

## 9.5 Community Development

### 9.5.2 CD Structure and Linkages

#### Responsibilities and Qualifications of a CO/CD Worker

##### 1. Tasks of a CD/CO Worker

###### *(a) As Facilitator*

- Enhances individual and group strengths and helps minimize weaknesses and conflicts;
- Heightens community unity; and,
- Assists individuals and groups to respond to common interests.

###### *(b) As Trainor and Educator*

- Discerns educational needs of people;
- Helps in consciousness-raising to enable group or individual capability development;
- Assists leaders in developing new leaders;
- Continually dialogues with people; and,
- Helps develop self-determination among leaders and members.

###### *(c) As Advocate*

- Helps analyze and articulate critical issues;
- Assists others to understand and reflect upon these issues; and
- Evokes and provokes relevant discussion and actions.

###### *(d) As Researcher*

- Conducts social analysis
- Engages in participatory research with the people as partners;
- Helps create research designs for people's use and interest; and
- Integrates with the people to understand social phenomenon from the people's viewpoint.

###### *(e) As Planner*

- Conducts initial analysis of area resources and potentials;
- Assists local group's planning, strategizing and creative action; and
- Helps systematize people's actions to attain desired goals.

***(f) As Catalyst***

- Initiates discussions and actions regarding critical issues; and
- Monitors and nurtures growth of individuals and groups to facilitate long-term social change for people's welfare.

**2. Personal characteristics of a CD/CO Worker**

- a) Must possess an innate and genuine love for people, which enables them to share with the people in their desire for change;
- b) Must have a commitment to help people in the desire to participate in changing society. The commitment sustains them and enables them to persevere.
- c) Must have a basic trust in the people, be willing to learn from them, and have faith with them.
- d) Must be adaptable, flexible, able to adjust to people and circumstances and able to move with people when and where they decide to move.
- e) Must be ready to learn and unlearn, be open to self-assessment and accept criticism; be able to drop pre-determined notions and stereotypes; and swallow their pride while remaining resourceful in the process.
- f) Must have patience with people but not with situations so that they can keep the people moving. The people must not be pushed. A CO must keep pace with them.
- g) Must be able to analyze problems, communicate with the people in their own language and work at the people's level. Only then can they start a process of critical awareness.
- h) Must be able to follow the growth of critical awareness by generating with the people appropriate action towards change and transformation of the community.

**3. Lifestyle and Method of Work of CD/CO Worker**

***(a) In Method of Work***

- People-oriented, i.e. serving the interest of the people by not insisting on own project proposals.
- Able to work informally among people, and not be overburdened with committee structures.
- Able to protect the community from outside intervention such as inappropriate projects.

***(b) In Lifestyle***

- Humble, simple and immerse oneself in the life of the community;
- Free of self-interest and committed, and expects no reward;
- Able to identify with the people, see themselves as different, and be aware of the limitations of such;
- Open to be transformed by identification with, and involvement in the community;
- Able to develop the internal strength to accept frustrations and loneliness at times.

**4. The CD/CO Worker: A Catalyst, Missionary and Visionary**

- a) He/she works with people, not for them.
- b) He/she considers people as intelligent and with numerous experiences.
- c) He/she lets the people grow.
- d) He/she builds up the people's cohesiveness.
- e) He/she builds up the people's organization.
- f) He/she believes that people can change and can bring about change in society.

**5. Desired Characteristics of a CD/CO Worker**

- a) Should have respect for and faith in the people they are working with; believe in the potential power and age-old wisdom of the masses.
- b) Should go to the people as learners, not as teachers; listen more than talk; facilitate more than lead. Should not have the messianic or redeemed complex - but instead believe that it is the masses who will be their own redeemer.
- c) Should try to know the people, their socio-economic, political and cultural situation and problems before starting any program or action.
- d) Should be simple and austere in lifestyle.
- e) Should have the capacity and humility to withdraw as soon as the people are ready to manage their own affairs; aims at becoming dispensable.
- f) Capable of improving other's skills and knowledge.
- g) Is needed in order to maintain the community's interest and participation, as well as, to maintain and accelerate the momentum needed.
- h) Requires that the CO be at least several steps ahead of the community, but having in mind the direction of the community will be going and how to reach the desired goals.

## 9.5.5 Approaches to Participatory Community Development

### FRAMEWORK FOR COMMUNITY DEVELOPMENT

#### Phase I: FORMATION OF ORGANIZATION

##### A. Pre-Entry/Preparatory

Activity	Objective	Strategy	Proponent/Organizer
1. Hire /Appoint CD-CO worker/s	Identify and recommend a capable CD-CO worker/s from the area	Review of track records; Interview and screening of applicants	Provincial/Municipal CD Specialists
2. Orient the CD-CO worker/s on the project objectives and requirements	Familiarize the CD-CO worker/s on the project	Group discussion	Provincial/Municipal CD Specialist
3. Gather secondary data ( <i>Barangay maps, socio-economic profile, list of leaders and development workers, peace and order situation, list of organization, history of participation in previous project.</i> )	Make an initial assessment of the barangay's capability to implement and assume responsibility for the project.	Data gathering	CD-CO worker/s
4. Conduct ocular survey of barangay	Orientation to the physical features/structures of the barangay	Site visits	CD-CO worker/s

##### B. Community Entry and Integration

5. Deploy the CD-CO Worker/s	Install the CD-CO worker/s by provincial and municipal level implementors	Community meeting	Provincial/Municipal CD Specialist; Barangay Captain
6. Pay courtesy call on barangay officials	CD-CO worker/s to establish rapport with barangay councils and leaders	Group meeting	Municipal Gov't./ Barangay Captain
7. Conduct house-to-house visit and informal interviews with the residents	Establish rapport with the barangay constituents	Home visits; Spending time in most frequented places and look and listen attentively	Barangay Leaders; CD-CO worker/s

Activity	Objective	Strategy	Facilitator/Organizer
8. Conduct project briefing	Orient community on the project objective and requirements, strategy of implementation, MOA, selection criteria of beneficiaries and activities in order to get their commitment and participation	Community meeting	CD-CO worker/s and Technical Team
9. Undertake project acceptance and signing of Memorandum of Agreement (MOA)	Delineate responsibilities of project beneficiaries and implementing agency	Community meeting	CD-CO worker/s

