PREFACE

In response to the request from the Government of the People's Republic of China, the Government of Japan decided to conduct a study on public transportation improvement in Chengdu City and entrusted the study to the Japan International Cooperation Agency (JICA).

JICA selected and dispatched a study team headed by Mr. Takashi Shoyama of ALMEC Corporation and consist of ALMEC Corporation and Chodai Co., Ltd. to China, twice between March 2000 and July 2001. In addition, JICA set up an advisory committee headed by Prof. Dr. Saburo Nakagawa, Ashikaga Institute of Technology between March 2000 and July 2001, which examined the study from specialist and technical points of view.

The team held discussions with the officials concerned of the Government of the People's Republic of China and conducted field surveys, a series of transportation/traffic analyses, transportation demand forecast, transportation planning and identification of priority projects at the study area. Upon returning to Japan, the team conducted further studies and prepared this final report.

I hope that this report will contribute to the improvement of public transportation in Chengdu and to the enhancement of friendly relationship between our two countries.

Finally, I wish to express my sincere appreciation to the officials concerned of the Government of the People's Republic of China for their close cooperation extended to the study team.

July 2001

Kunihiko Saito
President
Japan International Cooperation Agency

July 2001

Mr. Kunihiko Saito
President
Japan International Cooperation Agency

Letter of Transmittal

Dear Sir,

We are pleased to formally submit herewith the final report of “The Study for Public Transportation Improvement in Chengdu City in the People’s Republic of China”.

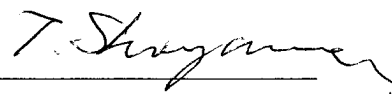

This report compiles the results of the study which was undertaken both in China and Japan, from March 2000 to July 2001 by the study team, organized jointly by ALMEC Corporation & Chodai Co., Ltd.

We owed a lot to many people for the accomplishment of this report. First, we would like to express our sincere appreciation to all those who extended their kind assistance and cooperation to the study team, in particular, the People’s Government of Chengdu and the Sichuan Provincial Commission of Science & Technology.

We also acknowledge the officials of your agency, the JICA Advisory Committee and the Embassy of Japan in China for their valuable advice and cooperation given to us throughout the course of the study.

We wish the report would contribute to Chengdu’s public transportation development in the near future.

Very truly yours,

Takashi Shoyama

Team Leader,
The Study Team for
Public Transportation
Improvement in Chengdu City
in the People’s Republic of
China

TABLE OF CONTENTS

1	INTRODUCTION	
1.1	Study Background.....	1-1
1.2	Objectives of the Study	1-1
1.3	Study Framework.....	1-2
1.4	Study Area.....	1-2
1.5	Study Organization.....	1-4
2	PROFILE OF THE STUDY AREA	
2.1	Administrative Setup of the Area.....	2-1
2.1.1	Historical Development.....	2-1
2.1.2	The Study Area vis-à-vis the Administrative Boundaries.....	2-2
2.2	Natural Condition.....	2-3
2.2.1	Topography and Geology.....	2-3
2.2.2	Climate	2-5
2.3	Socio-economic Condition.....	2-7
2.3.1	Demography	2-7
2.3.2	GDP and Income	2-17
2.3.3	Production and Consumption.....	2-22
2.3.4	Land Use	2-30
2.3.5	Vehicle Ownership.....	2-34
2.3.6	Bicycle Ownership.....	2-35
2.4	Legal System and Organization of Urban Planning.....	2-36
2.4.1	Urban Development Plan	2-36
2.4.2	City Government Budget	2-43
2.4.3	Tax System.....	2-45
2.5	Environment.....	2-46
2.5.1	Introduction	2-46
2.5.2	Air Pollution.....	2-54
2.5.3	Noise and Vibration	2-65
2.5.4	Resettlement	2-67
2.5.5	Disasters	2-68
2.5.6	Plant and Animal Resources.....	2-69
2.5.7	Historical and Cultural Sites.....	2-70

3	PRESENT CONDITION OF ROADS AND TRANSPORT	
3.1	Condition of Road Facilities	3-1
3.1.1	Existing Road Network and Classification of Roads.....	3-1
3.1.2	Primary Road Facilities and Traffic Conditions	3-11
3.1.3	Problems of Primary Road	3-17
3.1.4	Road Network Development Plan of Chengdu City.....	3-18
3.1.5	Design Criteria of Roads.....	3-22
3.1.6	Traffic Capacity on Road.....	3-25
3.2	Characteristics of the Existing Road Traffic.....	3-30
3.2.1	Traffic Volume.....	3-30
3.2.2	Hourly Fluctuation of Traffic Volume.....	3-34
3.2.3	Composition of Vehicle Type	3-38
3.2.4	Travel Speed	3-39
3.3	Public Transportation System	3-43
3.3.1	General Aspects of Public Transportation in Chengdu.....	3-43
3.3.2	Administration of Public Transportation	3-47
3.3.3	State-operated Buses in Cities.....	3-48
3.3.4	Organization of the Public Bus Company.....	3-58
3.3.5	Mini-bus	3-62
3.3.6	Suburban Buses.....	3-67
3.3.7	Bus Terminal.....	3-69
3.3.8	Taxis and Tricycles	3-74
3.3.9	Plan for Subway Development	3-78
3.4	Traffic Management.....	3-80
3.4.1	General Situation of Traffic Management	3-80
3.4.2	Traffic Regulation	3-80
3.4.3	Intersection Management	3-83
3.4.4	Car and Bicycle Parking Facility and Control	3-88
3.4.5	Traffic Management for Public Transport	3-89
3.4.6	Existing Pedestrians and Bicycle Facilities in City Center.....	3-89
3.4.7	Existing Measures on Traffic Demand Management	3-90
3.4.8	Traffic Safety	3-91
3.4.9	Existing Problems and Issues on Traffic Management	3-92
4	EXISTING TRANSPORT DEMAND	
4.1	Person Trip Survey and Methodology for Existing Transport Demand Estimate	4-1
4.1.1	Objective and Scope of the Survey	4-1
4.1.2	Survey Area and Zoning	4-4
4.1.3	Methodology for Existing Transport Demand Estimate.....	4-9

