

**CHAPTER 12**

**PROPOSED PRIORITY PROJECTS**

## 12 PRIORITY PROJECTS

According to the strategies which developed based on the current situation and problems and needs assessment to achieve the set objectives, the team proposes the several projects for the implementation by the government and donors/NGOs.<sup>1</sup>

### 12.1 PROJECT FOR IMPROVEMENT OF ACCESS AND QUALITY OF RCH SERVICES

#### 12.1.1 Project Purpose

The project purpose is to improve the RCH coverage and quality of services through management capacity building, health and communication skill development, referral service establishment, provision of equipment and upgrading/construction of health facilities.

#### 12.1.2 Project Location

##### (1) Year 1

- Damoh District – Recommended pilot area: Hatta Block
- Tikamgarh District – Recommended pilot area: Baldevgarh Block

##### (2) Year 2 ~ 8

After an evaluation of the activities and results in the first year, area for implementation will be extended to two to three blocks in the second year. If results of evaluation on the project for two years are positive, the project area will be extended to cover all blocks of the entire two districts.

- Damoh District – all blocks
- Tikamgarh District – all blocks

#### 12.1.3 Target Beneficiaries

##### (1) Year 1

- **Direct beneficiaries:** the women of reproductive age who reside in Damoh and Tikamgarh district, and their children, particularly neonates.
- **Indirect beneficiaries:** the families and communities of the direct beneficiaries.

---

<sup>1</sup> "Estimated Project Cost" in this chapter includes project activity costs such as cost for training, employment of experts, cost for outsourcing for developing IEC material, initial cost for equipment and facilities, etc., which are expected to be covered by external funds (World Bank Group, UN agencies and bilateral donors) and/or Government funds. It does not include salaries for Indian staff and maintenance cost for equipment and facilities.

## **(2) Year 2 ~ 8**

- **Direct beneficiaries:** the women of reproductive age and their children in Damon and Tikamgarh Districts.
- **Indirect beneficiaries:** the families and communities of the direct beneficiaries.

### **12.1.4 Project Duration**

Eight (5) years in total;

- (1) Preparation and pilot phase in one demonstration block per district: the first year
- (2) Expansion phase 1 in two to three blocks per district: the second years
- (3) Expansion phase 2 in the remaining blocks: the third years
- (4) Continuous phase of full implementation in the entire district: the forth and fifth years
- (5) Adding project sub-components under the project to achieve the master plan objectives in the sixth and eight years

### **12.1.5 Implementation Agency / Body**

District level: District Department of Public Health & Family Welfare (DOHFW)

State level: Department of Public Health & Family Welfare (DOHFW)

### **12.1.6 Project Components and Activities**

The Project Activities fall under four major sub-components.

#### **(1) Project preparation**

The first step in project activities is to establish a coordinating committee in each district, composed of donor, district, state, and block stakeholders, to oversee and support the project.

This committee will be responsible for assuring smooth implementation of the project and will monitor the quality of its implementation on an on-going basis. Next a reassessment must be conducted to ascertain the status of the target health facilities and infrastructure, equipment, skills and recent training, communication and management. This reassessment is necessary because of the time elapsed between the original project design and its implementation.

#### **(2) Strengthening of Management Capacity**

- 1) Training in management
- 2) Establishment of supervision system and training in supervision

- 3) Referral system establishment and operation
- 4) Improvement of HMIS and training in HMIS
- 5) Improvement of drug supply logistics
- 6) Establishment of collaboration and coordination mechanism with health committees and Panchayat and set MCH day (instead of immunization day)
- 7) Strengthening of RKS
- 8) Improvement of blood supply system

### **(3) Improvement of competency of health staff and health related field workers**

- 1) Training of trainers (District Hospital doctors/nurses, district training officers/district health officers, BEE)
- 2) *Training of health staff (skill development) – Doctors and LHVs/ANMs/MPWs*
  - Training in ANC, postnatal care, EOC and EmOC, danger signs in pregnant women
  - Training in family planning and counselling and interpersonal communication skill
  - Training in nutrition and micro-nutrients
  - Training in child health, including danger signs in newborn, ARI, diarrhoea
- 3) Training of Dai (skill development)
  - Training in safe delivery, breast feeding, danger signs in pregnant women and newborn
- 4) Training of other health related workers – Anganwadi workers and JSRs
  - Training in family planning and counselling and interpersonal communication skill
  - Training in danger signs in pregnant women and new born, and nutrition

### **(4) Improvement of RCH Service Delivery System**

- 1) Review of roles and functions of each service level
- 2) Improvement of health facilities
  - SC improvement
    - Assessment of location of SCs, reassignment where needed and catchment area particularly of SCs without a building
    - Redesign of SCs to improve privacy in exam room, construction of new SCs, & renovation of old SCs
  - Renovation of CHC, PHC and District Hospital
- 3) Improvement of mobility of field workers
  - Testing of different types of transport for MPWs to learn what works
- 4) Referral system improvement

- Establishment of referral management system
  - Establishment of transport system and provision of an ambulance at CHC
  - Establishment of communication system and provision radio/cell phone to all CHCs, PHCs and SCs
- 5) Provision of equipment and supplies
- Provision of equipment: each level of health facilities and training centre
  - Provision of medicines and medical supplies: each level of health facilities

Component and Activities	District level	Block level*	Year								
			1	2	3	4	5	6	7	8	
(1) Project management											
1) Establishment and operation of Coordinating Committee	X	X	X	x	x	x	x	x	x	x	x
2) Reassessment of the situation	x	X	X		X				X		
(2) Strengthening of health administrative management capacity											
1) OJT on management skills	X	X	X	X	X	X	X	X	X	X	X
2) Establishment of supervision system / training	X	X	X	X	X						
3) Establishment of referral system and its operation	x	X	X	X	X	X	X	x	x	x	
4) Improvement of HMIS	X	X	x	x	x	X	X	X	X	X	X
5) Improvement of drug supply logistics	X	x	x	x	x	X	X	X	x	x	
6) Coordination with Health Committee & Panchayat and setting MCH day	X	X	X	X	X	X	X	x	x	x	
7) Strengthening of RKS (Community participation and user fee system)	X	X				x	x	X	X	X	
8) Establishment of blood supply system	X	X				x	x	X	X	X	
(3) Improvement of competency of health staff											
1) Improvement of syllabus/training module *	X	x	X	X					X	x	
2) Training of trainers	X	x	X	X		X	x	X	X	x	
3)-5) Skill development training	x	X	X	X	X	x	x	X	X	x	x
(4) Improvement of RCH service delivery system											
1) Review of roles and functions of each service level	X	x	X			X					
2) Renovation of health facilities											
SC		X		X	X	X	X	X	X	X	X
CHC		X			X		X		X		
S-PHC and District Hospital		X					X	X	X	X	
3) Improvement of mobility of field workers		X	X	X	X					X	
4) Referral system improvement		X	X	X	X	X	X	x	x	x	
5) Provision of equipment	X		X		X		X		X		
6) Provision of medicines and medical supplies	X		X	X	X	X	X	X	X	X	X