### C. Community Assessment

10. Identify information to be gathered and possible source of information	List down relevant data that should be gathered	Group meeting	CD-CO worker/s
11. Select the method of data collection	Determine the best way of data collection, considering the information needed	Group discussion	CD-CO worker/s
12. Collect data from informants	Establish socio-economic, political and technical information about community	Home visit; focus group discussion; group meeting	CD-CO worker/s
13. Process /validate community profile and spot mapping	Confirm with the barangay officials and leaders data collected	Community and group meeting; spot checking	CD-CO worker/s
14. Present validated profile to the Community	Further enrich and refine data in the profile	Community meeting	CD-CO worker/s
15. Finalize the community profile	Update/finalize community profile	Group meeting	CD-CO worker/s
16. Analyze the problems identified	Know the causes and implications of the problems identified.	Group discussion	CD-CO worker/s

Activity	Objective	Strategy	Facilitator/Organizer
8. Conduct project briefing	Orient community on the project objective and requirements, strategy of implementation, MOA, selection criteria of beneficiaries and activities in order to get their commitment and participation	Community meeting	CD-CO worker/s and Technical Team
9. Undertake project acceptance and signing of Memorandum of Agreement (MOA)	Delineate responsibilities of project beneficiaries and implementing agency	Community meeting	CD-CO worker/s

### C. Community Assessment

10. Identify information to be gathered and possible source of information	List down relevant data that should be gathered	Group meeting	CD-CO worker/s
11. Select the method of data collection	Determine the best way of data collection, considering the information needed	Group discussion	CD-CO worker/s
12. Collect data from informants	Establish socio-economic, political and technical information about community	Home visit; focus group discussion; group meeting	CD-CO worker/s
13. Process /validate community profile and spot mapping	Confirm with the barangay officials and leaders data collected	Community and group meeting; spot checking	CD-CO worker/s
14. Present validated profile to the Community	Further enrich and refine data in the profile	Community meeting	CD-CO worker/s
15. Finalize the community profile	Update/finalize community profile	Group meeting	CD-CO worker/s
16. Analyze the problems identified	Know the causes and implications of the problems identified.	Group discussion	CD-CO worker/s

## Phase II: DEVELOPMENT OF ORGANIZATION (Levels I and II)

### A. Community Mobilization

Activity	Objective	Strategy	Participants/Organizer
1. Formulate action plan for the community	Prepare a plan of action towards the development of a WATSAN Project	Group discussion	CD-CO worker/s
2. Develop criteria to select core group that will comprise the water association	Enlist people who are interested to work actively that will support CO activities	Community meeting	CD-CO worker/s; Barangay Officials
3. Conduct core group orientation and presentation to the community	Familiarize the people comprising the core group of the water association	Barangay assembly	CD-CO worker/s; Barangay Officials

### B. Formation of WATSAN Association

4A. Launch formation of WATSAN association	Community residents conduct initial meeting to formalize formation of water association	Community meeting	CD-CO worker/s; Barangay Officials
5A. Facilitate legal works and documents and mobilize committee on documentation	Prepare necessary legal documents	Committee/group discussion	Committee Chairman
6A. Finalize membership	Confirm final membership by tapstand and undertake information campaign on the importance of tapstand grouping and house rules formulation; select tapstand leader	Undertake meeting per tapstand	CD-CO worker/s
7A. Draft and ratify constitution and by-laws	Develop a set of policies and by-laws that will govern the operation of the association	Meeting of core group or tapstand leaders	CD-CO worker/s; LGU
8A. Facilitate registration and accreditation of WATSAN association	Registration of water association to appropriate government agencies	Actual registration with concerned government entity	CD-CO worker/s; Association Officers

## Phase II: DEVELOPMENT OF ORGANIZATION (Levels I and II)

### A. Community Mobilization

Activity	Objective	Strategy	Facilitator/Organizer
1. Formulate action plan for the community	Prepare a plan of action towards the development of a WATSAN Project	Group discussion	CD-CO workers
2. Develop criteria to select core group that will comprise the water association	Enlist people who are interested to work actively that will support CO activities	Community meeting	CD-CO worker/s; Barangay Officials
3. Conduct core group orientation and presentation to the community	Familiarize the people comprising the core group of the water association	Barangay assembly	CD-CO worker/s; Barangay Officials

### B. Formation of WATSAN Association

4A. Launch formation of WATSAN association	Community residents conduct initial meeting to formalize formation of water association	Community meeting	CD-CO worker/s; Barangay Officials
5A. Facilitate legal works and documents and mobilize committee on documentation	Prepare necessary legal documents	Committee/group discussion	Committee Chairman
6A. Finalize membership	Confirm final membership by tapstand and undertake information campaign on the importance of tapstand grouping and house rules formulation; select tapstand leader	Undertake meeting per tapstand	CD-CO worker/s
7A. Draft and ratify constitution and by-laws	Develop a set of policies and by-laws that will govern the operation of the association	Meeting of core group or tapstand leaders	CD-CO worker/s; LGU
8A. Facilitate registration and accreditation of WATSAN association	Registration of water association to appropriate government agencies	Actual registration with concerned government entity	CD-CO worker/s; Association Officers

### C. Project Preparation

Activity	Objective	Strategy	Facilitator/Organizer
4B. Conduct feasibility study	Identify potential water source sites	Mobilize community through committee	Technical Team; CD-CO worker/s
5B. Present technical findings	Inform the community of the results of the feasibility study conducted	Core group meeting	CD-CO worker/s
6B. Prepare technical design	Determine/design the most appropriate technology to be used for WATSAN system	Community meeting	Technical Team
7B. Present draft technical design	Come up with recommendations on the technical study	Community meeting	Technical Team
8B. Finalize technical design	Generate community decision on the proposed WATSAN scheme	Technical Team Discussion	Technical Team

### D. Project Implementation

9. Undertake project presentation	Present to the community the project to be implemented and the responsibilities required of the beneficiaries	Community meeting	Technical Team/CD-CO Worker/s
10. Conduct Action Planning/Pre-construction Seminar	Generate work plan and tasking for the construction activities; Spell out what to expect during the construction processes	Community meeting	Technical Team
11. Mobilize committee for delivery of materials	Ensure that materials delivered at the community are all accounted for	Specific committee to handle materials	Selected Committee
12. Undertake construction of facility	Construct/Complete WATSAN Facility	Actual Construction	Technical Team

