting among tapstand leaders, core group and

barangay council

13. TRAINING ON HYGIENE, SANITATION AND HEALTH CARE

Objective

Conduct of training on health and hygiene

Expected Results

Awareness on community health aspects
Community meeting, or

Suggested Strategy ::

Meeting by tapstand grouping

Organizer :

CO Worker, community and rural sanitary inspector

Training Management :

LGU

Audience

Core Group, Barangay Officials, Barangay Health Workers, Rural Sanitary Inspectors, and Barangay Nutrition Scholars

14. SOURCE FOR EXCRETA DISPOSAL MATERIALS AND/OR FACILITIES

Objective :

To make available to the community facilities for excreta

disposal (if conditions and culture warrant)

Expected Results

Materials/facilities for excreta disposal constructed individually

by members of the community in their households

Suggested Strategy

Core group members together with CO worker make

representations with LGUs to source materials or facilities

Facilitator

Core group members

CO-facilitator

CO worker

15. ORGANIZATIONAL MANAGEMENT TRAINING

Organizer

CO and the community

Training Management

∍LGU

Audience

tapstand leaders, core group and barangay officials

16. PRE-CONSTRUCTION CONFERENCE

Objective : To generate work plan and tasking for the construction

activities

Expected Results : Activities and roles identified

Commitment to participate generated

Suggested Strategy

Hold a community meeting

Facilitator

Technical team

Co-facilitator :

CO worker

AGENDA IN THE PRE-CONSTRUCTION CONFERENCE

Presentation of schedule of work and tasking

Determine quantities of resources needed

Labor arrangements

Salaries/wages, if any that will be incurred

Mobilization of committees

Arrangement on materials storage

17. MOBILIZATION FOR DELIVERY OF MATERIALS

Objective : To ensure that materials delivered at the community

are all accounted for

Expected Results : Materials delivered all accounted for and in

accordance to the agreed upon specifications in the

technical design

Suggested Strategy: Specific committee to handle delivery, and storage of

materials, and, if need be, disposition of materials

Facilitator : Committee to be agreed upon by the core group

Co-facilitator : CO worker

18. ACTION PLANNING FOR CONSTRUCTION

Objective : To spell out what to expect during the construction

processes

Expected Results :

Smooth implementation of construction activities

Facilitator
Co-facilitator

CO worker

Suggested Strategy

Technical Team

Core group meeting

STEPS TO BE UNDERTAKEN:

Identify activities related to construction

• Define activity schedule and resources required

• Identify the type of manpower skills required per activity

Monitoring and documentation of major water system components

Progress reporting, evaluation and action planning

Monitoring and documentation on construction of major water system components

Repeat cycle until completion

19. DEVELOPMENT OF EXIT PLAN

Objective : To plan for the transfer of responsibility from CO worker to core

group members

Expected Results : Core group informed of activities ahead and the expected time of

withdrawal of the CO worker

An exit plan containing task list and specific person responsible

Organizational development program developed

Suggested Strategy

: Core group meeting

Facilitator Co-facilitator CO worker

: Technical Team

Audience : Community members

At the end of the Development of Organization Phase, the following milestone must have been achieved:

- Basic organizational development training such as value formation, leadership and team building and sanitation, health care and hygiene education must be done
- CO exit plan jointly developed by the CO together with the community
- All legal documents completed
- Pre-construction conference done
- Materials for construction delivered and accepted by the community
- Organizational strengthening such as involvement of a greater number of community members participating in mobilization activities and increased awareness on key issues through information exchange

The success of the phase rests on the extent the community had participated in the activities and learned from the processes as inputs to the community's capability for self-management. On the other hand, one of the most crucial factors to participation rests on the depth and broadness of their understanding of the project concept, features, processes, stakeholders, tasks, and responsibilities coupled with the need for water supply facility, a condition validated in the first orientation meeting done by the CO upon entry to the community.

The inputs that will be provided by the CO and the technical team will provide the necessary honing skills for the core group and tapstand leaders to have the confidence to accept more challenges in the next phase. These challenges are contained in the Exit Plan, which was formulated by the local stakeholders. The Plan will be implemented in Phase III stage to signal the weaning process of the community from the CO worker.