4.2	Outline of Person Trip	4-17
4.2.1	Number of Trips in the Study Area.....	4-17
4.2.2	Number of Trips by Purpose and Transport Mode	4-17
4.2.3	Number of Trips by Hour and Travel Time by Mode	4-20
4.2.4	Trip Generation and Attraction by Zone	4-23
4.3	Transport Demand Distribution	4-27
4.3.1	Transport Demand Distribution	4-27
4.3.2	Trip during Peak Hour and Off-Peak Hour	4-34
4.3.3	Structure of Trips Concentrating Central Area	4-35
4.3.4	Outline of Cordon Line Survey Result.....	4-37
4.4	Structure of Bus Trips	4-40
4.4.1	Characteristics of Bus Users	4-40
4.4.2	Distribution of Bus Trips.....	4-43
4.4.3	Bus Transfer Points	4-44
4.4.4	Perception of Bus Passengers	4-46
4.5	Structure of Bicycle Trips	4-48
4.5.1	Characteristics of Bicycle Users	4-48
4.5.2	Distribution of Bicycle Trips and Travel Distance	4-50
4.5.3	People's Perception on Shifting from Bicycle to Bus.....	4-53
4.6	Structure of Vehicle Trips	4-54
4.6.1	Characteristics of Samples	4-54
4.6.2	Distribution of Vehicle Trips	4-58
4.6.3	People's Perception on Shifting from Car to Bus	4-60
4.7	Assessment of Present Air Quality.....	4-62
4.7.1	Present Evaluation of Air Pollution by Diffusion Simulation.....	4-62
4.7.2	Comparison of the Traffic Pollution Indicators with Other Cities...	4-64
5	TRANSPORT DEMAND FORECAST	
5.1	Future Socio-economic Framework	5-1
5.1.1	Methodology	5-1
5.1.2	Population.....	5-1
5.1.3	GDP	5-6
5.1.4	Employment	5-9
5.1.5	Number of Students and Pupils	5-16
5.1.6	Household Income.....	5-20

5.2	Outline of Future Transport Demand Forecast	5-25
5.2.1	The Purpose of Forecasting Transport Demand	5-25
5.2.2	Process of Forecasting Traffic Demand.....	5-25
5.2.3	Building Models for Forecasting	5-27
5.3	Future Traffic Demand.....	5-28
5.3.1	The General Picture of Future Transport Needs	5-29
5.3.2	Car Ownership Rate	5-32
5.3.3	Trip Production	5-33
5.3.4	Trip Generation and Attraction.....	5-34
5.3.5	Trip Distribution	5-39
5.3.6	Modal Split Model	5-42
5.3.7	Traffic Assignment	5-47
5.3.8	Accessibility to Bus Service	5-51
5.3.9	Development Impact of Subway Line 1	5-53
6	POLICY DEVELOPMENT FOR PUBLIC TRANSPORT SYSTEM	
6.1	Introduction.....	6-1
6.2	Overview of Major Planning Indicators.....	6-2
6.2.1	Spatial, Social and Economic Development.....	6-2
6.2.2	Committed Transport Projects	6-4
6.2.3	Summary of Traffic Demand Forecast.....	6-4
6.3	Roles of the Public Transport System.....	6-6
6.3.1	National Policy Guidelines	6-6
6.3.2	Identified Local Issues	6-11
6.4	Policy Setting	6-14
6.4.1	Principal Policies on Urban Public Transport Development	6-15
6.4.2	Associated Policies on Urban Traffic Management	6-21
6.5	Physical Implications of Development Policies by Corridor.....	6-26
6.5.1	Characteristics and Traffic Demand by Corridor.....	6-26
6.5.2	Development Goals and Strategies for the Corridors	6-31
7	BUS FACILITIES IMPROVEMENT PLAN	
7.1	Introduction of Bus Lanes.....	7-1
7.1.1	Transportation Demand and Number of Bus Lanes	7-1
7.1.2	Structure Type of Trunk Bus Lanes.....	7-2
7.1.3	The Location of Bus Lanes on Present Roads	7-3
7.1.4	Plan for the Introduction of Trunk Bus Lanes	7-8

7.1.5	Identification of Trunk Bus Lanes	7-10
7.1.6	Functions and Structure on Primary and Secondary Busways.....	7-14
7.1.7	Description of Project Location	7-17
7.2	Improvement of Bus Transfer / Terminal Facilities.....	7-18
7.2.1	Bus Route Networks from a Supply-and-Demand Perspective	7-18
7.2.2	Change in Boarding, Alighting and Transferring of Passengers.....	7-19
7.2.3	Guidelines for Bus Route Network Improvement.....	7-22
7.2.4	Assessment of the Bus Terminals and Transfer Points Development	7-24
7.2.5	Terminal and Transfer Points Facility Development	7-29
7.3	Plan of Improving Bus Stops	7-34
7.3.1	Structures and Problems of Existing Bus Stops.....	7-34
7.3.2	Improvement Plans for Bus Stops.....	7-35
7.3.3	Location Bus Stops to be Improved.....	7-38
7.4	Bicycle Road Network Development Plan.....	7-41
7.4.1	Facilities and Capacities of Bicycle Road.....	7-41
7.4.2	Bicycle Traffic.....	7-42
7.4.3	Principal for Bicycle Road Network Development.....	7-45
7.4.4	Primary Road Network and Bicycle Lane.....	7-47
7.5	Intersection Improvement Plan and Related Traffic Management Options.	7-50
7.5.1	Intersection Improvement Plans.....	7-50
7.5.2	Related Traffic Management Options	7-56
7.6	Traffic Safety Measures	7-58
7.6.1	Necessity for the Development of Traffic Safety Plan	7-58
7.6.2	Development of the Road Traffic Environment.....	7-60
7.6.3	Development and Promotion of Traffic Safety Education and Dissemination	7-63
7.6.4	Improvement of the Operational Management on the Transport Companies	7-66
7.6.5	Strengthening Traffic Control Enforcement	7-67
8	BUS OPERATION BUSINESS IMPROVEMENT PLAN	
8.1	Policy Directions for the Improvement of the Administrative System.....	8-1
8.1.1	Current Administrative System.....	8-1
8.1.2	City Size in 2010	8-1
8.1.3	Proposed Traffic Administrative Organization	8-1
8.1.4	Shanghai (An Example of the Proposed Organization)	8-1

8.2	Policy Directions for the Improvement of Bus Operation Business.....	8-2
8.2.1	Deregulation and Privatization.....	8-2
8.2.2	Experience in the Privatization of Major Chinese Cities.....	8-3
8.2.3	Rules of Operation	8-10
8.2.4	Direction of Privatization in Chengdu	8-12
8.2.5	Chengdu City Government and Privatization	8-12
8.2.6	Chengdu Public Transportation Company and Privatization.....	8-14
8.3	Financial Analysis on the Privatization of the Bus Industry.....	8-15
8.3.1	Income and Expenses of the Chengdu Public Transportation Company	8-15
8.3.2	Management Improvements to Make Privatization Possible.....	8-16
8.3.3	Capital Flow after Planned Improvements.....	8-19
8.4	Analysis on Malfunctions	8-20
8.4.1	Operation at the Route No.4 (No.3 Bus Company)	8-20
8.4.2	Malfunction Analysis of the No.1 Company Buses.....	8-21
8.5	Promoting Use of CNG.....	8-25
8.5.1	Rationale for Promoting the Use of CGN Engine.....	8-25
8.5.2	Issues of CNG Conversion.....	8-26
8.5.3	Malfunction Rate of CNG Engines.....	8-27
8.5.4	Proposed Plan for CNG Conversion	8-28
8.6	Bus Fare System	8-31
8.7	Bus Unit Improvement.....	8-32
8.7.1	Current Situation of Bus Units.....	8-32
8.7.2	Direction of Vehicle Improvement	8-32
8.7.3	Immediate Implementable Measures	8-34
8.8	Implementation Schedule.....	8-34
9	EVALUATION OF THE MASTER PLAN ON PUBLIC TRANSPORTATION SYSTEM	
9.1	The Master Plan and List of Projects of Public Transport System	9-1
9.1.1	Master Plan on Public Transport System.....	9-1
9.1.2	Project List	9-4
9.1.3	Project Cost Estimate	9-7
9.2	Economic Evaluation	9-9
9.2.1	Objective and Methodology of Economic Evaluation.....	9-9
9.2.2	Economic Costs of the Project.....	9-9
9.2.3	Calculation of the Benefits.....	9-11
9.2.4	Results of Economic Evaluation.....	9-13