### C. Project Preparation

Activity	Objective	Strategy	Facilitator/Organizer
4B. Conduct feasibility study	Identify potential water source sites	Mobilize community through committee	Technical Team; CD-CO worker/s
5B. Present technical findings	Inform the community of the results of the feasibility study conducted	Core group meeting	CD-CO worker/s
6B. Prepare technical design	Determine/design the most appropriate technology to be used for WATSAN system	Community meeting	Technical Team
7B. Present draft technical design	Come up with recommendations on the technical study	Community meeting	Technical Team
8B. Finalize technical design	Generate community decision on the proposed WATSAN scheme	Technical Team Discussion	Technical Team

### D. Project Implementation

9. Undertake project presentation	Present to the community the project to be implemented and the responsibilities required of the beneficiaries	Community meeting	Technical Team/CD-CO Worker/s
10. Conduct Action Planning/Pre-construction Seminar	Generate work plan and tasking for the construction activities; Spell out what to expect during the construction processes	Community meeting	Technical Team
11. Mobilize committee for delivery of materials	Ensure that materials delivered at the community are all accounted for	Specific committee to handle materials	Selected Committee
12. Undertake construction of facility	Construct/Complete WATSAN Facility	Actual Construction	Technical Team

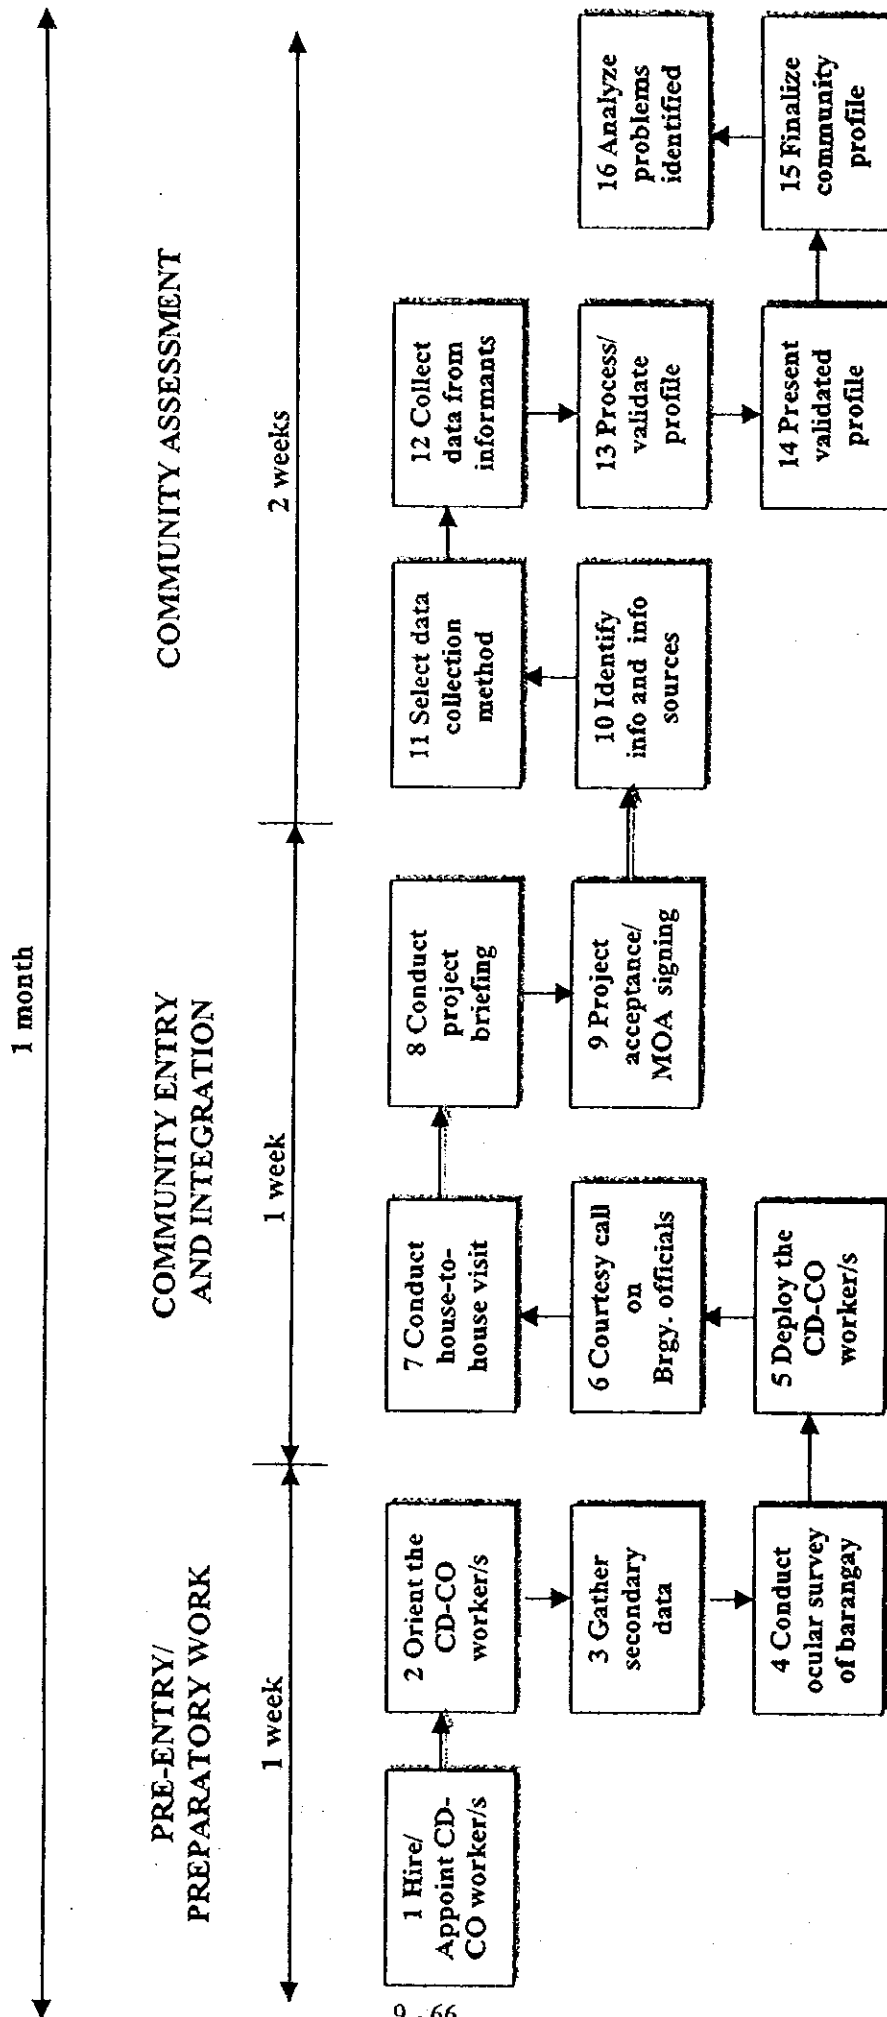

### PHASE III: CONSOLIDATION AND SUSTENANCE OF ORGANIZATION

Activity	Objective	Strategy	Facilitator/Organizer
1. Conduct training on hygiene, sanitation and on health care	Conduct of training on health and sanitation	Community meeting or meeting by tapstand grouping	CD-CO worker/s; Rural Sanitary Inspector
2. Conduct training on organizational management	Conduct of training on organizational management	Seminar-workshop	LGU/CD-CO worker/s
3. Conduct training on financial management	Conduct a financial management training	Seminar-workshop	LGU/CD-CO worker/s
4. Present, compare/collate tapstand and house rules	Collate similar house rules formulated in the previous activity	Meeting of tapstand leader	CD-CO worker/s
5. Conduct test run of facility/system	Solicit community participation in ocular operation and test run of facility installed	Actual Test Run; Community meeting	Technical Team
6. Undertake water quality test	Ensure potability of water from facility	Collect water sample and submit to DOH for test	Technical Team
7. Conduct training on system operation, maintenance and repair	Conduct a training on O&M and repair	Seminar-workshop	Technical Team
8. Turn-over facility/system to WATSAN Association	To have a formal turn-over of facility/system to officers and members	Turn-over ceremony	CD-CO worker/LGU
9. Conduct Final Meeting	Conduct a final meeting with the water association officers and barangay council	Community meeting	CD-CO worker/s
10. EXIT			

### PHASE III: CONSOLIDATION AND SUSTENANCE OF ORGANIZATION

Activity	Objective	Strategy	Facilitator/Organizer
1. Conduct training on hygiene, sanitation and on health care	Conduct of training on health and sanitation	Community meeting or meeting by tapstand grouping	CD-CO worker/s; Rural Sanitary Inspector
2. Conduct training on organizational management	Conduct of training on organizational management	Seminar-workshop	LGU/CD-CO worker/s
3. Conduct training on financial management	Conduct a financial management training	Seminar-workshop	LGU/CD-CO worker/s
4. Present, compare/collate tapstand and house rules	Collate similar house rules formulated in the previous activity	Meeting of tapstand leader	CD-CO worker/s
5. Conduct test run of facility/system	Solicit community participation in ocular operation and test run of facility installed	Actual Test Run; Community meeting	Technical Team
