APPENDIX K

WEBSITE FOR THE STUDY ON THE NATIONAL IRRIGATION MASTER PLAN

1.1 Objectives of Establishment of the Website

The JICA Study Team established the website of the Study under the official website of Ministry of Agriculture and Food Security (MAFS).

The website of the Study is established aiming at sharing of information to the Study. Considering the merit of easy-access of website, it is also expected to collect useful opinions to the Study widely from other stakeholders and also the others. The URL of the website is as shown below:

URL: <http://www.kilimo.go.tz/projects/nimp/nimp.htm>

1.2 Process of Establishment of the Website

MAFS established the Management Information System Unit (MIS) under the Department of Policy Planning in 1998. The task of the unit is to promote information technology (IT) in the MAFS, such as preparation of database of basic agricultural data and IT training for the MAFS's officers. The Unit has three system engineers and managing Local Area Network (LAN) system in the first building of the MAFS (Kilimo I).

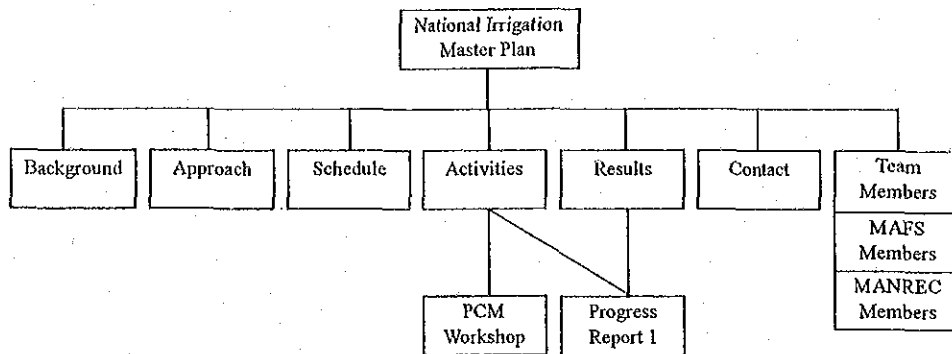

The MIS has been working on the website-establishing project since October 2001. The JICA Study Team was given an web space in the MAFS's network system, and then established LAN network connection between the Kilimo I building and the Kilimo II building in which the JICA Study Team office is located.

The position of the website of the Study and the links from other pages were decided under discussion with the JICA Study team and system engineers of the MIS. The position and links of the website of the Study is shown in Figure 1.2.1.

1.3 Contents of the Website as of August 2002

The website of the Study as of August 2002 consists of 29 web pages. The schematic and detailed figure for structure of the homepage is as shown in next page and Figure 1.3.1, respectively.

Schematic Structure of Website

The website is designed under the concept of “*Shearing of information about NIMP Study*” and “*Viewer-friendly*”. Through the website, the viewers are able to access the information such as concept and approach of the JICA Study Team, intermittent results of Study, etc., with enjoying a lot of beautiful photographs of irrigation and the Study. In addition, the contact address and sending form are also provided to send the viewers’ comments/opinions to the JICA Study Team, so that the Study is able to be reflected the any kind of good opinions from stakeholders. The feature of each page is as described below:

(1) National Irrigation Master Plan

“National Irrigation Master Plan” is the top page of the website. This page has link between the MAFS website. This page gives the summarized explanation about the Study, and links to the lower components of the website.

(2) Background

This page provides the general information about the background of the NIMP.

(3) Approach

This page illustrates the basic approach concept of JICA Study Team to the Study.

(4) Schedule

This page has links to the lower components. With these lower components, this page gives the information about schedule of the Study.

(5) Activities

In this page, the major activities of the JICA Study Team are presented.

From this page, the viewers are able to jump to results of PCM workshops, and summary of Progress Report 1, which is the latest intermittent result of the Study as of the Second Field Work. It is also helpful to the viewers to know the present stage of the Study.

(6) Results

This page gives the information about the result of the Study per each phase. It has link to the intermittent result of the Study, namely, the summary of Progress Report 1 as of the Second Field Work.

(7) Contact

This page shows the contact address of the JICA Study Team, and also has the link to sending form provided for viewers to send their comments.

(8) Members (Team Members, MAFS Members, MANREC Members)

This page introduces the JICA Study Team experts and their counterparts in MAFS and MANREC.

(9) PCM Workshop

The results of PCM Workshops held in June 2002 are provided in this page. This page has links to lower components, in which the detail problem analysis are illustrated.