9.3	Economic Evaluation of the Master Plan.....	9-16
9.3.1	Environmental Impact of the Mater Plan as a Whole	9-16
9.3.2	Necessity of EIA for Selected Projects	9-19
9.4	Comprehensive Evaluation of the Projects and Implementation Schedule..	9-21
9.4.1	Comprehensive Evaluation of the Projects	9-21
9.4.2	Implementation Schedule.....	9-23
10	EAST-WEST PRIMARY BUSWAY PROJECT	
10.1	Project Outline.....	10-1
10.1.1	Background and Objectives of the Project.....	10-1
10.1.2	Bus Routes on Shudu Road.....	10-2
10.1.3	Bus Traffic Volume on Shudu Road	10-3
10.1.4	Construction and Operation	10-5
10.2	Transport Demand Forecast	10-6
10.2.1	Methodology	10-6
10.2.2	Estimated Traffic Volume	10-7
10.3	Preliminary Design of the Exclusive Bus lane.....	10-11
10.3.1	Horizontal and Vertical Designs	10-11
10.3.2	Cross Section Design	10-18
10.3.3	Design of Structures	10-25
10.3.4	Traffic Management Design.....	10-33
10.3.5	Design of Bus Stop Facilities	10-39
10.4	Construction Plan and Project Cost Estimate.....	10-43
10.4.1	Construction Plan	10-43
10.4.2	Quantity of Works	10-51
10.4.3	Project Cost Estimate	10-57
10.4.4	Implementation Schedule	10-67
10.5	Environmental Impact Assessment	10-68
10.5.1	Introduction	10-68
10.5.2	Forecasted Traffic Volume.....	10-70
10.5.3	General Conditions of Environment along the Road	10-73
10.5.4	Selection of the Influence Factor of Environment	10-80
10.5.5	Present Environmental Situation.....	10-83
10.5.6	Evaluation of the Predicted Influence on Environment	10-89
10.5.7	Environment Conservation Strategy and its Monitoring.....	10-96

10.6	Economic Evaluation	10-98
	10.6.1 Economic Cost.....	10-98
	10.6.2 Economic Benefit	10-99
	10.6.3 Result of Economic Evaluation	10-100
	10.6.4 Sensitivity Analysis	10-101
11	CHENGDU BUS PRIVATIZATION PROJECT	
11.1	Background and Objectives	11-1
	11.1.1 Background	11-1
	11.1.2 Current Progress of Privatization in Chengdu	11-2
	11.1.3 Objectives and Scope of the Feasibility Study.....	11-3
11.2	Planning Environment of the Project.....	11-4
	11.2.1 Financial Characteristics of Chengdu Public Transportation Company	11-4
	11.2.2 Assessment of Bus Fare System	11-9
11.3	Fundamental Framework to Guide Bus Privatization.....	11-11
	11.3.1 Objectives of the Bus Privatization Project	11-11
	11.3.2 Role of Bus Transport Administration.....	11-13
	11.3.3 Role of Bus Transport Operators	11-14
11.4	Financial Analysis on the Chengdu Bus Privatization Project.....	11-16
	11.4.1 Financial Model for Chengdu Bus Company	11-16
	11.4.2 Preconditions and Assumptions for Financial Analysis	11-18
	11.4.3 Results of Financial Evaluation	11-21
11.5	Introducing the Route License System in Chengdu.....	11-25
	11.5.1 Methods to Incorporate a Competition Principle in Route Licensing	11-25
	11.5.2 Analysis of Method Characteristics	11-26
	11.5.3 A Route License System Suitable for Chengdu.....	11-29
11.6	Institutional Reform Program to Support Chengdu's Bus Privatization ...	11-31
12	CONCLUSION AND RECOMMENDATIONS	
12.1	Conclusion	12-1
12.2	Recommendations.....	12-2

3.1.2	Planned Roads by Chengdu City (Committed)	3-20
3.1.3	Road Classification and Design Speed	3-23
3.1.4	Width of Cross Section Elements	3-24
3.1.5	Major Geometric Design Standards.....	3-24
3.1.6	Capacity Correction Factor by Roadside Activity	3-26
3.1.7	Capacity of Selected Existing Roads	3-27
3.1.8	Possible Capacity of Roads Applied in China	3-27
3.1.9	Capacity of Roads with Exclusive Bus Lanes	3-28
3.2.1	Regional Characteristics of the Traffic Volume by Vehicle Type.....	3-30
3.2.2	Peak Hour Directional Traffic Volume at Major Intersections.....	3-32
3.2.3	Regional Characteristics of Hourly Fluctuation of Traffic Volume	3-35
3.2.4	Summary of Travel Speed Survey	3-40
3.3.1	Services Level of Different Transportation Mode between Chengdu and Other Main Cities.....	3-45
3.3.2	Routes Operated by Chengdu Public Transportation (as of September 2000)	3-49
3.3.3	Bus Fleet of Public Transport Company in May 2000	3-59
3.3.4	Number and Age of Bus Fleet of Public Transport Company	3-60
3.3.5	Employees of Chengdu Public Transportation Company.....	3-61
3.3.6	Financial Statement of the Public Transportation Company in Chengdu.....	3-62
3.3.7	Mini-bus Companies in Chengdu	3-63
3.3.8	Particulars on the Mini-bus Routes	3-65
3.3.9	Financial Conditions of Privately Operated Mini-Bus	3-66
3.3.10	Suburban Bus Routes Operated by State-owned Company.....	3-68
3.3.11	Privately Operated Suburban Routes	3-68
3.3.12	Urban Bus Terminals	3-70
3.3.13	Situation of Suburban Bus Terminals	3-72
3.3.14	Number of Daily Suburban Bus Operation by Terminal and by Direction	3-73
3.3.15	Taxis Fare System Table.....	3-76
3.4.1	Road Structure and Speed Limits	3-81
3.4.2	Trend in Traffic Accidents and Casualties in Chengdu	3-91
4.1.1	Survey Items	4-2
4.1.2	Survey Schedule of the Person-Trip Survey	4-4
4.1.3	Traffic Zones of Study Area	4-5
4.1.4	Traffic Zones Outside Study Area	4-7
4.1.5	Person Trips and Surveys.....	4-9
4.1.6	Number of Effective Samples in Person Trip Survey	4-12
4.1.7	Effective Samples on Car OD Survey.....	4-13
4.1.8	Effective Samples of OD Survey at Cordon Line (All Stations).....	4-13