20. PRESENTATION, COMPARISON & COLLATION OF TAPSTAND HOUSERULES (skip this activity if Level I)

Objectives

Collate similar housefules formulated in the previous activity

Expected Results

Collated houserules
Identified houserules

appropriate for by-laws

Suggested Strategy

Meeting of tapstand leaders

Facilitator

CO worker

Co-facilitator

Core Group Member

21. DRAFTING OF CONSTITUTION AND BY-LAWS

Objective

To develop a set of policies and by-laws that will govern the

operation of the organization

Expected Results

Constitution and by-laws ready for ratification

Suggested Strategy

Meeting of core group and tapstand leaders

22. RATIFICATION OF CONSTITUTION, BY-LAWS AND POLICIES

Facilitator

CO Worker

Co-facilitator

Expected Results

Core Group Member Constitution ratified

Officers elected

23. FACILITY/SYSTEM TEST RUN

The community participates in ocular operation and test run of facility installed

Facilitator

Technical Team

24. WATER QUALITY TEST

Objective

To ensure potability of water from facility
Water facility is to provide potable water to

community

Suggested Strategy

Expected Result

: Collect water sample from tapstand

Submit sample to DOH for test and certification

25. TURN-OVER OF FACILITY/SYSTEM

Officers elected organize and manage facility turnover ceremony

26. OPERATION, MAINTENANCE AND REPAIR TRAINING

Trainer

Technical team

Trainces

Community-appointed Plumber, Meter Reader (if there is a meter

installed), Tapstand leader and RWSA/BWSA officers

27. FINANCIAL MANAGEMENT TRAINING

Trainer

NGO, LGU or Water District

Trainees

Bookkeeper, Tapstand Leader and RWSA/BWSA officer

28. RWSA/BWSA REGISTRATION AND ACCREDITATION

Facilitator

RWSA/BWSA officer

Co-facilitator

CO worker

Registration of BWSA/RWSA to appropriate government agencies is done. Options on where to register shall be presented and decided upon by the organization.

Possible Options:

In the absence of a clear national policy on B/RWSA registration, the following Registering Agencies could be presented as options:

- a. Securities and Exchange Commission
- b. Bureau of Rural Workers
- c. Local Waterworks Utilities Administration

d. Department of Social Welfare and Development

Cooperatives Development Authority

Accreditation of BWSA/RWSA is done through the municipal local government unit.

29. FORMAL EXIT OF THE CO WORKER

Facilitator

RWSA Officer

Co-facilitator

CO worker

Suggested Strategy

Hold a community meeting

Agenda

Assessment of CO Exit Plan

Planning for the operation and management of water

facility

Scheduling of CO visits

Scheduling of RWSA/BWSA and CO formal linking

with other organizations and agencies

Formal turn-over of CO responsibility to RWSA/BWSA

At the end of the Consolidation Phase, the following milestones are achieved:

Facility is turned-over he RWSA/BWSA and is functioning as intended and has it set of officers, constitution and by-laws and policies

Plan for operation, maintenance and repair of system is installed

At the end of the community organizing process, the degree of capability of RWSA/BWSA in the operation and maintenance of water supply facility and maintaining their organizational health can be gauged on the extent of participation of the members in resolving problems and making decisions. The extent of focus of team building and leadership inputs is crucial in how the members of the RWSAs/BWSAs are willing to make amend allow some compromises among each other. On the other hand, the technical soundness of the design and execution of the construction ensures the long-term sustainability of the system.

By this time, the CO has exited but maintains monitoring visits until he/she is fully confident that the organization is strong enough to take decisions, plan and implement their WATSAN related activities and knows where to access support (in terms of financial, institutional and technical) when needed.

10 COST ESTIMATES FOR FUTURE SECTOR DEVELOPMENT

10.2 Assumption for Cost Estimates

10.2.1 Unit Construction Cost

(1) Calculation method

The base information in previous PW4SP, such as bill of quantities and unit cost of respective components facilities was fully utilized, which was referred to the standard of relevant sector agencies. Escalation rates experienced between 1995 and 1998 in terms of major construction materials and equipment rental were studied using NSO statistics (whole price index). Market prices of these items were also canvassed to compare with the calculated prices in 1998 from those in 1995 in application of the escalations rates.

In general, escalated prices meet canvassed prices in the most of the materials. Escalation rates between 1995 and 1998 were employed in round figures. Some of them (water closet, etc.) were, however, replace by current price due to considerable increase in the last two years.

The Table 10.2.1 shows the prices of the major materials by facility.

Table 10.2.1 Price of Major Materials by Facility
