# CHAPTER 17 DEVELOPMENT PLAN OF THE PRIORITY IRRIGATION SCHEMES

# 17.1 Introduction

The development plan in the Feasibility Study (F/S) has adopted the PCM method for participatory planning as mentioned in Chapter 16. The PCM workshops were held with personnel concerned in the priority irrigation schemes. The workshop's participants have determined farmer/community as the target group and adopted three approaches to be tackled during the Feasibility Study as: i) strengthening of farmers' organisation (including the increment of non-farm income as by improving employment opportunity), ii) obtaining sufficient irrigation water, and iii) improving agriculture activity (including marketing and agriculture credit). The Study Team has prepared PDMs for respective priority irrigation schemes based on the results of the workshops. This chapter is to set the development plan based on PDM and to prepare Plan of Operation.

# **17.2 Basic Development Concepts**

17.2.1 Overall Goal and its Adaptability with the Development Components of the Master Plan

The Master Plan Study has proposed the following two (2) goals.

- a) Achieving sustainable development of rural agriculture.
- b) Improving agricultural production in the rural community.

PCM workshops were organised based on the above goals. The PDMs for respective priority irrigation schemes prepared on the results of the workshops are adaptive and possible to implement within the frameworks of the Master Plan as described in the table below.

| PDM ( Narrative Summary ) - F/S              | Master Plan                               |
|--|---|
| Overall Goal                                 | Overall Goal                              |
| Achieving sustainable development of         | Sustainable development of rural agricul- |
| rural agriculture.                           | ture.                                     |
| Improving agricultural production in the     | Improvement of agricultural production &  |
| rural community.                             | Farm household income.                    |
| Project Purpose                              | Basic Development Purpose                 |
| Improving socio-economic status*1            | Increase farm household income            |
| Activities                                   | Development Components                    |
| 1) Strengthening Farmer' Organisation        |   |
| Conducting awareness and training pro-       | Awareness programme                       |
| grammes.                                     |   |
| Reorganisation to be multifunctional         | Strengthening programme for FOs.          |
| FOs.   |   |

| Improving water management.            | Water management plan                         |
|--|---|
| Strengthening O&M of the facilities.   | Including into above plans of the rehabilita- |
|  | tion and the strengthening FOs.               |
| 3) Improving agriculture activity.     |   |
| Strengthening agriculture extension    | Improvement of agricultural support serv-     |
| activity.                              | ices.   |
| Promoting OFC cultivation.             | Agriculture production plan.                  |
|  | (Crop diversification).                       |
| Improving marketing of inputs material | Marketing improvement plan.                   |
| and outputs.                           |   |
| Improving credit services.             | Rural credit improvement & Strengthening.     |
| Promoting reforestation in the catch-  | Corresponding to promote fruits cultivation   |
| ment area.                             | of the above income generation plan.          |
| Reducing elephant damage.              | ( Proposed as environmental conservation, not |
|  | included in the development components )      |

\*1: Summary of the entire priority irrigation schemes.

### 17.2.2 Basic Approaches on the Programme Preparation

The following basic approaches were adopted to formulate the concrete development programmes and to prepare the plan of operations, based on the PDM.

(1) Application of Basic Development Approaches adopted in Master Plan Study

In the preceding Master Study, the following basic approaches for the preparation of the development programme has been established (refer Section 8.3.2). These have also been adopted in this F/S.

- a) Programme implementation through farmers' initiative.
- b) Comprehensive development.
- c) Programme implementation according to the present development stage of the irrigation scheme.
- d) Equal distribution of the fruits of development.
- e) Close communication and maintaining transparency.

On the item of "programme implementation in accordance with the present development stage of the scheme", the development stage of the priority irrigation schemes is to be executed in the first stage (refer Section 8.6). Therefore the approach is to be a comprehensive development, which is the rehabilitation and improvement of irrigation facilities including the software components.

(2) Reflecting Farmers' Opinions obtained at Public Meeting

Many opinions raised in the public meetings on the preliminary PDM are considered to be valuable, which are farmers' own ideas. These opinions are reflected into the basic approach on the programme preparation, which are presented in the following table.

**Basic Approach on the Programme Preparation** 

| II  |  |
|---|--|
| Farmers' Opinion in the Public Meeting  | Basic Approaches   |
| <ol> <li>Participants consider the gap on idea<br/>of O&amp;M between FO leaders and<br/>ordinary farmers. They are also<br/>pointed out the importance of aware-<br/>ness for officers in order to change<br/>into the project implementation<br/>method of reflecting farmers' opinion<br/>from the one-sided project works.</li> </ol>   | The programme is to emphasis on awareness of<br>both personnel concerning the executing agencies<br>and farmers. Awareness programme for<br>individual farmer is to be carried out through FOs.  |
| <ol> <li>2) Rehabilitation works carried out in<br/>the past project were without reflect-<br/>ing farmers' intention and are not in<br/>operation at present. There are<br/>many farmers who are not satisfied<br/>the implemented works.</li> <li>3) Farmers criticised officers and con-<br/>tractors that rehabilitation works in<br/>the past were not transparent and dis-<br/>cussion before construction was not</li> </ol> | Lack of communication between official institutions<br>and farmers basically caused by the problems of 2)<br>and 3). Following approaches are employed as the<br>countermeasures in the programme preparation.<br>Contents of rehabilitation and improvement works<br>are to be <u>reflected as much farmers</u> ' intention <u>as</u><br><u>possible</u> . The plan in this study is prepared<br>based on FOs' estimation of the rehabilitation.<br>Transparency to the rehabilitation works and<br>communication system between executing side |
| <ul> <li>enough.</li> <li>4) Samurdi and other organisations are carrying out a group loan at present, but are not fairly implemented.</li> </ul>   | and farmers are to be established.<br>This is the issues not only for rural credit but also<br>for the services provided by the Project. Farm-<br>ers' organisation is to be fostered as autonomous<br>organisation representing the community and pro-<br>gramme is to approach for system to provide<br>fairly various services through FO.  |
| <ol> <li>There is a problem on O&amp;M of<br/>facilities and water management<br/>caused by unclear relation of landlord<br/>and tenant. (Nachchaduwa scheme)</li> </ol>  | This problem occurred in Nachchaduwa scheme<br>at present and might occur in the other schemes<br>too. Therefore, all FOs have to survey the rela-<br>tion of landlord and tenant.   |

