11:45 - 13:00 2nd Session

Abstract:

The dramatic wide spread of broadband services in the world will be able to bring many new businesses and to create new industries.

However we will have serious “security problems” in our society along with the spread of broadband services.

More interesting fact is that these problems will also force us to create new businesses.

This talk focuses on what we should prepare for establishing e-Jordan and e-business successfully in the broadband age.

The highlight of this talk is to show and demonstrate the recent progress of internet gadgets.
