132. As part of this survey we are studying anaemia among women. We request your cooperation in this regard. This will assist the Government of Madhya Pradesh to develop programmes to prevent and treat anaemia. Anaemia is a serious health problem in India, which results from poor nutrition. However, if a person is found to have anaemia, the person can be given iron folic acid tablets to cure the disease.

If you decide to be tested for anaemia, we will request that you give a drop of blood from your finger for the test. The test uses disposable sterile instruments that are clean and completely safe. The blood will be analyzed with new equipment. The result of the test will be given to you right after the blood is taken. The results of this test will be kept confidential and will not be shown to other persons.

You may decide not to have the test and we will respect your decision. Please tell me whether you agree to give a drop of blood.

If the woman does not agree, thank her and end the interview. If she agrees, continue and perform the test.

Results of Haemoglobin Measurement:

WHO Classification of Aenemia

Normal	HB above 11 G/DL
Mild Anaemia	HB 10 - 10.9 G/DL
Moderate Aenemia	HB 7 - 9.9 G/DL
Severe Aenemia	HB less than 7 G/DL

Introduction

Hello. My name is _____. We are conducting a district survey about the health of women and children. We would very much appreciate your participation in this survey. We are interviewing women between 15 and 49 years of age. Are you more than 14 years old and less than 50? **If no, thank woman and terminate interview. If yes, continue.**

Have you ever been married? **If no, thank woman and terminate interview. If yes, continue.**

I would like to ask you some questions about the visit you just had. The amount of time needed will be less than 30 minutes. Participation in the survey is voluntary. If you decide to participate, you may stop answering questions at any time. Whatever information you provide will be kept strictly confidential and will not be shown to other persons.

We hope that you will participate in the survey since your views are important. Do you want to ask me anything about the survey at this time?

Continue if client agrees. If she does not agree, thank her and go to the next interview.