4.1.9	Effective Samples of Bus OD Survey at Cordon Line (All Stations)	4-13
4.1.10	Results of Screen Line Adjustment	4-16
4.1.11	Average Occupancy by Type of Vehicle	4-16
4.2.1	Number of Trips in the Study Area	4-17
4.2.2	Number of Person Trips by Trip Purpose	4-18
4.2.3	Mode of Transportation.....	4-18
4.2.4	Number of Trips by Mode and by Trip Purpose	4-19
4.2.5	Trip Generation by Mode and by Hour	4-21
4.2.6	Trip Attraction by Mode and by Hour	4-21
4.2.7	Average Travel Time by Mode of Transport	4-22
4.3.1	Characteristics of Trip in Radial Direction	4-33
4.3.2	Characteristics of Trip in Circumferential Direction	4-33
4.3.3	Trip Attracted by Hour and by Purpose	4-34
4.3.4	Transport Mode by Purpose during Peak Hour.....	4-35
4.3.5	Number of Attracted Trips by Purpose	4-36
4.3.6	Number of Attracted Trips by Mode.....	4-36
4.3.7	Origin Zone of Attracted Trips.....	4-37
4.3.8	Number of Railway Passengers Boarding and Alighting at Stations.....	4-38
4.3.9	Number of Samples from Bus OD Interview Survey	4-39
4.3.10	Cordon Line Traffic Volume by Mode of Transport	4-40
4.4.1	Number of Bus Trips by Age Group.....	4-41
4.4.2	Number of Bus Trips by Occupation	4-41
4.4.3	Bus Trip Share of Registered/Temporary Population	4-42
4.4.4	Number of Bus Trips by Income Level.....	4-42
4.4.5	Number of Bus Trips By Purpose	4-42
4.4.6	Linked and Unlinked Trips by Bus	4-45
4.4.7	Reasons of Using Bus	4-46
4.4.8	The Problems of the Bus Services.....	4-46
4.4.9	Items Found Important by the People	4-47
4.5.1	Number of Bicycle Trips by Age Group.....	4-48
4.5.2	Number of Bicycle Trips by Occupation	4-49
4.5.3	Number of Bicycle Trips by Income Level.....	4-50
4.5.4	Number of Bicycle Trips by Purpose.....	4-50
4.5.5	Number of Bicycle Trips by Travel Distance	4-52
4.5.6	Reasons for the Use of Bicycles.....	4-53
4.5.7	Reasons Why Bicycle Users Do Not Use the Bus	4-53
4.5.8	Intention of Bicycle Users to Shift to Bus with Improved Service.....	4-54
4.6.1	Number of Samples in Car OD Survey	4-55
4.6.2	Number of Sample Vehicles by Industrial Sector.....	4-55
4.6.3	Parking Style by Trip Destination.....	4-56
4.6.4	Number of Vehicle Trips by Destination Facility and Parking Style	4-57
4.6.5	Number of Vehicle Trips by Purpose.....	4-58
4.6.6	Reasons for Using Buses.....	4-61
4.6.7	Reasons for Refusing Buses	4-61
4.6.8	Intension for Shifting to Bus Use.....	4-61
4.7.1	Countries and Cities Compared with Chengdu's Traffic Pollution	4-64
4.7.2	Criteria for Comparative Evaluation	4-64
4.7.3	Evaluation Items Used	4-65
4.7.4	Problem Analysis Checklist	4-66
4.7.5	Comparison of Causes for Traffic Pollution	4-68
4.7.6	Evaluation of Causes of Traffic Pollution.....	4-68

4.7.7	Pollution Sources and Corresponding Measures	4-69
5.1.1	Population Forecast of the Integrated Master Plan for the Central Districts of Chengdu City	5-1
5.1.2	Forecast of Population in the Study Area	5-2
5.1.3	Future Population by Area	5-4
5.1.4	GDP Growth Rates of China and Chengdu City.....	5-6
5.1.5	GDP Forecast for Chengdu City, 2000-2010.....	5-6
5.1.6	GDP Forecast for the Central Districts, 2000-2010.....	5-7
5.1.7	GDP Forecast for the Study Area, 2000-2010	5-8
5.1.8	Changes in Increase Rate of Labor Productivity by Sector in Chengdu City, 1995-1999	5-9
5.1.9	Future Increase of Labor Productivity by Sector	5-10
5.1.10	Future Employment by Sector in the Study Area	5-10
5.1.11	Future Population by Age Group, 2000 and 2010	5-11
5.1.12	Future Population (over 15 Years) by Employment Status, 2000 and 2010.....	5-11
5.1.13	Future Employment by Sector at Residence and Work Place in the Study Area, 2000 and 2010.....	5-12
5.1.14	Future Employment at Work Place by Area	5-13
5.1.15	Future Employment at Residence by Area	5-14
5.1.16	Forecast of Number of Pupils in the Study Area	5-16
5.1.17	Forecast of Student Density in Chengdu City.....	5-17
5.1.18	Forecast of Student Density in the Study Area.....	5-17
5.1.19	Forecast of Number of Students in the Study Area	5-17
5.1.20	Future Number of Pupils by Ring Area	5-18
5.1.21	Future Number of Students by Area	5-19
5.1.22	Future Number of Households by Income Level in the Study Area.....	5-22
5.1.23	Future Number of Households by Income Group and by Area	5-24
5.3.1	Trip Rate by Car Ownership and by Household Income	5-33
5.3.2	Change in Mobility by Car Ownership.....	5-34
5.3.3	Number of Trips by Trip Purpose	5-34
5.3.4	The Parameters for the Generation/Attraction Model.....	5-35
5.3.5	Parameter of Intra-zonal Trip Model	5-40
5.3.6	Future Transport Demand by Mode.....	5-47
5.3.7	Average Number of Passengers and PCU by Mode	5-49
5.3.8	Summary of Traffic Assignment Result by Scenario	5-49
5.3.9	Projected Traffic Demand for the No.1 Subway.....	5-54
5.3.10	Forecast of Subway Demand	5-55
5.3.11	Impact of Subway to Road Traffic.....	5-55
5.3.12	Reduction in Air Pollution Due to the Subway.....	5-55
6.2.1	Future Socio-economic Development Framework	6-3
6.2.2	Projected Traffic Demand.....	6-5
6.2.3	Change in Modal Share of Transport Modes	6-5
6.4.1	Expected Roles of Public Transport.....	6-15
6.4.2	Public Transport System Development Strategy	6-19
6.4.3	Relationship of Major Measures and Strategies for Improvement	6-21
6.4.4	Automobile Ownership in Chengdu	6-22
6.4.5	Schemes to Control Automobile Transport and Their Applicability in Chengdu	6-23
6.4.6	Schemes to Organize Pedestrian Space and Their Applicability in Chengdu.....	6-25
6.5.1	Corridors in Chengdu	6-28

