## Exchange Rate

(March 1, 2002)

US\$ 1.00 = 55.26 Taka = 134.45 Yen

1 Taka = 2.433 Yen = US\$ 0.01810

1 Yen = US\$ 0.007438 = 0.4110 Taka

## List of Abbreviations

AAN	Asia Arsenic Network
AAS	Atomic Absorption Spectrophotometer
ADP	Annual Development Program
ARD	Arsenic Removal Device
BADC	Bangladesh Agricultural Development Corporation
BAMWSP	Bangladesh Arsenic Mitigation Water Supply Project
BBS	Bangladesh Bureau of Statistics
BGS	British Geological Survey
BMD	Bangladesh Meteorological Department
BWDB	Bangladesh Water Development Board
DANIDA	Danish International Development Assistance
DCH	Dhaka Community Hospital
DFID	Department for International Development (UK)
DOEH	Department of Occupational & Environmental Health
DPHE	Department of Public Health Engineering
DTW	Depth To Groundwater Level from the ground surface
DWL	Dynamic Water Level
EC	Electric Conductivity
EIRR	Equity Internal Rate of Return
FIRR	Financial Internal Rate of Return
FK	Field Kit
FY	Fiscal Year
GHCN	Global Historical Climatology Network
GIS	Geographic Information System
GSB	Geological Survey of Bangladesh
GW	Groundwater
GWL	Groundwater Level

IRP	Iron Removal Plant
JICA	Japan International Cooperation Agency
LGED	Local Government Engineering Department
LLDC	Least-Less Developed Countries
MLD	Million Liters per Day
MLGRD&C	Ministry of Local Government, Rural Development & Cooperatives
masl	meter above sea level
MCM	Million Cubic Meter
MoF	Ministry of Finance
MoHFW	Ministry of Health & Family Welfare
mS/m	1 mS/m = 10 microS/cm
M/M	Minutes of Meeting
NGO	Non-governmental organizations
NIPSOM	National Institute of Preventive and Social Medicine
NPV	Net Present Value
OHT	Over Head Tank
OJT	On the Job Training
OM	Operation and Maintenance
ORP	Oxidation-Reduction Potential
PETP	Potential Evapotranspiration
PSF	Pond Sand Filter
RGAG	Research Group for Applied Geology
RWH	Rain Water Harvesting
PWSS	Pourashava Water Supply System
SOB	Survey of Bangladesh
SWL	Static Water Level
S/W	Scope of Work
TRT	Trainer's Training
UNDP	United Nations Development Program
UNICEF	United Nations Children's Fund
USGS	United States Geological Survey
WASA	Water and Sewerage Authority
WHO	World Health Organization
WTP	Willingness To Pay

## ABBREVIATIONS

# CONTENTS

## CHAPTER 1 GIS DATABASE

1.1	Components of GIS.....	1-2
1.1.1	Base Map Database.....	1-2
1.1.2	Well Inventory .....	1-2
1.1.3	Simulation Data Base 1 .....	1-2
1.1.4	Simulation Data Base 2.....	1-3
1.2	Materials for GIS Database.....	1-3
1.2.1	Source Data for Base Map.....	1-3
1.2.2	Data for Well Inventory.....	1-4
1.2.3	Data for Land Use Map .....	1-5
1.2.4	Data for Geological Map .....	1-5
1.2.5	Data for Soil Type Classification.....	1-5
1.2.6	Demographic-statistics Data .....	1-6
1.2.7	Meteorological Data .....	1-6
1.2.8	Urban Area Water Service.....	1-6
1.3	Thematic Map .....	1-7
1.3.1	Location of the Study Area .....	1-7
1.3.2	Thematic Map on Natural Condition.....	1-7
1.3.3	Thematic Maps on Social Economy Condition.....	1-8
1.4	Well Inventory .....	1-32
1.4.1	Structure of Well Inventory .....	1-32
1.4.2	General Characteristics of DPHE Wells.....	1-33
1.5	Analysis by GIS Database .....	1-57
1.5.1	Analysis of Arsenic Contamination Situation.....	1-57
1.5.2	Basic Data for Groundwater Simulation .....	1-62
1.6	Basic Data for Priority Project Area.....	1-69