6. Undertake water quality test	Ensure potability of water from facility	Collect water sample and submit to DOH for test	Technical Team
7. Conduct training on system operation, maintenance and repair	Conduct a training on O&M and repair	Seminar-workshop	Technical Team
8. Turn-over facility/system to WATSAN Association	To have a formal turn-over of facility/system to officers and members	Turn-over ceremony	CD-CO worker/LGU
9. Conduct Final Meeting	Conduct a final meeting with the water association officers and barangay council	Community meeting	CD-CO worker/s
10. EXIT

# PHASE III - CONSOLIDATION AND SUSTENANCE OF ORGANIZATION

## Typical CD Work

### *Community Organizing for Water Supply and Sanitation*

Community organizing for water supply and sanitation projects is aimed at forming user groups through a process that integrates the hardware (technical aspects) and software (social aspects) components of a water supply and sanitation project.

People's participation, which can be gauged against the extent to which they themselves are involved in the decision-making processes, their willingness to stake local resources, (both in cash and in kind) and the extent to which trainings have improved the knowledge, skills and attitudes of the people are some of the indicators of a good community organizing work.

The Community organizing process is developing a partnership with the community. The Community organizer is simply a catalyst in the community's efforts to build their self-confidence to operate, maintain and sustain their water supply and sanitation service.

### **The CO Framework**

The CO Handbook is one of the tools that a community worker may use as a guide in organizing user's groups for community-managed water supply and sanitation facilities. It is presented in three (3) major stages following the community-organizing framework. These stages are a) Formation of Organization; b) Development of Organization; and c) Consolidation of Organization.

The process contains a chronology of activities that starts with the deployment of community organizer and ends up with his/her exit from the community.

Except for steps 9 and 10 of Stage II and Step 20 of Stage III which need not be undertaken for a Level I, all the rest applies to Levels I and II water supply projects. level I water supply projects refer to point source facility catering to a cluster of ten to fifteen households while level II refers to a waterworks that has a distribution system such as multiple tapstands.

The *Formation of Organization* stage covers activities intended to enlist community participation and make community understand the concepts, processes and importance of organizing a group that will become responsible for eliciting maximum participation for WATSAN activities.

The *Development of Organization* stage covers activities intended to build capability of water users' organization, which include trainings and full participation in both technical and social activities. It also includes the CO worker's sharing and transferring of organization development and community organizing technology to the leaders of the water users' association. In this way, the community will be able to increase their capability for self-management.

The *Consolidation of Organization* stage consists of activities intended to "tie loose ends." This is to ensure that at the exit of the CO worker, the water users' association can sustain its operations without an external catalyst.

The last part of the Handbook is a compilation of useful tips in recording the minutes of the community meetings, contents of a spot map, sample tapstand membership form and tapstand membership list, characteristics of a CO worker and community leaders and others. All these

are appended as additional guides to enhance the organization process and facilitate the attainment of the CO objective.

