- The periods of two days for workshop is few.
- The periods for workshop should be three days.
- I'd like to thank to the persons who participate in conducting workshop because this workshop is very nice.
- I think that education standard of children will be progressed if CCA is successfully conducted in reality.
- I'd like to advise to manage for promotion of teachers' abilities and living standard.
- The workshop, in which performance done during a short period can be evaluated and presented, should be conducted.

Evaluation of Workshop  
(CCA Workshop in Taunggyi - Phase 2)

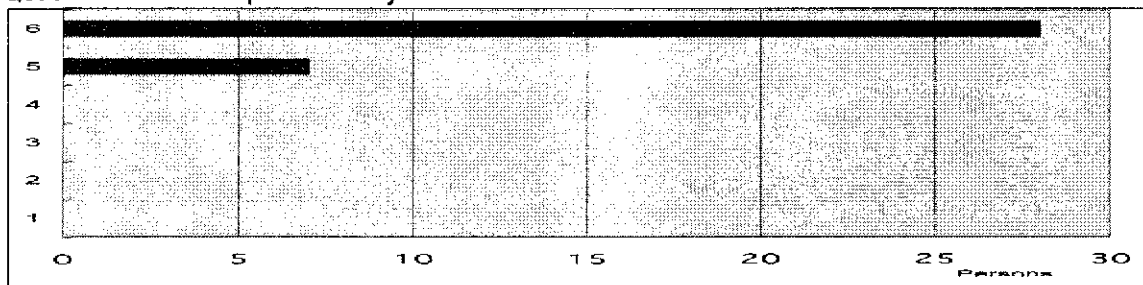

Q1: Is this workshop interesting to you?

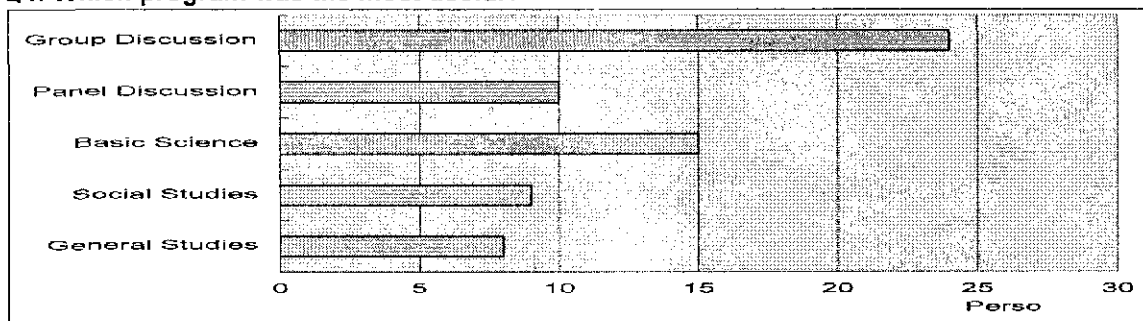

Q2: Which program was the most interesting?

Q3: Is this workshop useful to you?

Q4: Which program was the most useful?

## Q5: What did you learn in this workshop?

### Knowledge of CCA

- I've got the knowledge of the Child-Centered Approach.
- Knowledge relating effectiveness of CCA.
- Knowledge of demonstration method relating CCA.
- I become more realized about CCA from this Workshop.
- I become more realized about the method to make learners interesting and active participation so that it can be applicable in one's region.
- I've got new teaching methods or more effective teaching methods, knowledge relating changes and development of the education sector, new advice and thinking etc.
- I achieve new experiences and attending this workshop will make CCA more effective.
- It supports for teaching.
- Have the opportunity to study teaching methods, knowledge and experience.
- Enable to reveal self-education because of the self-discussion.
- *I am very delighted to enable to know the new collection of lessons.*
- I have learned the nature of CCA.
- Active participation of children in learning and collection of teaching aids makes teaching and memory more effective.
- I've learned the ways for CCA and ways to be followed relating teaching aids, and new knowledge.
- I've found that CCA is the most effective in teaching and in stimulation of consideration of the children. The use of more teaching materials, makes more interest of the children and more effectiveness of teaching.
- I've learned CCA, evolutionary changes of education, new way of thinking, new opinion, a variety of knowledge.
- Get knowledge about CCA.
- I prefer the teaching method learned from this workshop to old methods.
- We gain more improved knowledge and experiences in educational and teaching point of view.
- Teaching and learning activities will be more successful if CCA is applied effectively.
- I've known the weakness of the one-way education that gives only technology and knowledge.
- I've found that not only understanding the concept of a lesson but also applying practically can make children easy to understand the lesson.

