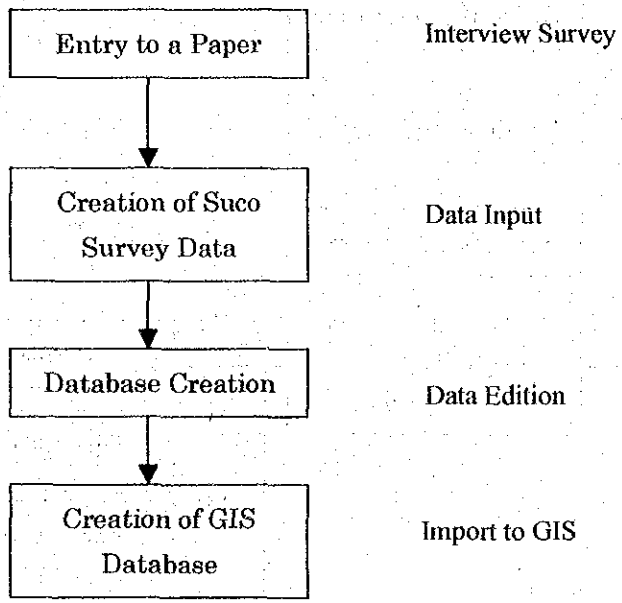
ANNEX Q. GIS AND DATABASE

CONTENTS

Q-1 Creation of Suco Survey Database

1. The Creation Method

Suco Survey database, which could be used for GIS was created based on the Suco survey, and the flow of creation is shown as follows;



2. Suco Database

Type of Suco Database

The contents of inventory survey could be divided into the 10 items. According to these items individual database was created. However, since the items of agricultural production have many sub-items, the item was furthermore subdivided in to five sub-items. As a result, total items become 14 databases.

Key Item for GIS

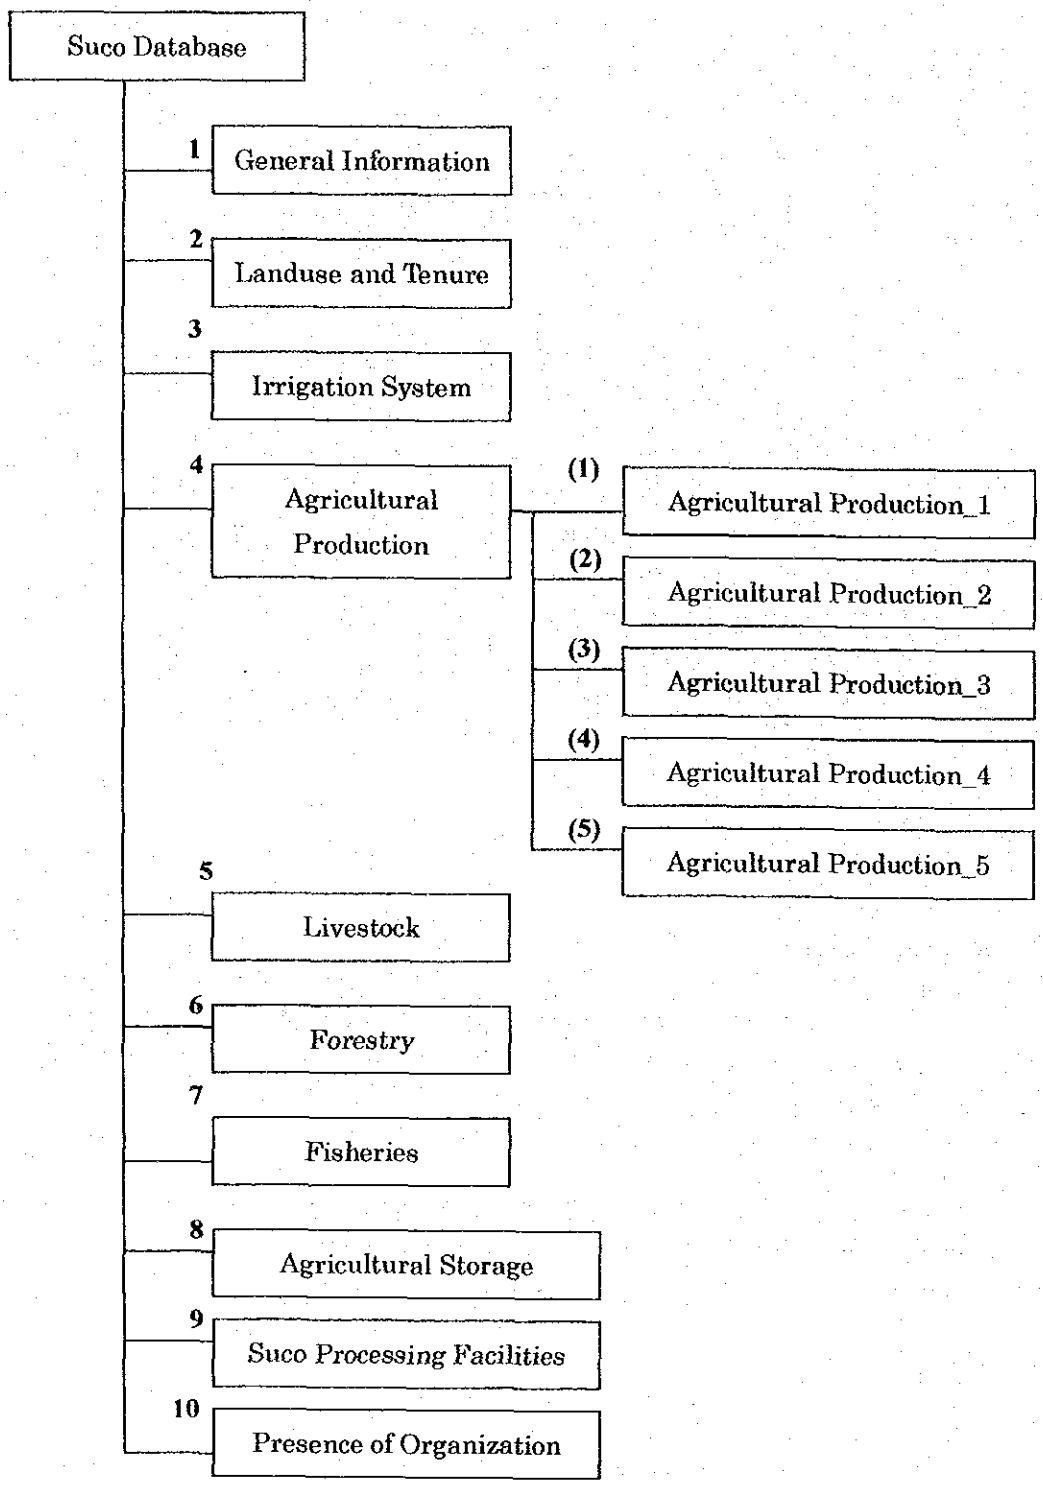
District code, Sub-district code, and Suco code were attached to each database. It is a code required for use of GIS. This code serves as the key, which ties up the figure database and attribute database of GIS. Suco database serves as attribute data.

