3. 第1回質問状に対する回答書

I. Organization and other related issues about TISI and EEI

(1) Organization and staff allocation

MINISTRY OF INDUSTRY (MOI)

Departments 1 Office of i

- 1. Office of Permanent Secretary
- 2. Dept. of Mineral Resources
- 3. Dept. of Industrial Works
- 4. Dept. of Industrial Promotion
- 5. The Office of Industrial Economics
- 6. THAI INDUSTRIAL STANDARDS INSTITUTE, TISI

Independent Institutes

- 1. Thailand Productivity Institute
- 2. Thai-German Institute
- 3. National Food Institute
- 4. Thailand Textile Institute
- 5. The Management System Certification Institute
- 6. Thailand Automotive Institute
- Institute of Small and Medium Enterprise Development
- 8. ELECTRICAL AND ELECTRONICS INSTITUTE, EEI

State Enterprises

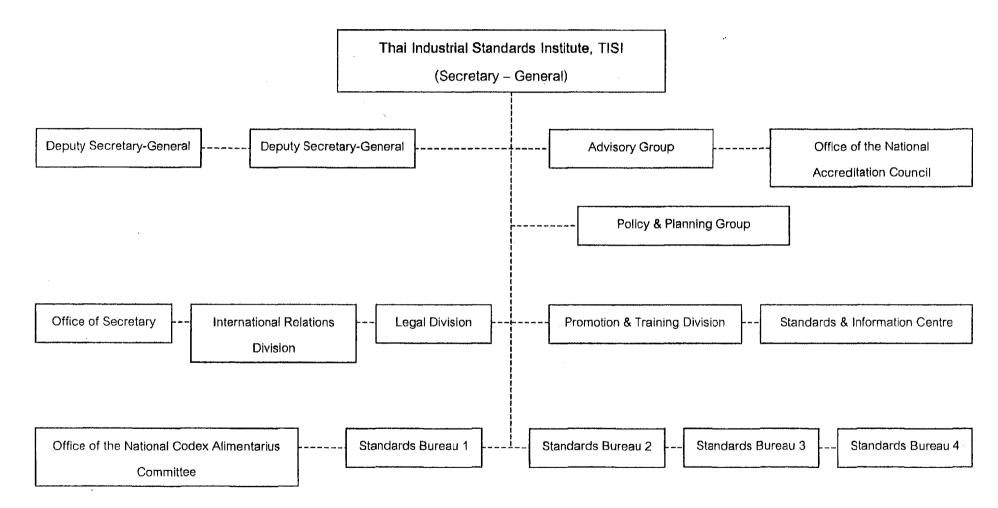

- The Industrial Estate
 Authority of Thailand
- 2. Narayana Phand Co.,Ltd
- Petroleum Authority of Thailand

Ministry of Industry consists of six departments, eight Institutes, and three state enterprises. TISI is one of the government departments and EEI is an independent and non-profit organization provisioned by the Industrial Development Foundation, Ministry of Industry.

In order to focus on the policy-making, budget planning and distributing and monitoring, the MOI had promoted EEI and other institutes, MOI now transfers some of its activities to those institutes for implementing and working closely to the industries.

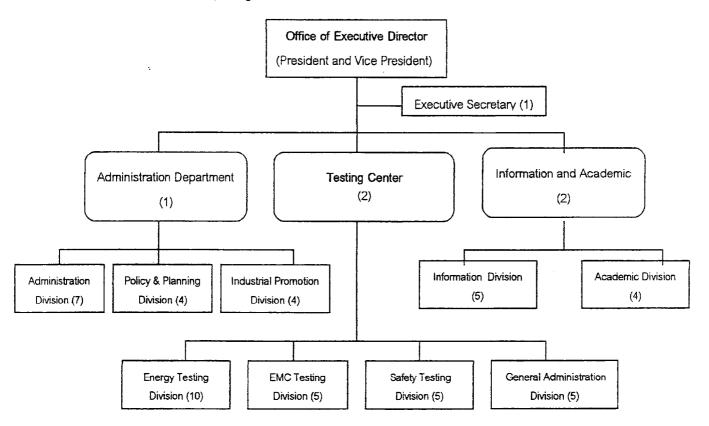

TISI is the national standards body for Thailand, established by virtue of the Industrial Product Standards Act B.E. 2511 (1968). According to the Act, the governing body for TISI is the Industrial Product Standards Council. The Council is responsible for policy making, sets the priority of standards to be prepared, recommends qualified for the Minister to appoint to technical committee, arbitrates and awards licenses under its certification scheme.

