表 II-1.4.1 土地利用基本計画ガイドラインの概要

No.	S P A T I A L P L A N (RENCANA TATA RUANG WILAYAH, RTRW)		
	NATIONAL LEVEL	PROVINCIAL LEVEL	DISTRICT LEVEL
COVERAGE	<p>Strategic and recommended policy of the national spatial utilization that consist of:</p> <ul style="list-style-type: none"> a. national objectives of spatial utilization for improving community welfare and security defense. b. Structure and pattern of national spatial utilization c. Criteria and pattern of the management of protected zone, cultivation zone and specific zone. 	<p>Spelling out of the strategic and recommended policy of the national spatial utilization into structure and strategy of provincial spatial utilization that consist of:</p> <ul style="list-style-type: none"> a. Provincial objectives of spatial utilization for improving community welfare and security defense. b. Structure and pattern of provincial spatial utilization c. Guidance for provincial spatial utilization control 	<p>Spelling out of the provincial spatial utilization into the implementation strategy of provincial spatial utilization that consist of:</p> <ul style="list-style-type: none"> a. District objectives of spatial utilization for improving community welfare and security defense. b. Structure and pattern of district spatial utilization plan c. General plan and spatial plan of district d. Guidance for controlling district spatial utilization
CONTENT	<ul style="list-style-type: none"> a. National protection zone, cultivation zone, and specific zone b. Condition and criteria of spatial utilization c. Guidance for spatial utilization control 	<ul style="list-style-type: none"> a. Recommendation of the management of protection and cultivation zone, b. Recommendation of the management of rural zone, urban zone, and specific zone. c. Recommendation of zone development for settlements, forestry, agriculture, mining, industry, tourism and others. d. Recommendation of central system development for rural and urban settlements e. Recommendation of regional infrastructure systems: transportation, telecommunication, energy water resources, and environment management, f. Recommendation of the priority zone, g. Recommendation policies of land use plan, water use plan, space use plan, other natural resources use plan, and pay attention for the integrity of human and artificial resources. 	<ul style="list-style-type: none"> a. The management of protection zone and cultivation zone b. The management of rural zone, urban zone, and specific zone, c. Systems of development activities and rural and urban settlements d. Infrastructure systems of transportation, telecommunication, energy, water resources, and environment management e. Land use plan, water use plan, space use plan, other natural resources use plan, and pay attention for the integrity of human and artificial resources.
GUIDELINES FOR	<ul style="list-style-type: none"> a. Formulation of integrity, interrelatedness, and balance of inter-region development and inter-sector harmony b. Creating integrity, interrelatedness, and balance of inter-region development and inter-sector harmony c. Recommendation of investment place d. Provincial and district planning 	<ul style="list-style-type: none"> a. formulation of main provincial spatial plan policies b. Creating integrity, interrelatedness, and balance of inter-provincial development and inter-sector harmony c. Recommendation of investment place d. District spatial planning which is a basis for controlling the permission of development location 	<ul style="list-style-type: none"> a. formulation of main district spatial plan policies b. Creating integrity, interrelatedness, and balance of inter-district development and inter-sector harmony c. Determining location of investment d. Formulating detailed district spatial plan e. Using land/space for development activities
PERIOD	25 years	15 years	10 years
REGULATION	Government regulation (<i>peraturan pemerintah</i>)	Regional regulation (<i>peraturan daerah</i>)	Regional regulation (<i>peraturan daerah</i>)
SCALE/INTENSITY	Minimum 1 : 1.000.000	Minimum 1 : 250.000	Minimum 1 : 100.000

表 II-1.4.2 地方開発企画局によるトンダノ流域の土地利用基本計画 (1/2)

No	ZONES	Location according to		
		Provincial Spatial Plan (<i>RTRW Propinsi</i>) by <i>BAPPEDA PROPINSI</i>	District Spatial Plan (<i>RTRW Kabupaten</i>) by <i>BAPPEDA Minahasa</i>	Zonation of TWS by <i>PU Pengairan</i>
A	RECOMMENDATION OF STABILIZING PROTECTED ZONE			
A.1	ZONE FOR PROTECTING ITS LOWER AREA 1. PROTECTED FOREST ZONE 2. WATER ABSORPTION ZONE	Mt.Klabat, Mt.Manimpork Protected forest and Tondano watershed	Mt. Klabat, Mt. Lembean, Mt. Mahawu, Mt. Masarang, Mt. Tampusu, Mt. Lengkoan, Mt. Kawatak, Mt. Soputan Protected forest and Mt. Manimpork	Districts of Tompaso, Langowan, Kakas, Remboken, Eris, Tondano, Tomohon, Pineleng, Kauditan, Airmadidi -----same as above-----
A.2	IN-SITU PROTECTION ZONE 1. RIVER BANK ZONE 2. SURROUNDING LAKE ZONE 3. SURROUNDING WATER SPRING ZONE	River Tondano Lake Tondano Not yet indicated	River Tondano (100 m of left-right side), River Tikala (50m of left-right side) Lake Tondano (50 – 100 m surrounding lake), Lake Sendow (50 m surrounding lake) Not yet indicated	River Tondano and River Tikala Lake Tondano All water spring in the catchment (in radius of 200 m)
A.3	NATURAL AND CULTURAL RESERVE ZONE 1. NATURAL RESERVE ZONE 2. CULTURE RESERVE ZONE	Not indicated Not indicated	Not indicated Ancient Tomb in Sawangan-Airmadidi	Tomohon and around the lake (ecotourism park) Not indicated
A.4	SENSITIVE NATURAL DISASTER ZONE 1. VOLCANOES ERUPTION 2. MASS MOVEMENT/LANDSLIDE 3. FLOODING	Mt.Mahawu, Mt.Soputan Not indicated Not indicated	Mt. Mahawu, Mt.Soputan Telap – Tasuka Not indicated	Not indicated Not indicated Cities of Manado and Tondano
B	RECOMMENDATION OF DEVELOPMENT OF CULTIVATION ZONE			
B.1	PRODUCTION FOREST ZONE	-	-	
B.2	AGRICULTURE ZONE 1. WETLAND CEREAL CROPS ZONE 2. ESTATE AND CEREAL DRYLAND FARMING ZONE 3. ANIMAL HUSBANDRY ZONE 4. FISHERY ZONE		Tondano, Kakas, Remboken, Langowan Clove cultivation: Kombi, Eris, Kakas, Tomohon, Tondano, Pineleng; Coconut cultivation: Airmadidi, Pineleng, Dimembe; Coffee cultivation: Tomohon, Langowan, Tompaso, Kakas, Kawangkoan; Nutmeg cultivation: Kauditan, Airmadidi; Cinnamon cultivation: Langowan Fruit trees: Dimembe (<i>Nephelium, Durian</i>); Vegetables: Tomohon, Remboken, Kawangkoan; Floriculture: Remboken Poultry commodity (Ducks): Remboken, Kakas, Tondano Livestock: Langowan (Goat) Animal Husbandry: Langowan, Tompaso, Tondano (Sapi, Kuda) Freshwater fish: Kakas, Eris, Tondano (around lake Tondano)	Tompaso, Kakas, Tondano, Eris, Airmadidi, Langowan <u>Cereal dryland farming</u> : Tompaso, Langowan, Eris, Remboken, Tondano, Airmadidi <u>Estates Crops</u> : Langowan, Eris, Remboken, Tondano, Airmadidi, Mapanget, Kauditan, Tomohon, Pineleng <u>Animal Husbandry</u> : Tondano, Langowan, Remboken, and Tomohon Lake Tondano, Airmadidi, River Tondano
B.3	ZONE OF MINING	Not indicated	Digging (<i>Galian C</i>): Maumbi, Noongan, Districts of Langowan, Dimembe (Klabat) have to be monitored periodically	-