GIS Use in Future

The database was created on the basis of Excel of Microsoft. If all suco survey data were finished and a database would be completed in the future, shift in database software such as ACCESS and Oracle will be attained. Creation of a relational database could be attained.

3. Structure of Suco Database

Followings indicate the structure of suco database;



Q-2 Survey Results of Suco Survey

1.General Information

District code	Sub_district Code	Suco code	Q1. Number of Household	Q2. Type of Main Road	Q3. Condition of Main Road	Q4. Lengh of Main Road(kms)	Q5. Percent of have Electricity Household	Q6. Percent of Have Piped-in Drinking Water Household(%)	Q7. Main Type of Water Sources	Q8. Financing Source	Q9. How Many Times of Agriculutur	Q10. Infrastructure Requiring Improvement		
												First Priority	Second	Third Priority
01	0101	010101	277	2	5	7	50	50	2	1	1	7	1	3
01	0101	010112	217	2	4	5	0	0	2	1	1	4	8	5

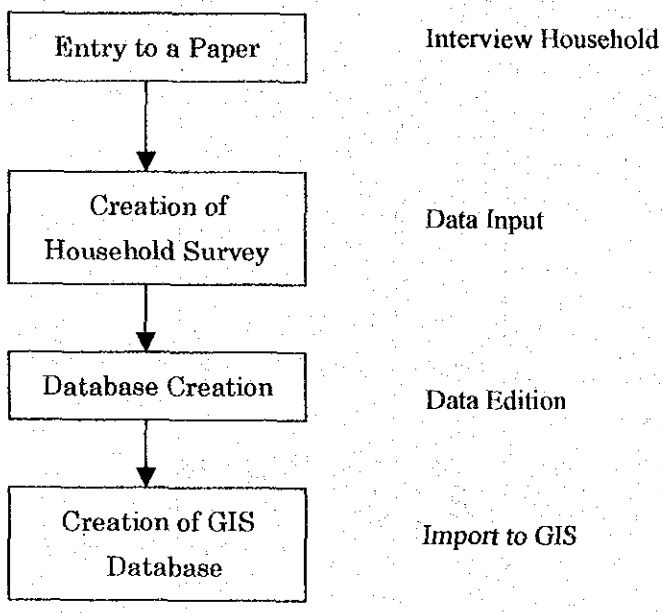
Q-3 Creation of Household Survey Database

1. The Creation Method

Household Survey database, which could be used for Computer was created based on the Household survey, and the flow of creation is shown as follows;



2. Household Database

Type of Household Database

The contents of inventory survey could be divided into the 13 Section. According to these Sections individual database was created. Household is created from the section of 13. Furthermore, each section is classified into some parts. The agricultural section of a section 9 is classified into the next part of 9 as an example. The database was created in Excel form according to the classified part.

Key Item for GIS

District code, Sub-district code, and Suco code were attached to each database. It is a code required for use of GIS. This code serves as the key, which ties up the figure database and attribute database of GIS. Household database serves as attribute data.