(a) Organization Chart of TISI

EEI was establishes by the MOI with the approval of the cabinet on 7 July 1998 in order to strengthen the competitiveness of Thai electrical and electronics industry in the international market.

(b) Organization Chart of EEI and Staff Allocation

() denotes number of staff

(c) Relations of EEI and TISI with other governmental organizations in Thailand

Not only the Ministry of Industry which EEI has closely cooperated, but also other government organizations, for example :-

Cooperating with BOI (Board of Investment) to facilitate the transaction process of importing raw materials for the manufacturers.

Coordinating with Foreign Trade Department, Ministry of Commerce, to organized the seminar and analytical study on the impact of EU Directives, Waste from Electrical and Electronics Equipment (WEEE), on the Electrical and Electronics industry.

(d) Degree of corporation (denationalization) of EEI

EEI has its own mission to the development of electrical and electronics industry.

The government policy has been implementing in addition to EEI's policy, which its partly supported. In order to achieve the principal mission of the institute, EEI has good coordination between private sectors and the government as depicted in the following diagram.

Private Sector Private Sector Private Sector Private Sector Public Interest Activities (eg. testing And information) Government Coordination Coordination

Private Sector and the Government Under EEI Umbrella

(e) Present positions and activities of the former counterpart personnel of the Project (Annex 1)

Due to the Project Type Technical Cooperation of JICA, TISI Testing Center had terminated before the Testing Center had been transferred to EEI. As a result, the information of the former counterpart personnel is not available.

(2) Function, placement and activities

(a) Function and placement of EEI in Thailand

EEI is managed and operated under the provision of the EEI Board, chaired by the MOI Permanent Secretary, and representatives of the government sector the private sector and distinguished experts as members of the committee. The function and responsibilities of EEI initially set by the board are as follows:-

- Providing quality, safety and environmental testing for electrical and electronic products.
- 2. Providing information on production technology, and trade.
- Coordinating and cooperates with the government and private sectors at domestic and international levels to develop the industry and its related businesses as well as to improve knowledge and skills of the workforce.
- 4. Conducting relevant studies in order to make recommendations on policies, plan and measures for developing and solving problems on the industry.

(b) Placement of EEI in TISI

The EEI executes testing and certification services based on Thai Industrial Standards Act 1968. These activities were directly transferred from TISI since November 1999. The activities cover the following areas.

- Safety testing of electrical and electronics products and parts based on TISI Standards
- 2. Compulsory standards testing required by TISI
- Voluntary standards test. The EEI conducts testing services for voluntary standards to satisfy the demand from private sector for their export, import and manufacturing.
- CE-Marking Test. The EEI conduct the testing services based on EU
 Directive, which are essential factors for CE-Marking.

EEI arrange mutual recognition agreements (MRA) on electrical and electronics products and proposes the national standards of electrical and electronics products through TISI.

(c) Function of EEI in national development plan of Thailand

In January 1998, the Government of Thailand has announced its Cabinet approval of the "Industrial Restructuring Plan, IRP" proposed by the MOI. The purpose of IRP was to cope with the Thai's economy recession through the improvement of Thai's international competitiveness and export expansion, and the "Concept for Institutional Building" was one of the means to execute IRP's action plans. EEI had been executed the "Supplier Development Program" and was assigned to look into the "International Procurement Office Program (IPO)".

(d) Basic guidelines of activities of EEI and TISI Basic guidelines of activities of EEI

- Policy Making and Planning Support
- Industrial Promotion
- Transaction Services
- Testing and Calibration
- Information Services
- Academic Services

Activities of TISI

- Standards Development
- Certification of Conformity
- Laboratory Accreditation
- International Cooperation
- Standardization Promotion
- Standard Information Service

- (e) Relations with other bi-lateral and multilateral aid agencies, which had assisted, and will assist EEI
 - The government of Australia had approved a technical cooperation in the field of Energy Saving by dispatching the experts to EEI in the year 2001.
 - With cooperation of the Bureau of Supporting Industries Development (BSID), Department of Industrial Promotion, the Government of Federal Republic of Germany shall establish of Joint Information Center (JIC) in order to promote the business development service networks for SME in Thailand. EEI is in the JIC working group.