The main needs of farmers in the public meetings were the rehabilitation and improvement of irrigation facilities, and farmers' intention on the works is on "reflecting farmers' ideas" and "maintaining transparency of the works and effective communication." Therefore, the F/S is prepared based on the following concrete basic approaches.

1) Reflecting Farmers' Ideas to the Development Components (Programmes)

All FOs (28 FOs) were made to prepare the rehabilitation plans during the field survey as mentioned in Section 16.5. The plans prepared were mostly technically and economically acceptable; therefore it was decided that the rehabilitation and improvement programmes in the F/S are prepared based on these plans.

2) Maintaining Transparency and Close Communication

In order to maintain transparency and close communication between officers and farmers, three resident workshops, which are systematically practised by ADB project at present, are to be introduced in this Project. Moreover for further strengthening the system, training for officers, "Capacity building on communication" for both parties and "Skill of technology transfer to farmers" are to be applied.

# (3) Implementing Project as Comprehensive Development

The component of activities prepared on the basis of the PCM workshops shows a comprehensive development consisting of not only rehabilitation of the irrigation facilities but also strengthening of FOs, provision of income generating and social services, improvement of agricultural extension, marketing and rural credits, etc. And, in order to achieve successful implementation of these components, it is important to strengthen the support services of the government agencies concerned. Therefore, the development of the priority irrigation scheme should include strengthening programme of the government support services. Moreover, the priority schemes consisting of 5 areas should be developed as one unit, because individual development of priority scheme will bring about over investment on grading-up of the government agencies concerned.

# 17.3 Development Plan of the Priority Irrigation Schemes

17.3.1 Nachchaduwa Major Scheme

# (1) General

Nachchaduwa major irrigation scheme is located adjacent to Anuradhapura and it has easy access to Dambulla, which is a centre for marketing agricultural products. Total number of farm households is 3,230 and the irrigated paddy area is 2,540ha. The Farmers' Organisation Federation, consisting of 14 FOs of Nachchaduwa and 1 FO of Thruwila, is organised in to a scheme. (The project targeted FOs are the former 14) The present situation of the scheme is in Table 15.1.1.

The PDM of the Nachchaduwa scheme is shown on page 17-12. The development plan is formulated as "increase farmers' income in the rural community" for the project purpose and the target group in farmers/community's people. The details are given in the table of the Plan of Operation of page 17-13 and 17-14, and the project layout map of page 17-15.

# (2) Strengthening Farmers' Organisation

Farmers' organisations are the main executing organ of the Project. The proposed components are to be implemented by the FOs or through the FOs, who are also the core organ of sustainable rural agriculture development for self-reliance. The approaches considered for strengthening FOs are: i) awareness and training programmes, ii) establishment of multifunctional FOs, iii) income generation programme and iv) construction of farmer centre. The concrete plans for these programmes are as follows. 1) Awareness Programme and Educational/Training Programmes

### Awareness programme

Awareness programme is applied for the both "farmers" and "official institutions concerned" as mentioned before. Its contents and implementation procedure are as detailed in Section 9.2. The multifunctional FO is to be established through this programme with the self-motivation of the entire community.

# Education/ training programme

Following education and training programmes for fostering leaders of the multifunctional FO are to be conducted.

| Training Subject      | Contents                             | Training Method               |
|-----------------------|--------------------------------------|-------------------------------|
| 1) Draft preparation  | Draft preparation of the Articles of | Lecture in Srawasthipura      |
| of the Articles of    | Organisation, and knowledge of the   | Agrarian Service Centre       |
| Organisation          | systems and the procedures required  | (ASC/DAS) and practical       |
| amendment             | on the process.                      | training by Farmer Animator.  |
| 2) Practical training | Planning, participatory manage-      |                               |
| of the basic          | ment, practical operation & man-     |                               |
| operation and         | agement of FO, practical financial   |                               |
| management of         | management, financial resource       |                               |
| the organisation      | management, role & systems of        |                               |
|                       | official concerned, etc.             |                               |
| 3) Training on the    | Practical; training of the opera-    | Lecture by ASC/DAS, IMD,      |
| income genera-        | tion/management of the rural         | private bank (PMU arranges    |
| tion activity         | credit(Group-loan, Revolving-loan)   | with banks) & practical       |
|                       | and co-operative purchasing/selling. | training by Farmer Animator.  |
| 4) Information net-   | Establishing information networks    | Holding joint workshops with  |
| work forma-           | with external organisations for      | external organisations and 14 |
| tion/Awareness        | collecting and sharing information   | FOs for sharing information.  |
| training              | in and around the community.         |                               |

Education/Training Programmes for FO Leader – Nachchaduwa Major Scheme

These programmes are conducted separately from the awareness programme within the regular works of Nachchaduwa Resident Project Manager's Office (RPM) and Srawasthipura ASC. Education and training facilities of Srawasthipura ASC are to be improved and strengthened (refer Section 17.4).