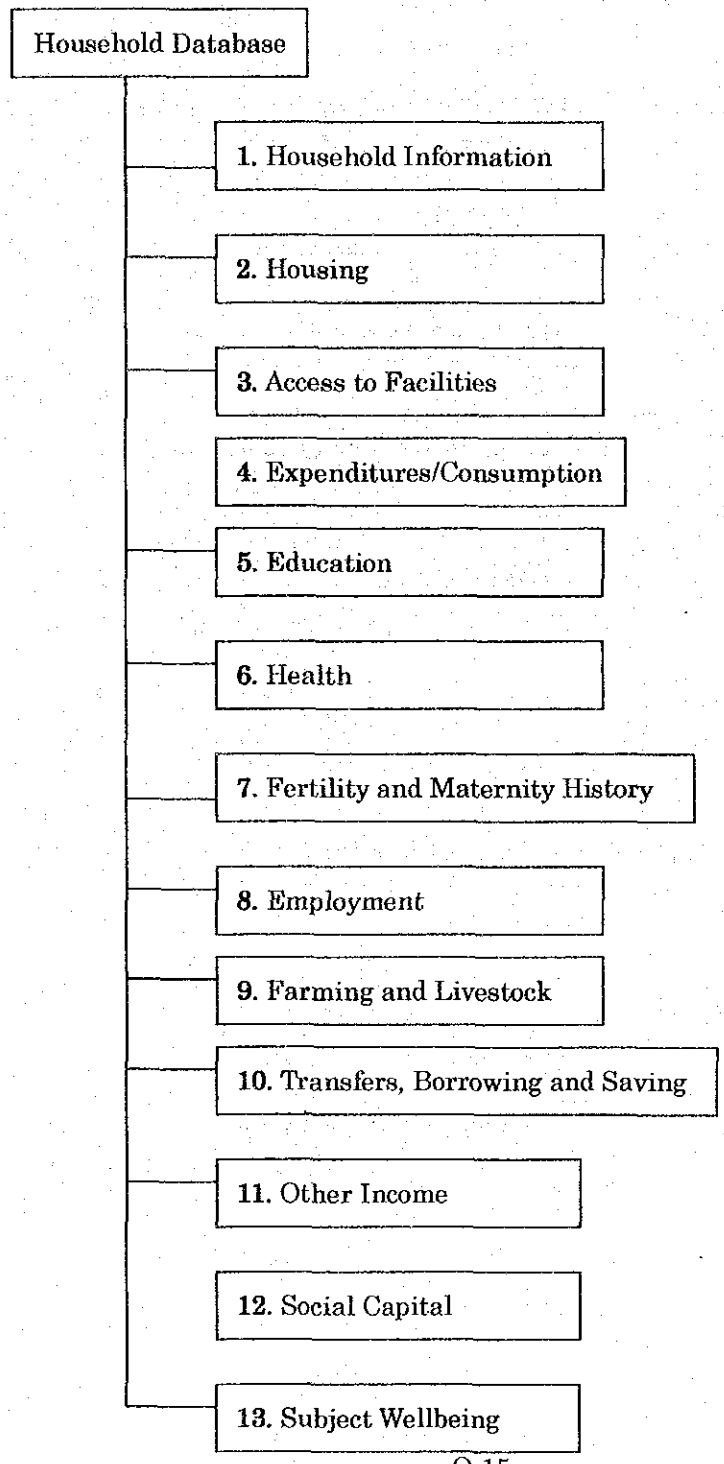
GIS Use in Future

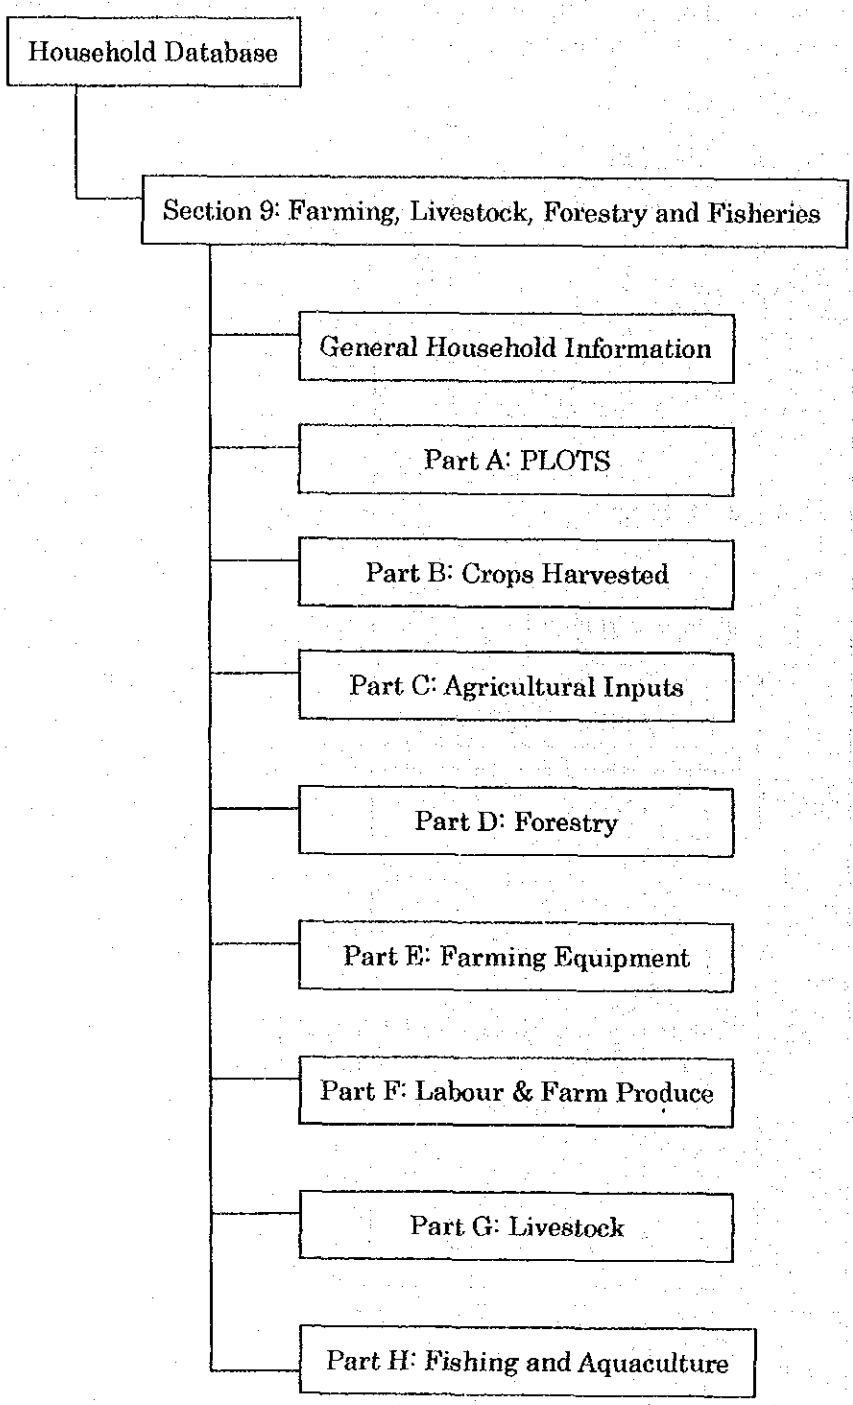
The database was created on the basis of Excel of Microsoft. If all Household survey data

