QUANTITY CALCULATION COVER SHEET

Project	Detailed Design on Port Reactivation Project in La Union Province	Project Code	JC1N004/2N001
Work Section Title	CONCRETE OF CAISSON	Pay Item No. (BOQ)	2B-0404
Quantity Item		Unit	m ³

Calculation Procedure Applied

CAISSON concrete volume was computed for a respective Caisson. Cross section area was computed using geometric formulas and multiplied to the section length of respective caisson. The volume was multiplied to the total of caissons.

The volume was computed with 2 decimal for section area and 200 decimal for total

The result was verified in Intellicad.