表 II-1.4.2 地方開発企画局によるトンダノ流域の土地利用基本計画(2/2)

No	ZONES	Location according to		
		Provincial Spatial Plan (<i>RTRW Propinsi</i>) by BAPPEDA PROPINSI	District Spatial Plan (<i>RTRW Kabupaten</i>) by BAPPEDA Minahasa	Zonation of TWS by PU Pengairan
B.4.	ZONE OF INDUSTRY	Not indicated	Tourism industry (mountain, lake tourism) and agroindustry: Districts of Tomohon, Langowan, Kakas, Eris, Tondano, and Remboken	
B.5.	ZONE OF TOURISM		Main tourism zone of Tomohon – Tondano and its surrounding: Water tourism, ecotourism (agriculture)	Langowan, Tompaso, Remboken, Tondano, Tomohon, Airmadidi, Manado
B.6.	ZONE OF SETTLEMENTS		Development of planned housing: Airmadidi, Pineleng, Tondano, Kauditan, Remboken, Langowan, Kawangkoan; Resting places: Tondano, Remboken, Kakas; Labor housing: Kauditan, Airmadidi	All kecamatan
C.	RECOMMENDATION OF DEVELOPING RURAL ZONE			
D.	RECOMMENDATION OF DEVELOPING URBAN ZONE			
E.	RECOMMENDATION OF SPECIFIC ZONE			
E.1.	INTEGRATED ECONOMIC DEVELOPMENT ZONE (<i>KAPET</i>) MANADO - BITUNG		Manado – Bitung corridor (core zone of <i>KAPET</i> industry	
F.	RECOMMENDATION OF DEVELOPING AND MANAGING PRIORITY ZONE			
F.I.	DEVELOPING STRATEGIC ZONE 1. WATER TOURISM: LAKE TONDANO		Integrated with other tourism activities as like <i>FESBUDATON</i> (in Paleolan village), Pottery handicraft industry (Pulutan village)	
F.2.	DEVELOPING GROWTH REGIONAL TRIGGER ZONE		-	
F.3.	DEVELOPING FAST GROWTH AREA 1. CORRIDOR OF MANADO – BITUNG 2. CORRIDOR OF MANADO – TOMOHON		Along corridor Manado – Bitung Along corridor Manado – Tomohon	
G.	DEVELOPING SPECIAL ZONE 1. MANADO – BITUNG HIGHWAY 2. TONDANO RIVER DAM		Along the planned highway Not yet indicated

**表 II-1.4.3 Pola RLKTにおいてゾーニングに使用された
スコア換算表**

1. Classification of Intensity of Daily Rainfall and its Score

No	Intensity of daily rainfall (mm/day)	Class	Score
1.	< 13.60	very low	10
2.	13.6 – 20.7	low	20
3.	20.7 – 27.7	moderate	30
4.	27.7 – 34.8	high	40
5.	> 34.8	very high	50

2. Classification Soil Type and its Score

No	Soil Type (Center for Soil Research, Bogor)	Classification	Score
1.	Aluvial, Gley Planosol, Hidromorf Kelabu, Laterik Air	Not sensitive	15
2.	Tanah	Low sensitive	30
3.	Latosol	Moderately sensitive	45
4.	Brown Forest Soil, Non Calcic Brown, Mediteran	Sensitive	60
5.	Andosol, Laterit, Grumusol, Podsol, Podsolik Regosol, Litosol, Organosol, Renzina	Very sensitive	75

3. Classification of Slope and its Score

No	Slope gradient (%)	Classification	Score
1.	00 - 08	Flat	20
2.	08 – 15	Gentle	40
3.	15 – 25	Moderate	60
4.	25 – 40	Steep	80
5.	> 40	very steep	100