were finished and a database would be completed in the future, shift in database software such as ACCESS and Oracle will be attained. Creation of a relational database could be attained.

3. Structure of Household Database

Followings indicate the structure of Household database;





Household Database
Section 9: Farming, Livestock, Forestry and Fisheries
General Household Information
Part A: PLOTS
Part B: Crops Harvested
Part C: Agricultural Inputs
Part D: Forestry
Part E: Farming Equipment
Part F: Labour & Farm Produce
Part G: Livestock
Part H: Fishing and Aquaculture

Q-4 Survey Results of Household Survey

ANNEX S. ISSUES TO BE COORDINATED AMONG THE DONORS AND EAST TIMOR GOVERNMENT

CONTENTS

S-1. Issues to be coordinated among the Donors and East Timor Government

Main issues to be coordinated among different donors and ET government for efficient and effective agricultural development are provisionally indicated as follows.

1) Development strategy about the issues as mentioned in the following four items are necessary to be agreed.

   - Basic development strategy, Master Plan and decision of priority order in agriculture sector development standing on the spirit of self-help efforts and meeting the needs of rural majority and the rural people's absorptive capacity. This strategy must be in conformity with National Development Plan.
   - Selection of "Efficiency or Equality" in economic policy.
   - Selection of open market policy, closed market policy or middle of them in some extent.
   - Convergent development or equally balanced development in nationwide and in sector wide to avoid expanding the income discrepancy and social inequality.

In the transitional period(2000～2002) , many donors including NGOs have rushed and concentrated into same highlighted area and same type of materials and equipment without agreed development strategy and master plan or without system to reflect for evolving requests of the poor.

Development Plan should consider about coordination and combination between in area-wide and components of the project, concentration of the projects into big city / convergent development or equally balanced growth in nationwide. This is for the purpose of minimizing the increasing discrepancy of income. This is based on the view that exhaustion in rural area will induce the turning urban areas into a slam. The development of regional core town is effective to absorb the labor power in rural area.

2) Small CFET budget allocation to agricultural sector under national budget constraints and current development priority order is one of the most serious constraints in the implementation of the agricultural project.

   - Budget for maintenance and operation (M&O) of rural infrastructure projects (roads, irrigation systems, sanitation, etc.) and farm machines must be ensured to prepare even in the limited national government budget.
   - While donor's project aid will help, it typically does not pay for the recurrent costs such as operation and maintenance nor a DAA's operating costs. This implies a very minimal DAA activity.

Agriculture is a key sector for East Timor and accounted for about 34% of GDP in1997. About 80% of the populations live in rural area. Agricultural sector is the engine of growth for the economy of East Timor. However, budget allocation of CFET to Agricultural Sector is very small so far (about 1.1% for F/Y 00/01, and 1.8% for F/Y 01/02) in spite of the importance of this sector. Current CFET budget allocation to agriculture sector under emergency recovery

period is too small to increase foods security and to increase per capita income to double or to triple in real GDP.

3) It must be discussed about (a) Subsidy valid for a specified period of time up to realize self-sufficient rice production, within the limited subsidy in some range of no overprotection, and (b) the range of social net to be prepared for the defeated people in the free competitive market.

- In Indonesian rule period, farmers in East Timor have operated in a culture where the government regulated agriculture, formed so-called "cooperatives" and provided free or subsidized inputs.
- UNTAET/ETTA government policy is focusing the transition from a heavily subsidized sector to one with limited government funding. Small government policy in transitional government requests the peoples to have responsibility to secure the farmer's cost recovery efforts by individual risk through changing farmer's mentality to one of "self-help efforts spirit" or "reward based on effort".