### Implementation of CCA

- Teachers have to apply CCA.
- Teachers have to be trained to enable to apply CCA.
- CCA can make children's physical and mental development.
- I have learned that research works have to be carried out continuously in CCA.
- During the fixed time, it is easier to learn by the active participation of children in CCA than to learn by heart.
- I've found that teachers have to encourage the active participation and creation of the children.
- CCA is commensurate with the present time and necessary to be applied.

### Understanding of Children

- I've understood the children's nature.
- This method makes children's knowledge more improved.
- Children do not have to do what the teacher commands like in old teaching method.
- Children enable to learn happily because of active participation, opportunity for free thinking, exploration and discussion.
- Children will be able to consider relating cause and effect.
- Children's memory will become improved.

**Q5: What did you learn in this workshop?**

- We gain more improved knowledge and experiences in educational and teaching point of view.
- Teaching and learning activities will be more successful if CCA is applied effectively.
- I've known the weakness of the one-way education that gives only technology and knowledge.
- I've found that not only understanding the concept of a lesson but also applying practically can make children easy to understand the lesson.

**Implementation of CCA**

- Teachers have to apply CCA.
- Teachers have to be trained to enable to apply CCA.
- CCA can make children's physical and mental development.
- I have learned that research works have to be carried out continuously in CCA.
- During the fixed time, it is easier to learn by the active participation of children in CCA than to learn by heart.
- I've found that teachers have to encourage the active participation and creation of the children.
- CCA is commensurate with the present time and necessary to be applied.

**Understanding of Children**

- I've understood the children's nature.
- This method makes children's knowledge more improved.
- Children do not have to do what the teacher commands like in old teaching method.
- Children enable to learn happily because of active participation, opportunity for free thinking, exploration and discussion.
- Children will be able to consider relating cause and effect.
- Children's memory will become improved.

**Teaching Materials**

- I'd like to attend the workshop concerning promotion of teacher's ability, making teaching/ learning materials, application of teaching methodology and revised CCA workshop.

**Assessment and Evaluation**

- I'd like to attend the workshop regarding methodology, assessment and evaluation, and opening of preprimary school.

**Academic Subjects**

- I'd like to attend the workshops such as CCA workshop, academic subject workshop and methodology workshop.
- I'd like to attend the workshop relating to academic subjects such as English, Mathematics and Myanmar.

**Any Kinds of Workshop**

- I'd like to attend any kind of workshop relating to us, which can make my tasks improved.
- I'd like to attend the workshops that upgrade teacher's ability.
- I'd like to attend the workshops, which support the education sector of Myanmar to be developed.
- I'd like to attend the workshop relating to education.
- I'd like to attend any workshop that will be beneficial to children.
- I'd like to attend any kind of workshop.
- I'd like to attend any kind of workshop that is beneficial.

**Others**

- I'd like to attend the workshop where self-discussion and group discussion can be carried out.
- I'd like to attend the workshop regarding modern development of education.
- I'd like to attend the workshop that is effective for children and able to provide guidance to achieve the opportunity for the children to do practically.