# 2) Establishment of Multifunctional Farmers' Organisations

The present FOs are to be reorganised to multifunctional. The reorganisation is determined in the general meeting of the entire community, which conducted the awareness programme mentioned previously. The organisation is to provide various services to farmer/community and to be fostered to be an autonomous organ representing the community. Major change in the reorganisation is to set up subcommittees under the executive committee for acting on irrigation, agriculture, business of FO, and income generation/social services.

| Subcommittees                                    | Purposes and Activities  |
|--|--|
| 1) Irrigation                                    | i) Water management, ii) O&M of facilities, iii) Safety operation of irrigation facility, iv) Estimation & collection of Irrigation Service Fee (ISF), and v) Survey on lease/tenant of farmland   |
| 2) Agriculture                                   | i) Collaboration with official extension works, ii) Holding technical<br>extension seminar, iii) Income generation activity (Home garden and<br>livestock development), iv) Operation of group works as pest control,<br>and v) Control elephant damage (strengthening control by FO)  |
| 3) Businesses<br>of FO                           | i) Establishment and operation of co-operation purchasing/selling,<br>Pola/collection point, ii) Operation and management of the rural credit<br>service (group loan, revolving loan), iii) Business of FO as farm machin-<br>ery rental service, inland fishery, agro-processing, etc.  |
| 4) Income<br>Generation/<br>Social Serv-<br>ices | i) Income generation activities such as vocational training, small-scale<br>enterprise/business, self-employment, ornamental fish culture and col-<br>lection of employment information, ii) Promotion of mutual aid credit<br>system, iii) Financial support for income generation, and iv) Promotion<br>of anti alcohol addict campaign, social welfare, health & sanitary<br>improvement. |

Setting up the Subcommittee – Nachchaduwa Major Scheme

Operation and management of irrigation facilities by seasonal tenant became a problem in Nachchaduwa scheme as the responsibility of landlord and tenant on O&M works is not clear. Therefore, the irrigation subcommittee of FO is to survey the situation of seasonal tenant and the responsibility of O&M is to be clarified. It is proposed that this activity is to be authorised to FOs by the Kanna meeting.

Audit section is proposed to set for maintaining transparency of FO activity and to employ volunteer for close communication with FO members. The audit section is to check periodically and report to the general meeting. The volunteers are to work on communication among the executive committee, the subcommittees and the members.

# 3) Income Generation/Social Services through Farmers' Organisations

"Agriculture" and "Income Generation/Social Services" subcommittees are to carry out income generation for farmers and community. The activities are; i) promotion of home garden development, ii) livestock promotion, iii) inland fishery promotion, iv) promotion of vocational training, v) employment services, vi) small-scale enterprise/business promotion, vii) financial support for income generation, and viii) social services such as anti-alcohol addict. The income generation/social services are to be carried out by the self-motivation of FOs and are to target poverty groups in the community. Necessary information is to be provided through Srawasthipura ASC and Farmer Animators. The training facilities of the National Youth Service Council (NYSC) are to be utilised for vocational training, so no extra facility is constructed by the Project.

### 4) Construction of Farmer Centre

Farmer centres are to be constructed for smooth implementation of FOs' activities and for maintaining communication in the community and with the official agencies concerned. Ranketa FO owns a hall at present but it has deteriorated and there are no facilities in the other thirteen FOs. Therefore, fourteen centres are to be constructed for all FOs. The size of the facility is according to the DOA's on-going plan as mentioned in Section 17.4.2.

### (3) Distribution of Proper Irrigation Water

1) Rehabilitation and Improvement Plan of Irrigation Facilities

The rehabilitation and improvement works in Nachchaduwa major scheme are as follows:

| Category | Item         | Quantity | Description of works                                    |
|----------|--------------|----------|---|
| Tank     | Bund         | L.S.     | Embankment, Gravelling, Rip-rap, Filter toe drain       |
|          | Sluice       | L.S.     | Repair of concrete works, protection of down-           |
|          |              |          | stream, Measuring device                                |
|          | Spillway     | L.S.     | Repair of concrete works                                |
|          | Others       | L.S.     | O&M Road  |
| Main     | Earthworks   | 15 km    | Embankment, De-silting                                  |
| canal    | Lining       | 7 km     | Masonry Lining  |
|          | Structures   | 180 Nos. | Turnout, Regulator, Bathing steps, Bridge, Culvert etc. |
|          | O&M Road     | 26 km    | Earth filling, Gravelling                               |
| D-canals | Earthworks   | 16 km    | Embankment, De-silting                                  |
|          | Lining       | 21 km    | Masonry Lining  |
|          | Structures   | 230 Nos. | Turnout, Drop, Culvert                                  |
|          | O&M Road     | 18 km    | Earth filling, Gravelling                               |
| F-canals | Earthworks   | 17 km    | Embankment, De-silting                                  |
|          | Lining       | 38 km    | Masonry Lining  |
|          | Structures   | 122 Nos. | Farm turnout, Culvert, Drop                             |
|          | O&M Road     | 45 km    | Earth filling, Gravelling                               |
| Others   | Small Tank   | 11 Nos.  | Minor repair  |
|          | Feeder Canal | L.S.     | Repair of feeder canal from Kala Wewa                   |

Rehabilitation and Improvement Plan – Nachchaduwa Major Scheme

The major works on the main canals include the rehabilitation of the offtakes, and construction of new bridges. The masonry lining will be provided in most of the D-canals and 20% of the F-canals in length. As for the O&M of roads, earthworks with gravelling are proposed for easier vehicle transportation in rainy season.