### **12.1.7 Project Outputs / Inputs**

#### **(1) Expected Outputs**

- Improved RCH service system in which functioning FRU is the core of the system and service delivery
- More efficient and effective RCH service delivery through better management
- Improved staff reproductive and child health skills that are critical for a fully functioning FRU
- Improved coverage and functioning of the SCs
- Improved coverage and functioning of the sector-level PHCs

#### **(2) Project inputs**

- Training and education for improved management and skill development
- Technical assistance for development of training modules and materials
- Technical assistance for system development
- Provision of medical equipment and furniture
- Provision of drugs and medical supplies
- Construction and renovation of health facilities

### **12.1.8 Project Management Issues**

Linkages of several kinds are crucial to the success of this project:

- With the district hospital
- With dais
- With community institutions and individuals who are gatekeepers between pregnant women and the CHC/PHC/SC.
- In Tikamgarh with the Community Health Boards and Block Advisory Committee supported by UNICEF
- In Tikamgarh with World Bank Project to strengthen women's development groups.

### **12.1.9 Estimated Project Cost**

About US\$ 33,480,000

## **12.2 PROJECT FOR RCH IMPROVEMENT THROUGH STRENGTHENING BCC/IEC LINKED WITH GENDER AWARENESS CAMPAIGN PROGRAMME**

### **12.2.1 Project Purpose**

The purpose of the project is to create the context for positive behaviour change in several identified problem RCH areas including social gender issues through a series of linked BCC interventions in the project area.

### **12.2.2 Project Location**

- State level: IEC Bureau
- District level: Damoh District  
Tikamgarh District

### **12.2.3 Target Beneficiaries**

- The families and communities in Damoh and Tikamgarh districts.

### **12.2.4 Project Duration**

Eight (5) years in total;

### **12.2.5 Implementation Agency / Body**

- State level: IEC Bureau, Department of Public Health & Family Welfare
- District level: District Department of Public Health & Family Welfare

### **12.2.6 Project Components and Activities**

The three major components of the BCC Strategy implementation for this project are: 1) BCC Campaign Preparation including Gender Awareness Campaign, 2) Mass Media/Materials' Development and 3) Social Mobilisation and Community Based Campaign.

All three components will involve the long-term project co-ordinator, based in Damoh District and state IEC staff. Counterparts for the Government of India (GOI) will be assigned from the State IEC Bureau and the District IEC Bureau. State IEC Bureau participation will focus primarily on the second component which District IEC Bureau participation will focus on the first and third components. Short-term technical assistance for the first and the third components will be provided to the project as indicated in the timeline. The second component will be managed primarily by the long-term project co-ordinator and the implementation of this component will be sub-contracted to one or more advertising agencies.

### **(1) BCC Campaign Preparation**

- 1) Training in RH Competency, RH BCC and IEC and advocacy (State, District and Block level)
- 2) Refining of problems and conducting assessment
- 3) Development of BCC/IEC strategies
- 4) Development of Media/Social Mobilisation work plan
- 5) Development of Advocacy work plan
- 6) Development of Gender Awareness Tools and Materials For Training and Campaign
- 7) Establishment of monitoring and evaluation system

### **(2) Mass Media/Materials' Development**

- 1) Assess, identify and contract local design and advertising resources
- 2) Conducting field assessment
- 3) Development of BCC/IEC materials
- 4) Launch of district mass media campaign

### **(3) Social Mobilisation**

- 1) Conducting baseline studies/Behavioural surveillance survey
- 2) *Identification and contracting resource to conduct social mobilisation training*
- 3) Selection and training of social mobilizer in blocks
- 4) Launch of block social mobilization
- 5) Community Based Awareness Camps organized by local officers with full participation of all concerned CBOs and Panchayats

### **<Problem Area Prioritisation>**

Problem areas below are prioritised in terms of the importance of the intervention for overall RH improvement and in terms of the problem area can be effectively addressed through BCC in the study areas.

- Family Planning Spacing Options' Promotion
- RTI/STI Awareness Raising
- PHC Perinatal Campaign and ANM Role Enhancement
- Postponement of Marriage
- De-emphasis of Dowry and Reduction of post-marital Harassment
- Reduction of Boy Child Preferences
- Enhancing Women's Equality from Birth to Death
- Increasing Girls' School Enrolment and Retention
- Postpartum Care Promotion and Awareness Raising

- Health Facility Promotion and Increased Service Demand
- Women's and Children's Nutrition

### **12.2.7 Project Outputs / Inputs**

#### **(1) Expected Outputs**

- Increased use of temporary family planning methods
- Improved ability of clients to recognise symptoms of some RTIs/STIs
- Higher level of registrations by women for postpartum care
- Greater BCC skills among IEC specialists at district level and below
- Increased contacts between ANMs and their clients
- Women's later marriage age
- Higher school enrolment and retention of girls
- Increased number of perinatal visits
- Higher levels of contact among members of Village Health Committees
- Increased number participation of Gender Awareness Camps

#### **(2) Project inputs**

- Long-term experts
- IEC equipment
- Contract out for developing IEC materials
- Technical inputs for trainings
- Fund for holding workshops and meetings

### **12.2.8 Project Management Issues**

Linkages of several kinds are crucial to the success of this project:

- With GOI IEC actors especially at the state, district and village levels.
- With frontline service providers
- With ANMs
- With Village Health Committees
- With community stakeholders and gatekeepers
- With donors and NGOs which have been active in social mobilisation, such as UNICEF, Samarthan and CARE
- With the proposed project of "Project for RCH Improvement through Community Based Activities"
- With PRIs for Gender Awareness Camps
- With the Educational Committee and Institutions

### **12.2.9 Estimated Project Cost**

About US\$ 3,300,000

## **12.3 PROJECT FOR RCH IMPROVEMENT THROUGH COMMUNITY BASED ACTIVITIES**

### **12.3.1 Project Purpose**

The purpose of the project is to improve RCH status of population by increase of access and community participate in RCH services through revitalization of village health committee.