6.5.2	Change in Traffic Demand in Each Road of the Corridors	6-29
7.1.1	Transportation Capacity of Various Bus Types.....	7-1
7.1.2	Maximum Transportation Capacity of Buses by Departing Intervals	7-1
7.1.3	Number of Necessary Bus Lanes.....	7-2
7.1.4	Characteristics of Alternative Plans.....	7-7
7.1.5	Transportation Demand in 2010	7-11
7.1.6	Future Transportation Capacity and Volume of Main Routes of Major Traffic Axle	7-13
7.2.1	Projected Changes in Bus Demand Areas between Second Ring Road Outskirts and City Center	7-19
7.2.2	Projected Changes in Bus Demand in Areas between Third Ring Road Outskirts and City Center	7-19
7.2.3	Change in Bus Demand at Major Transfer Points	7-25
7.2.4	Bus Transfer Facilities	7-26
7.2.5	Inter-city Bus Terminal Development Plan in Chengdu City	7-27
7.2.6	Planned Inter-city Bus Terminal.....	7-28
7.2.7	Types and Functions of Public Transport Bus Terminals	7-30
7.3.1	Roads Needing Bus Stop Improvement.....	7-39
7.4.1	Design Elements of Bicycle Traffic Facilities.....	7-41
7.4.2	Bicycle Traffic Capacity.....	7-42
7.4.3	The Service Level of Bicycle Lanes/Roads.....	7-42
7.4.4	Bicycle Traffic Volume on Typical Bicycle Lanes	7-44
8.1.1	Predicted Number of Bus Passengers	8-1
8.2.1	Management Quotas of the Shanghai Shangxing Bus Limited Corporation (year).....	8-6
8.2.2	Management Quotas of Guangzhou Xingfuli Bus Compaby (in 1999)	8-8
8.2.3	Coverage Rate by Company	8-9
8.2.4	Privatization Rules in Chinese Cities and Japan's Transportation Law	8-11
8.2.5	Figures on the Affiliated Companies.....	8-14
8.3.1	Financial Condition of the Chengdu Public Transportation Company for 1998.....	8-15
8.3.2	Projected Increase in Subsidies for Public Transport (Bus), 2000-2010.....	8-15
8.3.3	Required Number of Vehicles	8-17
8.3.4	Cash Balance of the Chengdu Public Transportation Company After the Improvement Measures (using 1999 figures)	8-19
8.4.1	Driving Efficiency of the Route No.4 Buses	8-20
8.4.2	Malfunction Situation of the Route No.4 Buses.....	8-21
8.4.3	Buses Owned by the No. 1 Bus Company, by Bus Type and Engine Type.....	8-22
8.4.4	Number of Buses, by Type and Year Purchased	8-22
8.4.5	Average Number of Buses Breaking Down	8-22
8.4.6	Frequency of Bus Malfunctions, by Engine Type	8-23
8.4.7	Frequency of Malfunction of Buses, by Year of Purchase and by Type of Engine	8-23
8.4.8	Percentage of Breakdown Among Different Bus Parts and Duration of Repair Work	8-24
8.4.9	Frequency and Type of Repair Works.....	8-24
8.5.1	Decrease Rate of Exhaust Gas Emission by CNG (in comparison with Diesel).....	8-25
8.5.2	Properties of Fuels	8-26

8.5.3	Comparative Analysis between CNG and Diesel Engines.....	8-26
8.5.4	Routes with a Daily Average Running Distance of Over 200Km.....	8-27
8.5.5	Buses Owned by the No. 1 Bus Company	8-27
8.5.6	Frequency of Bus Malfunctions by Engine Type.....	8-28
8.5.7	Number of Vehicles Requiring Daily Filling	8-30
8.5.8	Number of Required Gas Stations.....	8-30
8.7.1	Direction of Bus Improvement.....	8-34
9.1.1	List of Public Transport Projects in the Master Plan.....	9-6
9.1.2	Master Plan Project Cost Summary.....	9-8
9.2.1	Economic Cost of the Project	9-10
9.2.2	Calculation of Time Value	9-11
9.2.3	Total Economic Benefit of the Master Plan	9-12
9.2.4	The Economic Benefits of the Projects	9-13
9.2.5	Total Evaluation of the Master Plan.....	9-14
9.2.6	Sensitivity Analysis of Economic Evaluation of Master Plan.....	9-15
9.2.7	Individual Evaluation of Projects	9-15
9.3.1	Vehicle Emissions for “Do-Nothing” Case in 2010.....	9-18
9.3.2	Vehicle Emissions for Introduction of CNG in 2010.....	9-18
9.3.3	Vehicle Emissions for Improvement of Public Transport in 2010.....	9-18
9.3.4	Vehicle Emissions for Combination of CNG Introduction and Public Transport Improvement in 2010	9-18
9.3.5	Vehicle Emissions for Combination of CNG Introduction and Subway Service Provision in 2010.....	9-18
9.3.6	Evaluation of Selected Projects	9-20
9.4.1	Comprehensive Evaluation of Projects Proposed in the Master Plan	9-22
9.4.2	Implementation Schedule of Proposed Projects	9-24
10.1.1	Bus Traffic Volume on Shudu Road	10-3
10.2.1	Traveling Conditions on Network	10-7
10.2.2	Estimated Traffic Volume on the Shudu Road.....	10-8
10.3.1	Curve Semi Diameter of Shudu Road	10-13
10.3.2	Longitudinal Grade of Shudu Road.....	10-13
10.3.3	Traffic Forecast on Shudu Road in 2010.....	10-18
10.3.4	Traffic Capability and Traffic Demand, 2010.....	10-19
10.3.5	Typical Cross Section Elements in Shudu Road	10-20
10.4.1	List of Earth-Retaining Wall Methods	10-46
10.4.2	Quantities of Major Works	10-51
10.4.3	Quantities of Road Works	10-52
10.4.4	Quantities of Related Works	10-53
10.4.5	Quantities of Underpass	10-54
10.4.6	Quantities of Pedestrian Bridge.....	10-55
10.4.7	Quantities of Other Works.....	10-56
10.4.8	Unit-Prices of Labor• Material• Equipment.....	10-59
10.4.9	Other Direct Costs of Major Works	10-60
10.4.10	Site Expenses of Major Works	10-60
10.4.11	Indirect Costs of Major Works	10-61
10.4.12	Example of Unit-Process Cost Table	10-62
10.4.13	Example of Unit-Process Cost Table (continued).....	10-63
10.4.14	Unit Construction Costs of Major Works.....	10-64
10.4.15	Unit Construction Costs of Major Works (continued)	10-65

