JAPAN INTERNATIONAL COOPERATION AGENCY (JICA)		QUESTIONNAIRE/ INFORMATION REQUIRED		Plan Organization : World Bank in Jakarta
PROJECT NAME: Optimal Electric Power Development and Operation in Indonesia		Ref. No. :	Issue Date : February 08, 2001 Revision Date :	

No.	Questionnaire/Information Required	Reply	Remarks
1.	Demand and Supply Balance of Power in Java-Bali System (1) According to the National Electricity Generation Plan recently prepared by MEMR, Serious power shortage is expected in 2003. It may cause the economy crisis in Indonesia. → What is World Bank's view on the matter ? (2) Nevertheless MEMR and PLN recognize the crisis of power shortage, they seem to be not giving any specific policy to overcome the problem. → What is World Bank's observation on this non-action plan by Indonesian side ? → Does World Bank make any suggestion or advice to Indonesian side ?		
2.	Restructuring of Power Sector in Indonesia (1) Power Sector Restructuring is delaying due to mere reasons by Indonesian side. This delay may accelerate the required countermeasures against future power shortage. → How World Bank is evaluating the progress of the restructuring of power sector in Indonesia ? → What is World Bank's outlook about the progress from now on ? (2) Technical Assistance(T/A) by ADB seems to be also delaying due to the malfunction by Indonesian side. → What is World Bank's observation on this delay ? Does it generate any adverse effect on the improvement of power sector in Indonesia ? → How World Bank feels a necessity of modification of the present ADB T/A program ?		
3.	World Bank Finance to Power Sector in Indonesia (1) It is no doubt that Power Generation projects must be promoted on the investment by a private basis. However, this may not tide over the power shortage in 2003, since this promotion takes a time up to project materialization. → Are there any World Bank's policy change on finance ? → Are there any finance plan by World Bank to Power Generation field ?