### **12.3.2 Project Location**

- Damoh District
- Tikamgarh District

### **12.3.3 Target Beneficiaries**

- **Direct beneficiaries:** village health committee members and the women of reproductive age who reside in Damoh and Tikamgarh districts.
- **Indirect beneficiaries:** the families and communities of the direct beneficiaries.

### **12.3.4 Project Duration**

Three (5) years

### **12.3.5 Implementation Agency / Body**

- Offices of Block Medical Officer of Tikamgarh District
- Offices of Block Medical Officer of District Damoh
- with support from District Department of Public Health & Family Welfare (DOHFW)

### **12.3.6 Project Components and Activities**

The Project Activities fall under four major sub-components.

#### **(1) Establishment or Revitalization of Village Health Committee**

- 1) Defining roles and function of village health committee
- 2) Selection of village health committee members
- 3) Mobilization of community group for collaboration with village health committee activities
- 4) Training of Panchayat member, village health committee member, and community

group leaders in RCH, RCH programme and micro-planning

**(2) Establishment of Coordination Mechanism for Health Workers, Other Health Related Field Workers and Village Health Committee**

- 1) Establishment of village health worker team and conducting joint training
- 2) Establishment of SC management team consisting of representatives of village health committee and health workers
- 3) Establishment of MCH day per month in every village

**(3) Raising Awareness of RCH and RCH services and Demand Creation**

- 1) Conducting regular village health meeting

**12.3.7 Project Outputs / Inputs**

**(1) Expected Outputs**

- Functioning village health committee
- Increased participation of community in operation and management of SC
- Operation of MCH day by community with support of health workers
- Increased participation of community in micro-planning and assessment of their RCH status and RCH programme

**(2) Inputs**

- Technical assistant for training and education of Panchayat members and community group leaders
- Technical assistant for joint training of field health workers
- Provision of IEC materials
- Fund for holding workshops and meetings in the villages

**12.3.8 Project Management Issues**

Linkages of several kinds are crucial to the success of this project:

- Close coordination with the proposed project of "RCH Improvement through Strengthening BCC/IEC linked With Gender Awareness Campaign"
- Close coordination with the Community Health Boards and Block Advisory Committee supported by UNICEF In Tikamgarh
- With World Bank Project to strengthen women's development groups in Tikamgarh

**12.3.9 Estimated Project Cost**

About US\$ 1,100,000

## **12.4 PROJECT OF SOCIAL MARKETING AND FAMILY LIFE EDUCATION FOR ADOLESCENT**

### **12.4.1 Project Purpose**

The objective of the project is to improve the level of sexual and reproductive health services and family planning acceptance with particular emphasis on younger acceptors through behaviour change communication, social marketing, and advocacy.

A secondary objective of the project will be to enable adolescents and youth to make positive behaviour changes to deal effectively with the demands and challenges of their everyday life.

### **12.4.2 Project Location**

Hatta block, Damoh District

### **12.4.3 Target Beneficiaries**

- **Direct beneficiaries:** the women and adolescents of reproductive age who reside in Damoh District.
- **Indirect beneficiaries:** the families and communities of the direct beneficiaries.

### **12.4.4 Project Duration**

Three (3) years

### **12.4.5 Implementation Agency / Body**

NGO (FPAI (Family Planning Association of India) has an interest in implementation of the project, if the fund will be provided.)

### **12.4.6 Project Components and Activities**

#### **(1) Project preparation**

- 1) Conducting a formative research
- 2) Obtaining of consensus of key stake holders
- 3) Development communication design

#### **(2) Family Life Education and BCC**

- 1) Development of training aides
- 2) Orientation of Master Trainers in Family Life Education and BCC

- 3) Formation of peer groups and orientation
- 4) Establishment of adolescent and youth counselling centres
- 5) Capacity building of service providers

### **(3) Social Marketing**

- 1) Identification and orientation of Link Persons
- 2) Awareness programme for the Community
- 3) Develop teams of Community Based Distributors (CBDs)
- 4) Programme for service providers for attitudinal change
- 5) Procurement of contraceptives and health items

### **(4) Sensitisation and Coordination for Village Health Committees (VHCs)**

- 1) Conducting sensitisation orientation and workshops for VHCs
- 2) Coordination programmes of VHCs

\*\* Monitoring and evaluation of the project will be conducted through the project.

## **12.4.7 Project Outputs / Inputs**

### **(1) Expected Outputs**

- Capacity building of service providers for functional competence in Behaviour Change Communication in reproductive health and FP.
- Adolescents and youth will be covered through peer groups of boys & girls and equip them with knowledge and skills in Family Life Education, both in terms of practice as well as in performing the role of peer groups.
- Creating consistent acceptors of family planning services by providing FP services including awareness generation, counselling and FP products.
- Capacity building of village health committees towards their roles in bringing about behavioural change outcomes through community mobilisation.

### **(2) Inputs**

Fund for NGO

## **12.4.8 Project Management Issues**

- Linkage with Panchayat and Health Committees at higher level (Gram and Block level)
- Close coordination with the proposed project of "RCH Improvement through Strengthening BCC/IEC"

#### **12.4.9 Estimated Project Cost**

About Rs. 32,000,000 (about US\$ 670,000)

### **12.5 LIFE ENVIRONMENT DEVELOPMENT PROJECT FOR RURAL WOMEN**

#### **12.5.1 Project Purpose**

Project purpose is to improve women's quality of life through;

- Reducing women's workload by introduction of ecological friendly bio-gas technology
- Increasing intake of nutritious food by introduction of kitchen garden

#### **12.5.2 Project Location**

- Damoh District
- Tikamgarh District

#### **12.5.3 Target Beneficiaries**

- **Direct beneficiaries:** the women of reproductive age who reside in Damoh and Tikamgarh districts and their children.
- **Indirect beneficiaries:** the families and communities of the direct beneficiaries.