10.4.16	Summary of Project Cost.....	10-66
10.4.17	Implementation Schedule and Yearly Project Cost.....	10-67
10.5.1	Present Traffic Volume on Shudu Road in 2001.....	10-70
10.5.2	Predicted Traffic Volume of Exclusive Bus Lane after 7-Year Operation, 2011.....	10-71
10.5.3	Predicted Traffic Volume of Exclusive Bus Lane after 15-Year Operation, 2019.....	10-72
10.5.4	Present Land-Use along Shudu Road.....	10-74
10.5.5	Population and Number of Schools in Jinjiang District and Qingjiang District along Shudu Road.....	10-75
10.5.6	Employment Situation in the Central Districts.....	10-75
10.5.7	Historical and Cultural Heritages along Shudu Road.....	10-75
10.5.8	Selection of Environmental Impact Assessment Factors.....	10-81
10.5.9	Selected EIA Items Accompanied by Introducing Exclusive Bus Lane along Shudu Road.....	10-82
10.5.10	Population Trend in Jinjiang District and Qingyang District.....	10-83
10.5.11	GRDP, per capita GRDP and Average Income in Jinjiang District and Qingyang District, 1998.....	10-83
10.5.12	Data on Underground Water in the Center of the Chengdu City.....	10-85
10.5.13	Estimated Annual Absorbing Amount of CO ₂	10-86
10.5.14	Present CO Emission Density on the Shudu Road.....	10-88
10.5.15	Present NO _x Emission Density on the Shudu Road.....	10-88
10.5.16	Present TSP Emission Density on the Shudu Road.....	10-88
10.5.17	CO ₂ Emissions.....	10-96
10.6.1	Economic Cost of the East-West Primary Busway Project.....	10-99
10.6.2	Economic Benefit of the East-West Primary Busway Project.....	10-99
10.6.3	Benefit/Cost Stream of the East-West Primary Busway Project.....	10-100
10.6.4	Sensitivity Analysis on Economic Feasibility of the East-West Primary Busway Project.....	10-101
11.2.1	Operational Performance of Chengdu Public Transportation Company.....	11-4
11.2.2	Profit and Loss Statement of Chengdu Public Transport Company, 1996-1999.....	11-5
11.2.3	Operating Expense of Chengdu Public Transport Company.....	11-5
11.2.4	Subsidies to Public Transport Company.....	11-6
11.2.5	Sales Profit and Fare Revenue of Affiliated Bus Companies.....	11-7
11.2.6	Balance Sheet of Chengdu Public Transport Company.....	11-8
11.2.7	Proportion of Bicycle and Bus Trips.....	11-9
11.4.1	Demand Increase and Necessary Bus Fleet.....	11-19
11.4.2	Bus Acquisition Plan for the New Bus Company.....	11-19
11.4.3	Number of Workers of Chengdu Public Transport Company.....	11-20
11.4.4	Summary of Evaluation.....	11-23
11.4.5	Maximum Dividend and IRR on Equity.....	11-24
11.5.1	Average Number of Enterprises Entering the Bidding Process for Bus Route Licensing (British Cases).....	11-27
11.5.2	Relationship between Operation Cost of Bus Route Licensing and Quantity of Enterprises Entering the Bid (British Cases).....	11-27
11.5.3	Comparison on Estimation Effect by Different Methods of Bus Route License System.....	11-29

LIST OF FIGURES

Figure No.	Title	Page No.
1.3.1	Study Framework.....	1-3
1.4.1	Study Area.....	1-4
1.5.1	Study Organization	1-4
2.1.1	The Study Area	2-3
2.2.1	Monthly Variation of Temperature of Chengdu (1998).....	2-6
2.2.2	Monthly Variation of Rainfall Volume of Chengdu (1998)	2-6
2.2.3	Number of Foggy Days by Month of Chengdu (1998).....	2-6
2.3.1	Nine Major Zones for the Person-Trip Survey of 1987	2-10
2.3.2	Population Density by Traffic Zone, 1999.....	2-13
2.3.3	Distribution of Universities.....	2-17
2.3.4	Development of Urban Areas of Chengdu City (1949-1990).....	2-31
2.3.5	Present Land Use (1994).....	2-33
2.4.1	Comprehensive Urban Development Plan (2010)	2-42
2.5.1	Number of Vehicles in the Last Four Years	2-51
2.5.2	Change of TSP in Chengdu.....	2-54
2.5.3	Measurement Sites for Air Pollution and Noise Vibration.....	2-57
2.5.4	Average Daily Concentration of NO ₂ (mg/m ³) in Various Sites	2-58
2.5.5	Average Daily Concentration of SO ₂ (mg/m ³) in Various Sites.....	2-60
2.5.6	Average Daily Concentration of CO (mg/m ³) in Various Sites.....	2-61
2.5.7	Hourly Change of Concentration of CO (mg/m ³) in Various Sties	2-62
2.5.8	Average Daily Concentration of CnHn (mg/m ³) in Various Sites.....	2-63
2.5.9	TSP Concentration (mg/m ³) in Various Sites	2-64
2.5.10	Results of Measurement of Noise	2-66
2.5.11	Results of Measurement of Vibration Levels (dB).....	2-67
3.1.1	The Primary Road Network in the Study Area.....	3-2
3.1.2	Intercity Road Network around Chengdu	3-3
3.1.3	Existing Road Network by Number of Lanes.....	3-8
3.1.4	Existing Road Network by Road Width	3-9
3.1.5	Network of Segregated Bicycle Lanes.....	3-10
3.1.6	Typical Cross-Section of Existing Road.....	3-15
3.1.7	Location of Intersections.....	3-16
3.1.8	Planned Road Network for the Study Area.....	3-21
3.2.1	24-Hour Traffic Volume at Survey Locations	3-31
3.2.2	Hourly Fluctuation of Traffic Volume by Vehicle Type	3-36
3.2.3	Hourly Fluctuation of Passenger Cars and Taxis.....	3-37
3.2.4	Hourly Fluctuation of Buses	3-37
3.2.5	Hourly Fluctuation of Trucks.....	3-37
3.2.6	Composition of Vehicle Type on Screen Line.....	3-38
3.2.7	Composition of Vehicle Type by Time of the Day.....	3-38
3.2.8	Time-Distance Relation on Mayor Routes by Mode	3-41
3.2.9	Road Sections with Car Speed Below 20 km/h	3-42
3.2.10	Road Sections with Bus Speed Below 20 km/h.....	3-42
3.3.1	Inter-Regional Transportation in Chengdu	3-44
3.3.2	Public Transport Vehicles in Chengdu	3-46
3.3.3	The Administrative Organization of the Public Transportation	3-47