The works for tanks and main canals are to be conducted by constructors and the works for D-canals and F-canals are to be carried out by contractors or farmers. The training courses for rehabilitation and improvement works are programmed in order to reflect farmers' intention to the works as much as possible, and to carry out the works by the farmers. The training courses for the government staff and the farmers are outlined below.

|            |         |                   | 3        |  |  |  |
|------------|---------|-------------------|----------|--|--|--|
| Activities | Session | Period            | Lecturer | Subject of training                    |  |  |
| Training   | First   | 1day              | RATPA    | Participatory planning                 |  |  |
| for the    |         | Pre-construction  |          | Communication with farmers             |  |  |
| government | Second  | 1 day, in the     | ID       | Skill of technology transfer to farm-  |  |  |
| staff      |         | construction      |          | ers                                    |  |  |
|            | Third   | 1day              | ID       | Hand-over of O&M responsibility to     |  |  |

|            |         | tion              |          | rehabilitation, field inspection       |  |  |
|            | Fourth  | 1 day             | ID       | Follow-up programme                    |  |  |
|            |         | Post-construction |          |  |  |  |

Training Programme for Rehabilitation and Improvement Works – Nachchaduwa Major Scheme

RATA: Research and Advisory Team for Participatory Approach

Education/training for officers is one course for TA and WS of Anuradhapura ID. One course in every two FOs (total 7 courses in Nachchaduwa) is to be conducted and farmers, the office bearers of FOs and the subcommittee members are to be participants.

### 2) Training for Water Management

The water management training for the government staff and farmers are proposed as follows:

| Activities | Session | Period       | Lecturer | Subject of training                       |
|------------|---------|--------------|----------|---|
| Training   | First   | 1 day, pre-  | RATPA    | Awareness programme, communication        |
| for the    |         | construction |          | with farmers                              |
| government | Second  | 1.5days      | ID       | Estimation of water requirement, prepa-   |
| staff      |         | Post-        |          | ration of water distribution programme,   |
|            |         | construction |          | skill for gate operation of tank and off- |
|            |         |              |          | takes, flow measurement and flow moni-    |
|            |         |              |          | toring, skill of technology transfer to   |
|            |         |              |          | farmers                                   |

Training Programme for Water Management – Nachchaduwa Major Scheme

RATA: Research and Advisory Team for Participatory Approach

Education/training for officers is one course for TA and WS of Anuradhapura ID. One course in every two FOs (total 7 courses in Nachchaduwa) is to be conducted and farmers, the office bearers of FOs and the subcommittee members are to be participants.

### 3) Training for O&M of Irrigation Facilities

The training on O&M of irrigation facilities for the government staff and farmers is proposed as follows:

|                     | 0       | 0                            |          | 5   |

Education/training for officers is one course for TA and WS of Anuradhapura ID. One course in every two FOs (total 7 courses in Nachchaduwa) is to be conducted and farmers, the office bearers of FOs and the subcommittee members are to be participants.

### (4) Improvement of Agriculture Activities

1) Promotion of Crop Diversification

Water resource potential of Nachchaduwa scheme is not so high and its potential for increasing cultivation area after the project implementation is as less than 50% (refer Section 9.4.3), therefore OFC promotion cropping pattern is proposed. The proposed cultivation area and production of respective crop are as follows, and the proposed cropping system is shown in Figure 15.3.1.

| Cropping Area and Production With & Without Project |
|---|
| – Nachchaduwa Major Scheme                          |

|               | Without Project |          | With Project |       |          | I          |                |
|---------------|-----------------|----------|--------------|-------|----------|------------|----------------|
|               | Area            | Yield    | Production   | Area  | Yield    | Production | Increase (ton) |
|               | (ha)            | (ton/ha) | (ton)        | (ha)  | (ton/ha) | (ton)      | (1011)         |
| Paddy - Maha  | 2,540           | 4.43     | 11,252       | 2,286 | 5.0      | 11,430     | 178            |
| - Yala        | 1,473           | 3.81     | 5,611        | 2,032 | 5.0      | 10,160     | 4,549          |
| OFC           |                 |          |              |       |          |            |                |
| Maha - Pulses | -               | -        | -            | 89    | 1.5      | 134        | 134            |
| - Chili       | -               | -        | -            | 76    | 1.5      | 114        | 114            |

| - B'onion     | -               | -        | -            | 102   | 10.0     | 1,020      | 1,020          |
| - Vegetables  | -               | -        | -            | 51    | 10.0     | 510        | 510            |

### 2) Strengthening Agricultural Extension Services

Major technical improvement required for crop diversification and increasing yield in Nachchaduwa is as follows.

| Yield Increase of Paddy             | Crop Diversification & OFC Yield Increase            |
|-------------------------------------|--|
| a) Improvement of planting tech-    | a) Improvement of plant density                      |
| nique (seed rate, seed quality)     | b) Improvement of OFC irrigation (interval, amount)) |
| b) Improvement of fertilising tech- | c) Improvement of Fertilising technique              |
| nique (amount, timing)              | (amount, timing)                                     |
| c) Improvement of pest management   | d) Improvement of soil (organic matter application)  |
| (amount of chemical, timing)        | e) Appropriate harvesting time (quality improvement) |

Inter-provincial Extension Unit (IPEU) of the central government is to conduct the following extension activities in order to achieve crop diversification and increase in yield.

| Programme                                     | Objectives               | Method & Required Materials   |
|---|--------------------------|---|

Agriculture Extension Activity - Nachchaduwa Major Scheme

Moreover, improvement of marketing agricultural products is needed for OFC promotion. Improvement of fertilising/pest management techniques is related closely to marketing of input materials and the rural credit, and the countermeasures are described in 3) and 4).