#### **12.5.4 Project Duration**

Eight (5) years in total

#### **12.5.5 Implementation Agency / Body**

- State level: Department of Agriculture (DA)
- District level: District Department of Agriculture (DDA)

#### **12.5.6 Project Components and Activities**

The Project Activities fall under four major sub-components.

- Introductory workshop of life environment development programme for officers
- Bio gas (Cow dang gas ) plant will be introduced to the households that required
- Smokeless energy efficient oven will be introduced to the households that required
- Kitchen garden programme for each household will be guided and implemented
- Other life Improvement skill will be guided through agricultural extension worker

### **12.5.7 Project Outputs / Inputs**

#### **(1) Expected Outputs**

- Introduction of alternative eco-friendly fuel (bio-gas, cow dang-gas) and use of smokeless stove..
- Introduction of kitchen garden by utilizing enriched organic fertilizer generated by bio-gas (Cow dang gas ) plant.
- Increase of knowledge on nutrition and improvement of food intake in family
- Cow or other cattle compost will be utilized for generating organic fertilizer

#### **(2) Project inputs**

- Technical assistance for introduction of bio-gas plant and mobilization of community
- Training and education
- Fund for subsidy of bio-gas plant
- Fund for provision of seeds for kitchen garden

### **12.5.8 Project Management Issues**

Linkages of several kinds are crucial to the success of this project:

- With on-going bio-gas plant introduction programme by Agriculture Department. Programme should be demand-oriented project.
- With MP Agro Industry Development Corporation and Energy Development Corporation
- With agriculture extension workers and health workers
- With ICPD nutrition programme by Department of Women and Child Development

### **12.5.9 Estimated Project Cost**

About US\$ 400,000

**ANNEX**

## 1. STUDY TEAM MEMBERS

### Study Team Members

Ms. Masako Tanaka	Team Leader / Health Planning
Mr. Hirotsugu Aiga	Organization & Institutions
Ms. Shiho Sasada	Economics & Finance 1 (Health Finance)
Mr. Hideto Yasui	Economics & Finance 1 (Project / Programme Evaluation)
Ms. Fernanda C Kaplan	Maternal & child Health 1 (Health / Medical Service)
Ms. Marianne Burkhart	Maternal & child Health 2 (Regional / District Health)
Ms. Noriyo Aoki	Gender / WID / Sociology / Anthropology
Mr. T. Okamoto	Population Issues
Mr. Ranganayaku Bodavala	HMIS/GIS
Mr. Yuji Ko	Facility Planning
Mr. Hiroshi Kitajima	Equipment Planning
Mr. Philip Sedlak	IEC / Health Education
Mr. Sadatoshi Matsuoka	Administrative Coordinator

Government of India

## I. INTRODUCTION

In response to the official request of the Government of India (hereinafter referred to as "GOI"), the Government of Japan has decided to conduct The Development Study on Reproductive Health in the State of Madhya Pradesh (hereinafter referred to as "the Study") in accordance with the relevant laws and regulations in force in Japan.

Accordingly, the Japan International Cooperation Agency (hereinafter referred to as "JICA"), the official agency responsible for the implementation of the technical cooperation programmes of the Government of Japan, will undertake the Study in close cooperation with the authorities concerned of GOI and Government of Madhya Pradesh (hereinafter referred to as "GOMP").

The present document sets forth the Scope of Work with regard to the Study.

## II. OBJECTIVES OF THE STUDY

The overall goal of the Study is to improve the women's health status in the project area. The specific objectives of the Study are:

- (1) to review and analyse the existing programmes which aim to improve women's reproductive health and to empower women, and to formulate Master Plans at the district level
- (2) to conduct technical transfer to the Indian counterpart personnel throughout the Study.

## III. IMPLEMENTATION OF THE STUDY

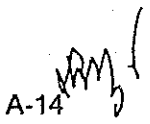

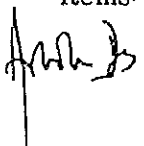

The study will promote participation of communities in the planning process through various workshops.

## IV. STUDY AREA

The area of the Study will be the districts of Chhatarpur, Damoh, Panna, Sagar and Tikamgarh of Sagar Division of the state of Madhya Pradesh. (See Appendix II)

## V. SCOPE OF THE STUDY

In order to achieve the objectives mentioned above, the Study will cover the following items:

  
A-14

## *Phase I. Basic Study*

1. Collection and review of existing data and documents on:
  - (1) general issues including natural environmental conditions and socio-economic conditions
  - (2) health related information
  - (3) progress situation of existing programmes
  - (4) present condition of health services
  - (5) sectors and issues related to health of women
  - (6) community participation and public-private sector cooperation
2. Recognition of other related development partners' and NGO's activities and exchange opinions.
3. Examination of current situation regarding:
  - (1) administration, organizations, laws, regulations and policies related to the Study
  - (2) social survey: possibility of participatory development, gender analysis, life style and working conditions of women
  - (3) main industries including agriculture and forestry
  - (4) financial conditions
  - (5) social infrastructure
  - (6) development plans and planning mechanism at the levels of the state and the districts
  - (7) health service facilities and equipment
  - (8) supply system of medical materials
  - (9) referral system including transportation
  - (10) present conditions of human resource development in health sector
  - (11) access to health services
  - (12) area specific conditions
4. Assessment of current environment relevant to women and issues influencing health status.
  - (1) Organization, administration, financial condition, legal system
  - (2) Health service delivery system
  - (3) Human resources development on health
  - (4) Socio-cultural factors on health education and community participation
  - (5) Health-related issues in other sectors
  - (6) Reproductive and child health with focus on health seeking behavior, mortality and mobility pattern, and reduction of mortalities
  - (7) Nutrition
  - (8) Sanitation
  - (9) Education including family life education, adolescent education and parental education
  - (10) Working environment

*Amah Is*

*W*

*Amah Is*

*Amah Is*

(11) Economic empowerment of women

5. Setting a socioeconomic framework for Master Plan

*Phase II. Formulation of basic strategies and the district level Master Plans*

1. Supplementary data collection and field surveys
2. Basic strategies of the Master Plans
  - (1) Strengthening of primary health care system
  - (2) Improvement of reproductive and child health
  - (3) Promotion of IEC activities
  - (4) Improvement of working environment of women
  - (5) Human resource development in health
  - (6) Expansion of health facilities and equipment
  - (7) Institutions and organizations including hospitals and training centres
3. Formulation of the Master Plans
4. Cost estimation
5. Assessment of the project components in the Master Plans (Social impacts etc.)
6. Formulation of stage-wise implementation plan

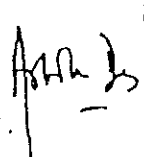

**VI. WORK SCHEDULE**

The Study will be conducted in accordance with the tentative work schedule attached as Appendix I.