(10) Progress Report 1

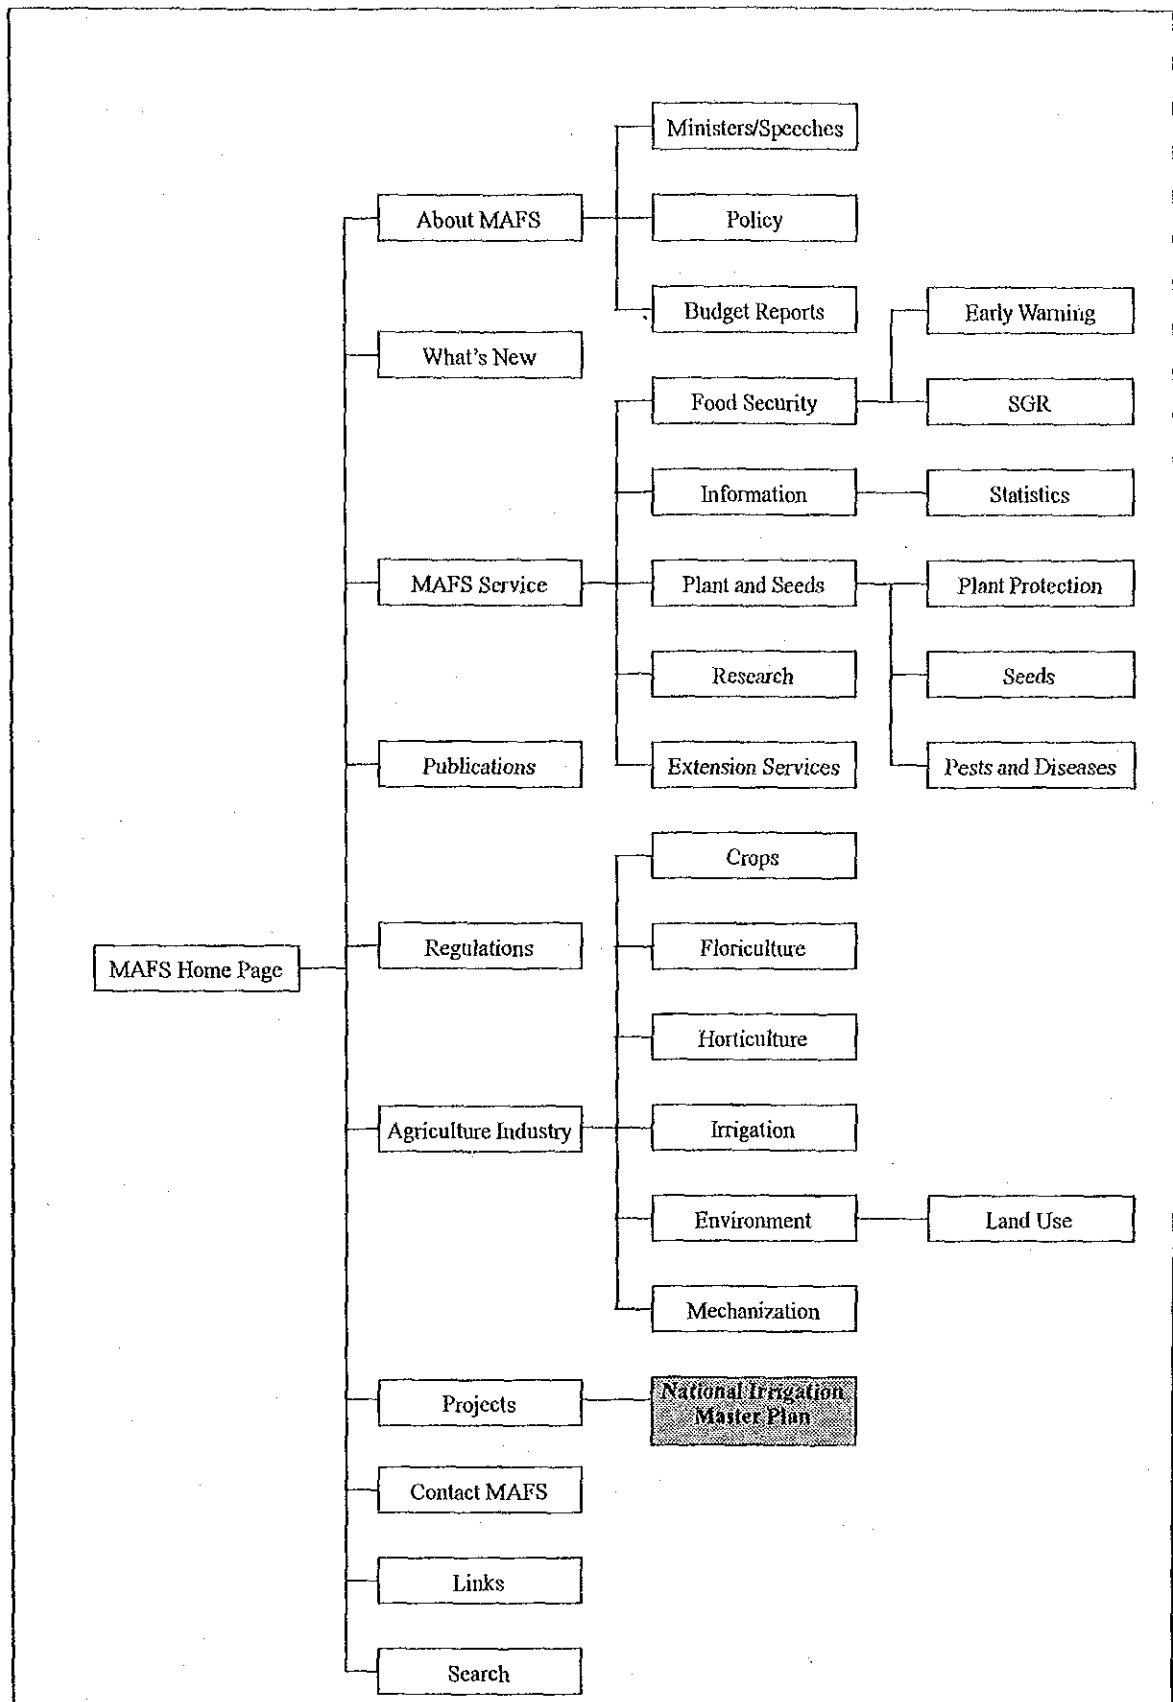

The summary of Progress Report 1, which is the latest intermittent result of the Study as of Second Field Work, is presented in this page. This page has links to some figures of Progress Report 1.

Some of essential pages of the website, which are selected from the pages explained in the above, are presented in the Attachment.

1.4 Necessity and Future Plan of Update

In order to provide the latest information and intermittent results of the Study timely, the website shall be updated in each Study Phase, by MAFS staff in corporation with the JICA Study Team.