### **Community Organizer**

The community organization worker as a catalyst is one who believes that the people are the main actors in the processes and that his/her role is that of facilitating the community organizing process; improving the skills and knowledge of the community; and that he/she has to withdraw as soon as the people are ready to manage their affairs.

### **Objectives of the CO Work**

The General Objective of the CO work is to form a community-based water user's association that will operate, maintain and sustain their water supply and sanitation facilities.

### **Stages of CO Work**

Each of the three stages of CO work as contained in the framework is distinctly characterized by various activities needed to ensure that the organization will continue to function even after the exit of the CO worker.

*Phase I* is characterized by the formal entry of the CO worker to the community. This is marked by courtesy call first to the barangay leaders and then to the community. These activities require thorough understanding of the nature of the project.

The CO worker needs various tools to undertake these activities. A chart preferably in the local dialect that explains the concept of the project and the roles of the various stakeholders is very important. The community profile is one tool that also needs to be validated by the community themselves. The profile serves as a CO tool in facilitating community decisions.

*Phase II* is characterized by a series of trainings intended to provide adult learning processes to the water users' association. This includes practical and workable approaches needed to synchronize activities and provide appropriate mix of technical and social knowledge and skills to the water users.

*Phase III* begins when the organization is formalized, water system potability is ensured, legal documents are executed and facility is turned-over to the water users' association for their operation and maintenance. This phase ends when the community organizer exits from the community, leaving behind an organization with positive indicators for sustainability.

## **1. ENTRY STRATEGIES**

### **CO DEPLOYMENT**

Objective	: Indorse the CO worker to the community by provincial and municipal level implementors
Expected Result	: CO worker is introduced to the barangay officials and the community
Suggested Strategy	: Community meeting
Facilitator	: Barangay Chairman
Co-facilitator	: Municipal Level Implementor

Agenda in the first orientation meeting and courtesy call to barangay council:

- Title of the project
- Objectives
- Stakeholders and their roles, responsibilities and accountabilities
- Funding and counterparting
- Project features or components
- How the project will be executed
- Timetable
- Inputs and outputs (largely trainings)
- Role of the intermediaries (NGOs)
- Solicit/request for CO volunteers to participate in profiling and spot mapping

## **VALIDATION OF COMMUNITY PROFILE AND SPOT MAPPING**

Objective : To establish socio-economic, political and technical information about community directly or indirectly related to water and sanitation.

Expected Results : Validated secondary data from the community

Suggested Strategies :

- Home visits
- Focus group discussion
- Visit to RHUs, MPDO, MHO, local school
- Community meeting

## **CONTENTS OF THE SPOT MAP**

- Natural features (creeks, river, lakes, mountains, water sources)
- Man-made structure (houses, buildings, bridges, roads, schools, cemetery, halls, markets, water system facilities)
- Technical data ( distance, north orientation, elevations, scale, date prepared, source of information, persons/agencies involved, names of places, boundaries, legend, index to adjoining sheets, coordinates)

## **2. PRESENTATION OF VALIDATED PROFILE TO THE COMMUNITY**

Objective : To further enrich and refine data in the profile

Expected Results :

- Profile validated by the community
- Surfacing of thoughts on:
  - How project will be implemented on the site
  - How the facility will be designed and constructed
  - How the community perceived their role in the project
- Solicit counterpart
- Determine/recommend long list of potential core group members

Facilitator : CO worker

Audience : Key informants (farmers, church leaders, teachers, etc.)

## **3. DEVELOPMENT OF CRITERIA FOR SELECTION OF CORE GROUP**

Objectives : To enlist people interested to work actively that will assist in CO activities

Expected Results : Core group members elected

- Role and function of core group drawn
- Adhoc committees formed and functions drawn
- Committee chairman selected
- Plan of action done

### **IDEAL SELECTION CRITERIA FOR CORE GROUP MEMBERS**

- Must have the time and commitment to do community development activities in their locality
- Proven leadership skills
- Direct exposure and experience in community development project/activities
- Have some basic knowledge and/or skills in community organizing
- Good moral standing
- No criminal record
- Should be one of the beneficiaries
- With good interpersonal relationship with the community
- Should be literate

### **ROLES AND FUNCTIONS OF THE WATER CORE GROUP**

- Initiates the planning and implementation of action on water related activities
- Preparation of water project feasibility study/design community survey and spot map to further validate the importance of the project to the community at large
- Mobilize community resources specifically: the time, skills and efforts of the people
- Resources of the local agency, i.e., money, technical know-how, equipment, machines
- Disseminate information, keeps the community informed about the status of the water project
- Hears and considers suggestions of people with regards to the appropriate activities of the project
- Facilitates the expansion of water core group into Barangay/Rural Waterworks Association.

### **COMPOSITION OF THE CORE GROUP**

- Technical persons who can be trained on the technical aspects of the project
- Individual who are trusted and respected by community
- Those who have a strong liking to work for people
- Those who have a spirit of volunteerism
- Those who are resourceful
- Individuals who are understanding and patient enough to go with the pace of the community
- Together with the community, they should be able to identify the:
  - Objectives of the group
  - Define roles and responsibilities
  - Clear expectations to members and group as a whole

### **ADHOC COMMITTEES CO-TERMINUS WITH THE CORE GROUP**

- Education and recruitment
- Monitoring, evaluation and control
- Coordination and manpower
- Documentation (to include preparation of legal documents)

### **FUNCTIONS OF THE COMMITTEES**

- a. Education and recruitment
  - Project information drive
  - Advocacy on water supply, sanitation, health care and hygiene

- b. **Monitoring, evaluation and control**
  - Inspects and accepts hardware, tools and equipment
  - Acts as property custodian
  - Monitor the evaluation
  - Initiate action planning relative to construction activities
- c. **Coordination and manpower**
  - Coordinate resources from stakeholders
  - Do follow-ups and issue reminders
  - planning and manpower scheduling in terms of number and distribution
  - Coordinate technical activities in project site
- d. **Documentation**
  - Facilitate the issuance of legal documents such as right of way permit, deed of donation, certification water source site, etc.

