Pró-Mar de Dentro/JICA

"Pró-Mar de Dentro" Program

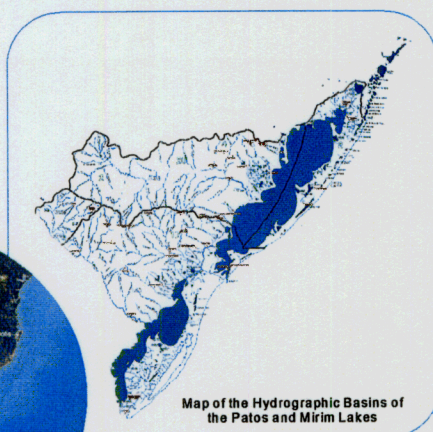

is an initiative of the State Government of Rio Grande do Sul arising from the mobilization measures adopted for the southern region. This program is being executed by the Secretariat of Coordination and Planning (SCP) to promote an ecologically sustainable development, and the preservation and the environmental management of the Hydrographic Littoral Region (Hydrographic Basins of Mirim, São Gonçalo, Camaquã and Litoral Médio).

The Japan International Cooperation Agency (JICA)

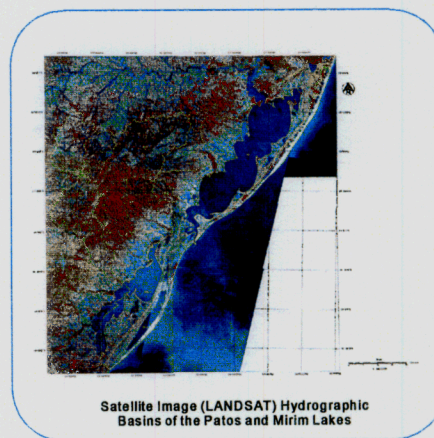

through "The Study on the Environmental Management of the Hydrographic Basins of Patos and Mirim Lakes" extends technical cooperation for the implementation of Pró-Mar de Dentro. The JICA Study aims to analyze the water quality and formulate measures for the conservation of wetlands in and around the Patos and Mirim lakes.

Objectives of the Program

To establish public participation in and for the preparation of the environmental management plan for the Hydrographic Littoral Region (Hydrographic Basins of Mirim/São Gonçalo, Camaquã and Litoral Médio), and assess the feasibility of an ecologically sustainable development in view of environmental preservation, the generation of employment, income distribution and a better quality of life.