**VII. REPORTS**

JICA will prepare and submit the following reports in English to GOI and GOMP.

1. Inception Report :  
Twenty (20) copies at the commencement of the first work in India.
2. Progress Report :  
Twenty (20) copies at the end of the Basic Study in India.
3. Interim Report :  
Twenty (20) copies at the commencement of the Phase II.
4. Draft Final Report :  
Twenty (20) copies at the end of the study in India.

GOI and GOMP will submit its comments to JICA within one (1) month after receipt of the Draft Final Report.

5. Final Report :

Fifty (50) copies within one (1) month after receipt of the comments on the Draft Final Report.

### VIII. UNDERTAKING OF GOVERNMENT OF INDIA

1. To facilitate the smooth conduct of the Study, GOI will take the following necessary measures:

- (1) to secure the safety of the Japanese study team (hereinafter referred to as "the Team"),
- (2) to permit the members of the Team to enter, leave and sojourn in India for the duration of their assignment therein, and exempt them from foreign registration requirements and consular fees,
- (3) to exempt the members of the Team from taxes, duties, fees and any other charges on equipment, machinery and other materials brought into India for the conduct of the Study,
- (4) to exempt the members of the Team from income tax and charges of any kind imposed on or in connection with any emoluments or allowances paid to the members of the Team for their services in connection with the implementation of the Study,
- (5) to provide necessary facilities to the Team for remittance as well as utilization of the funds introduced into India from Japan in connection with the implementation of the Study,
- (6) to secure permission for the Team to enter into private properties or restricted areas for the implementation of the Study,
- (7) to secure permission for the Team to take all data and documents (including photographs and maps), other than those restricted, related to the Study out of India to Japan, and
- (8) to provide medical services as needed. Its expenses will be chargeable on the members of the Team.

2. GOI/GOMP shall bear claims, if any arise, against the members of the Team resulting from, occurring in the course of, or otherwise connected with, the discharge of their duties in the implementation of the Study, except when such claims arise from gross negligence or willful misconduct on the part of the member of the Team.

3. Public Health and Family Welfare Department, GOMP shall act as the counterpart agency to the Team and also as a coordinating body in relation with other

governmental and non-governmental organizations concerned for the smooth implementation of the Study.

4. Public Health and Family Welfare Department, GOMP shall, at its own expense, provide the Team with the following, in cooperation with other organizations concerned:

- (1) Available data and information related to the Study
- (2) Counterpart personnel
- (3) Suitable office space
- (4) Credentials or identification cards
- (5) Provision of logistics support as far as possible

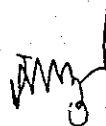

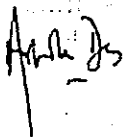

#### IX. UNDERTAKING OF JICA

For the implementation of the Study, JICA shall take the following measures:

1. to dispatch, at its own expense, the Team to India, and
2. to pursue technology transfer to the counterpart personnel in the course of the Study.

#### X. CONSULTATION

JICA and GOI/GOMP shall consult with each other in respect of any matter that may arise from or in connection with the Study.

MINUTES OF MEETING  
ON  
SCOPE OF WORK  
FOR  
THE DEVELOPMENT STUDY ON REPRODUCTIVE HEALTH  
IN THE STATE OF MADHYA PRADESH, INDIA

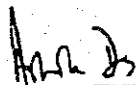

AGREED UPON BETWEEN

DEPARTMENT OF HEALTH AND FAMILY WELFARE,  
GOVERNMENT OF MADHYA PRADESH

AND

THE JAPAN INTERNATIONAL COOPERATION AGENCY

Bhopal, 20 April 2000

---

Mr. Ashok DAS  
Secretary  
Family Welfare Department  
Government of Madhya Pradesh

---

Dr. Yoichi YAMAGATA  
Leader  
Preparatory Study Team  
Japan International Cooperation Agency  
(JICA)

The Japanese Preparatory Study Team (hereinafter referred to as "the Team"), organized by Japan International Cooperation Agency (hereinafter referred to as "JICA") visited the state of Madhya Pradesh from 12<sup>th</sup> to 20<sup>th</sup> April 2000, during which the Team had a series of meetings with officials concerned of Government of Madhya Pradesh (hereinafter referred to as "GOMP"). The list of those who attended the meetings is shown in the Appendix I.

The Minutes of Meetings have been prepared for the better understanding of the Scope of Work agreed upon between GOMP and the Team on 20<sup>th</sup> April 2000. The main items discussed and agreed by both sides are as follows.

### I. TITLE OF THE STUDY

Both sides agreed that the title of the study be changed to "The Development Study on Reproductive Health in the State of Madhya Pradesh, India" in order to clarify the object of the study.

### II. STUDY AREA

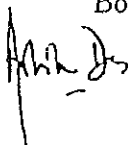

1. Both sides agreed that the Study would cover Sagar Revenue Division and prioritize on Tikamgarh and Damoh districts.
2. GOMP requested the Team that Ujjain Division of the state of Madhya Pradesh (see Appendix II) should also be included in the study area since women's health status in this division showed one of the lowest figures in the state. The Team explained that this kind of request needs to be submitted to the Government of Japan through the diplomatic channel for their consideration. It would therefore not be realistic to include Ujjain Division in the Study. In the mean time, the Team assured that they should bring this request to Ministry of Foreign Affairs, Government of Japan and JICA Head Quarters.