表 II-1. 4.4 州地方開発企画局によるトンダノ流域保全計画の構想

No.	Main activities	Description	Executing agency
1.	Protecting sedimentation	Reforestation/Planting: 1. Nursery/sedling: a. Reforestation b. Planting 2. Rearing 3. Construction of check dam 4. Maintaining of the dam	Kanwil Forestry & Estates Crops Dinas Kehutanan Propinsi Dinas Kehutanan Kabupaten Dinas PU (Pengairan)
2.	Water Use	Water use retribution	Reg. Govn. Propinsi & Kabupaten, Dipenda, DPRD
3.	Water lake polution	1. Garbage management and weeds control 2. Hadycraft industry (Eceng gondok) 3. Controlling of Liquid garbage, fertilizer, pesticide, detergent, etc (extension service for floating net fishery)	Dinas PU (pengairan) Kanwil industry and commerce BAPEDALDA Dinas Perikanan Propinsi
4.	Sempadan Danau dan sungai (surrounding lake and river bank zone)	1. delimiting boundary of zone 2. Extension and sosialization	BAPPEDA Minahasa BAPPEDA Minahasa
5.	Spatial Plan of the Watershed	1. Detailed spatial plan Second year: legalization and sosialization 2. Definiting forest boundary	UNSRAT, BAPPEDA, PU (cipta karya) Dinas Kehutanan Propinsi
6.	Demography/ pressure on the watershed	1. Resettlement 2. application of appropriate technology for conserving land (training) 3. Diversification and supplement livelihood (seeds assistance) 4. Research in demography and ecosystem. The activities: 1 st year : preliminary study on community perception 2 nd year experimental study (pilot project) 3 rd – 4 th year : implementation 5. improving community awareness and attitude changing 1 st year: extension/training 2 nd year:developing environmental human resources 3 rd year: improving capability and participation of NGOs 4 th year: giving appreciation 5 th year: evaluation 6. Training on environmental aspects 7. Funds assistance for farmers	Regional government (Prop. & Kab.) Politeknik, Kanwil Pertanian Kanwil industry & commerce UNSRAT BAPEDALDA BAPEDALDA BAPEDALDA
7.	Watershed Management Institution	1. Formulating the Management Board 2. Formulating and revising the regulation 3. Extension services for stakeholders 4. Formulating integrated watershed management 5. Obtaining environmental geology data/ information 6. Supervising/ law enforcement 7. Evaluation	BAPPEDA, LAW BUREAU OF REGIONAL GOVT. NGOs Related agency Kanwil Pertambangan (mining office) Police Department BAPPEDA

表 II-1.11.1 本調査の主たる関連政府機関とその責務

Agencies	Duties	Functions
1. Directorate General of Land Rehabilitation and Social Forestry	To implement the duties of the MOFEC (Ministry of Forestry and Estate Crops) in the sector of land rehabilitation and social forestry according to the policy as stipulated by MOFEC and based on the existing legislative regulation (Article 87 of the Decree of Ministry of Forestry and Estate Crops no.:002/Kpts-II/2000, dated on January 7,2000).	(a). Formulation of technical policy in land rehabilitation and social forestry sector; (b). Plan and program, as well as technical control, social forestry, forest product diversification development, and forest crops seedling; and; (c). Development, which covers the training guidance, and standard preparation in the sector of land rehabilitation and conservation, social forestry, forest product diversification development and forest crops seedling.
2. Regional Office of Ministry of Forestry and Estate Crops	To make and coordinate various plans on forestry activities.	-
3. Office of Land Rehabilitation and Soil Conservation (BRLKT)	Implement the compositions of micro-planning, monitoring, evaluation of watershed management, successful land rehabilitation and soil conservation;	(a). Prepare the long term plan (pattern of land rehabilitation and soil conservation) and the medium term plan (field technical plan of land rehabilitation and soil conservation); (b). Execute the monitoring and evaluation on watershed management; (c). Execute the monitoring and evaluation on successful land rehabilitation and soil conservation; (d). Examine the technical arrangement of land rehabilitation and soil conservation; (e). Examine the technical plan of greening and reforestation; and (f). Perform the administration matters.
4. Forestry Service Office of North Sulawesi Province	(a). Lead and coordinate all forestry activities at provincial level; (b). Execute the technical policies in forestry affairs in accordance with the guidelines and / or technical policies prepared by the central government; (c). Prepare the plans on forestry affairs at provincial level in accordance with the national forestry development plan; (d). Control the forest use including its protection and maintenance; and (e). Perform other duties given by the central government, as the provincial leader.	To fulfil the whole exertions and activities for: (a). Planning, preparing, processing, analyzing; (b). Implementing the duties of Forestry Service Office in accordance with the applicable laws; (c). General administration, civil service, and logistic and financial matters; (d). Arranging and establishing some cooperations, integrating and synchronizing whole organizational activities of the Forestry Service Office, including the implementation of technical coordination with other relevant agencies for smooth execution of the Office duties; and (e). Implementing the technical security.
5. Estate Crops Office of North Sulawesi	Execute the household affairs at provincial level in the estate crops section;	(a). Implement the general establishment in accordance with the policies prepared by the Ministry of Home Affairs; (b). Execute the technical program in the estate crops; (c). Provide the permiton enterprise establishment; (d). Execute the extension and enlightenment services; (e). Execute the research ; (f). Execute the technology examination in the framework of establishment of recommended technology; (g). Perform the office administration matters; (h). Carry out the management of Technical Implementation Unit.
6. Forestry Service Office of Minahasa District	To support the Governor for the household matters at district level on the forestry affairs, about ways of: (a). Sale and distribution of forest products; (b). Forest protection; (c). Greening and conservation of soil and water; (d). Sericulture; (e). Apiculture; (f). Community forest and private forest; (g). Enlightenment of importance of forestry, which are supported by the central and regional governments.	(a). Control the distribution and sale of forest products; (b). Protect the forest damage; (c). Prepare the program monitoring, evaluation, and other administration matters; (d). Support the communities and Self-Supporting Community Institutions in planting, and protection / maintenance of community forest and private forest; (e). Execute the implementation and improvement of apiculture and sericulture; (f). Implement the greening, soil, and water conservation; (g). Execute the enlightenment activities and train the extension workers; (h). Support the community and community organization in recovering and maintaining function of forest, soil, and water; and (i). Provide technical guidance for Technical Implementation Unit.
7. Estate Crops Office of Minahasa District	(a). Examination and application of technology; (b). Land resources utilization; (c). Sedding preparation; (d). Fertilizer supply; (e). Pesticides supply; (f). Establishment of Method of use for machinery equipment; (g). Establishment of farm enterprise management; (h). Products management; (i). Establishment of marketing.	(a). Perform the development by the approach to the natural resources, human resources, agri-business, and integrity concept of inter sector / sub sector; (b). Implement the development pattern consisting of various patterns such as self-supporting / partial establishment, economic enterprise, and investor; (c). Partnership / joint venture of economic enterprise and joint venture; (d). Partnership / joint venture of investor and economic enterprise; (e). BOT (built, operate, transfer); (f). BTN (the estate is made / constructed by the investor / entrepreneur, which the payment is made by the farmers in installments); (g). Execute the main cultivation activities consisting of intensification, extensification, rehabilitation / replanting, diversification, and land conservation; (h). Implement agriculture commodity development; and (i). Application of the commodity policies on various estate crops such as cocoa, clove, nutmeg, coffee, cacao, vanilla, casewh, cassia, civera, candlenut, cardamom, and ginger.