#### 4. **ASSIST IN SITE SELECTION AND FEASIBILITY STUDY**

- Objectives : To identify potential water source sites
- Expected Results : Water source site for development identified (or prospecting for wells)
- Suggested Strategy : Technical data gathered

#### 5. **PRESENTATION OF TECHNICAL FINDINGS**

- Objectives : To come up with recommendations on the technical study
- Expected Results : Decision by the community on the technical findings  
: Water samples collected from agreed upon water source site (for spring only)
- Suggested Strategy : Meeting of the core group
- Facilitator : LGU Technical Team
- CO-facilitator : CO worker

By the end of Phase I of Community organizing work, the following milestones must have been achieved:

- Water Core Group formed
- Adhoc Committees formed and chairman named
- Water source site identified and initial studies done
- Community profile and spot map completed and validated

While at this stage, there is no way yet of gauging the certainty of making the project succeed in terms of a community-managed facility, a thorough understanding by the beneficiaries of the project features, stockholders, tasks, inputs, outputs and other important information about the project which is done formally as the opening salvo of the CO to the community and, later, on a more informal manner, as the CO integrates to the community is one of the most critical part of this phase.

As community organizing progresses, the deepening sessions of the CO worker in reinforcing project concepts such as strategies for community initiatives towards addressing key issues affecting their community that are directly or indirectly related to water are reinforcing mechanisms in providing impetus to the development of an informal water users' organization, as infant as a water core group.

## **6. HUMAN RESOURCE DEVELOPMENT TRAINING**

- Objective : To build a strong and cohesive team from among the core group members and barangay officials (if appropriate)
- Expected Results : Trained core group members on Human Resource Development
- Facilitator : CO worker
- Co-facilitator : Core group members

## **7. PRESENTATION OF TECHNICAL DESIGN**

- Objective : Generate community decision on appropriate technology to be used
- Expected Results : Generate community decision on appropriate technology to be used
- Suggested Strategy : Community meeting to discuss  
- Initial findings on technical feasibility study  
- Presentation of technology options
- Facilitator : Technical Team

## **8. FACILITATION ON LEGAL WORKS AND DOCUMENTS**

- Objective : Prepare necessary legal documents
- Expected Results : Legal documents required in WATSAN projects prepared
- Facilitator : Committee Chairman
- CO-facilitator : CO Worker

### **LIST OF DOCUMENTS REQUIRED IN IMPLEMENTING WATSAN PROJECTS**

- Barangay Resolution desiring to avail of a water facility to be submitted to the LGU
- Building permit of WATSAN facility, from LGU
- Waiver form DENR (if water system components such as the source, tank, pipelines are situated in areas other than private lands) to use the site(s) for community development
- Right of way permit from private land owners, specifically for spring sites and pipeline routes
- Deeds of donation from private landowners for water tank and tapstand sites
- Certificate of water quality source to be developed and tapped, from DOH
- Certificate of water quality produced through the water system facility, from DOH
- Letter of acknowledgment from the municipal mayor endorsing the water system management to the water users' association formed
- Accreditation pertinent papers (needed for the accreditation of RWSAs/BWSAs at the LGU level)
- Water rights
- Water permit
- Drilling permit

## **9. PRESENTATION OF DRAFT TECHNICAL DESIGN** (Skip This Activity If Level I)

- Objective : To inform the community of the results of the feasibility study conducted

**Expected Results:**

- Location of major components such as well drilling site, transmission and distribution pipelines
- Tanks and tapstands are identified
- Community acceptance of design
- Local counterpart generated

**Suggested Strategies:**

- Community meeting
- Site visit to proposed structures/facilities' location

**INFORMATION TO BE PRESENTED TO THE COMMUNITY**

- Role of technical people
- Contents of typical water system technical plan
- Presentation of design specifications and explanation of plan contents /drawings in layman's terms
- Presentation of program of work (POW) , bill of materials and cost estimates
- Validation of data gathered and used in the designing
- Solicit ideas, opinions, comments and preferences
- Come-up with compromises, and if appropriate determine local counterpart

**10. MOBILIZATION OF COMMITTEE ON DOCUMENTATION**  
*(skip this activity if Level I)*

- Objective : To facilitate additional legal work requirement for tapstand, pipeline and other major system components
- Expected Results : To ensure a formal listing of tapstand membership
- Facilitator : Completed legal documentation requirement membership per tapstand known
- CO-facilitator : Committee Chairman, Committee on Documentation and Education and Membership
- CO-facilitator : CO worker

**11. CONFIRMATION OF MEMBERSHIP BY TAPSTAND**

- Objective : To confirm final membership by tapstand
- Expected Results : To undertake information campaign on the importance of grouping and house rules formulation
- Suggested Strategy : To select tapstand leader
- Facilitator : Final listing of membership per tapstand
- CO-facilitator : Formulated tapstand house rules
- Facilitator : Tapstand leader selected
- CO-facilitator : Undertake meeting per tapstand
- Facilitator : CO worker
- CO-facilitator : Chairman, Committee on Education and Recruitment

## **DISCUSSION POINTS IN FORMULATING TAPSTAND HOUSE RULES**

- a. Getting water:
  - How will water be fetched?
  - When will water be fetched?
  - Who can fetch water?
- b. Monitoring
  - List down who fetches and how much volume of water was taken
- c. Water tariff due the specific tapstand
- d. Sanitation around the tapstand and around the cluster
- e. Beautification and physical development in the tapstand site
- f. Financial management regarding water tariffs

### **12. PRESENTATION OF FINAL TECHNICAL DESIGN**

- Objective : To present and approve the final technical design  
Expected Results : Finalized counterpart agreement  
Suggested Strategy : Construction scheduling developed  
Meeting among tapstand leaders, core group and barangay council

### **13. TRAINING ON HYGIENE, SANITATION AND HEALTH CARE**

- Objective : Conduct of training on health and hygiene  
Expected Results : Awareness on community health aspects  
Suggested Strategy : Community meeting, or  
Meeting by tapstand grouping  
Organizer : CO Worker, community and rural sanitary inspector  
Training Management : LGU  
Audience : Core Group, Barangay Officials, Barangay Health Workers,  
Rural Sanitary Inspectors, and Barangay Nutrition Scholars

### **14. SOURCE FOR EXCRETA DISPOSAL MATERIALS AND/OR FACILITIES**

- Objective : To make available to the community facilities for excreta disposal (if conditions and culture warrant)  
Expected Results : Materials/facilities for excreta disposal constructed individually by members of the community in their households  
Suggested Strategy : Core group members together with CO worker make representations with LGUs to source materials or facilities  
Facilitator : Core group members  
CO-facilitator : CO worker

