

CHAPTER 6
BASIC DATA OF STUDY BRIDGES

6.0 BASIC DATA OF STUDY BRIDGES

6.1 General

The original list of the study bridges provided by LGED contained 1,579 bridges.

The Consultant Teams visited all the 64 Districts and collected data from XEN, LGED offices. The Consultant Teams also visited 196 bridge sites scattered in all Districts. During the visit, it was found that many of the listed bridges have already been taken up for construction under other projects and by other agency (RHD). Some of them have been completed, some are ongoing and some are under process of tendering and implementation. There are also some duplications in the original list and some of the bridges are located at the place where no bridge is required. These bridges are excluded from the study bridges.

During the process of the study, LGED came up with new/additional proposals of bridges for inclusion in the list of the study bridges and in the master plan. These proposals came directly from the field offices of LGED (i.e. XEN, LGED or Upazila Engineer Office) as well as through the PD, LGED. These additionally proposed bridges are included in the study bridges.

The numbers of duplicate/unnecessary bridges and completed/ongoing/under process bridges are 288 and 636 respectively totaling 924, while number of newly proposed bridges is 497. The final number of bridges thus stands at 1,152. Number of bridges by District is shown in Table 6.1-1.

Location of the study bridges is shown in Figure 6.1-1.

6.2 Basic Data of Study Bridges

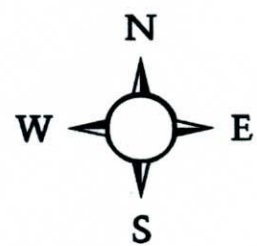

The data collected during the initial visits to 64 districts are tabulated in "Basic Data of Study Bridges" as shown in Appendix B, including:

- Project identification (bridge code, road ID, etc)
- Information on existing bridge
- Information on approach/connecting road
- Information on waterway
- Socio-economic information of influence area
- Expected traffic volume including pedestrian
- Other information including alternative route, proposed bridge length, coverage by other project, relative priority according to LGED local offices.

The list of the bridges including deleted bridges is given in Table 6.2-1. This list includes the project cost and priority which are discussed in subsequent chapters.