**Q7: Please write down any comment of this workshop.**

- To be known widely about this workshop, replicating discussion should be carried out.
- More time for the workshop like this should be allowed.
- The workshops should be carried out widely.
- I wish the teaching learning materials used in the workshop to be sold in cheap price.
- According to my opinion, distributions of videotapes, which concern with the workshop by the co-ordination of Myanmar Educational Department and broadcasting sometimes by TV program, are more effective than spreading through participants.
- This workshop is invaluable not only for the educational employees but also for the country because of the opportunity to apply the improved knowledge concerning CCA, application of CCA, Experiment and Discussion & Problem solving, which are achieved by attending this work.
- This workshop is beneficial to us because of the opportunity to discuss closely with participants and responsible persons.
- Teaching Methodology is necessary for the local indigenous children who do not understand proficiently to Myanmar language.
- CCA is corresponding to Education of Myanmar.
- This workshop gives us the guidance to be able to apply CCA.
- This workshop is supportive and I realize that doing experiment with teaching aids make teaching more effective. This workshop is very good and beneficial.
- Please let every teacher enable to attend such workshop. The more teachers who know, the more benefits.
- Teaching method in line with the subjects and age of the children and application method of

**APPENDIX 11**

**Evaluation of Workshop  
(CCA Workshops - Phase 3)**

**Overall Evaluation:**

The CCA workshops were very successful and received many positive comments from the participants. Most participants answered that the workshop was useful (99.6%, 547 out of 549 respondents) on the questionnaire after the workshop. Among the various items in the program, the most interesting item was "Demonstration and Video." This is because this item of the workshop is unique and the participants can observe the real practice of CCA. Though the workshops were conducted in various places, there were no clear differences among the places. All places had common characteristics and opinions on the questionnaires.

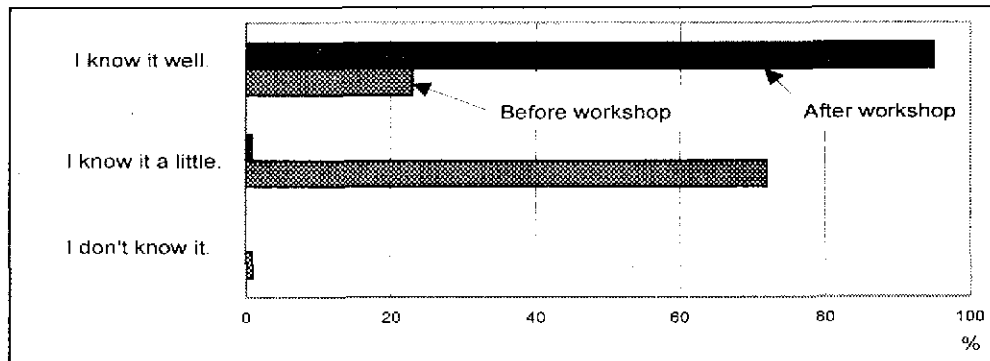

**Q: Was this workshop useful to you?**

**Knowledge Level of CCA:**

Before the workshop, 73% of the participants had little knowledge of CCA. Twenty-four percent of them answered that they had heard of CCA but did not know it. On the other hand, 23% of the participants answered that they knew CCA well. After the workshop, however, 95% of the participants responded that they understood CCA well.