### **15. ORGANIZATIONAL MANAGEMENT TRAINING**

- Organizer : CO and the community  
Training Management : LGU  
Audience : tapstand leaders, core group and barangay officials

## 16. PRE-CONSTRUCTION CONFERENCE

Objective	:	To generate work plan and tasking for the construction activities
Expected Results	:	Activities and roles identified
	:	Commitment to participate generated
Suggested Strategy	:	Hold a community meeting
Facilitator	:	Technical team
Co-facilitator	:	CO worker

### AGENDA IN THE PRE-CONSTRUCTION CONFERENCE

- Presentation of schedule of work and tasking
- Determine quantities of resources needed
- Labor arrangements
- Salaries/wages, if any that will be incurred
- Mobilization of committees
- Arrangement on materials storage

## 17. MOBILIZATION FOR DELIVERY OF MATERIALS

Objective	:	To ensure that materials delivered at the community are all accounted for
Expected Results	:	Materials delivered all accounted for and in accordance to the agreed upon specifications in the technical design
Suggested Strategy	:	Specific committee to handle delivery, and storage of materials , and, if need be, disposition of materials
Facilitator	:	Committee to be agreed upon by the core group
Co-facilitator	:	CO worker

## 18. ACTION PLANNING FOR CONSTRUCTION

Objective	:	To spell out what to expect during the construction processes
Expected Results	:	Smooth implementation of construction activities
Facilitator	:	CO worker
Co-facilitator	:	Technical Team
Suggested Strategy	:	Core group meeting

### STEPS TO BE UNDERTAKEN:

- Identify activities related to construction
- Define activity schedule and resources required
- Identify the type of manpower skills required per activity
- Monitoring and documentation of major water system components
- Progress reporting, evaluation and action planning
- Monitoring and documentation on construction of major water system components
- Repeat cycle until completion

## 19. DEVELOPMENT OF EXIT PLAN

Objective	:	To plan for the transfer of responsibility from CO worker to core group members
Expected Results	:	Core group informed of activities ahead and the expected time of withdrawal of the CO worker
	:	An exit plan containing task list and specific person responsible
	:	Organizational development program developed
Suggested Strategy	:	Core group meeting
Facilitator	:	CO worker
Co-facilitator	:	Technical Team
Audience	:	Community members

At the end of the Development of Organization Phase, the following milestone must have been achieved:

- Basic organizational development training such as value formation, leadership and team building and sanitation, health care and hygiene education must be done
- CO exit plan jointly developed by the CO together with the community
- All legal documents completed
- Pre-construction conference done
- Materials for construction delivered and accepted by the community
- Organizational strengthening such as involvement of a greater number of community members participating in mobilization activities and increased awareness on key issues through information exchange

The success of the phase rests on the extent the community had participated in the activities and learned from the processes as inputs to the community's capability for self-management. On the other hand, one of the most crucial factors to participation rests on the depth and broadness of their understanding of the project concept, features, processes, stakeholders, tasks, and responsibilities coupled with the need for water supply facility, a condition validated in the first orientation meeting done by the CO upon entry to the community.

The inputs that will be provided by the CO and the technical team will provide the necessary honing skills for the core group and tapstand leaders to have the confidence to accept more challenges in the next phase. These challenges are contained in the Exit Plan, which was formulated by the local stakeholders. The Plan will be implemented in Phase III stage to signal the weaning process of the community from the CO worker.

## 20. PRESENTATION, COMPARISON & COLLATION OF TAPSTAND HOUSERULES (skip this activity if Level I)

Objectives	:	Collate similar houserules formulated in the previous activity
Expected Results	:	Collated houserules
	:	Identified houserules appropriate for by-laws
Suggested Strategy	:	Meeting of tapstand leaders
Facilitator	:	CO worker
Co-facilitator	:	Core Group Member

## 21. DRAFTING OF CONSTITUTION AND BY-LAWS

Objective	:	To develop a set of policies and by-laws that will govern the operation of the organization.
-----------	---	----------------------------------------------------------------------------------------------

Expected Results : Constitution and by-laws ready for ratification  
Suggested Strategy : Meeting of core group and tapstand leaders

**22. RATIFICATION OF CONSTITUTION, BY-LAWS AND POLICIES**

Facilitator : CO Worker  
Co-facilitator : Core Group Member  
Expected Results : Constitution ratified  
: Officers elected

**23. FACILITY/SYSTEM TEST RUN**

The community participates in ocular operation and test run of facility installed

Facilitator : Technical Team

**24. WATER QUALITY TEST**

Objective : To ensure potability of water from facility  
Expected Result : Water facility is to provide potable water to community  
Suggested Strategy : Collect water sample from tapstand  
: Submit sample to DOH for test and certification

**25. TURN-OVER OF FACILITY/SYSTEM**

Officers elected organize and manage facility turnover ceremony

**26. OPERATION, MAINTENANCE AND REPAIR TRAINING**

Trainer : Technical team  
Trainees : Community-appointed Plumber, Meter Reader (if there is a meter installed), Tapstand leader and RWSA/BWSA officers

**27. FINANCIAL MANAGEMENT TRAINING**

Trainer : NGO, LGU or Water District  
Trainees : Bookkeeper, Tapstand Leader and RWSA/BWSA officer

**28. RWSA/BWSA REGISTRATION AND ACCREDITATION**

Facilitator : RWSA/BWSA officer  
Co-facilitator : CO worker

Registration of BWSA/RWSA to appropriate government agencies is done. Options on where to register shall be presented and decided upon by the organization.

Possible Options:

In the absence of a clear national policy on B/RWSA registration, the following Registering Agencies could be presented as options:

- a. Securities and Exchange Commission
- b. Bureau of Rural Workers
- c. Local Waterworks Utilities Administration

- d. Department of Social Welfare and Development
- e. Cooperatives Development Authority

Accreditation of BWSA/RWSA is done through the municipal local government unit.