Recent agricultural growth rate, according to some information, was about 4% annually. This was the result helped by many subsidies from transitional government through foreign assistance in the period of emergency recovery period.

Subsidies accrued from international donation is uncertain in continuity after transitional period. Future growth without donation from international society may possible be repressed, if there is no active efforts to get capital by the cost recovery efforts of subsistence farmers, and efforts on their farming expertise. In case that the rice producing farmers are defeated by cheap imported rice, what source of fund can provide the social nets to the farmers? Subsidies to some extent for standing on farmer's own legs and up to the time realizing self-sufficient rice production are necessary on considering current situation of agricultural sector within the financial frame.

4) Human resources and institutional capacity development of DAA, DAO and NGOs should be strengthened.

The implementing agencies, DAA and Local Administrations may, at present, not have the proper technical, financial, staffing and management capability to implement the project, more specifically to operate and maintain system for the project sustainability. Problems and constraints that may occur with inexperienced implementing agencies' are as follows:

- Coordination mechanism for sector development strategic framework, prioritization, project implementation, monitoring and evaluation
- Ownership status of projects implemented, capacity needed to implement
- Limited resources (budget and staffing) and lack of experience with execution as implementing agencies···limited financial resource is one of the most serious constraints of the DAA in the implementation of the projects.
- Establishing a system to enhance data collection and reporting of outputs and outcomes

of agency programs and activities,

- Procurement and disbursement arrangements from the donor to the recipient and to the other sub-implementing agencies;
- Responsibility and cost sharing···roles and responsibilities must be identified among each administrative agencies.
- Counterpart funding arrangement and delivery mechanisms
- Relation between modern administration system and traditional practice/custom of local people in some district(such as Viqueque, Suai, Ailcu,, Bobonaro Oequsse, etc,) connected to the former kingdoms ("Keliurajan")(liurai=king) and "traditional adat ruler", Aldeia(hamlet) chiefs or reino(commoners) . Only the projects supported by traditional rule are seemed to be the long-term income generation projects.

5) Leadership and partnership in development among National and Local Government, NGOs , Churches and University in each function and capability.

If NGOs execute the important role in development under small government policy, what is it's financial source? How NGOs secure the continuity of activity and combination with NGO and community.

Current institutional scheme, which has no modernized systems, are very weak and need the assistance of foreign donors and NGOs or Church. DAA are, in collaboration with foreign assistance, expected to provide technical, financial and academic support for the institutional development. The establishment of a strong coordinating agency working together with various implementing agencies will be required to overcome problems in traditional/ancient rules. But if it is difficult, establishment of good partnership with International and local NGO Groups, as "Development Partner" with government sector for agriculture/rural development is essential to the successful founding of newly independent "Timorese Timor State".

Many LGUs are still very weak and need the assistance of NGAs/NGOs/Church. The NGAs/NGOs/Church are expected to provide technical, financial and academic support The participation of NGOs, Church and Universitas Timor Lorosae will be requested for the development of rural area and agriculture sector. In East Timor, there are hundreds of NGOs, POs operating in variety of activities, particularly on community development, rural development programs, social development of depressed communities, etc. Combination with NGO, University and Community are important for institutional development in small government policy. In this aspect, local NGOs contribution must be institutionalized in development process. Development speed may be slow, but this type of bottom-up decision-making process and community participation process must, patiently, accept in present situation in East Timor.

6) Efficient and effective combination between technology transfer, institutional development and physical project construction. Expansion and enforcement of training on agricultural technology and extension service

The average yield of paddy per hectare is low (about 2.0 ton/ha or less). The low yield is

attributed to insufficient irrigation system, low quality seeds, pests or diseases as well as to primitive cultivation method. In East Timor, animal plow over a paddy field (animal drawn cultivation methods) is, presently, not introduced into cultivation with farmers. In the past two years of emergency recovery period, many donors contributed variety of farming machines and tools for agricultural production increase. But all of those are in the situation of "sleeping" in the stockyards without use due to no O&M budget and insufficient technology transfer to the farmers.

Training on agricultural technology to and extension services for farmers are indispensable to increase productivity in addition to irrigation facilities. Prior to construction of physical project, farmers farming expertise must be developed. After turbulence, number of extension workers was sharply decreased, nothing now in East Timor. Hence, the number of staff of DAA and DAO is very limited to implement these functions, in this fields also, NGOs and Church's contribution are expected.

7) Improvement of marketing/distributing system and post harvest processing of staple foods

As prerequisite condition to realize sufficient food security, it is most urgent issue to develop the marketing and distribution system which is reflected into high transportation cost and high milling cost of staple foods from producing (rice surpluses) districts to consuming (rice shortage) districts.

Main staple foods producing Districts (rice surplus districts) are Bobonaro, Viqueque, Covalima, and Aileu where there is located in the south coastal districts having adequate irrigation facilities. Main consuming districts (shortage districts) are Dili, Ermera, Liquica and Ainaro.

This marketing distortion between rice surpluses districts and rice shortage districts surely come from the reason of lack of distribution systems, transportation facilities and lack of milling facilities. Weak price competitive power of domestic rice against imported rice is probably affected by these reasons.

If it is failed to establish the efficient marketing system between these district, foods shortage problem and low farmer's income is not easy to settle, even though attained the increase of productivity.