### III. TARGET YEAR

Both sides agreed that the target year of the Master Plans designed be 2010 in accordance with the National Socio-Demographic Goals for 2010.

### IV. SCOPE OF THE STUDY

Both sides agreed that Full-Scale Study Team consisting of Japanese consultants

(hereinafter referred to as "the Consultants Team") should follow ICPD guidelines in the course of the Study.

#### V. WORK SCHEDULE

GOMP requested the team that duration of the Study should be shortened from proposed 18 months to 12 months in order to catch up with the rapid developments taking place in the State. The Team assured GOMP to consider this request.

#### VI. UNDERTAKING OF GOVERNMENT OF INDIA

1. As to 4. (2) of the Scope of Work, the Team requested GOMP that counterpart personnel should be identified who accompany the Consultants Team while going for field survey for ensuring better cooperation, to which GOMP agreed. A nodal officer to be nominated for this by GOMP.
2. As to 4. (3), GOMP notified the Team that office space would be provided in Health and Family Welfare Sector Reform Bureau Building in Bhopal and in the Training Center in Sagar District for the use of the Consultants Team. GOMP will provide them any further office space if requested. As for necessary equipment and furniture, GOMP requested Japan to provide the same, to which the Team agreed to consider.
3. As to 4. (5), GOMP notified the Team that GOMP shall provide the Consultants Team with support in transportation as far as possible.

#### VII. OTHERS

1. Both sides agreed that the Study would cover newborn baby as well as children up to five years.
2. Both sides agreed the result of the Study be open to the public.

(4) *Justification of the Project*

Present condition of the sector. Population situation in India  
requires immediate attention as it continues to grow at a high  
rate. For the period 1995-2000, the average annual population  
growth rate in India has been estimated to be 1.8 per cent per  
year which is higher than the Asian average rate of 1.5 per cent  
according to UNEPA. There is a projection that the population

of the country would be largest in the world at this rate of growth. It is therefore urgent to tackle issues related to population growth in India.

Sectoral development policy of the national/local government. Government of India as well as government of Madhya Pradesh are committed to tackle the problem of rapid population growth in a manner that is conducive to social and economic development and well-being of the society, especially the poor and the most deprived sections. The population stabilization programme is one of the top priority programme of the national and the state government.

Problems to be solved in the sector. One of the alarming facts in the population issues in India is the extremely low level of women's reproductive health. Maternal mortality rate in India, estimated on the basis of data collected from 109 hospitals in 23 districts, is 500 deaths per 100,000 live births. As long term solution to the India's population challenge, it is crucial to promote women's empowerment through improvement of their reproductive health among women in reproductive age, to raise awareness about health and to build an environment in which women themselves can control their reproductive health.

Outline of the project. The project will focus on the improvements in women's reproductive health through the expansion of services concerning safe motherhood. Specifically, it will focus upon

1. Strengthening pre-natal care services provided by Traditional Birth Attendant (TBA) and Auxiliary Nurse Mid-wife (ANM).
2. Strengthening essential obstetric care (EOC) at the community health centre level.
3. Formulating comprehensive development strategies integrating education, income generating activities and other social development activities to realize empowerment of women.

Purpose (short-term objective) of the project. The objectives of the study will be as follows:

- a. To review and analyze the existing programmes which aim to improve women's reproductive health and to empower women, and to support to formulate effective Implementation Plan at the district level from the aspect of comprehensive social development focusing on women.
- b. To formulate project profile for the individual projects of the master plan based on the expected cooperation from Japanese government.
- c. To promote participation of communities in the planning process through various workshops in the study.

Goal (long-term objective) of the project. The ultimate goal of the project is to improve the women's health status in the project area. It has been conjectured that improvements in the health status of women will lead to tackling of population issues in the project population.

Prospective beneficiaries. Women, especially in the reproductive age group.

Project priority in National Development Plan/Public Investment Programme. Population related issues as well as issues related to the health status of the women have got top-most priority in the Development Plans of the national as well as state governments.

(5) *Scheduled time of the commencement of the project*

The project is scheduled to start from January 1997 with the following time budgeting:

1	Inception report and workshop	January 1997
2	Interim report and workshop	September 1997
3	Draft final report	March 1998
4	Final report	June 1998

(6) *Expected funding source and/or assistance*

The entire cost of the development study will be borne by the Government of Japan.

(7) *Other relevant project, if any*

Nil

2. Terms of Reference for the Proposed Study

(1) *Necessity/Justification of the study*

In order to develop a need based programme of improving the health status of women in the project area, it is necessary that the existing situation is studied in detail and a decentralized planning process is evolved involving community of the project area. This situation analysis may focus on development issues regarding social and economic environment around women and social services, especially health, family welfare and education services.

(2) *Necessity/Justification of Japanese Technical Cooperation*

The government of Madhya Pradesh is constrained in providing additional inputs that are urgently required to tackle population issues prevailing in the state and is looking for the partners for its efforts to improve the health and family welfare status of the people of the state. It is in this context that external assistance from Overseas Economic Cooperation Fund (OECF) of Japan is being sought. Assistance from OECF requires a detailed development study as a pre-requisite for extending assistance. The Japan International Cooperation Agency has shown interest in the proposed development study.

(3) *Objective of the study*

- a. To review and analyze the existing programmes which aim to improve women's reproductive health and to

empower women, and to support to formulate effective Implementation Plan at the district level from the aspect of comprehensive social development focusing on women.

- b. To formulate project profile for the individual projects of the master plan based on the expected cooperation from Japanese government.
- c. To promote participation of communities in the planning process through various workshops in the study.

(4) *Area to be covered*

Rewa division of the state of Madhya Pradesh comprising of the districts of Rewa, Satna, Shahdol and Sidhi.

(5) *Scope of the study*

- a. Situation analysis and review of development issues regarding social and economic environment around women and social services, especially health and education services.
- b. Review of on-going programmes.
- c. Understanding of current situation of the related organization system.
- d. Analysis of current situation of concerned human resources.
- e. Analysis of current situation of related infrastructures.
- f. Study on social aspects.
- g. Review of community issues affecting comprehensive social development for improvement of women's reproductive health and empowerment.