3) Improvement of Marketing of Agricultural Outputs and Inputs Materials

### Improvement of inputs materials

Co-operative purchasing of inputs materials is proposed by FOs. This system is to carry out by linking to a group loan to be mentioned in the improvement of rural credit of the item 4). Awareness and education to Srawasthipura ASC are to be attempted for introducing the system.

### Improvement of outputs

Following improvement on marketing programme is proposed. These activities are to be carried out by FOs (FO business subcommittee).

| – Nachchaduwa Major Scheme  |   |  |  |  |
|---|---|--|--|--|
| Programme   | Objectives  | Method & Required Materials  |  |  |
| 1) Setting Pola   | To activate mar-<br>keting of farm<br>products by open<br>Polas.<br>To sell small quan-<br>tity products from<br>home gardens.                    | <ul> <li>Polas are to be managed by FOs</li> <li>Proposed that Pola is to set without any construction for reducing maintenance cost and no Pola fee is to charge.</li> <li>Guidance for setting Pola is to be carried out to FOs by ASC/DAS and suitable location and day are to be decided by contact with merchants.</li> <li>Proposed location of Polas is shown in the Project Layout Map based on the discussion with FO leaders.</li> </ul> |  |  |
| <ul> <li>2) Setting<br/>Collecting<br/>Point of Farm<br/>Products</li> <li>3) Establishing<br/>Co-operative<br/>Selling System</li> </ul> | To set contact points<br>of producers with<br>merchants on out-<br>puts marketing.<br>To sell products<br>regularly and de-<br>velop new markets. | <ul> <li>No required materials for setting the system.</li> <li>Selections of merchants and locations are determined by farmers and Proceeded by FOs.</li> <li>ASC/DAS is provide guidance to both merchants and FOs on collecting points and cooperative selling.</li> </ul>  |  |  |
| 4) Establishing<br>Market<br>Information<br>Collection  | To collect infor-<br>mation on market<br>prices.  | <ul> <li>Regular purchasing of KARTI publication.<br/>PMU will provide information on purchasing.</li> </ul>   |  |  |
| 5) Improving<br>Quality   | To improve quality<br>of products.  | <ul> <li>No required materials.</li> <li>Quality standard of products is not established<br/>and it is judged by merchants. FOs have to<br/>collect information on quality and disseminate<br/>to farmers.</li> <li>ASC/DAS is to provide guidance on information<br/>collection.</li> </ul>   |  |  |

#### Improvement Programme of Marketing Agricultural Products - Nachchaduwa Major Scheme

# 4) Improvement of Rural Credit

Introduction of the following loans is proposed. The activity on the rural credit is to carry out mainly by FOs and PMU and Srawasthipura ASC will support them.

|                 |                 | ir ar Creun – Nachenadu wa Major Beneme                               |
|-----------------|-----------------|---|
| Programme       | Objectives      | Method & Required Materials   |
| 1) Introduction | For purchasing  | • No required materials.  |
| of Group        | inputs          | • Mainly loan by private banks. It is considered to be                |
| Loan (culti-    | materials.      | possible to introduce for group loan by private banks,                |
| vation loan)    |                 | because this loan is practised at present. PMU is to                  |
|                 | Linkage with    | request to banks on introduction.                                     |
|                 | co-operative    | • The system management/operation of farmer sides is                  |
|                 | purchasing      | carried out by FOs(subcommittee)                                      |
|                 | system.         | • ASC/DAS is to educate FOs on the introduction and                   |
|                 |                 | training FO leaders on the operation works.                           |
| 2) Introduction | For purchasing  | • No required materials.  |
| of Revolving    | farm machinery  | • Operation & management by FOs (subcommittees).                      |
| Loan (me-       | and financing   | Principally the fund is to be prepared by FOs. If its                 |
| dium term       | small-scale en- | capital is not enough, FOs obtain a loan from the bank,               |
| loan)           | terprise.       | and PMU supports FOs for obtaining loan.                              |
|                 |                 | <ul> <li>ASC/DAS is to provide training for lending works.</li> </ul> |
| 3) Introduction | For emergency   | • No required materials.  |
| of Mutual       | need on living  | • Loan from the Women's Bank.   |
| Aid Credit      | as sickness,    | <ul> <li>Mainly operating for women groups.</li> </ul>                |
| system          | accident or     | • FOs (Income Generation/ Social Services Subcommit-                  |
|                 | financing of    | tee) is deal with education but not on operation.                     |
|                 | self-           | <ul> <li>ASC/DAS's education to FOs.</li> </ul>                       |
|                 | employment.     |   |

### Plan of Operation - Nachchaduwa Major Irrigation Scheme (2/2)

<sup>17 - 15</sup> 

# 17.3.2 Palukadawela Major Scheme

# (1) General

Palukadawela major scheme is located near Galgamuwa and midpoint of Anuradhapura and Kurunegala. Number of farm households in the scheme is 1,100 and the irrigated paddy area is 960 ha. There are seven farmers' organisations (FOs) and the present situation of the scheme is shown in Table 15.1.1.

The PDM of the Palukadawala scheme is shown on page 17-24. The development plan is formulated as "proper economic level is created" for the Project purpose and the target group is farmers / community's people. The detail contents are given in the table of the Plan of Operation of pages 17-25 and 17-26 and the Project layout map on page 17-27.

# (2) Strengthening Farmers' Organisation

Farmers' organisations are the main executing organ of the Project. The proposed components are to be implemented by FOs or through FOs who are also the core organ for sustainable rural agriculture development for self-reliance. The concrete plans for the strengthening FOs programmes are as follows.