Numerals in parenthesis shows optionally applicable or recommendable.

Soil: Andsol; medium, Other soil; less

Access: Distance from the village. Good : less than 1 km, Poor: more than 1km

In case that farming activities are excuted at more than 40% sloped area, it is proposed to employ hedgerow cropping by considering soil erosion.

For recommendation of agroforestry system, it is necessary to pay regard to farmers opinion and requirement.

Erosion: Relative value

*: Determined by field inspection.

Type	Woody perennials				Herbaceous crops	
	Woody trees	Estate crops			Fruit trees

表 III-1.4.3 インテンシブエリアを含むスタディエリアにおける有用樹種

No	Latin Name	Lokal Name	Usage
1	2	3	4
1	<i>Agathis celebica</i>	Agatis / Damar	Construction, Plywood, Furniture, Music and sports instruments, matches, pulp, pencil
2	<i>Annona mucikata</i>	Sirsak	Fruits
3	<i>Artocarpus integra</i>	Nangka	Fruits, Vegetables
4	<i>Aleurites molluccana</i>	Kemiri	Spice, Cosmetics
5	<i>Areca oxycarpa</i>	Palem	Land conservation
6	<i>Areca catechu</i>	Pinang	Medicine, Ornamental purpose
7	<i>Arenga undulatifolia</i>	Aren/enau	Sugar, Alkohol, Broom, rope
8	<i>Averrhoa carambeia</i>	Belimbing	Fruits
9	<i>Albizia falcataria</i>	Sengon	Construction, Wrapping materials
10	<i>Casuarina sumatrana</i>	Cemara	Land conservation
11	<i>Casuarina junghuniana</i>	Cemara	Land conservation
12	<i>Casuarina equisetifolia</i>	Cemara	Land conservation, Ornamental
13	<i>Cananga odorata</i>	Kenanga	Construction
13	<i>Cinnamomum burmanii</i>	Kayu manis	Spice
14	<i>Cocos nucifera</i>	Kelapa	Oil, Flour, Firewood, Furniture
15	<i>Cordia blanca</i>	Kanonan	Fuel wood, Paste
16	<i>Durio zibethinus</i>	Durian	Construction, Fruits
17	<i>Dysoxylum caulestachium</i>	Tombawak	Construction
18	<i>Excocoria agalloca</i>	mapopok	Construction
19	<i>Elmerillia celebica</i>	Cempaka wasian	Construction, Door and window frame
20	<i>Elmerillia ovalis</i>	Cempaka	Construction, Door and window frame
21	<i>Eugenia aromatica</i>	Cengkih	Fruits
22	<i>Eugenia aquatica</i>	Jambu air	Fruits
23	<i>Eugenia malaccensis</i>	Jambu	Fruits
24	<i>Erythrina cristagalli</i>	Dadap	Land conservation
24	<i>Ficus celebensis</i>	Beringin	Land conservation
26	<i>Ficus benjamina</i>	Beringin	Land conservation
27	<i>Gnetum genemon</i>	Melinjo/ganemo	Vegetable
28	<i>Garcinia mangostana</i>	Manggis	Fruits
29	<i>Koordersiodendron pinatum</i>	Kayu bugis	Construction
30	<i>Lansium domesticum</i>	Lansat	Fruits
31	<i>Lithocarous celebicus</i>	Wakan	Construction
32	<i>Livistona rotundifolia</i>	Woka	Land conservation, Wrapping materials
33	<i>Metroxylon sagu</i>	Rumbia	Sago flour, Roofing materials
34	<i>Myristica fragrans</i>	Pala	Fruits, Specie
35	<i>Mangifera indica</i>	Mangga	Fruits
36	<i>Nephelium lappacium</i>	Rambutan	Fruits
37	<i>Octomeles Sumatrana</i>	Binuang	Construction, Door and window frame
38	<i>Palaquium Abovatum</i>	Pulutan	Construction, Door and window frame
39	<i>Palaquium Obtusifolium</i>	Nantu	Construction, Door and window frame
40	<i>Pangium Edule</i>	Pangi	Vegetable
41	<i>Pinus merkusii</i>	Pinus	Construction, Firewood, Pulp, Resin
42	<i>Pingafetha Filaris</i>	Nibong	Land conservation
43	<i>Pterocarpus indicus</i>	Angsana/Lingga	Furniture, Door and window frame
44	<i>Pterospermum Celebicum</i>	Wolo	Construction
45	<i>Parsia Speriosa</i>	Petai	Vegetable
46	<i>Parsia Americana</i>	Alpokat	Fruits
47	<i>Pometia Tomentosa</i>	Wusel	Construction
48	<i>Sivietenia Macrophylla</i>	Mahoni	Furniture, Door and window frame
49	<i>Spondias pinata</i>	Kedondong	Fruits
50	<i>Toona Celebica</i>	Lalumpek	Construction