- h. Formulating of programmes relating to promotion of girl's and women's education; nutritional status; health status; working environment of girls and women etc.
- i. Review related to inter-linkages and coordination mechanism; budgetary systems and mechanisms; implementation time table and prioritization; sustainability etc. of each programme.
- j. Selection of prioritized/urgent projects
- k. Formulation and evaluation of project profile based on proposal format.
- l. Information sharing with the community on the outcome through study workshops and community participation in planning process.
- m. Review of possibility of cooperation from Japan.

(6) *Study schedule*

1997	1	Inception report and workshop	January 1997
	2	Interim report and workshop	September
	3	Draft final report	March 1998
	4	Final report	June 1998

(7) *Expected major outputs of the study*

- \* A detailed description of the existing situation regarding status of women in the project area.
- \* Identification of priority issues in improving the health status, especially, reproductive health status of women.
- \* Development of need specific decentralized plan of action to address the identified issues.

(8) *Request for the study to any other donor agency*

No

(9) *Other relevant information, if any*

Nil

3. Facilities and Information for the Study Team

(1) *Assignment of counter-part personnel of implementing agency*

The counter-part implementation organization for the study will be Government of Madhya Pradesh, Department of Public Health and Family Welfare. A Steering Committee will be formulated by the representatives of the implementing agency to decide direction of the study based on government policies and political decisions.

(2) *Available data, information, documents etc. related to the study*

Necessary information, documents etc. will be provided to the implementation agency as and when desired.

(3) *Information on security conditions in the study area*

There is no security problem in the study area. There are no social and political issues or un-rest in the project population.

4. Global Issues (Environment, Women in Development, Poverty, etc)

(1) *Environmental component*

No environmental component involved.

(2) *Anticipated environmental impact*

It is a situational analysis and planning study. There is no environmental impact of the proposed study.

(3) *Women as main beneficiaries or not*

Yes

- (4) *Project components which requires special consideration for women*

The entire project is directed towards women's health.

- (5) *Anticipated impacts on women caused by the project, if any*

The project will lead to significant improvements in the health status of women, especially reproductive health status of women.

- (6) *Poverty reduction components of the project, if any*

The project will include income generating activities for women which will directly lead to reduction in poverty.

- (7) *Any component against the low income people caused by the project*

#### 5. Undertakings of Government of India

In order to facilitate a smooth and efficient conduct of the study, the Government of India shall take necessary measures:

- (1) to ensure safety of the study team.
- (2) to permit members of the study team to enter, leave and sojourn in India in connection with their assignments therein, and exempt them from alien registration requirement and consular fees.
- (3) to exempt the study team from taxes, duties and any other charges on equipments, machinery and other materials brought into and out of India for the conduct of the study.
- (4) to exempt the study team from income tax and charges of any kind imposed on or in connection with any emoluments or allowances paid to the members of the study team for their services in connection with the implementation of the study.

- (5) to provide necessary facilities to the study team for remittances well as utilization of the funds introduced in India from Japan in connection with the implementation of the study.
  - (6) to secure permission or entry into private properties or restricted areas for the conduct of the study.
  - (7) to secure permission for the study team to take all data, documents and necessary materials related to the study out of India to Japan.
  - (8) to provide medical services as needed. Its expenses will be chargeable to members of the study team.
6. The Government of India shall bear claims, if any, arises against member(s) of Japanese Study team resulting from, occurring in the course of or otherwise connected with the discharge of their duties in the implementation of the study, except when such claims arise from gross negligence or wilful misconduct on the part of the member of the study team.
7. Government of Madhya Pradesh, Public Health and Family Welfare Department shall act as counter-part agency to the Japanese Study team and also as coordinating body in relation with other governmental and non-governmental organizations concerned with the smooth implementation of the study.

The Government of India assures that the matters referred in this form will be ensured for a smooth conduct of the development Study by the Japanese Study Team.

INCEPTION REPORT  
FOR  
THE DEVELOPMENT STUDY ON REPRODUCTIVE HEALTH  
IN  
THE STATE OF MADHYA PRADESH, INDIA

Bhopal, November 22, 2000

The Scope of Work for the Development Study on Reproductive Health in the State of Madhya Pradesh, India (hereinafter referred to as the "Study") was agreed upon between the JICA Preparatory Study Team and Indian side on April 20, 2000. In accordance with the Scope of Work, JICA sent to India the Study Team headed by Ms. Masako Tanaka on November 15, 2000.

The Study Team submitted to the Indian side 20 copies of the Inception Report in the English language on November 20, 2000. The Study Team explained the contents and procedures of the Study on November 22, 2000. Subsequently, discussions between the Indian side and the Study Team were held, concluding the following points:

- (1) The Indian side basically agreed on the contents and study procedures presented in the Inception Report.
- (2) The counterparts were identified as shown in Annex I.
- (3) For smooth and effective implementation of the Study, the Joint Coordinating Committee will be formed with representatives from the organizations listed in Annex II.
- (4) Comments expressed by the Indian side, which are detailed in Annex-III shall be considered.

List of participants in the meeting is attached as Annex-IV.

COMMENTS BY THE COUNTERPARTS

1. **Review of Existing Data and Information and Planned Studies**

The Department of Health and Family Welfare will provide all related data/information including planned future studies and surveys to the Study Team. The Study Team will review these data/information and utilize as much as possible to minimize the duplication of conducting studies and surveys. The study will utilize both original data collected by the study team and existing data.

2. **Conference (Seminars) on Reproductive Health Issues in Madhya Pradesh with Donors and NGOs**

Meeting with donors and NGOs will be carried out on individual basis, and not as proposed in the Inception report, item 2.1.2 Stage 1 Study in India, (3) Conference (Seminars) on Reproductive Health Issues in Madhya Pradesh with Donors and NGOs.

3. **Office Space**

The Department of Health and Family Welfare will provide adequate office space for the Study Team.

4. **Length of Study**

The Indian side requested that the study take less time if possible. The JICA representative explained that the time line is fixed.