3.3.4	Bus Routes of the Chengdu Public Transportation Company (as of September 2000)	3-52
3.3.5	Number of Routes (as of September 2000).....	3-54
3.3.6	Distribution of Bus Route Length	3-55
3.3.7	Correlation between Frequency and Number of Allocated Buses divided by Line Length	3-56
3.3.8	Change in Ridership and Route Lengths.....	3-57
3.3.9	Relation between Passengers and Population (1982-1998)	3-57
3.3.10	Organization of State-owned Public Transport Company	3-59
3.3.11	Mini-bus Routes in Chengdu.....	3-64
3.3.12	Bus Fares of Suburban Routes	3-69
3.3.13	Location of the Origin and Destination and Bus Terminals.....	3-70
3.3.14	Interval between Stations (Investigated for 13 routes).....	3-71
3.3.15	Locations of Suburban Bus Terminals	3-72
3.3.16	Suburban Bus Route Map	3-74
3.3.17	Increase of Taxis in Urban Chengdu.....	3-74
3.3.18	Distribution of Taxi Companies by Fleet Size	3-75
3.3.19	Number of Taxis by Models.....	3-75
3.3.20	Rail Transit Network Plan, as of May 2000.....	3-79
3.4.1	Speed Limit Signs	3-81
3.4.2	Existing and Planned One-way System	3-82
3.4.3	Grade Separation for Motorized Vehicles and Bicycles	3-84
3.4.4	Existing Signal Systems	3-85
3.4.5	Example of Current Signal Phasing at Intersections and Possible Improvement	3-86
3.4.6	Example of Separation of Bicycles from Cars	3-86
3.4.7	Traffic Problem Caused by Reckless Left Turning.....	3-87
3.4.8	Motor Vehicle and Bicycle Parking.....	3-89
3.4.9	The Green Path by the Fuman River Cleaning Project	3-90
4.1.1	Zoning of the Study Area	4-8
4.1.2	Data Processing for Person Trip Related Database.....	4-11
4.1.3	Calculation of Expansion Factors	4-14
4.1.4	Concept of Adjustment by Screen Line Traffic Volume	4-15
4.2.1	Modal Choice by Trip Purpose	4-19
4.2.2	Trip Generation by Mode and by Hour.....	4-20
4.2.3	Trip Attraction by Mode and by Hour	4-20
4.2.4	Travel Time by Mode of Transport.....	4-22
4.2.5	Trip Generation / Attraction by Purpose	4-24
4.2.6	Trip Generation / Attraction by Mode.....	4-25
4.2.7	Trip Generation / Attraction by Mode (Excluding Bicycle)	4-26
4.3.1	Medium Zone System	4-27
4.3.2	Distribution of Traffic Demand between Medium Zones (Work Trip, School Trip)	4-29
4.3.3	Distribution of Traffic Demand between Medium Zones (Private Trip, Business Trip).....	4-30
4.3.4	Traffic Volume by Corridor	4-32
4.3.5	Analyzed Zones.....	4-35
4.3.6	Traffic Counted at Cordon Line Survey Stations (24 hours)	4-38
4.4.1	Bus Trip Distribution by Age Group.....	4-40
4.4.2	Bus Trip Distribution by Occupation	4-41
4.4.3	Trip Generation and Attraction by Bus	4-43

4.4.4	Bus Trip Distribution	4-44
4.4.5	Major Bus Transfer Points	4-45
4.4.6	Evaluation of the Bus Service by the Bus Users.....	4-47
4.5.1	Bicycle Trip Distribution by Age Group	4-48
4.5.2	Bicycle Trip Distribution by Occupation.....	4-49
4.5.3	Trip Generation and Attraction by Bicycle.....	4-51
4.5.4	Distribution of Bicycle Trips	4-51
4.5.5	Distribution of Bicycle Trips by Travel Distance.....	4-52
4.6.1	Destination Facilities of Vehicle Trip.....	4-56
4.6.2	Parking Style by Destination Facility	4-57
4.6.3	Vehicle Trip Generation and Attraction by Purpose.....	4-59
4.6.4	Distribution of Vehicle Trips	4-60
4.7.1	Comparison of the Observed and Computed Values	4-63
4.7.2	Concentration Distribution Map of Carbon Monoxide (CO) in 2000	4-63
5.1.1	Future Population in the Study Area.....	5-3
5.1.2	Changes in Population Distribution by Traffic Zone.....	5-5
5.1.3	GDP Forecast for Chengdu City	5-7
5.1.4	GDP Forecast for the Study Area	5-8
5.1.5	Future Employment by Sector in the Study Area	5-10
5.1.6	Employment by Sector and by Traffic Zone.....	5-15
5.1.7	Future Number of Pupils and Students in the Study Area	5-18
5.1.8	Changes in Distribution of Pupils and Students by Traffic Zone	5-21
5.1.9	Changes in Distribution of Household Income in the Study Area.....	5-22
5.2.1	Process of Future Traffic Demand Forecast	5-26
5.2.2	Modal Split Structure	5-28
5.3.1	Models for Forecasting Traffic Demand.....	5-30
5.3.2	Traffic Zones in the Study Area.....	5-31
5.3.3	Car Ownership Rate by Income Group.....	5-32
5.3.4	Car Ownership Rate Model.....	5-32
5.3.5	Forecast of Trip Generation and Attraction	5-36
5.3.6	Changes in Generated Trips by Traffic Zone.....	5-37
5.3.7	Changes in Attracted Trips by Traffic Zone	5-38
5.3.8	Output of Trip Distribution Model	5-39
5.3.9	Changes in the Desired Line (Medium-sized Zone).....	5-41
5.3.10	Modal Split Structure and Model Choice Models	5-42
5.3.11	Modal Share of Walk Trips by Trip Distance.....	5-43
5.3.12	Modal Share Curve of Car	5-44
5.3.13	Modal Share of Public Transport Mode by Trip Distance.....	5-45
5.3.14	Modal Share Curve of Bus by Trip Distance.....	5-46
5.3.15	Traffic Assignment Procedure	5-48
5.3.16	Future Assigned Traffic Volume (Do-nothing Case)	5-50
5.3.17	Future Assigned Traffic Volume (Do-improvement Case)	5-50
5.3.18	Frequency of Bus by Road Link	5-51
5.3.19	Accessibility by Traffic Zone	5-52
5.3.20	Areas Covered by Subway Line 1.....	5-53
6.1.1	Policy Development Framework for Chengdu's Urban Public Transport System.....	6-1
6.5.1	Configuration of the Selected Corridors	6-27
6.5.2	Current Traffic Demand in the Corridor (2000)	6-30
6.5.3	Future Traffic Demand in the Corridors (2010)	6-30