8) Preparation of Action Plan to prepare the development system, law and regulation for agricultural sector development

While the implementation process in the sector or regions/districts focus on the development plan, institutions involved and participants concerned also embark on the formulation of their respective sectoral and regional targets. This is not only speaks of their commitment to make the national targets an operational reality, but more importantly, in ensuring that sustainable development takes root in their respective localities with definite legal and institutional background. For this purpose, action plan should be drawn out as a first step in translating further the national targets into institutionalized and localized targets for each sub-

sector and districts, sub-districts and villages. These are by no means a complete and comprehensive for each region. It is, however, a first attempt towards localizing this development plan and can serve as a basis in firming up a more thorough and comprehensive participatory development in the near future.

9) Minimization of duplication of the similar type of project construction in the same place and the establishment of a close combination or a clear demarcation to attain efficient development between different donors' on-going, committed and/or planning stages projects in earlier opportunity.

S-2. Proposed Action Plan by Sub-sector / by Region (As a part of donor's coordination)

Action Plans, which will be in shape, are embodied in this Annex S. While the development potentials and constrains and implementation process in the sector or regions focus on this Agricultural Development Plan, institutions involved and participants concerned also embark on the formulation of their respective sectoral and regional targets. This not only speaks of their commitment to make the national targets an operational reality, but more importantly, in ensuring that sustainable development takes root in their respective localities and ownerships based on the corroboration.

The sub-sector basis development issues contain in the matrix bellow that will follow articulates the emerging issues and concerns in the various region and can serve as a first step in translating further the national targets into local targets for each districts, sub-districts and villages. Beside of those targets, many legal/institutional frameworks must be provided on the primary stage of the implementation. These are by no means a complete and comprehensive for each region. It is, however, a first attempt towards localizing Agricultural Development Plan and can serve as a basis in firming up a more thorough and comprehensive participatory development in the near future. These action plans are indispensable for establishment of sustainability of agriculture sector. Following matrix are shown as a central and regional authorities' targets to realize in the plan period.

1) Sustainable Development

Issues/Concerns	Strategy/Action Targets	Time Table	Institutions & District Involved
1. Macro-Economics	1.1 Growth⇒Revenue Up⇒More Budget Allocation to Agriculture / Rural Sector development based on nation's priority orders.	2,003~07	Planning Commission / DAA
	1.2 Food Import⇒Damage to rice producing farmers/ Foreign Exchange loss⇔Higher Foods Self-sufficiency⇒restraint on rice import ⇒ Save Foreign Exchange ⇒ Diversification of Economic Activities by effective use of limited foreign exchange	2,003~07	Planning Commission / DAA
	1.3 Attain the sustainable agriculture (⇔ Win against and free from vicious circle)	2,003~07	DAA
2. Foods Security	2.1 Domestic produced and imported food crops, livestock and fish products to meet the food requirements of the populace. Restraint rice import under shortage of foreign exchange	2,003~07	DAA/ Planning Comm.

Issues/Concerns	Strategy/Action Targets	Time Table	Institutions & District Involved
	2.2 Give priority to domestic production of staple foods i.e. rice, corn, vegetables for domestic consumption	2,003~07	DAA/ Planning Comm.
3. Foods Self-sufficiency	3.1 Improve Domestic producing potentiality for the future populace.	2,003~07	DAA
	3.2 Promote the adoption of integrated financing approach covering all aspects of agricultural sectors operations.	2,003~07	
	3.3 Advocate for increased budget for sustainable agriculture.	2,003~07	DAA/ Planning Comm.
	3.4 Rationalize and strengthen farmer's organizations to facilitate the integration of the agricultural sector into the mainstream economy	2,003~05	
	3.5 Establish an information support system that will provide integrated and consolidated weather, soils, agricultural technology and market information	2,003~05	DAA/ Offices concerned
4. Relief for Poor Families and Poor Villages	4.1 Social nets If no subsidy prepared for farmers, social nets should be provided to the weaks. Criteria for judgment to apply of social nets	2,003~04	DAA
	4.2 District Administration Office (DAO) should grasp the wreaks situation.	2003~04	DAA/ Planning Comm.
5. Economic Incentives for the social activities	5.1 Give investment priority to trader, NGOs and peoples organization	2003~07	
	5.2 Strengthen and establish cooperatives by strengthening government support and neutralizing competition	2003~07	Planning Comm.
	5.3 Give investment priority	2003~07	Planning Comm.
	5.4 Provide accessible funding facility	2003~07	
6. Major Targets / Stakeholders	6.1 Farmers, rural peoples and landless rural workers should be focused as targets.	2,003~04	Planning Comm.
	6.2 Indirect targets are urban poor, disadvantaged groups, ethnic minority and indigenous peoples		Planning Comm.