(3) Budgetary condition

For five years starting 1959, the EEI will receive a total of 100 million bahts. This five-years budget was considered to be an initial setting-up budget. Afterward, the EEI can ask for supporting budget to compensate their additional investment and operational cost.

(4) Activities

- (a) Testing Activities (see Annex 4)
- (b) Training Courses (see Annex 5-1, Annex 5-2)
- (c) Counseling Services (see Annex 6)
- (d) Other Main Activities (see Annex 7)

Il Contents of the Aftercare Program

- (1) Taking additional care of the machinery and equipment already provided by the Government of Japan
 - (a) Name, specification, maker, date of provision, and present condition (see Annex 8)
 - (b) Necessity of spare parts and consumables to be provided by JICA, and availability of spare parts and consumables in Thailand and the quotations (see Annex 9)
 - (c) Necessity of repairs by Japanese experts (see Annex 10)
- (2) Supplementary technical cooperation within the scope of R/D
 - (a) The themes within the scope of R/D which need supplementary technical cooperation by the Japanese short-term experts and detail contents of the task for the said experts

(see Annex 11)

- (b) Name, quantity, specification, maker, reason of necessity, availability in Thailand and quotation of the machinery and equipment needed to be provided in order to transfer the technology on the said themes (see Annex 12)
- (c) Plan for assignment of the Thai counterpart personnel for the Aftercare Programme; Number, name and age, sex, their present position and their qualification (see Annex 13)

ANNEX 1 (Data is not available)

BUDGETARY CONDITION OF FTU FOR THE IMPLEMENTATION THE AFTERCARE PROGRAMME

a. Settlement Accounts from 1993 Thai fiscal year to 1997
 Investment for Testing Equipment

Unit: baht (million)

| | 1995 | 1996 | 1997 | 1998 | 1999 | 2000 |
|----------------|------|------|------|------|------|------|
| Budget of TISI | N/A | N/A | N/A | N/A | N/A | N/A |
| Budget of EEI | - | - | - | - | 6.1 | 7.8 |

b. Budget from 2001 Thai fiscal year to 2003

Unit: baht (million)

| | 2001 | 2002 | 2003 |
|----------------|------|------|------|
| Budget of TISI | N/A | N/A | N/A |
| Budget of EEI | 3.5 | 1.5 | - |

- c. Perspective of defrayal of local cost expenses for the implementation of the Aftercare Programme by EEI
 - (a) expenses for the internal transportation for the machinery and equipment to be provided by Japan Baht: 200,000
 - (b) expenses for the supply of the machinery, the equipment and other materials necessary for the Aftercare Programme other than provided by Japan.

Baht: 300,000

(c) All the other running expenses for the Aftercare Programme

Baht: 200,000

| 2. Impact Tester | 1 | set |
| 3. Go/Contact Gauge | 1 | set |
| 4. Grip for Torque Test of Incandescent Lamps | 1 | set |
| 5. Glow-wire Test Apparatus | 1 | set |
| 6. Fault Condition Test Apparatus | 1 | set |
| | | |
| Supplementary Equipment ปีงบประมาณ 2537 | | |
| Quartz Thermometer | 1 | set |
| 1. Qualitz illermometer | , | 361 |
| 2. Quartz Probe | 1 | set |
| 3. Anemometr | 1 | set |
| 4. Digital Manometer | 1 | set |
| 5. Water Bath | 1 | set |
| 6. Ventilated Psychrometer | 1 | set |

