Note : Improve.-A = improvement of all the part of rural road , Improve.-G = improvement of the only gravel pavement of the surface for rural road .

Note : About P-1 and P-2 , see the figures of both Bridge (Type-P) : pipe of reinforced concrete .

H-8-2. Planning and Design of Rural Road ; (2) in the Vangkhong Model Area

Planning and Design of Rural Road in the Vangkhong Model Area

to construct the new Rural Road through the paddy fields and the forest area

- (1) To construct the new Rural Road through the forest area under land reclamation
- (2) To construct the new Gravel Pavement (thickness : $t = 50 \text{ mm}$) on the existing rural road
- (3) Total Road Width = $BR = BE + 0.50 \times 2$; Effective Road Width = BE ; Shoulder Width = 0.50 m

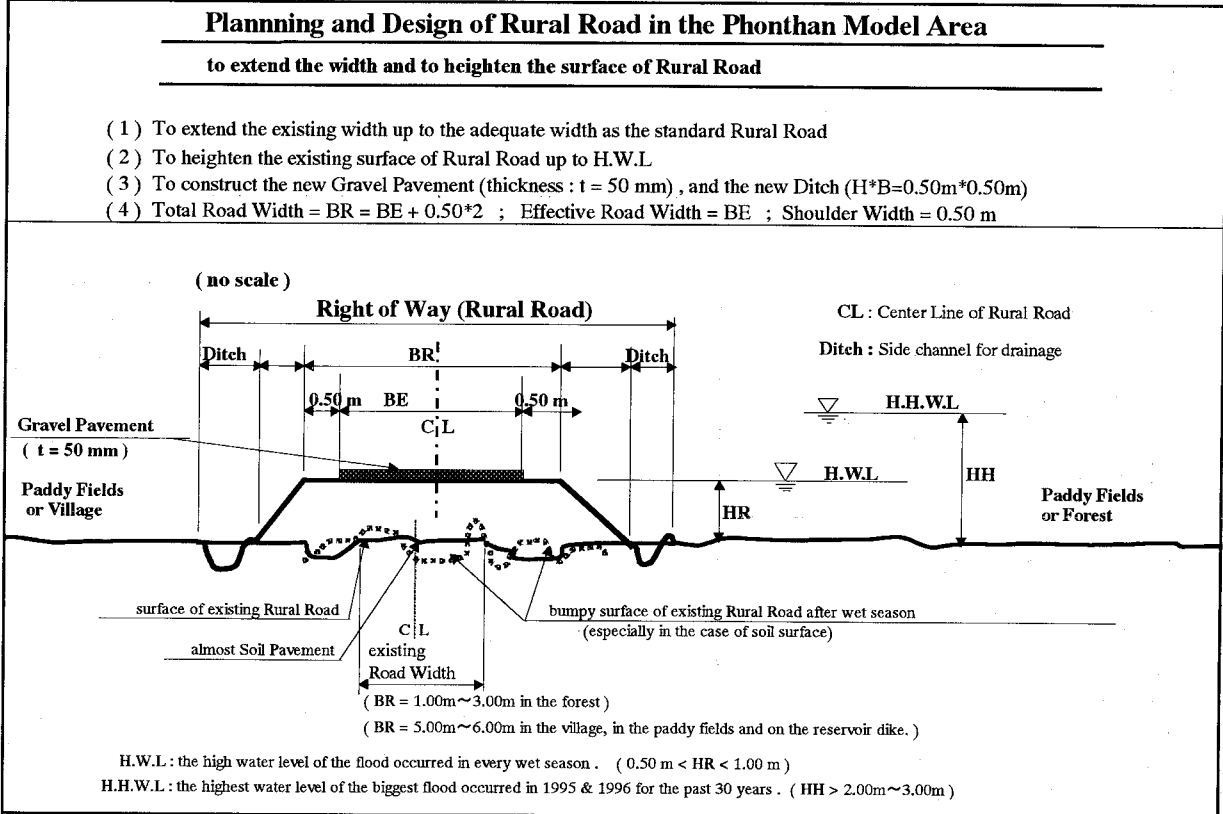

Feasibility Study Area : (2) Vangkhong Model Area (Village : Ban. Vangkhong)