表 III-1.6.1 アグロフォレストリーに使用される樹種

Species	Suitable Altitude (m)	Suitable Rain fall (mm/year)	Suitable Soil			Production age	Adaptability
			pH	Depth (cm)	Type		
Estate crops							
Clove (Eugenia aromatica)	200-600	1500-4700	3.0-7.0		Well drained	5-6	o
Coconut (Cocos nucifera)	0-600	1200-2000	4.3-8.3	75		4	o
Coffee (Coffea sp.)	0-600	1550-1800	4.5-5.5	150	Loamy	3	o
Vanilla (Vanilla fragrans)	0-800	2000-2500		Deep	Loamy sand	3	o
Cinnamon (Cinnamomum zeylanicum)						5-6	o
Cocoa (Theobroma cacao)	0-500 (1000)	1000-3000		Deep	Loamy sand	3	o
Nutmeg (Myristica fragrans)	0-700	1400-2450	4.5-7.5		Sandy soil		o
Candle nuts (Aleurites moluccana)	0-700	1000-2500			Volcanic	5-6	o
Cashew (Anacardium occidentale)	0-700 (800)	500-3200	5-8	Deep	Sandy	5-6	o
Sugar palm (Arenga pinnata)	700-1000				Volcanic	3	o
Pepper (Piper nigrum)	0-500(1000)	1500-2000	4.3-7.4		Loamy		x
Rubber (Hevea brasiliensis)	0-500				Rain forest Acidic-nutral	5	x
Fruits							
Durian (Durio zibethinus)	1-1000	1500-2500	5.5-7		Well drained	5-10	o
Mango (Mangifera indica)	0-500(600)	760-2000	5.5-7.5	Deep	Loam	4	o
Mangostin (Garcinia mangostana)	0-500	1500-2500	Acidic	Deep	Loam	10-15	o
Avocado (Persea americana)	0-500	1500-3000	5.5-6.5		Volcanic	6	o
Langsat (Lancium domesticum)	30-500	1500-2500	5.5-7.0		Loose	5	o
Rambutan (Nephelium lappaceum)	200-1500	1500-2500	5.5-7.0		Well drained	8	o
Jackfruit (Artocarpus integrifolia)	0-700(1000)	>1500	5.0-7.0	Deep	Well drained	5	o
Banana (Musa sp.)	0-1500	1400-2500					o
Guava (Psidium guajava)	0-800	700-3700	5.5-7.5	Deep	Well drained	5	o
Citrus sp.	0-1200	1500-2000	5.5-6.5		100 Sandy loam	3-4	o
Trees							
Cempaka (Elmerilla ovalis)	0-1000	2000-4000				20	o
Albizia (Paraserianthes falcataria)	0-1200	2000-4000	Acidic-nutral		Well drained	5 (for pulp), 20	o
Piper (Piper aduncum)							Autogenensis
Ficus sp.							Autogenensis
Pangium (Pangium edule)							o
Tayapu (Trema orientalis)	300-2500	1000-2000	Nutral-basic		Loam	15	o
Mahogany (Swietenia sp.)	50-1400	1600-4000	Nutral-basic		Nutral-basic	15	o
Nyatou Batu (Paracodium sp.)	0-1000	2000-4000	Acidic-nutral			20	o
Kanonang (Cordia blanca)	0-1000	2000-4000	Acidic-nutral				o
Dadap/Walantaken (Erythrina)	0-1000	2000-4000	Acidic-nutral				
Angsana pterocarpus	0-1000	Rain forest				30	o
Lingga (Pterocarpus indica)	0-1800	2000-4000				30-40	o
Pinus sp.	200-2000				Volcanic		x
Teak (Tectona grandis)	0-900	1250-2500	Acidic-nutral		Well drained	80	x
Meranti (Shorea Sp.)	0-1000				Well drained	50	x
Multipurpose trees							
Calliandra calothyrsus	150-1500	2000-4000	moderate acidic		Well drained		o
Glicicidia sepium	0-1600	1500-2300	Acidic-nutral		Well drained		o
Gmelina arborea	0-1200	950-4500	Acidic		Well drained	15	o
Leucaena Leucocephala	0-1000	600-3000	Nutral-basic		Well drained		x

1) Indonesian Government, 2) International Union for Conservation of Nature and Natural Resources

Pr: Protected by PP No. 7/1999 Concerning the protection of plants and animals.

R: Population is characterised by an acute restriction in its area of occupancy (typically less than 100 km²) or in the number of locations (typically less than 5). Such a taxon would thus be prone to the effects of human activities (or stochastic events whose impact is increased by human activities) within a very short period of time in an unforeseeable future, and is thus capable of becoming Critically Endangered or even Extinct in a very short period.