NECESSITY OF REPAIR, SPARE PARTS AND CONSUMABLES OF MACHINERY AND EQUIPMENT PROVIDED BY JAPAN

| Priority (*1) | Name | Necessity of repair(*2) and the detail | Necessity of spare parts and consumables (*2) and the detail | Availability of spare parts and onsumables In Thailand (*3) and the quotations | REMARKS(*4) |
|---------------|---------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|--------------------------------------------------------------|--------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|
| 1 | Photometric integrating sphere (Testing equipment in dark room - TOSHIBA) | A Up-grading control system Moving and reinstalling to new laboratory | | | |
| 2 | Colorimetry (Testing equipment in dark room - TOSHIBA) | A Repairing of measuring sensor Up-grading control system Moving and reinstalling to new laboratory | A Measuring sensor | В | |
| 3 | Photometric bench (Testing equipment in dark room - TOSHIBA) | A Moving and reinstalling to new laboratory | A Standard lamps of intensity | В | en in de la companya |
| 4 | Walk-in temperature and humidity chamber | B Moving and reinstalling to new laboratory | В | В | |

(*1) Please clarify the priority among the items by putting numbers (No.1 as the highest priority)

| (*2) | A: Must | (*3) | A: Available | (*4) | Any relation with supplementary |
|------|----------------|------|------------------|------|--------------------------------------------|
| | B: Necessary | | B: Not available | | technical cooperation (Annex 11, Annex 12) |
| | C: If possible | | | | |

| Priority (*1) | Name | Necessity of repair(*2) and the detail | Necessity of spare parts and consumables (*2) and the detail | Availability of spare parts and onsumables In Thalland (*3) and the quotations | REMARKS(*4) |
|---------------|--------------------------------------------------------------------|-------------------------------------------------------|--------------------------------------------------------------|--------------------------------------------------------------------------------|-------------|
| 5 | Calorimeter (Testing equipment for room air-conditioner - OHNISHI) | B Up-grading control system Reinstalling thermocouple | B Flow meter Humidifier Measuring sensor | В | |

(*1) Please clarify the priority among the items by putting numbers (No.1 as the highest priority)

| (| *2) A: | Must | (*3) | A: Available | (*4) | Any relation with supplementary | 1 |
|---|--------|-------------|------|------------------|------|--------------------------------------------|---|
| | В: | Necessary | | B: Not available | | technical cooperation (Annex 11, Annex 12) | |
| | C: | If possible | | | | | l |

| Priority(*1) | Number of machinery and | Details of Expert's role (repair or/and maIntenance) | Period of Dispatch of Japanese Expert | | Remarks | |
|--------------|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|----------|-----------------|--|
| | equipment(*2) | | From | То | Period (months) | |
| 1 | 1, 2, and 3 | Remove and reinstall the equipment in Dark Room (photometric integrating sphere, colorimetry and photometric bench) to new laboratory Repair the equipment Up-grade control system Provide training on the test system Provide maintenance techniques | April 2001 | May 2001 | | |
| 2 | 4 | Remove and reinstall walk-in temperature and humidity chamber to new laboratory | April 2001 | May 2001 | 1 | |

^(*1) Please clarify the priority among the items by putting numbers (no.1 as the highest priority)

^(*2) Please correspond to the machinery and equipment number of ANNEX 9

THEME No. __1_.

- 1. Field of the Japanese expert (Theme field): Lighting and luminaires testing.
- 2. Period of Training: From <u>April 2001</u> to <u>June 2001</u> (<u>3</u> months)
- 3. Detailed Subjects of Guidance by Experts:
 - 3.1 Testing according to IEC 60598 (Luminaires)
 - 3.2 Testing according to IEC 60928 (A.C. supplied electronic ballasts for tubular fluorescent lamps)
 - 3.3 Providing advice on test results and problems analysis
- 4. Counterpart:
 - 4.1 Mr. Teera Rimpirangsi
 - 4.2 Mr. Chairat Tuamprasert
 - 4.3 Mr. Danai Sattabut
 - 4.4 Mr. Sarawoot Singto
- 5. Qualification required to the Expert:
 - 5.1 Education : Bachelor degree in electrical engineering ⊀√€
 - 5.2 Experience: at least 10 years experience on above field
 - 5.3 Language : good command in English

ANNEX 11 THEME No. 2.

