

Figure 2.2.13

**Building Distribution by Structure (Reinforced Concrete) [Dwelling Unit]**

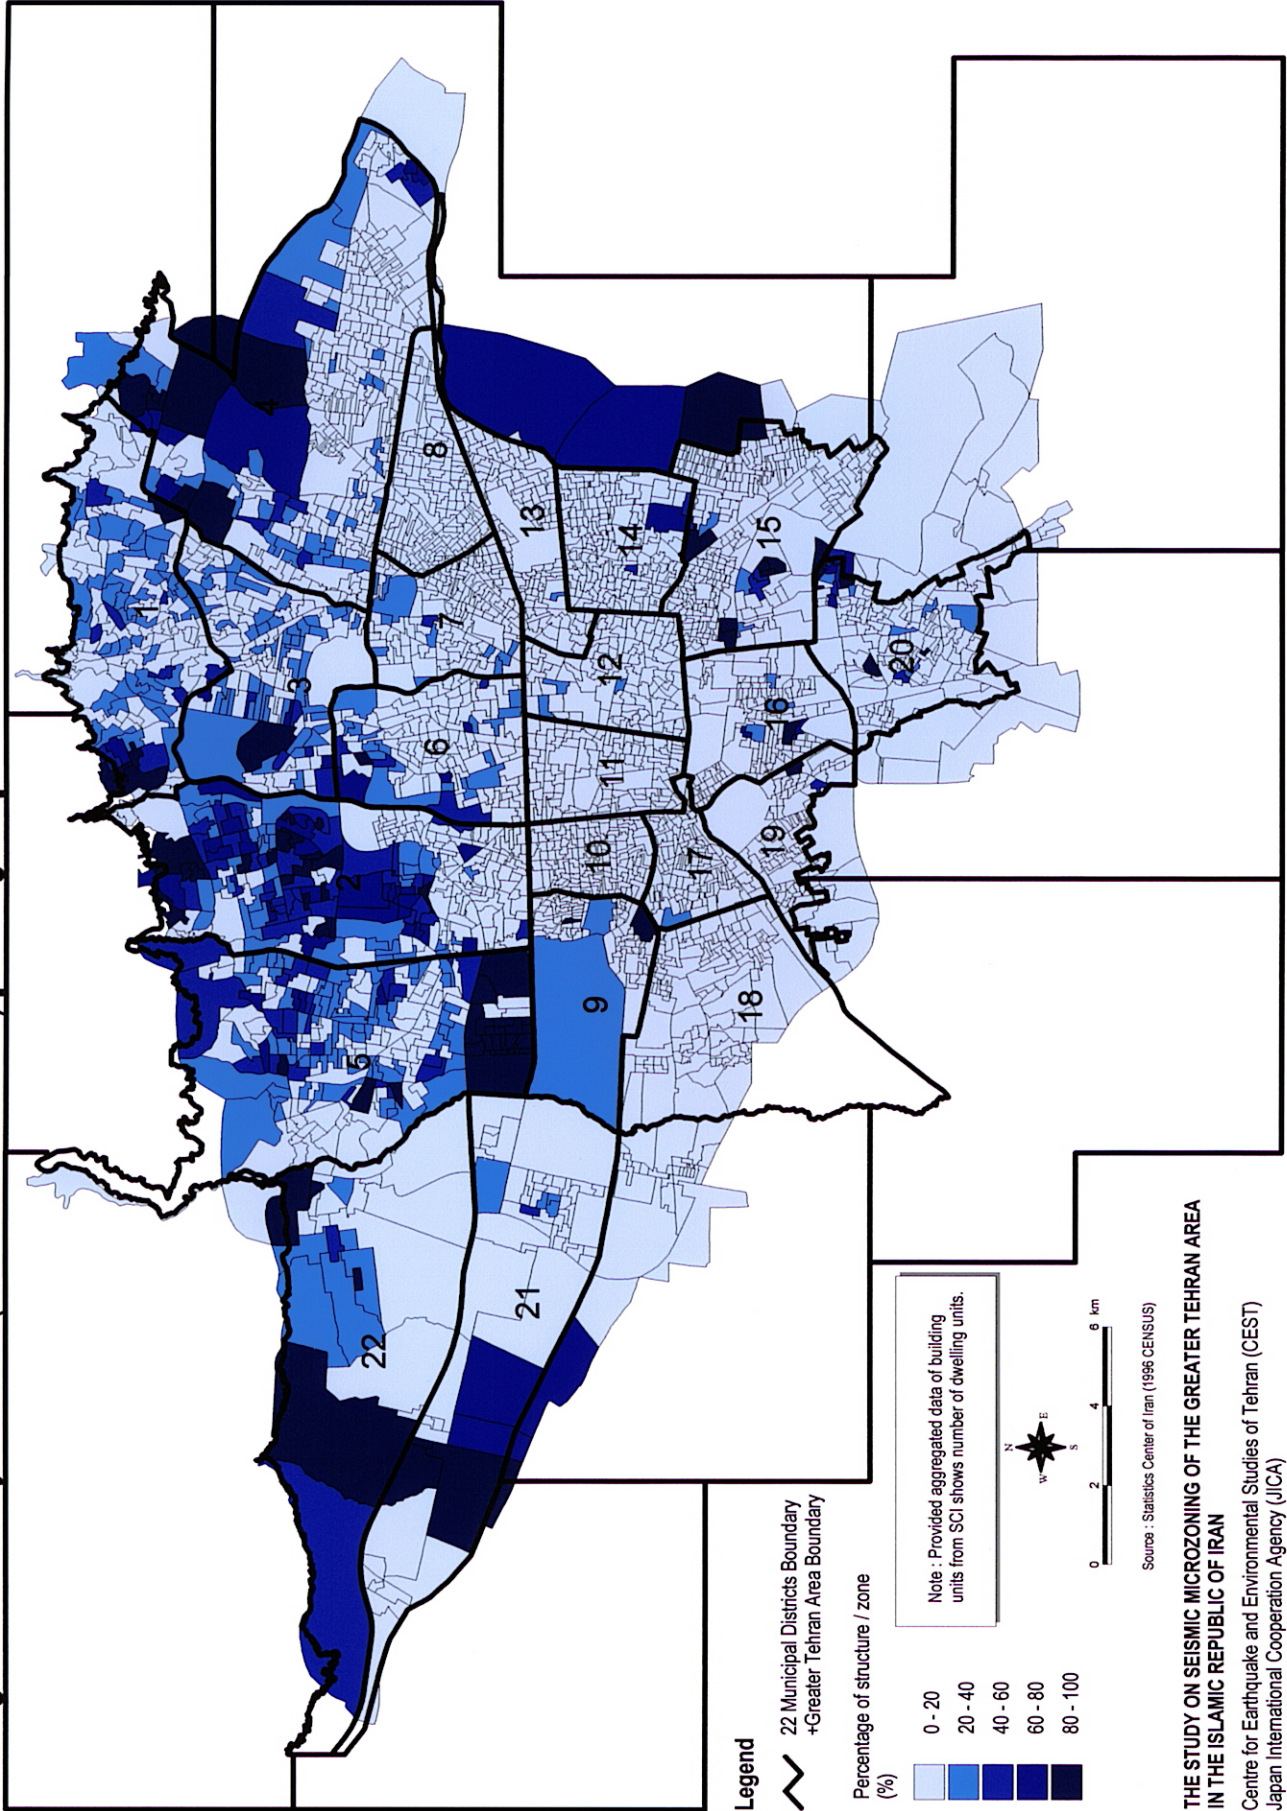

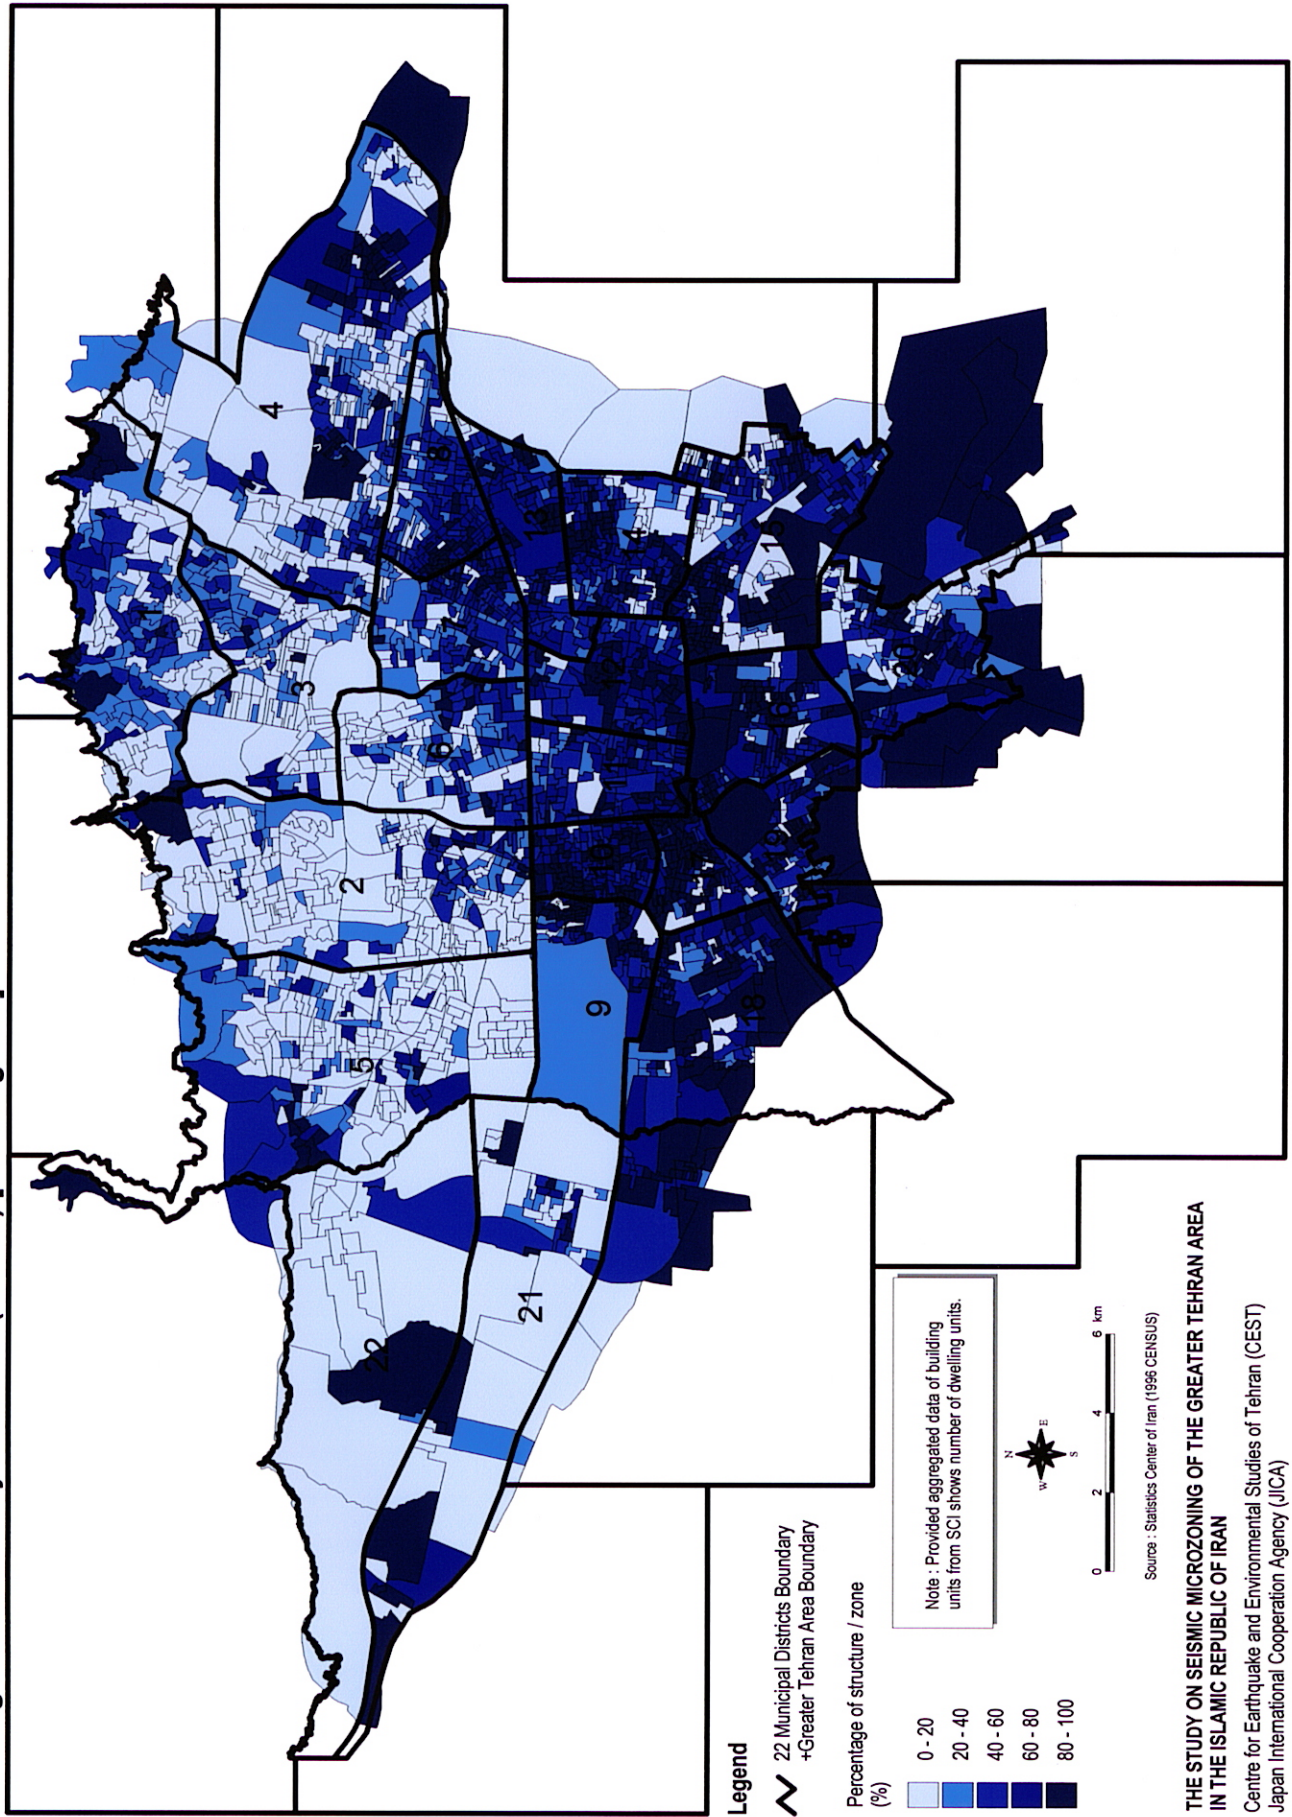

Figure 2.2.14

**Building Distribution by Structure (Others) [Dwelling Unit]**

The “ Others” category is classified into the following nine (9) types of structures:

- 1) Brick and steel, or stone and steel
- 2) Brick and wood, or stone and wood