## **CHAPTER 2 SUBSURFACE HYDROGEOLOGICAL STRUCTURE**

2.1	Geophysical Prospecting .....	2-1
2.1.1	Purpose of the survey .....	2-1
2.1.2	Outline of the survey .....	2-1
2.1.3	Investigation of the geophysical survey method .....	2-8
2.1.4	Measurements .....	2-8
2.2	Analysis of Hydrogeological structure .....	2-27
2.2.1	Results of Geophysical Prospecting .....	2-27

## **CHAPTER 3 DETAIL INFORMATION OF ARSENIC TESTING LABORATORY**

3.1	Objective of the laboratory .....	3-1
3.2	Utility and infrastructure .....	3-1
3.3	Guideline for quality control of field sampling and testing .....	3-6
3.4	Training .....	3-6
3.5	Laboratory Business Plan .....	3-8
3.6	Recommendation for sustainable operation.....	3-8

## **CHAPTER 4 ARSENIC ROMOVAL EQUIPMENT**

4.1	Objective .....	4-1
4.2	Basic Approach for Arsenic removal experiment.....	4-1
4.2.1	Systematic categorization of the technologies .....	4-1
4.2.2	Analysis of technical issues .....	4-2
4.2.3	Evaluation criteria.....	4-9
4.3	Design of Arsenic Removal Equipment.....	4-11
4.3.1	Basic plan for experiment.....	4-11
4.3.2	Double bucket system.....	4-14
4.3.3	Passive sedimentation system.....	4-15
4.3.4	Activated alumina system .....	4-16
4.3.5	Basin type solar still .....	4-16
4.3.6	Vacuum type solar still .....	4-17
4.3.7	Manufacturing of arsenic removal equipment .....	4-18
4.4	Site selection and installation.....	4-28
4.4.1	Site selection process .....	4-28
4.4.2	Bara Dudpatila, Damurhuda, Chuadanga .....	4-37
4.4.3	Krishna Chandrapur, Mohespur, Jhenaidah.....	4-45

4.4.4	Rajnagar Bankabarsi, Keshabpur, Jessore.....	4-53
4.5	Field Test.....	4-59
4.5.1	Methodology.....	4-59
4.5.2	Double bucket system.....	4-59
4.5.3	Passive sedimentation system.....	4-65
4.5.4	Activated alumina system .....	4-74
4.5.5	Basin type solar distillation system .....	4-77
4.5.6	Vacuum type solar distillation system .....	4-80
4.6	Evaluation and conclusion .....	4-82

## **CHAPTER 5 IMPROVED DEEP WELL**

5.1	Necessity of the Improved Deep Well .....	5-1
5.2	Type of Improved Deep Well.....	5-2
5.3	Construction methods of Improved Deep Well.....	5-3
5.4	Results of improved deep well construction.....	5-15
5.5	Water quality monitoring of improved deep wells.....	5-36
5.6	Comparison of improved deep well types .....	5-37
5.7	Future agenda.....	5-42

## **CHAPTER 6 SOCIAL SURVEY**

6.1	Selection of Model Rural Areas.....	6-1
6.1.1	Definition of Model Rural Areas.....	6-1
6.1.2	Planned Activities in Model Rural Areas.....	6-1
6.1.3	Process of Model Rural Area Selection.....	6-3
6.1.4	Selected Villages for Model Rural Areas .....	6-4
6.1.5	Features of the Model Rural Areas .....	6-6
6.2	Overview of Socioeconomic Conditions in the Rural Areas .....	6-12
6.2.1	General Characteristics of the Villages in the Study Area .....	6-12
6.2.2	Water Fetching and Consumption.....	6-13
6.2.3	Arsenic Problems .....	6-14
6.3	Water Quality .....	6-17
6.3.1	Groundwater Quality .....	6-17
6.3.2	Pond Water Quality .....	6-25
6.4	Study on Socioeconomic Conditions in Model Rural Areas .....	6-114
6.4.1	Objective of the Study .....	6-114
6.4.2	Methodology of the Study.....	6-114