1) Awareness Programme and Educational/Training Programmes

# Awareness programme

Awareness programme is applied for the both "Farmers" and "Official institutions concerned" as mentioned before. Its contents and implementation procedure are as detailed in Section 9.2. The multifunctional FO is to be established through this programme with the self-motivation of the entire community.

The farmers in three FOs (Yaya-4DC, Yaya-5DC & Yaya-6DC) in the downstream of Palukadawela are highly dependent, especially elders. Therefore, the target of awareness programme is proposed mainly for youth and women.

# Education/ training programme

Following education and training programmes for fostering leaders of the multifunctional FO are to be conducted.

| Training Subject     | Contents                             | Training Method           |
|----------------------|--------------------------------------|---------------------------|
| 1) Draft preparation | Draft preparation of the Articles of | Lecture in Galgamuwa      |
| of the Articles of   | Organisation and knowledge of the    | Agrarian Service Centre   |
| Organisation         | systems and the procedures required  | (ASC/DAS) and practical   |
| amendment            | on the process.                      | training by Farmer Anima- |
|                      | _                                    | tors.                     |

Education/Training Programmes for FO Leader – Palukadawela Major Scheme

(continued)

| 2) Practical training<br>the basic operation<br>and management of | Planning, participatory management,<br>practical operation & management of<br>FO, practical financial management, |                              |
|---|---|------------------------------|
| the organisation  | financial resource management, role   |                              |
|   | & systems of Officials concerned, etc.  |                              |
| 3) Training on the  | Practical; training of the opera-   | Lecture by ASC/DAS, IMD,     |
| income generation   | tion/management of Rural Credit   | private bank (PMU arranges   |
| activity  | (Group-loan, Revolving-loan) and co-  | with banks) & practical      |
|   | operative purchasing/selling.   | training by Farmer Animator. |
| 4) Information net-   | Establishing information networks   | Holding joint workshops      |
| work forma-   | with external organisations for col-  | with external organisations  |
| tion/Awareness  | lecting and sharing information in and  | and 7 FOs for sharing in-    |
| training  | around the community.   | formation.                   |

These programmes are conducted separately from the Awareness programme within the regular works of Mi Oya Resident Project Manager Office (RPM) and Galgamuwa ASC. Education and training facilities of Galgamuwa ASC are to be improved and strengthened (refer Section 17.4).

2) Establishment of Multifunctional Farmers' Organisation

The present FOs are to be reorganised to be multifunctional. The reorganisation is determined in the general meeting of the entire community, which conducted the awareness programme mentioned previously. The organisation is to provide various services to farmer/community and to be fostered as an autonomous organ representing the community. Major change in the reorganisation is to set subcommittees under the executive committee and to act on irrigation, agriculture, business of FO, and income generation/social services.

| Subcommittees                            | Purposes and Activities  |
|--|--|
| Irrigation                               | i) Water management, ii) O&M of facilities, iii) Safety operation of irriga-<br>tion facility, iv) Estimation & collection of Irrigation Service Fee (ISF),<br>and v) Survey on lease/tenant of farmland   |
| Agriculture                              | i) Collaboration with official extension works, ii) Holding technical exten-<br>sion seminar, iii) Income generation activity (Home garden and livestock<br>development), iv) Operation of group works as pest control, and v)<br>Control elephant damage (strengthening control by FO)  |
| Businesses of<br>FO                      | i) Establishment and operation of co-operation purchasing/selling,<br>Pola/collection point, ii) Operation and management of the rural credit<br>service (group loan, revolving loan), iii) Business of FO as farm machin-<br>ery rental service, inland fishery, agro-processing, etc.  |
| Income<br>generation/<br>Social Services | i) Income generation activities such as vocational training, small-scale<br>enterprise/business, self-employment, ornamental fish culture and collec-<br>tion of employment information, ii) Promotion of mutual aid credit sys-<br>tem, iii) Financial support for income generation, and iv) Promotion of<br>anti alcohol addict campaign, social welfare, health & sanitary improve-<br>ment. |

Setting up the Subcommittee – Palukadawela Major Scheme

An audit section is proposed to be set for maintaining transparency of FO activities and to employ volunteers for close communication with FO members. The audit section is to check periodically and report to the general meeting. The volunteers are to work on communication among the executive committee, the subcommittee, and the members.

Puranagama village of Palukadawela scheme is split due to religious affiliations. Youth club was organised by young generation in January 2000 for reuniting the village. Therefore, the establishment of multifunctional FO is proposed to be mainly carried out by the youth club.

3) Income Generation/Social Services through Farmers' Organisations

"Agriculture" and "Income Generation/Social Services" subcommittees are to carrying out an income generation activities for farmers and community. The activity is as shown in previous section 2). The income generation/social services are to be carried out by the self-motivation of FOs and are targeting poverty groups of the community. Necessary information is to be provided through Galgamuwa ASC and Farmer Animators. The training facilities of the National Youth Service Council (NYSC) are to be utilised for vocational training, so that no extra facility is constructed by the Project.

4) Construction of Farmer Centre

There is no any facility for FOs' in Palukadawela scheme. Farmer centres are to be constructed for smooth implementation of FOs' activities and for maintaining communication in the community and with the official agencies concerned. The construction is to be five buildings and the details are described in Section 17.4.2.