LR/nt: A taxon is Lower Risk when it has been evaluated, does not satisfy the criteria for any of the categories Critically Endangered, Endangered or Vulnerable. Near Threatened (nt). Taxa which do not qualify for Conservation Dependent, but which are close to qualifying for Vulnerable.

Vu C1+2a: A taxon is Vulnerable when it is not Critically Endangered or Endangered but is facing a high risk of extinction in the wild in the medium-term future. C. Population estimated to number less than 10,000 mature individuals and either: 1. An estimated continuing decline of at least 10 % within 10 years or 3 generations, whichever is longer; or 2. A continuing decline, observed, projected or inferred, in numbers of mature individuals and population structure in the form of a severely fragmented (i.e. no sub-population estimated to contain more than 1000 mature individuals)

23	<i>Teron vernans</i>	Columbidae	Tam		R
24	<i>Trichastoma celebense</i>	Timaliidae	Kal, Tam, Ku		R

Note: Kal = Kaluta forest, Tarn = Tarpusu forest, Kas = Kasuratan forest, Man = Manimporok forest

1) Indonesian Government, 2) International Union for Conservation of Nature and Natural Resources
Pr: Protected by PP No. 7/1999 Concerning the protection of plants and animals.

R: Population is characterised by an acute restriction in its area of occupancy (typically less than 100 km²) or in the number of locations (typically less than 5). Such a taxon would thus be prone to the effects of human activities (or stochastic events whose impact is increased by human activities) within a very short period of time in an unforeseeable future, and is thus capable of becoming Critically Endangered or even Extinct in a very short period.

LR/nt: A taxon is Lower Risk when it has been evaluated, does not satisfy the criteria for any of the categories Critically Endangered, Endangered or Vulnerable. Near Threatened (nt). Taxa which do not qualify for Conservation Dependent, but which are close to qualifying for Vulnerable.

Vu C1+2a: A taxon is Vulnerable when it is not Critically Endangered or Endangered but is facing a high risk of extinction in the wild in the medium-term future. C. Population estimated to number less than 10,000 mature individuals and either: 1. An estimated continuing decline of at least 10 % within 10 years or 3 generations, whichever is longer, or 2. A continuing decline, observed, projected or inferred, in numbers of mature individuals and population structure in the form of a severely fragmented (i.e. no sub-population estimated to contain more than 1000 mature individuals)

表 III-2.5.1 各組織開発計画に必要な活動 (1/3)

(a) Community Institutional Development
<ul style="list-style-type: none"> - To prepare minimum requirements for village cadre selection, - To prepare and apply village cadre recruiting procedure, - To select first generation of village cadres and NGO members as to attend training programs as well, - To prepare and apply village cadre introductory program, - To develop village cadre human resource management capacity in relevant government office (forestry services) and a village level proposal process, - To prepare guidelines and technical manual for proposal development - To train local village communities based on technical manual & guidelines, - To repair guidelines for proposal selection, - To facilitate project proposal process in selected villages, - To deploy extension workers in the field, - To promote project process, - To implement village proposal process for nursery development, proper farming practices, physical measures construction, and agroforestry development, - To prepare ongoing proposal preparation selection, funding process, and implementation.
(b) Technical Institutional Development
<ul style="list-style-type: none"> - To develop physical measures construction training for extension workers, - To establish agroforestry research and development capacity (AFRDC), - To prepare facility, - To recruit consultants, - To prepare research programs, - To implement research programs, - To prepare annual reports and recommendations, - To establish and maintain demonstration plots, - To prepare modules for village cadre training center, - To appoint village cadre training center (VCTC) - To prepare facility, uniforms and kits, - To prepare basic programs such as agroforestry, environmental and watershed awareness, priority project identification, proper farming practices, physical measures construction, and project management, - To begin village cadre induction and orientation, - To strengthen village cadre training center (receive updated modules, recommendations from AFRDC) - To prepare advanced agroforestry extension worker training program - To apply basic extension cadre training program for new recruits - To apply advanced extension cadre training program (physical measures, proper farming, and agroforestry)

表 III-2.5.1 各組織開発計画に必要な活動 (2/3)

(c) Institutional Development of Forestry Services	
<u>1) Information Systems Development I (District level)</u>	<ul style="list-style-type: none"> - Establish office in district structure - Engage institutional development and information systems consultant - Install computers and related hardware in district office - Install software in district office - Select staff for training - Select training contractor - Computer operation training I (Basic Computer Operation 10 trainees x 10 days) - Computer operation training II (Business Software 10 trainees x 10 days) - Computer operation training III (Database & Data Processing 10 trainees x 10 days) - Computer operation Training (Advanced training, desktop publishing and GIS, 25 trainees X 4 sessions X 10 days) - Research and identify routine data gathering points - Install data gathering equipment and facilities - Develop simple watershed database - Develop standard data forms for branch offices - Training for branch staff - Develop standardized project monitoring and evaluation forms - Train staff in differential GPS operation - Deploy branch office staff - Gather data - Design input data screen form - Data coding - Data entry - Forward data to province office - Descriptive analysis and report writing training I - Descriptive analysis and report writing workshop I
<u>2) Information Systems Development II (Province level)</u>	<ul style="list-style-type: none"> - Engage database and computer communications specialist - Install computers and related hardware in province office - Install software in province office - Install LAN intranet - Design website with IT staff - Select staff for general training - Install watershed database - Computer operation training I (basic computer operation 15 trainees x 10 days) - Computer operation training II (Business Software 15 trainees x 10 days) - Computer operation training III (database & data processing 15 trainees x 10 days) - Computer operation training IV (desktop publishing and graphics design combined with district office) - Descriptive analysis and report writing training workshop I (15 trainees x 2 days) - Descriptive analysis and report writing seminar I (15 trainees x 2 days) - Develop simple but attractive environmental leaflet for village awareness - Develop posters (environmental awareness) - Computer GIS operation training I on the job - Train staff in differential GPS operation on the job - Develop environmental impact signaling system - Environmental impact signaling report 1 - Environmental impact signaling report 2 - General real time on the job training and coaching for information systems and product development in province and district Offices
<u>3) General capacity strengthening</u>	<ul style="list-style-type: none"> - Technical assistance with counterpart arrangements where existing office staff work together with technical assistance staff.