Issues/Concerns	Strategy/Action Targets	Time Table	Institutions & District Involved
7. Private Initiative	7.1 Transportation Private sector will promote the efficient transportation of agricultural products and goods. Farm-to-markets roads should be constructed by government. Focus not on the formulation of policies but on identification of specific infrastructure projects to support the growth of the transport industry / marketing system.	2,003～07	DAA/ Planning Comm
	7.2 Trading Delivery and transaction by private traders will be executed instead of DOLOG of Indonesian time. Provision of incentive on investment is important.	2,003～05	DAA/ Planning Comm
	7.3 Marketing Marketing facilities should be constructed by local government responsibility. Official institution should supply market information, so that farmers' income becomes stable.	2003～05	DAA/ Planning Comm.
	7.4 Processing/Agro-Industry ・ Investment incentives ・ Tax exemption ・ Micro-finance scheme	2,003～07	DAA/ Planning Comm.
	7.5 Coffee Sector ・ Production increase will be promoted by private basis. Coffee cooperatives will prepare support to individual farmers. ・ Processing/Quality improvement to realize export quality by foreign expert T/A	2003～05	DAA/ Planning Comm.

2) Crop Production and Irrigation

Issues/Concerns	Strategy/Action Targets	Time Table	Institutions & District Involved
1. Absence of national Agricultural Land Use Policy	1.1 Formulate and strictly implement a national land use plan/policy for each district, such that it will regulate conversion as well as expansion of agricultural lands.	2,003~07	DAA/ Planning Comm
	1.2 Formalize tenure rights over agricultural lands being tilled by farmers	2,003~07	DAA/ Planning Comm
	1.3 Encourage the participation of communities in the formulation of the National Land Use Code and publish for broad/wide review	2003~05	DAA/ Planning Comm
2. Loss of Agricultural lands	2.1 To improve and rehabilitate irrigation systems and communal irrigation facilities like small water impounding projects.	2,003~07	DAA
3. Impact of Agriculture on Marginal Lands	3.1 Promote cultivation of high value crops to increase income and productivity of farmers	2,003~07	DAA
	3.2 Develop and implement sustainable agroforestry systems	2,003~	DAA
4. Idle Agricultural Land	4.1 Improve irrigation system	2,003~07	DAA
	4.2 Review on idle agricultural land and make new policy to use effectively	2,003~05	DAA/ Planning Comm
	4.3 Training of land cultivation by using machines and draft animal power	2,002~05	DAA
5. Food Security/ Production	5.1 Provide support to farmers in terms of better production technologies, marketing and financial assistance.	2,003~05	DAA
	5.2 Give priority to farmer's funds and agricultural markets.	2,003~07	DAA
	5.3 nterventions to ensure food security and agricultural development through construction of irrigation system and farm-to-markets roads.	2,003~07	DAA/ Planning Comm
	5.4 Broaden seed production/certification activities to include cash crops	2,003~07	DAA/ Planning Comm
	5.5 Produce food crops, livestock and fish products on a sustainable basis to meet the food requirement of the populace.	2,003~07	DAA/ Planning Comm

Issues/Concerns	Strategy/Action Targets	Time Table	Institutions & District Involved
	5.6 Produce quality seeds and planting materials; and expand and maintain existing nurseries and research stations.	2,003～07	DAA/ Planning Comm
	5.7 Organize and strengthen agricultural cooperatives and promote marketing tie-ups between government and non-government organizations.	2,003～07	DAA/ Planning Comm
	5.8 Increase budget for sustainable agriculture to establish, upgrade and rehabilitate agricultural facilities i.e. irrigation, post harvest facilities.	2,003～07	DAA/ Planning Comm
	5.9 Protect small farms and farmers/workers by some social nets.	2,003～07	DAA/ Planning Comm
	5.10 Prepare the "Irrigation and Agricultural Productivity Enhancement Act"	2,003～07	DAA/ Planning Comm
	5.11 Provide incentives to farmers practicing sustainable agriculture.	2,003～07	DAA
	5.12 Give priority to production of staple crops i.e. rice, maize vegetables and fruits for domestic consumption		DAA
6. Inadequate Pre/Post Harvest Facilities and Infrastructures	6.1 Farming Machines are not effectively used. Many of the machines are sleeping at stockyards.	2,003～07	DAA/ Planning Comm
	6.2 Training, operation and maintenance methods are necessary.	2003～05	DAA/ Planning Comm
	6.3 Undependable rural farm-to-market roads to link key production areas	2,003～07	DAA
7. Slow and Inefficient Delivery of Extension Services	7.1 Coordination with District on the supervision of agricultural projects		DAA
	7.2 Provide training to extension workers	2,003～07	DAA/ Planning Comm
	7.3 Mobilize agricultural schools for research studies.	2,003～07	
8. Organization Development	8.1 Organize and strengthen agricultural cooperatives and promote marketing tie-ups between government and NGOs	2004～07	DAA/NGO
	8.2 Conduct capability-buildiong on participatory recources management notably on alternative marketing, organic farming and sustainable agriculture.		DAA/ Planning Comm

Issues/Concerns	Strategy/Action Targets	Time Table	Institutions & District Involved
	8.3 Establishment of Irrigators Association and Collection of Water Charge	2002~03	DAA
9. Diversification and cash crop	9.1 Following to increase of self sufficiency of staple foods, diversification and introduction of cash crops should be promoted.		DAA
	9.2 Promote cultivation of high value crop to increase income and productivity of farmers	2003~05	DAA
	9.2 NGOs and extension workers efforts	2003~05	DAA/ Planning Comm
	9.3 Modernization of marketing system	2003~05	DAA/ Planning Comm
10. Poor livng conditions in rural areas	10.1 Formulate specific strategies/action agenda and targets related thereto	2003~04	DAA
	10.2 Protect poor farms and farmers / workers by government ffforts	2003~07	DAA
11. Data Collection & Statistics	11.1 Development of agricultural statistic data collection system	2003~05	DAA
	11.2 Drawing up the manual and system to use data efficiently for agricultural policy making	2003~06	DAA
12. Rural *Infrastructure*	12.1 Survey & Formulation of rural *infrastructure projects*	2003~05	DAA
	12.2 Budget allocation for O&M	2003~05	DAA/DAO