7.1.1	Positions of Bus Lanes	7-5
7.1.2	Network of Primary and Secondary Busways (2010)	7-14
7.1.3	Cross-Section of Primary Busway	7-16
7.2.1	Bus Demand Distribution at Present	7-21
7.2.2	Bus Demand Distribution in the Future	7-21
7.2.3	Types of Public Transport Routes	7-23
7.2.4	Intra-city Bus Transfer Facilities and Inter-city Bus Terminals Development Plan	7-29
7.2.5	Conceptual Development Plan for Inter-Urban Terminal	7-30
7.2.6	Conceptual Development Plan for Public Transport Interchange Plaza	7-31
7.2.7	Conceptual Development Plan for Public Transport Square	7-32
7.2.8	Concept of Tianfu Square Multi-Modal Public Transport Terminal Development	7-33
7.3.1	Structure of Existing Bus Stop (1)	7-34
7.3.2	Structure of Existing Bus Stop (2)	7-34
7.3.3	Improvement Bus Stop Plan in Trunk Roads Without Dedicated Bicycle Lanes (Type-1)	7-37
7.3.4	Improvement Bus Stop Plan in Trunk Roads With Dedicated Bicycle Lanes (Type-2)	7-37
7.3.5	Location Bus Stops to be Improved	7-40
7.4.1	Bicycle Traffic Volume at Peak Hour	7-43
7.4.2	Width of Roads in City Center	7-48
7.4.3	Separation of Main Bicycle Lanes on Principal Main Lines	7-49
7.5.1	Grade-Separation with Different Purpose	7-52
7.5.2	Standard Structure of Overpasses for Bicycle Lanes	7-53
7.5.3	Signal Phasing at Intersections with Bus Lanes	7-54
7.5.4	Standard Structure of Intersections of Roads with Bus Lanes	7-55
7.5.5	One-way Road System in Urban City Center (Example)	7-57
7.5.6	Transit Mall Layout Plan (Example)	7-57
7.6.1	Left Turning Traffic Measures for Car and Bicycle	7-62
9.1.1	Master Plan for the Development and Improvement of Public Transport (2010)	9-5
9.2.1	Vehicle Operating Cost and Travel Time Cost by Speed	9-12
9.3.1	CO Emissions by Scenario	9-17
10.1.1	Bus Routes on Shudu Road (2000)	10-2
10.1.2	Bus Traffic Volume on Shudu Road	10-4
10.2.1	Traffic Volume on the Shudu Road (2000)	10-9
10.2.2	Traffic Volume on the Shudu Road (2010)	10-10
10.3.1	Project Outline	10-12
10.3.2	Typical Cross Section Type A	10-22
10.3.3	Typical Cross Section Type B	10-23
10.3.4	Selected Structure (Road-Crossing Underpass; East Intersection where Shudu Road and the 1st Ring Road Cross)	10-27
10.3.5	Pedestrian Bridge Structure (Typical)	10-28
10.3.6	Thickness of Top Slab	10-30
10.3.7	Thickness of Bottom Slab	10-30
10.3.8	Thickness of Side Wall	10-30
10.3.9	Cross Section of Box Culvert	10-31
10.3.10	Cross Section of Pedestrian Bridge	10-32
10.3.11	Location of Intersection on Shudu Road	10-33

10.3.12	Traffic Diagram for Bus and Other Vehicles.....	10-34
10.3.13	Basic Form of Traffic Signal Lamps at the Plane Crossings	10-35
10.3.14	Connecting Ways of Utilization of Lanes and Frontage Land.....	10-36
10.3.15	Location of Bicycle Park Lot Along the Zongfu Lu.....	10-38
10.3.16	Bus Stop Plan for Exclusive Bus Lane Type A	10-41
10.3.17	Bus Stop Plan for Exclusive Bus Lane Type B	10-42
10.4.1	Structure Drawing of Temporary Earth-Retaining	10-47
10.4.2	Construction Procedure Drawing (Phase-1)	10-48
10.4.3	Construction Procedure of Pedestrian Bridge.....	10-50
10.4.4	Project Cost Components Estimate in China	10-58
10.5.1	Procedure for the Evaluation of the Environmental Influences.....	10-69
10.5.2	Photo along the Pavement of Shudu Road.....	10-77
10.5.3	Photo along Shudu Road near Dongfeng Lu	10-77
10.5.4	Air and Noise Pollution Levels at Chengbai Company along Shudu Road	10-78
10.5.5	Density of Nitrogen Oxide and Sulfur Oxide a Chengbai Company along Shudu Road	10-78
10.5.6	Density of Carbon Monoxide at Chengbai along Shudu Road.....	10-79
10.5.7	Density of Total Suspended Particulate at Chengbai Company along Shudu Road	10-79
10.5.8	Parking Facility on Sidewalk	10-84
10.5.9	Waste Soil Piling on Sideawalk and Invasion of Construction Site to Sidewalk	10-84
10.5.10	Prototype Street Trees.....	10-85
10.5.11	Planting Trees on Separator of Bicycle and Car.....	10-85
10.5.12	Air Pollution in the Chengdu City	10-87
10.5.13	Estimated CO Emission Density	10-88
10.5.14	Trees to be Transplanted	10-91
10.5.15	Change in CO Emission Density on the Shudu Road (Existing, Operated in 2011 and Operated in 2019)	10-93
10.5.16	Change in CO Emission Density on the Shudu Road (Existing, Not Operated in 2011 and Operated in 2011)	10-94
10.5.17	Change in CO Emission Density on the Shudu Road (Existing, Operated in 2019 and Operated in 2019)	10-94
10.5.18	Change in CO Emission Density on the Zongfu Road (Existing, Not Operated in 2011 and Operated in 2011)	10-94
10.5.19	Change in CO Emission Density on the Zongfu Road (Existing, Not Operated in 2019 and Operated in 2019)	10-95
10.5.20	Change in CO Emission Density on the West Section of the Renmin Road (Existing, Not Operated in 2011 and Operated in 2011)	10-95
10.5.21	Change in CO Emission Density on the West Section of the Renmin Road (Existing, Not Operated in 2019 and Operated in 2019)	10-95
10.6.1	Benefit/Cost Stream of the East-West Primary Busway Project	10-100
11.2.1	Financial Indicators of the Affiliated Bus Companies.....	11-7
11.2.2	Bus Shares Estimated by the Modal Split Model	11-9
11.2.3	Total Bus Fare Revenue or Various Levels of Bus Fare.....	11-10
11.3.1	Framework for Bus Privatization.....	11-12
11.4.1	Structure of Financial Model	11-16
11.4.2	Trend of Accumulated Balance of New Bus Company	11-22