表 III-2.5.1 各組織開発計画に必要な活動 (3/3)

(d) Accurate Village Boundary Mapping	<ul style="list-style-type: none"> - To recruit survey and mapping consultant - To consultant preparations - To gather existing village boundary maps from Sub Districts and Department of Lands - To develop standard approach for mapping village boundaries - To have meetings with all Sub District Heads for explaining objectives of village boundary mapping - To use differential GPS to locate and establish village reference points - To relate maps to natural and man made boundaries (streams, roads etc.) - To establish boundaries through map and aerial photo interpretation on 1:10,000 maps - To create village boundary layer in GIS - To overlay village boundaries on zoning and problem maps - To provide recommendations to Sub District and village about zoning needs
(e) Institutional Integration and Strengthening of Legal and Regulatory Framework	<ul style="list-style-type: none"> - To revise laws and adapt regional regulations (Forestry/Social Forestry) - To research and establish joint decree - To establish Watershed Conservation Committee - To establish forum for integration of government activities
(f) Strengthening of Watershed Conservation Capacity at University of Manado	<ul style="list-style-type: none"> - To work with staff to strengthen the research capacity and supervise watershed program - To work with university staff to select research topics - To researcher undertake research - To present findings and recommendations to university - To revise based on inputs if necessary - To present final report to Watershed Conservation Committee - To work with public relations and community information section to develop simplified report - To translate simplified report - To layout and prepare simplified report - To disseminate simplified report to community

表 III-3.1.1 環境影響評價作業

Activities	Scale/Area
I. FORESTRY FIELD	
1 Development of Safari Garden	>= 250 ha
2 Development of Zoo	>= 100 ha
3 Forestry Exertion Authority	All size
4 Sago Forest Exertion Authority	All size
5 Industrial Plants Forest Exertion Authority	>= 10,000 ha
6 Bamboo Forest Exertion Authority	All size
7 Exertion of Natural Tourism in	
- National Park	>= 100 ha
- Natural Tourism Park	>= 100 ha
- Hunting Park	>= 100 ha
- Botanical Forest	>= 100 ha
All the activities appropriate to the Conclusion of Forestry Department no. 167/Kpts-II/1994	
II. TOURISM FIELD	
1 Hotels	>=200 rooms or area>5ha
2 Golf Area	All size
3 Park	>= 100 ha
4 Tourism Area	All size
III. AGRICULTURE FIELD	
1 Wet rice field on the Forest	>= 1,000 ha
2 Food plantation cultivation and horticulture with or without its exemption units	>= 3,000 ha
3 Estate season plant cultivation with or without its exemption unit	>= 5,000 ha
4 Estate Plant cultivation with or without its exemption unit	>= 10,000 ha
5 Fishpond cultivation	>= 50 ha
IV. PUBLIC WORK	
1 River normalization	
Medium city	>= 5 km
Village	>= 10 km
2 Water	>= 500 l/second
V. Relocation AND Forest cleared Settlement	
1 Settlement and relocation activities	> = 1,500 ha

Alteration of vegetation	D	D	D	D
Invasion and propagation of harmful fauna and flora	C	D	D	D
Extermination or decrease of precious or specific fauna and flora	D	D	D	D
Disappeared wetland or peat bog	D	D	D	C
Loss of bio-diversity	D	D	D	D
Loss of rain forest/ wild lands	D	D	D	D

表 III-3.4.3 計画による環境への影響：動植物 (2/2)

Issues	Activities			
	Expansion of woodland, Prevention of deforestation	Green belt along the lake and rivers	Regulation of fishery in the lake	Construction of erosion control structures
Occurrence of local diseases	D	D	D	D
Spread of malaria/ filaria epidemic	D	D	D	D
Increase of pesticide consumption	D	D	D	D
Accumulation of remained toxic matter	D	D	D	D
Increase of waste and excrement	D	D	D	D
Garbage and trash dump, falling standards of hygiene	D	D	D	D
Spread of vermin	D	D	D	D
Dump of construction waste, excavated soil, sludge, trash, etc.	D	D	D	D
Alteration of vegetation	D	D	D	D
Invasion and propagation of harmful fauna and flora	D	D	D	D
Extermination or decrease of precious or specific fauna and flora	D	D	D	D
Disappeared wetland or peat bog	D	D	D	D
Loss of bio-diversity	D	D	D	D
Loss of rain forest/ wild lands	D	D	D	D

Judgement scores

A : Serious impact anticipated, need careful assessment in the site,

B : Anticipated impact

C : Unknown (necessary to assess, detail could be clarified in a further assessment),