- 1. Field of the Japanese expert (Theme field): Safety test for household electrical appliance.
- 2. Period of Training: From <u>June 2001</u> to <u>August 2001</u> (<u>3</u> months)
- 3. Detailed Subjects of Guidance by Experts:
 - 3.1 Testing according to IEC 60335-1
 - 3.2 Testing according to IEC 60335-2-x
 - 3.3 Providing advice on test results and problems analysis
- 4. Counterpart:
 - 4.1 Mr. Witee Srimongkol
 - 4.2 Mr. Narin Phansantieh
 - 4.3 Mr. Theerawat Wiwekwin
 - 4.4 Mr. Pijit Homsombat
- 5. Qualification required to the Expert:
 - 5.1 Education : Bachelor degree in electrical engineering
 - 5.2 Experience : at least 10 years experience on above field
 - 5.3 Language : good command in English

THEME No. 3.

- 1. Field of the Japanese expert (Theme field): Safety test for electronics and IT appliance.
- 2. Period of Training: From October 2001 to December 2001 (3 months)
- 3. Detailed Subjects of Guidance by Experts:
 - 3.1 Testing according to IEC 60065
 - 3.2 Testing according to IEC 60950
 - 3.3 Providing advice on test results and problems analysis
- 4. Counterpart:
 - 4.1 Ms. Vimolpun Ruangsri
 - 4.2 Mr. Channarong Pattamasing
 - 4.3 Mr. Pakom Poompan
- 5. Qualification required to the Expert:
 - 5.1 Education : Bachelor degree in electrical engineering
 - 5.2 Experience: at least 10 years experience on above field
 - 5.3 Language : good command in English

THEME No. 4.

- 1. Field of the Japanese expert (Theme field): <u>EMC testing</u>.
- 2. Period of Training: From May 2001 to July 2001 (3 months)
- 3. Detailed Subjects of Guidance by Experts:
 - 3.1 Testing according to CISPR 13
 - 3.2 Testing according to IEC 61000-4-x
 - 3.3 Providing advice on test results and problems analysis
- 4. Counterpart:
 - 4.1 Mr. Narat Rujirat
 - 4.2 Ms. Pompimon Ratanawichien
 - 4.3 Mr. Thossaphom Udomsinsirikul
 - 4.4 Mr. Pudit Palakawong
- 5. Qualification required to the Expert:
 - 5.1 Education : Bachelor degree in electrical engineering
 - 5.2 Experience: at least 10 years experience on above field
 - 5.3 Language : good command in English

ANNEX 12 1/5 LIST OF THE MACHINERY AND EQUIPMENT NEEDED TO BE PROVIDED ON THE THEME No. 2 ____ Name of machinery and equipment: Thermostat and temperature limiters test apparatus. 1. (Number of Priority: ___1__) 2. Quantity : 1 3. Specification According to IEC 60335-1 and IEC 60730 Maker (Price unit JP ¥ 1,000) 4. - (approximately JP \pm 3,000,000)

To be able to do complete safety test for household electrical product according to IEC 60335

Availability in Thailand and the quotation

Reasons of necessity

5.

6.

LIST OF THE MACHINERY AND EQUIPMENT NEEDED TO BE PROVIDED ON THE THEME

| No | 2. |
|----|-------------------------------------------------------------------------------------------------------|
| 1. | Name of machinery and equipment: <u>Automatic controller test apparatus</u> . (Number of Priority:2) |
| 2. | Quantity |
| | 1 |
| 3. | Specification |
| | According to IEC 60335-1 and IEC 60730 |
| 4. | Maker (Price unit JP ¥ 1,000) |
| | - (approximately JP ¥ 3,000,000) |
| 5. | Reasons of necessity |
| | To be able to do complete safety test for household electrical product according to IEC 60335 |
| S. | Availability in Thailand and the quotation |

LIST OF THE MACHINERY AND EQUIPMENT NEEDED TO BE PROVIDED ON THE THEME

| No | 2 |
|----|---------------------------------------------------------------------------------------------------------------------|
| 1. | Name of machinery and equipment:Switch test apparatus (Number of Priority:3) |
| 2. | Quantity 1 |
| 3. | Specification According to IEC 60335-1 and IEC 60328 |
| 4. | Maker (Price unit JP ¥ 1,000) - (approximately JP ¥ 3,000,000) |
| 5. | Reasons of necessity To be able to do complete safety test for household electrical product according to IEC 60335 |
| 6. | Availability in Thailand and the quotation |