- (3) Distribution of Proper Irrigation Water
  - 1) Rehabilitation and Improvement Plan of Irrigation Facilities

The rehabilitation and improvement works in Palukadawela major scheme are as follows:

| Category Item Quantity Description                      | of works                   |
|---|----------------------------|
| Dend LC Forth Cilling Consulting D                      |                            |
| Bund L.S. Earth filling, Gravelling, Ri                 | ip-rap, Filter             |
| Tank Sluice L.S. Minor repair, Downstream pro           | otection, Measuring device |
| Spillway L.S. Minor repair                              |                            |
| Others L.S. Bathing steps                               |                            |
| Earthworks 16.3 km Earth filling, De-silting            |                            |
| Main Lining 16 Nos. Masonry Lining around stru          |                            |
| canal Structures 78 Nos. Turnout, Regulator, Bathing    | g step, Bridge, Culvert    |
| O&M Road 16.3 km Earth filling, Gravelling              |                            |
| Earthworks 11.2 km Earth filling, de-silting            |                            |
| D-canals Lining 5 Nos. Masonry Lining around stru       | ictures                    |
| D-canais Structures 96 Nos. Turnout, Regulator, Culvert | t                          |
| O&M Road 11.2 km Earth filling, Gravelling              |                            |
| Earthworks 0.6 km Earth filling, De-silting             |                            |
| F-canals Lining 0.8 km Masonry Lining                   |                            |
| F-canals Structures 71 Nos. Farm turnout, Culvert, Drop | p etc.                     |
| O&M Road 20.7 km Earth filling, Gravelling              |                            |
| Others Anicuts 18 Nos. Improvement of Anicuts in        | Traditional village        |
| Feeder canal L.S. Improvement of feeder cana            | al from Attaragala Wewa    |

Rehabilitation and Improvement Plan – Palukadawela Major Scheme

The major works on the main canals include the rehabilitation of the offtakes, and construction of new birth steps, bridges and culverts. The masonry lining will be provided in a part of the D-canals, as for the O&M of road, earthworks with gravelling and anicut rehabilitation in Prana village are also proposed.

The works for tank and main canal are to be conducted by constructors and the works for D-canals and F-canals are to be carried out by contractors or farmers. The education/training courses for rehabilitation and improvement works are programmed in order to reflect the farmers' intention properly to the works and conduct the works smoothly by farmers. The training courses for the government staff and the farmers are to be conducted as below.

| Activities                 | Session | Period                          | Lecturer | Subject of training   |
|----------------------------|---------|---------------------------------|----------|---|
| Training for the           | First   | 1day, pre-<br>construction      | RATPA    | Participatory planning, commu-<br>nication with farmers   |
| government<br>staff        | Second  | 1 day, in the con-<br>struction | ID       | Skill of technology transfer to farmers   |
|                            | Third   | 1 day, post-<br>construction    | ID       | Hand-over of O&M responsibility to farmers, follow-up programme   |
| Training<br>for<br>farmers | First   | 2 days, pre-<br>construction    | RATPA    | Participatory planning, field<br>investigation, design and cost<br>estimate                                     |
|                            | Second  | 2 days, pre-<br>construction    | ID       | Contract for rehabilitation works<br>Farmers' contribution  |
|                            | Third   | 1 day, in the con-<br>struction | ID       | Quality control for earthworks and<br>concrete, preparation of document<br>for rehabilitation, field inspection |
|                            | Fourth  | 1day, post-<br>construction     | ID       | Follow-up programme   |

Training Programme for Rehabilitation and Improvement Works – Palukadawela Major Scheme

Education/training for officers is one course for TA and WS of Galgamuwa ID. One course in every two FOs (total 4 courses in Palukadawela: 3 courses for settlement villages and one course for traditional village) is to be conducted for farmers, the office bearers of FOs and the subcommittee members.

### 2) Training for Water Management

The training on water management for the government staff and farmers is proposed as shown in the following table. Education/training for officers is one course for TA and WS of Galgamuwa ID. One course in every two FOs (total 4courses in Palukadawela: 3 courses for settlement villages and one course for traditional village) is conducted for farmers, the office bearers of FOs and the subcommittee members.

Training Programme for O&M- Palukadawela Major Scheme

Education/training for officers is one course for TA and WS of Galgamuwa ID. One course in every two FOs (total 4 courses in Palukadawela: 3 courses for settlement villages and one course for traditional village) is conducted and farmers, the office bearers of FOs and the subcommittee members are to be participants.

# (4) Improvement of Agriculture Activities

1) Promotion of crop cultivation in unused farmland

Water resource potential of Palukadawela scheme is not so high and its potential for increasing cultivation area after the project implementation (refer Section 9.4.3), therefore OFC promotion cropping pattern for effective use of water resource is proposed. The proposed cultivation area and

production of respective crop in the Palukadawela major scheme are as follows, and the proposed cropping system is shown in Figure 15.3.1.

|               | Without Project With Project |          |            | Increase |          |            |                |
|---------------|------------------------------|----------|------------|----------|----------|------------|----------------|

Cropping Area and Production With & Without Project - Palukadawela Major Scheme

### 2) Strengthening Agricultural Extension Services

The technical improvement required for promoting effective land use and increasing crop productivity in Palukadawela is as follows.

| Effective Land Use                              | Increase Crop Productivity               |
|---|--|
| a) Disseminating proper cropping system.        | a) Selecting appropriate crops.          |
| b) Promoting effective land use.                | b) Improving cultivation technique       |
| c) Effective labour use.                        | c) Improving harvesting technique.       |
| d) Providing Market information & rural credit. | d) Improving soil (Use organic material) |
| e) Procuring inputs materials before cropping.  | e) Disseminating proper harvesting time  |
| f) Introducing co-operative selling system.     | (Quality improvement)                    |