- 3) Cement block (with any kind of roof)
- 4) All brick, or stone and brick
- 5) All wood
- 6) Sun-dried mud brick and wood
- 7) Sun-dried mud brick and mud
- 8) Others
- 9) Unknown

The first structural type, brick and steel, or stone and steel, makes up 91 % of the "Others" category. The second structural type, brick and wood, or Stone and Wood, makes up 4 %. In total, 95 % of the "Others" category consists of these two structures. Table 2.2.11 shows in detail the number of each structural type in the "Others" category. The distribution pattern, by census zone, of each structural type in these categories is presented by a series of maps. Districts 10, 16 and 17 have more than 70 % of traditional-type buildings, and Districts 9, 11, 12, 13, 18 and 19 have more than 60 % of these structures. District 22, where much new residential development is taking place, has only 10 % of traditional-type structures.

**Table 2.2.11 Detail Structure of Others (Dwelling Unit)**

District	"Other" Structural Types (No. of buildings)									Total by district
	Brick and Steel, or Stone and Steel	Brick and Wood, or Stone and Wood	Cement Block (with any kind of roof)	All Brick, or Stone and Brick	All Wood	Sun-dried Mud Brick and Wood	Sun-dried Mud Brick and Mud	Others	Unknown	
1	14,761	1,360	323	960	24	276	252	96	9	18,061