## 29. FORMAL EXIT OF THE CO WORKER

Facilitator	:	RWSA Officer
Co-facilitator	:	CO worker
Suggested Strategy	:	Hold a community meeting
Agenda	:	Assessment of CO Exit Plan
	:	Planning for the operation and management of water facility
	:	Scheduling of CO visits
	:	Scheduling of RWSA/BWSA and CO formal linking with other organizations and agencies
	:	Formal turn-over of CO responsibility to RWSA/BWSA

At the end of the Consolidation Phase, the following milestones are achieved:

- Facility is turned-over to the RWSA/BWSA and is functioning as intended and has its set of officers, constitution and by-laws and policies
- Plan for operation, maintenance and repair of system is installed

At the end of the community organizing process, the degree of capability of RWSA/BWSA in the operation and maintenance of water supply facility and maintaining their organizational health can be gauged on the extent of participation of the members in resolving problems and making decisions. The extent of focus of team building and leadership inputs is crucial in how the members of the RWSAs/BWSAs are willing to make amends, allow some compromises among each other. On the other hand, the technical soundness of the design and execution of the construction ensures the long-term sustainability of the system.

By this time, the CO has exited but maintains monitoring visits until he/she is fully confident that the organization is strong enough to take decisions, plan and implement their WATSAN related activities and knows where to access support (in terms of financial, institutional and technical) when needed.

## **10 COST ESTIMATES FOR FUTURE SECTOR DEVELOPMENT**

### **10.2 Assumption for Cost Estimates**

#### **10.2.1 Unit Construction Cost**

##### **(1) Calculation method**

The base information in previous PW4SP, such as bill of quantities and unit cost of respective components facilities was fully utilized, which was referred to the standard of relevant sector agencies. Escalation rates experienced between 1995 and 1998 in terms of major construction materials and equipment rental were studied using NSO statistics (whole price index). Market prices of these items were also canvassed to compare with the calculated prices in 1998 from those in 1995 in application of the escalations rates.

In general, escalated prices meet canvassed prices in the most of the materials. Escalation rates between 1995 and 1998 were employed in round figures. Some of them (water closet, etc.) were, however, replace by current price due to considerable increase in the last two years.

The Table 10.2.1 shows the prices of the major materials by facility.

Table 10.2.1 Price of Major Materials by Facility

Major Materials	Water Supply		Sanitation		Projection by major materials					Canvassed & collected price		Comparison (1), (2) & (3)	
	L-I	L-II	L-III	ST, PT	Flush type	VIP, Pit	NSO wholesale price index		Price		DPWH <sup>(2)</sup>		CIA <sup>(3)</sup>
							1995	1998	Escalation	1995			
1. Aggregate	x	x	x	x	x	x	311.6	367.5	5.7%				Almost same with (2) & (3).
Sand										304	330	350	
Gravel										385	418	500	
2. Cement	x	x	x	x	x	x	197.4	214.1	2.7%	117	126	105	ditto
3. Fuel	x		x				601.6	742.6	7.3%	1,100	1306		ditto
4. Metal pipe	x	x	x				208.7	226.3	2.7%				Price of GI casing is almost same with (2) and screen is 12% lower than (2).
4" x 3m, GI										2,625	2763		
4" x 3m, Screen										4,313	5291		
5. PVC pipe	x	x	x	x			199.2	223.4	3.9%				Price of PVC pipe is almost same with (2) and 7% higher than (3).
2" x 3m										813	882	852	
1-1/2" elbow										13		40	
6. Reinforcing	x	x	x	x	x	x	201.4	221.9	3.3%				Almost same with (3).
12mm x 6m										68		75	
10mm x 6m										49		45	
7. Lumber				x	x	x	268.5	296.8	3.4%				
8. Paint				x			128.0	140.1	3.1%				Almost same with (3).
Enamel, QDE										266		310	
9. Machinery	x		x				254.8	254.8	0.0%				

L-I: Deep well/shallow well, L-II: Major materials are same as those of L-I spring development.

ST: School toilet, PT: Public toilet, Flush type: Flush water sealed w/ septic tank and Pour flush w/ double latrine,

CIA: Construction Industry Authority of the Philippines, prevailing prices for the month of December 1998

GI: Galvanized iron steel pipe for well casing, Screen: Low carbon steel and wound wire type

### 10.2.2 Unit Cost of Equipment

Unit cost (CIF Manila) of equipment was referred to the market price in 1997 as follows.

(1) Medium size rotary drilling rig

Type: Truck-mounted top head drive mud circulation type

Rated drilling capacity: 150 m depth for  $\phi 250$  bore hole

Equipment composition:

One unit of truck-mounted drilling rig

Each one set of operating accessories, drilling tools, casing tools and fishing tools

One set of spare parts (equivalent to 10% of above equipment/tool cost)

Unit cost: Peso 32,314,000 per set

(2) Medium size percussion drilling equipment

Type: Truck-mounted cable percussion type

Rated drilling capacity: 150 m depth for  $\phi 250$  mm bore hole

Equipment composition:

One unit of truck-mounted drilling rig

Each one set of operating accessories, drilling tools, pipe handling tools and fishing tools

One set of spare parts (equivalent to 10% of above equipment/tool cost)

Unit cost: Peso 25,582,000 per set

(3) Well rehabilitation equipment

Equipment composition:

One unit of diesel engine driven air compressor (7.5 kg/sq.cm, 500 liter/min.)

One set of air hose and hose fittings

Unit cost: Peso 280,000 per set

(4) Service truck

Type: Diesel engine driven 4 tons truck equipped with crane

Unit cost: Peso 1,200,000 per unit

**(5) Support Vehicle**

Type: Diesel engine driven pick-up truck with electric winch

Unit cost: Peso 590,000 per unit

**(6) Refuse collection truck**

Type: Closed type compactor truck with 5 cu.m of payload capacity

Unit cost: Peso 2,057,000 per unit including spare parts

**(7) Maintenance tools**

One set of maintenance tools for O&M of Level I facility shall be provided to respective municipality.

Unit cost: Peso 10,000 per unit

**(8) Water quality testing kits**

One set of water quality testing kits for O&M of Level I facility shall be provided to respective municipality.

Type: Ammonia testing kit

Unit cost: Peso 15,300 per unit

**10.2.3 Cost of Laboratory and Equipment**

Required cost for new laboratory including building/facility and instruments/chemicals and additional cost for upgrading of existing laboratory are shown in Table 10.2.18 and Table 10.2.19, respectively.