6.4.3	Preliminary Findings of the Study.....	6-115
6.5	Identification of Arsenicosis Patients.....	6-155
6.5.1	Preliminary Diagnosis of Arsenicosis Patients .....	6-155
6.5.2	Formal Diagnosis of Arsenicosis Patients .....	6-155
6.5.3	Tubewells Used by Arsenicosis Patients.....	6-156
6.5.4	Characteristics of Arsenicosis Patients .....	6-157
6.5.5	Treatment and Management of Patients.....	6-158
6.6	Community Activities in the Model Rural Areas.....	6-166
6.6.1	Community Organization.....	6-166
6.6.2	Raising Awareness of Arsenic Problems.....	6-168

## **CHAPTER 7 HOME PAGE PREPARATION**

7.1	Structure of Home Page.....	7-1
7.2	Contents of Home Page.....	7-2
7.2.1	Main Page .....	7-2
7.2.2	Page for Background of the Study Page .....	7-2
7.2.3	Page for Objectives of the Study Page .....	7-3
7.2.4	Page for Main Activities of the Study Page .....	7-4
7.2.5	Page for Study Area Page.....	7-5
7.2.6	Page for Study Implementation Page.....	7-6
7.2.7	Page for Basic Policy Page.....	7-7
7.2.8	Page for Organization of the Study Page.....	7-7
7.2.9	Links.....	7-8
7.3	Renewal of Home Page .....	7-8

## LIST OF TABLES

Table 1.3.1	Average Monthly Rainfall .....	1-7
Table 1.3.2	Soil Classification by Grain Size.....	1-8
Table 1.3.3	Basic Information of the Study Area.....	1-8
Table 1.3.4	Population in Each Census Year.....	1-9
Table 1.3.5	Land Use Classification .....	1-9
Table 1.3.6	Outline of Water Services in the Study Area.....	1-10
Table 1.4.1	DPHE Well Density in the Study Area (by 1999).....	1-35
Table 1.4.2	Number of DPHE Wells Constructed in Each Year from 1970 to 1999.....	1-41
Table 1.4.3	Distribution of DPHE Well in Each Depth (m).....	1-46
Table 1.5.1	Estimated Population Affected by Arsenic Contamination.....	1-59
Table 1.5.2	Relation between Arsenic Level and Lithofacies.....	1-61
Table 1.5.3	Relation between Arsenic Level and Soil Type .....	1-61
Table 1.5.4	Groundwater Withdral for Irrigation in the Study Area (1983 to 2001) .....	1-70
Table 1.5.5	Groundwater Withdral for Domestic Use from 1983 to 2001.....	1-71
Table 1.6.1	Basic Information for Urgent Area.....	1-79
Table 1.6.2	Basic Information for Semi-urgent Area.....	1-86
Table 2.1.1	Specifications of TEM Survey Equipment.....	2-3
Table 2.1.2	Sampling gate times .....	2-4
Table 2.1.3	Electrode Spaced .....	2-7
Table 2.1.4	Specifications of Electric Survey Equipment.....	2-8
Table 2.1.5	List of Geophysical Prospecting.....	2-11
Table 2.1.6	List of Resistivity Structures Obtained by 1D Inversion.....	2-17
Table 2.2.1	Resistivity Range of Rocks .....	2-29
Table 2.2.2	Summary of Lithological Interfaces in Borehole .....	2-29
Table 4.1	Four Categories of Arsenic Removal Technologies.....	4-2
Table 4.2	Evaluation Criteria of Arsenic Removal Equipment.....	4-10
Table 4.3	Summary of Arsenic Removal Experiment Plan.....	4-14
Table 4.4	Large-scale Solar Distillation Units .....	4-17
Table 4.5	Cost Information of Material and Goods .....	4-22
Table 4.6	Sites Selected for Arsenic Removal Equipment, Krishna Chandrapur .....	4-35
Table 4.7	Sites Selected for Arsenic Removal Equipment, Bara Dudpatila .....	4-37
Table 4.8	Installation of Arsenic Removal Equipment, Bara Dudpatila.....	4-39
Table 4.9	Sites Selected for Arsenic Removal Equipment, Krishna Chandrapur .....	4-46
Table 4.10	Installation of Arsenic Removal Equipment, Krishna Chandrapur .....	4-47