D : No impact anticipated, not necessary IEE and/or EIA

表 III-3.4.4 計画による環境への影響：社会経済（1/2）

Issues	Activities			
	Set-up of monitoring institution for watershed management	Establishing community forest	Introduction/Extension of agroforestry	Introduction/Extension of erosion control farming practices
Scheduled relocation	D	D	D	D
Unwilling relocation	D	D	D	D
Alteration of the right on land tenure, & residence	D	D	D	D
Change of life style	D	B/C	C	C
Conflict between population	D	D	C	C
Effect on indigenous people, minority, & nomads	D	D	D	D
Reform of traditional institution, & custom	D	D	D	D
Obstruction on fishing right, water right, local regulations	D	D	D	D
Alteration of social structure by organization, etc.	D	D	D	D
Radical change of social structure, & population increase	D	D	D	D
Lost opportunity on production, such as loss of land	D	D	D	D
Transfer, conversion of foundation of economic activity, or unemployment	D	D	D	D
Enlarging income gap	D	D	D	D
Impact on existing transportation	D	D	D	D
Impact on schools & hospitals	D	D	D	D
Cutting off the local society by roads	D	D	D	D
People's perception	D	D	D	D
Destruction or damage of historical remains and cultural legacy	D	D	D	D
Loss of precious scenery	D	D	D	D
Effects on underground resources	D	D	D	D
Change of ground features by construction of the structures	D	D	D	D
Disturbance of harmonic scenery by construction of the structures	D	D	D	D
Increased opportunity of slope failure, accidents	D	D	D	D
Pollution by exhaust or toxic gas of vehicles and plants	D	D	D	D
Noise and vibration caused traffic, pumps, etc.	D	D	D	D
Change of temperature and wind by large scale development	D	D	D	D

Judgement scores A : Serious impact anticipated, need careful assessment in the site,

B : Anticipated impact

C : Unknown (necessary to assess, detail could be clarified in a further assessment),

D : No impact anticipated, not necessary IEE and/or EIA

表III-4.1.1 インテンシブエリアにおけるゾーン別流域保全計画

Item	Zone					
	P Zone	Bm1 Zone	Bm2 Zone	Bm3 Zone	Bw Zone	F Zone
1 Physical Watershed Conservation Measures		The same plan will be applied for Bm1 and Bm2 zones				
1.1 Forestry Management and Rehabilitation	<ul style="list-style-type: none"> 1) Boundary survey for protection forests 2) Community forestry (Soputan protection forest at south area) 3) Reforestation 4) Forest patrol 5) Research for non-wood products 	<ul style="list-style-type: none"> 1)Nursery (9 locations), 2)Extension workers (30 persons), 3)Fuel wood plantation (150ha), 4)Delivery station(7 locations) 		No plan	<ul style="list-style-type: none"> 1) Establishment of green belt 	No plan
1.2 Agriculture/Agroforestry Improvement	<ul style="list-style-type: none"> 1) Fruit tree dominant agroforestry system in the middle part of community forest 	<ul style="list-style-type: none"> 1) AGF-I(Type I-2,4,5)/IM 2) Introduction of culture practice considering soil conservation 	<ul style="list-style-type: none"> 1) AGF-III(Type III-2)/IM 2) Application of AGF-I(Type I-2,4)/IM to place with low resistance to soil erosion 3) Application of AGF-II(Type II-2)/IM and UF/IM to place with high resistance to soil erosion 	<ul style="list-style-type: none"> 1) AGF-II(Type II-2/IM) and UF/IM 2) Application of AGF-III(Type III-2/IM) to a part of sloped area 	<ul style="list-style-type: none"> 1) Application of AGF-I(Type I-2) to sloped area along road. 2) Application of AGF-III (TypeIII-2) to gentle-sloped area 3) Application of AGF-I (TypeI-6) to undulated grass fallow 4) Provision of hedge raw at boundary of home garden 	<ul style="list-style-type: none"> 1) Application of AGF-II(Type II-2)/IM and UF/IM with hedge raw
1.3 Erosion Control Facility Development	<ul style="list-style-type: none"> 1) Slope Protection works for hillsides at Mt.Maimberg in the South Area. 	<ul style="list-style-type: none"> 1) Construction of slope protection works for road at Eris-3 in the East Area 2) Construction of check dam at Tandengan in the East Area 3) Construction of check dam at Ranomerut in the East Area 	<ul style="list-style-type: none"> 1) Construction of slope protection works for road at Paleloan in the East Area 2) Construction of check dam at Tataaran in the West Area 3) Rehabilitation of existing check dam at Leleko in the West Area 	<ul style="list-style-type: none"> 1) Rehabilitation of existing check dam at Kasuratan in the West Area 	No plan	<ul style="list-style-type: none"> 1) River bed protection works at 6 sites on Panasen river in the South 2) River bank protection works at 900m site on Panasen river in the South Area 3) Construction of check dam at Tounipus in the East Area 4) Rehabilitation of exising check dam at Tountimorom in the South Area
2 Institutional Development	<p>Applied for all zones.</p> <p>1)Community institutional development, 2)Technical institutional development, 3)Institutional development of forestry services, 4) Accurate village boundary mapping, 5) Institutional integration and strengthening of legal and regulatory framework, 6) Strengthening of watershed conservation capacity at university of Manado, 7) Strengthening of local NGOs.</p>					
3 Community Empowerment	<p>Applied for all zones.</p> <p>Provide relevant information and data to implementers and supporting agencies to be able to facilitate decision making for community empowerment.</p>					
4 Monitoring and Evaluation System	<p>Applied for all zones.</p> <p>1) Soil erosion and sedimentation, 2) Water quality, 3) Water balance, 4) River bed erosion and slope failures</p> <p>Applied for all zones.</p> <p>1) Micro planning for sustanable land use, 2) Awareness raising and environmental education, 3) Organizing of local people and reorienting of officials, 4) Strengthening of social safety net, 5) Gender and conservation.</p>					

Note 1

AGF—I (TypeI-2)/IM

Improved Estate Crop Dominant Agroforestry System

AGF—I (TypeI-4,5,6)/IM

Improved Tree(woody trees and tree crops) Dominant Agroforestry System

AGF—II (TypeII-2)/IM

Improved Herbaceous Crop Dominant Agroforestry System

AGF—III (TypeIII-2)/IM

Improved Inter-cropping System

UF/IM

Improved Upland Cultural Practice

Note 2

S Zone is not included in Watershed Conservation Plan.
