## Description of microscopic observation on thin sections

### MJVD-17-11.90 : REO ore

The sample is REO ore, containing calcite (>60%), bastnaesite(>15%), synchysite(>3%), barite(<10%), fluorite(<10%) and apatite(<3%). Bastnaesite and synchysite are very fine grained. Rare Earth minerals are between calcite crystals and along fractures.

#### MJVD-17-88.70 : Fluorite and Barite ore

The sample is fluorite and barite ore, containing fluorite(>50%), calcite(>30%), barite (>10%), quartz (<5%) and REO minerals(<1%).

### MJVD-19-24.65 : Weathered limestone with barite and REO ore

The sample is weathered and altered limestone (brecciate). The major rock forming minerals are calcite (>60%), barite (20%), K-feldspar (5%), fluorite(<5%), and phlogopite.

## MJVD-19-87.25 : Barite ore

The sample is barite ore, containing barite (>80%), calcite (>15%), and fluorite. Calcite veinlets (<3mm).

#### MJVD-20-116.70 : REO ore (synchysite and bastnaesite)

The sample is Rare Earth Ore, containing calcite (>30%), barite (>20%), synchysite (>15%), fluorite (15%), and bastnaesite (<5%). Synchysite is observed needle like shaped.

#### MJVD-21-115.60 : REO ore (bastnaesite and synchysite)

The sample is Rare Earth Ore, containing bastnaesite (>30%), calcite (>30%), barite (>15%), fluorite (<10%) synchysite (<5mm), and quartz (<5%). Bastnaesite is observed very fine grained. Fluorite veinlet width is 0.8mm.

## MJVD-23-96.55 : Marble with barite and fluorite

The sample is mineralized marble by barite and fluorite, containing fine grained calcite (>85%), barite (>10%), fluorite (5%), pyrite (<1%). Calcite veinlet width is 2.5mm and fluorite veinlets are <3mm..

## MJVD-20-119.40 : Marble

The sample is fine grained Marble disseminated by pyrite, containing calcite (>85%), fluorite (<5%), barite (<5%), pyrite (<5%), and REO (<1%)

## MJVD-23-96.05 : Fluorite ore

The sample is fluorite ore, containing fluorite (>60%), calcite (>30%), barite (<5%), pyrite (<2%), and sphalerite(<2%). This sample is disseminated sulfides.

# MJVD-23-99.60 : Fluorite and barite ore

The sample is fluorite and barite ore, containing calcite (>60%), fluorite (>20%), barite (>10%), apatite (<2%), pyrite(<1%), and phlogopite(<1%).