Table 4.11	Sites Selected for Arsenic Removal Equipment, Rajnagar Bankabarsi .....	4-53
Table 4.12	Installation of Arsenic Removal Equipment, Rajnagar Bankabarsi .....	4-54
Table 4.13	Water Quality of Three Villages .....	4-59
Table 4.14	Initial Field Test of Double Bucket System .....	4-60
Table 4.15	Test Data of Increased Chemical Dosing .....	4-61
Table 4.16	Test Data of Tablet Form .....	4-62
Table 4.17	Test Data of Increased Chemical Dosing -2- .....	4-63
Table 4.18	Test Data of Increased Dosing of Chemical and Additional Filtration .....	4-64
Table 4.19	Test Data of Passive Sedimentation in Three Villages .....	4-68
Table 4.20	Test Data of Passive Sedimentation by Chemical Oxidation .....	4-71
Table 4.21	Monitoring of Passive Sedimentation Units .....	4-72
Table 4.22	Test Data of Activated Alumina .....	4-75
Table 4.23	Effect of Increased Activated Alumina at Rajanagar Bankabarsi .....	4-75
Table 4.24	Monitoring of Activated Alumina Units .....	4-76
Table 4.25	Test Data of Basin-type Solar Distillation .....	4-77
Table 4.26	Monitoring of Basin-type Solar Distillation Units .....	4-79
Table 4.27	Test Data of Vacuum Type Solar Distillation Unit .....	4-80
Table 4.28	Evaluation of Five Technologies .....	4-83
Table 5.1	Summary of Drilling Improved Deep Wells at Rajnagar Bankabarsi .....	5-18
Table 5.2	Geologic log at Rajnagar Bankabarsi vil .....	5-22
Table 5.3	Summary of Drilling Improved Deep Wells at Krishna Chndrapur .....	5-25
Table 5.4	Geologic log at Krishna Chandrapur Vil .....	5-29
Table 5.5	Summary of Drilling Improved Deep Wells at Bara Dudpatila .....	5-31
Table 5.6	Geologic log at Bara Dudpatila .....	5-35
Table 5.7	Results of Simple Pumping Test .....	5-35
Table 5.8	Monitoring Result at Rajinagal Bankabarsi Village .....	5-37
Table 5.9	Breakdown of Construction Cost of Improved Deep Well .....	5-39
Table 5.10	Characteristic and Evaluation of Improved Deep Well .....	5-41
Table 6.1.1	Number of Model Rural Area .....	6-3
Table 6.1.2a	List of Prospective Villages for Model Rural Area in Chuadanga .....	6-7
Table 6.1.2b	List of Prospective Villages for Model Rural Area in Jessore .....	6-7
Table 6.1.2c	List of Prospective Villages for Model Rural Area in Jhenaidah .....	6-8
Table 6.1.3	Features of Model Rural Areas .....	6-9
Table 6.1.4	Socioeconomic Conditions of Model Rural Areas .....	6-10
Table 6.2.1	General Characteristics of the Villages and Their Implications to Arsenic Problems .....	6-12
Table 6.2.2	Water Fetching and Consumption Practices and its Implications to Arsenic	

	Problems.....	6-13
Table 6.2.3	Characteristics of Arsenic Problems and Their Implications to Mitigation Measures.....	6-14
Table 6.3.1	Groundwater Quality in Bara Dudpatila Village in October 2000.....	6-28
Table 6.3.2	Groundwater Quality in Krishna Chandrapur Village in October 2000.....	6-31
Table 6.3.3	Groundwater Quality in Rajnagar Banlabarsi Village in October 2000.....	6-33
Table 6.3.4	Groundwater Quality in Bara Dudpatila Village in December 2000.....	6-35
Table 6.3.5	Groundwater Quality in Krishna Chandrapur Village in December 2000.....	6-37
Table 6.3.6	Groundwater Quality in Rajnagar Banlabarsi Village in December 2000.....	6-39
Table 6.4.1	Household Size.....	6-116
Table 6.4.2	Estimated Number of Households and Population.....	6-116
Table 6.4.3	Household Structure.....	6-116
Table 6.4.4	Literacy Level.....	6-117
Table 6.4.5	Property Ownership.....	6-117
Table 6.4.6	Average Population Served by Tube Well.....	6-118
Table 6.4.7	Workload of Water Fetching.....	6-118