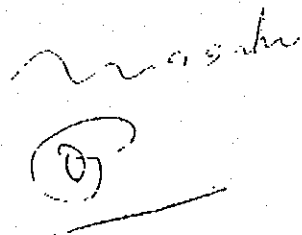

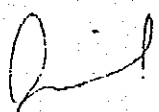

5. **Technical Skill Transfer**

Clarification of skill transfer was requested. It was explained that this will occur principally at the district level in planning and surveys, as well as during a visit to Japan by three Indian counterparts.

The Scope of Work for the Development Study on Reproductive Health in the State of Madhya Pradesh, India (hereinafter referred to as the "Study") was agreed upon between the JICA Preparatory Study Team and Indian side on April 20, 2000. In accordance with the Scope of Work, JICA sent to India the Study Team headed by Ms. Masako Tanaka on November 15, 2000.

The Study Team submitted to the Indian side 20 copies of the Interim Report in the English language on July 25, 2001. The Study Team explained the contents of the Interim Report and procedures of the Phase II work of the Study on July 27, and August 6, 2001 in Bhopal and on July 31, 2001 in Bhopal. Subsequently, discussions between the Indian side and the Study Team were held, concluding the following points:

- (1) The Indian side basically agreed on the contents in the Interim Report.
- (2) The Indian side basically agreed on the goal, objectives and strategies for district planning as shown in the Annex I.
- (3) The both sides also agreed that the points raised in the meeting will be considered for the preparation of the Draft Final Report;

List of participants in the meeting is attached as Annex II.

Annex I

**GOAL, OBJECTIVES AND STRATEGIES FOR DISTRICT PLANNING**

**1. Goal**

To improve health status of women and children and to contribute to population stabilization in the target districts through a Reproductive and Child Health (RCH) approach

**2. Objectives**

- A) To improve the access to high quality RCH services
- B) To improve management of RCH programs at State, District and Block levels
- C) To improve women's status

**3. Strategies**

- A) To improve the access to high quality RCH services
  - A1. Increase knowledge and skills of MDs and LHV/ANMs
  - A2. Increase knowledge and awareness of population
  - A3. Increase adequate (quality) coverage by field staff
  - A4. Implement functioning and adequate referral systems
  - A5. Increase number and proximity of EOC and EmOC services and MTP service provision (upgrade of selected facilities equipment, supplies and staff)
  - A6. Increase financial access to service
  - A7. Improve availability of drugs and medical supplies
  - A8. Implement telecommunication mechanisms
- B) To improve management of RCH programs at State, District and Block levels
  - B1. Increase management (including strategic planning) and administration capabilities of decision makers
  - B2. Management decentralization
  - B3. Increase linkages between and within governments, programs and NGOs
- C) To improve women's status
  - C1. Promote and encourage women's empowerment
  - C2. Improve women's quality of life

MINUTES OF MEETING  
ON  
DRAFT FINAL REPORT  
FOR  
THE DEVELOPMENT STUDY ON REPRODUCTIVE HEALTH  
IN  
THE STATE OF MADHYA PRADESH, INDIA

Bhopal, Mar. 4 , 2002

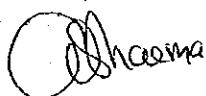

The Counterpart Meeting was convened on 31 January 2002 at Jchan Numa Palace Hotel to explain and discuss the Draft Final Report, which was submitted to the Government of Madhya Pradesh.

After the presentation of the Draft Final Report by JICA Study Team, discussion was made and the following points were agreed upon between the Indian side and the Japanese side.

1. The following items were discussed and confirmed by both sides.
  - (1) The strategy to strengthen cooperation and coordination between the health infrastructure and the political system (PRI/Gram Sabha) should be two folds:
    - (a) To strengthen the service providers
    - (b) To strengthen the motivators  

The motivator will be under the gamut of 'Village Health Committee' but could be an anganwadi worker, a self-help group or any good opinion leader either as individual or as an organization.

Their capacity building shall be done to promote participatory planning & and implementation.
  - (2) Linkages between the community and the government health sector will be important and help generate demand for health services.
  - (3) It is recommended that micro planning be included in the priority projects.
  - (4) Proposed projects should be discussed in the Strategic Planning Meeting, prior to finalization for implementation, in order to avoid duplication.
2. The following comments expressed by the Indian side shall be considered by JICA.
  - (1) The priority projects of the district master plan should extended to the entire two districts of Damoh and Tikamgarh within three years in accordance with the new state health strategies. 'Convergence', 'Micro-planning', 'Implementation' and

 Shama

A-54

 Solo

 MS

'Monitoring' are the key guidelines of the new state health strategies for the strategic approach with 40 points activities to achieve the mission of population policy.

- (2) The priority projects will be started with small-scale projects at one block in each district, Damoh and Tikamgarh. The small-scale projects should be replicable to all blocks in the two districts.
  - (3) To improve the access to high quality RCH services, the State Government of Madhya Pradesh would prefer to incorporate the concept of 'Convergence of services of social sector' (hygiene sanitation, women's income, women's empowerment, nutrition, etc.) into the implementation phase of the priority projects. The convergence of activities of different department at grass root level should focus to maximize their efforts.
  - (4) GIS will give a very good user-friendly alternative to see graphic display of information. Village wise user-friendly GIS package would also be available and it should be used maximally for micro-planning. The GIS developed by the Government of Madhya Pradesh is recommended to be used.
  - (5) 'Micro-planning' shall be introduced for better implementation of activities in the priority projects. In the new state health strategies, the 20% area of selected districts will be covered in the first year for intensive activity, and gradually expanded to the whole area of the districts in a phased manner.
  - (6) The strategy shall include proper 'monitoring' tools. Performance indicators shall be worked out in the priority projects using HMIS and GIS for better monitoring of implementation.
  - (7) The State Government of Madhya Pradesh understands that the terms of reference for JICA Study Team was to prepare the master plan for improvement of reproductive health for Tikamgarh and Damoh Districts. Based on the plan, the priority projects may be undertaken by the government and/or any development partners.
3. The State Government of Madhya Pradesh agreed to send the comments on the Draft Final Report by March 8, 2002 to JICA headquarter through JICA India Office.
  4. The State Government of Madhya Pradesh will accept the Final Report after the study team gives necessary correction to the Draft Final Report based on the comments agreed on by both the State Government of Madhya Pradesh and JICA Study Team.

Lists of participants in the meeting in Bhopal and Sagar are attached as Annex I and II.