3) Forestry

Issues/Concerns	Strategy/Action Targets	Time Table	Institutions & District Involved
1. Effective Use of forest Resource / Products	1.1 Enhance forest resource conservation	2,003~07	DAA/NGO
	1.2 Conduct to intensify forest rehabilitation	2004~07	DAA
2. Lack of Law	2.1 Impose total log ban and prohibition of useless burning the mountain and hill	2,003~07	DAA/DAO
	2.2 Impose illegal fuel woods ban	2005~	DAA/DAO
	2.3 *Provide buffer zones for virgin forests*	*2003~*	DAA
3. Sustain Ing of Succe ssful Initiatives in Watersheds and Forest Land/Uplands	3.1 Perform advocacy work of watershed protection on successful initiatives to other sites	2,003~07	DAA/DAO
	3.2 Mobilize support for forest reserve plans	2,003~07	DAA/NGO
4. Inadequ ate Financial and Technical Support to Integrate Upland Development	4.1 Formulate and generate financing for an Integrated Upland Development Program	2003~07	DAA/Planni ng Comm.
	4.2 Institutionalize multi-sectoral forest protection commitees	2,003~007	DAA/NGO
	4.3 Establish a comprehensive system of protected natural forests	2003~07	DAA/DAO/ NGO
5. Denudation of Forests	5.1 Rehabilitate and manage critical upland areas adopting the community-based approach in rehabilitating and managing critical upland areas. It has to be linked with ecosystem protection programs and policy reforms and institutional strengthening initiatives dealing with the socio-economic roots of ecosystem degradation	2,003~07	DAA/NGO
	5.2 Adopt a concerted action for the reforestation of denuded watershed areas and control of pollution		
6. IEC	6.1 Intensify IEC on ecological significance of trees and forests	2,003~07	DAA/NGO
	6.2 Impose total log ban in heavily denuded and environmentally critical areas	2,003~07	DAA

4) Fisheries

Issues/Concerns	Strategy/Action Targets	Time Table	Institutions & District Involved
1. Marine and Coastal Fishery Promotion	1.1 Conduct an intensive review and strictly enforce / implement current fisheries laws and advocate for the enactment of the fisheries bill.	2003~07	DAA
	1.2 Procurement of fishing gear and fishing boats	2003~07	DAA
	1.3 Provide support services like financing for fisher folk	2003~07	DAA
	1.4 Encourage the formation of fishery and aquatic resources management	2003~07	DAA
2. Inland Fishery & . Aquaculture	2.1 Identify inland fishery potentials	2003~07	DAA
	2.2 Establish rehabilitate fish nurseries/hatcheries farm	2003~07	DAA
3. Marketing	3.1 Marketing System / Transportation Facility/Storage Facility must be studied	2003~05	DAA
4. Port	4.1 Necessary Fishery Port and Facilities must be surveyed	2003~05	DAA

5) Livestock

Issues/Concerns	Strategy/Action Targets	Time Table	Institutions & District Involved
1. Lack of Animal Stocks	1.1 Prepare forecasts on animal stocks and brood stocks	2,003～07	DAA/DAO
	1.2 Upgrade animal stocks and breeds	2,003～07	DAA
	1.3 Implement cattle raising	2,003～07	DAA
	1.4 Establish breeding farms for cattle, buffalo, goat	2,003～07	DAA
2. Extension Workers	2.1 Provide training to extension workers	2,003～05	DAA/DAO
3. Incentives	3.1 Provide incentives to farmers practicing sustainable livestock	2,003～04	DAA
	3.2 Provide support services like micro-financing for farmers	2,003～05	DAA
4. Poverty Abbreviation of Smallholders	4.1 Deliver the animal population of farmers to take nutriment and to increase cash income	2,003～07	DAA/DAO
5. Draft Animal Power	5.1 Training for field cultivation by using draft animal power	2,003～05	DAA/DAO

6) Environmental Preservation

Issues/Concerns	Strategy/Action Targets	Time Table	Institutions & District Involved
1. Ecosystem	1.1 Sustaining of successful initiatives in watersheds and forest land/uplands	2,003～07	DAA
	1.2 Mobilize support for forest reserve plans	2,003～07	DAA
	1.3 Promote environmental education	2,003～	DAA/
	1.4 Control land based sources of pollution	2,003～	
	1.5 Set national standards on pesticides and fertilizer	2,003～	
	1.6 Promote organic and bio-dynamic farming technologies and practice	2,003～07	DAA
	1.7 Minimize use of commercial inorganic fertilizers and pesticides and intensify education campaign on organic farming.	2,003～07	DAA
2. Flora and Fauna	2.1 Conduct an inventory of ET flora and fauna.	2,005～	
	2.2 Protect contamination of Lake	2,005～	
3. Watershed Management	3.1 Urgent preparation of the main watershed protection manual	2002～04	DAA