The Provincial Department of Agriculture (PDOA) is to conduct following extension activities in order to carry out the improvements mentioned above. Countermeasures on agricultural production inputs, marketing and rural credit are to be mentioned in Sections 3) and 4).

| Programme  | Objectives   | Method & Required Materials   |
|--|--|---|
| <ol> <li>Field Trial / Demonstration<br/>Programme         <ul> <li>Adaptive trials</li> <li>Small-scale demonstration</li> <li>Cropping pattern demonstration</li> <li>Large-scale demonstration</li> <li>Productivity increase programme</li> <li>IPM programme</li> </ul> </li> </ol> | <ul> <li>To develop<br/>technology for<br/>improving<br/>productivity</li> <li>To demonstrate<br/>recommended<br/>practices &amp; irri-<br/>gation technique<br/>of paddy and<br/>OFC for effec-<br/>tive land use &amp;<br/>increase produc-<br/>tivity.</li> <li>Appropriate<br/>chemical appli-<br/>cation</li> </ul> | <ul> <li>Conducted by PDOA</li> <li>FOs closely contact with PDOA</li> <li>Use farmers' field for demonstration</li> <li>Farmer training programme including quality seed campaign, and field tour</li> <li>Seed production programme includes provision of register seed and technical guidance. Production expense is born by farmers.</li> <li>Required material cost for extension activities are born by the Project. Detail is in 1/12 to 7/12 of Table R.2.3 of Appendix-R.</li> </ul> |

# 3) Improvement of Marketing of Agricultural Outputs and Inputs Materials

# Improvement of inputs materials

Co-operative purchasing of input materials is proposed by FOs. This system is to carry out by linking to a group loan to be mentioned in the improvement of rural credit of the item 4). Awareness and education to Galgamuwa ASC is to attempt for introducing the system.

# Improvement of outputs

Following improvement of marketing programme is proposed. These activities are to be carried out by FOs (FO business subcommittee).

| Programme  | Objectives  | Method & Required Materials  |
|--|---|--|
| 1) Setting Pola  | To activate mar-<br>keting of farm<br>products by open<br>Polas.<br>To sell small quan-<br>tity products from<br>home gardens.                  | <ul> <li>Polas are managed by FOs</li> <li>Proposed Pola is to set without any construction for reducing maintenance cost and no fee for Pola is to required.</li> <li>Guidance to FOs on setting Pola is to be carried out by ASC/DAS and suitable location and day are to be decided by contact with merchants.</li> <li>Proposed location of Polas is shown in the Project layout map based on the discussion with FO leaders.</li> </ul> |
| <ul> <li>2) Setting Collecting Point<br/>of Farm<br/>Products</li> <li>3) Establishing<br/>Co-operative<br/>Shipping<br/>System</li> </ul> | To set contact<br>points of producers<br>with merchants on<br>outputs marketing.<br>To sell products<br>regularly and de-<br>velop new markets. | <ul> <li>No materials are required for setting the system.</li> <li>Selections of merchants and locations are determined by farmers and Proceeded by FOs.</li> <li>ASC/DAS is to provide guidance to both merchants and FOs on collecting points and cooperative selling.</li> </ul>   |
| 4) Establishing<br>of Market In-<br>formation<br>Collection  | To collect informa-<br>tion on market<br>prices.  | <ul> <li>Regular purchasing of KARTI publication.</li> <li>PMU will provide information on purchasing.</li> </ul>  |
| 5)Improving<br>Quality   | To improve quality<br>of products.  | <ul> <li>No materials are required.</li> <li>Quality standard of products is not established<br/>and it is judged by merchants. FOs have to<br/>collect information on quality and disseminate<br/>to farmers.</li> <li>ASC/DAS is to provide guidance on informa-<br/>tion collection.</li> </ul>   |

Improvement Programme of Marketing Agricultural Products
– Palukadawela Major Scheme

# 4) Improvement of Rural Credit

Introduction of the following loans is proposed. The activity on the rural credit is to carry out mainly by FOs and PMU and Galgamuwa ASC will support them.

| Programme  | Objectives  | Method & Required Materials   |
|--|---|---|
| Programme 1) Introduction of Group Loan (culti- vation loan)       | For purchasing<br>inputs materials.<br>Linkage with co-<br>operative purchas-<br>ing system.    | <ul> <li>Method &amp; Required Materials</li> <li>No required materials.</li> <li>Mainly loan by private banks. It is considered to be possible to introduce for group loan by private banks, because this loan is practised at present. PMU is to request to banks on introduction.</li> <li>The system management/operation of farmer sides is carried out by FOs(subcommittee)</li> <li>Galgamuwa ASC/DAS is to educate FOs on the introduction and training FO leaders on the operation works.</li> </ul> |
| 2) Introduction<br>of Revolving<br>Loan (me-<br>dium term<br>loan) | For purchasing<br>farm machinery<br>and financing<br>small-scale enter-<br>prise.               | <ul> <li>No required materials.</li> <li>Operation &amp; management by FOs (subcommittees). Principally the fund is to be prepared by FOs. If its capital is not enough, FOs obtain a loan from bank, and PMU supports to FO for obtaining loan.</li> <li>Galgamuwa ASC/DAS is to provide training for lending works.</li> </ul>  |
| 3) Introduction<br>of Mutual<br>Aid Credit<br>system               | For emergency<br>need on living as<br>sickness, accident<br>or financing of<br>self-employment. | <ul> <li>No required materials.</li> <li>Loan from the Women's Bank.</li> <li>Mainly operating for women groups. FOs (Income generation/ Social Services Subcommittee) is deal with education but not on operation.</li> <li>Galgamuwa ASC/DAS's education to FOs.</li> </ul>   |