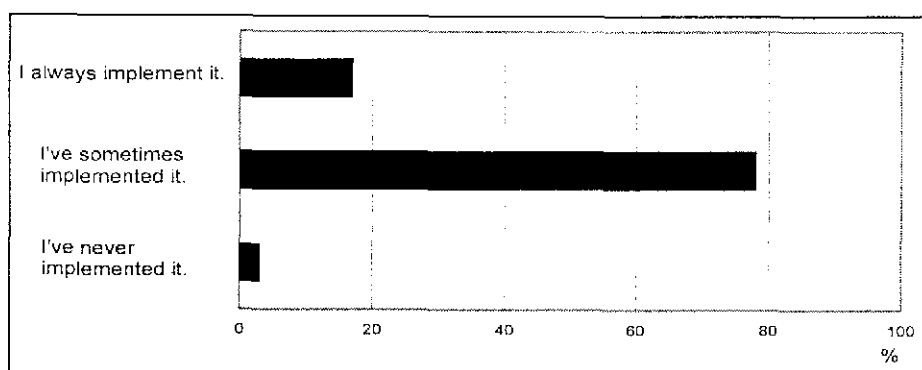

**Q: How is your knowledge of CCA before and after the workshop?**

### Implementation of CCA:

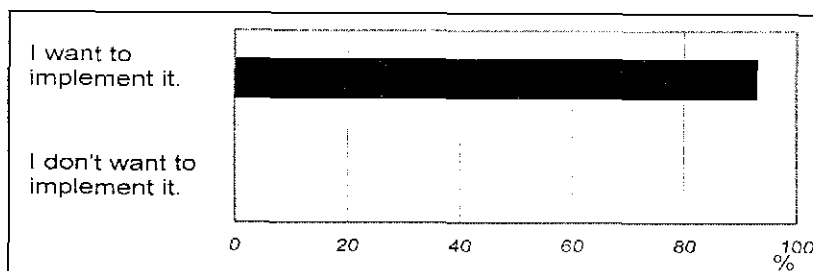

Before the workshop, 78% of the participants implemented CCA sometimes in their real classrooms. Three percent of the participants never used CCA at all. On the other hand, some of them answered that they had always used CCA, who accounted for 17% of the total participants. The rate varies from place to place. The highest rate of “always using CCA” was recorded in two locations, Taunggyi (24%) and Mawlamyaing (21%). The other places showed only 11 to 13%.

#### Q: How was your CCA implementation before the workshop?

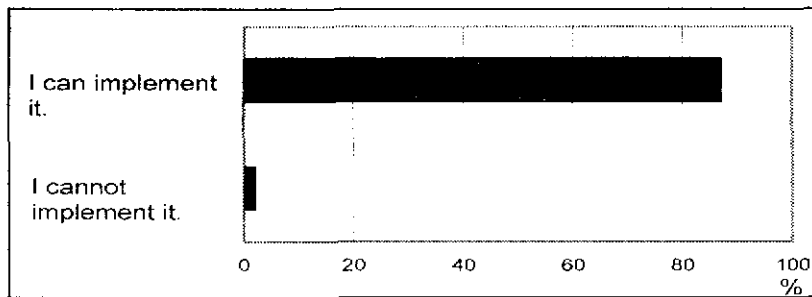

After the workshop, 93% of the participants answered that they wanted to implement CCA in their real classrooms. (7% of the participants had no answers.) No participants answered that they did not want to implement CCA. All participants had a positive view toward CCA. However, the percentage decreased for a question asking their confidence in implementing CCA. Eighty-seven percent of the participants answered that they could implement CCA, but 2% of them answered no. Main reasons were (1) shortage of teachers, (2) shortage of classrooms, (3) shortage of furniture and necessary materials, (4) lack of sufficient knowledge of CCA, (5) insufficient time allocation for each lesson, (6) difficulty to change the teacher's attitude, and (7) difficulty for the teacher to create various activities in the lessons.

#### Q: How is your feeling for implementation of CCA after the Workshop?

**Q: How is your confidence of implementing CCA after the workshop?**

**What you learnt from the workshop:**

Through the workshop, the participants gained a various kind of knowledge. Major comments are as follows:

- The concept of CCA (including difference between CCA and TCA)
- Application of CCA in real situations (teaching/learning procedure)
- Effect of using CCA
- Effective usage of teaching/learning materials
- ERR framework
- Various teaching/learning activities
- Teacher's qualification for CCA

**What kinds of workshops do you expect in the future?:**

Various answers were given to the questionnaire. Main answers were as follows:

- CCA
- Teaching methodology
- Children's psychology and related issues
- Participatory workshop
- Teaching/learning activities
- Life-long learning
- Subject-based workshop
- Electronic teaching/learning materials
